The mail of September 27 arrived at Hong Kong on November 16.

List of Passengers.

PASSENGERS INWARD.

By this mail.—From Hong Kong for Southampton: Commander J. J. B. Jones, Mr. J. B. McLeish; 2nd Class: Messrs. W. F. Richards, John Isbister, J. Moore, and W. Burke.—From Singapore: Messrs. Stirling, Hertford, Sullivan, Barker, Binster, Master, Cove, and Plant.

PASSENGERS OUTWARD.

Per P. and O. st., 4th Jan.—From Southampton to Hong Kong: Brevet-Col. P. Harris, Capt. Grant, Lieut.-Col. W. H. March,—From Marseilles, 12th January, to Shanghai: Messrs. Le Libon, De Vernouillet, Trisson, Rawson, and Pochon, Mario Bourbillon, Gen. Montauban, Col. Bentzmann, Lieut.-Col. Schmitz, Mr. Dubut, Com. Deschiens, Capt. De Voullé, Capt. Montauban, Capt. Cools, and Capt. De Pina. To Hong Kong: Mr. M. A. McLeod.

Per P. and O. st., 20th Jan.—From Southampton to Shanghai: Messrs. Harvey, Brand, and Miller. To Hong Kong: Messrs. A. Soerman, Baker, and Barnes; Mrs. Lambert. To Singapore: Messrs. Friedrich and Staff.—From Marseilles, 28th January, to Hong Kong: Mr. Arnould, Dona Barroeta, and Gull. To Shanghai: Messrs. Champromain and Cornelle, Mr. and Mrs. Fajard, Count de Lantun, Count Kozz Kowski and friend. To Singapore: Mr. Sellier, Mr. and Mrs. Davidson.—From Suco to Penang: Mr. Zolkofer.

Per P. and O. st., 4th Feb.—From Southampton to Hong Kong: Mrs. Fernandes. To Shanghai: Mr. Holdsworth.—From Marseilles, 12th February, to Singapore: Mr. Pilliet, Mr. H. L. Von B. Waanders.

Per P. and O. st., 20th Feb.—From Southampton to Shanghai: Messrs. W. Thorburn

and Krayer. To Singapore: Mrs. Mooyer and two infants.—From Marseilles, 28th February, to Hong Kong: Senor Collioni. To Shanghai: Mr. and Mrs. Don, Mr. N. Bickham. To Singapore: Mr. and Mrs. Helliers, Mr. and Mrs. Paterson, Mr. E. Busing, Captain John Ross.

MAP OF INDIA, CHINA, JAPAN, AND THE EASTERN ARCHIPELAGO; AND STATISTICS OF OUR TRADE WITH CHINA FOR THE PAST TEN YEARS.

Subscribers to the present volume, of 24 numbers, are entitled to a copy of the above. Subscription, 18s. per volume, exclusive of postage. Single copies of the map or statistics can be had, price 1s. Single copies of the paper, map, and statistics, price 1s. 6d. Statistics of our trade with other parts of the Far East will be given in succeeding numbers.

The first volume was completed on November 11, and bound copies can be had at the office at 23s.

Summary of News from the Far East.

THE EXPEDITION FROM INDIA TO CHINA.

The *Times* correspondent at Calcutta advises, by the mail received to-day, that no progress had been made in the expedition, nor likely to be, until more definite instructions were received from this country.

JAPAN.

Although there is no intelligence of interest from Japan, we are able to report that trade is progressing very favourably, so much so, that the profits derived are acknowledged to be very large. The only drawback being, that it absorbs so much silver that the balance of trade is, as yet, rather against foreigners. It is understood that large shipments of American dollars are made from Shanghai to Japan, but great secrecy is maintained on the subject. Gold is said to be cheap, and still abundant, and there seems to be every probability that the perseverance and energy of Mr. Consul-General Alcock will ultimately bring about the best results to both Japanese and foreigners.

CHINA.

PEKIN.

The extracts and translations from the *Pekin Gazette* are unusually lengthy, and extend from October 17 to 28. The first item of interest we find in them is, that the Ex-Governor-General of Chili, Tan-ting-siang, who was condemned to death last year for the loss of the Taku forts, but subsequently banished, has since been recalled from exile, has been presented with a button of the fifth grade, and directed to make himself useful in disciplining the militia of Shun-teh, Kwang-ping, and Ta-ming, three contiguous departments in the south of the province of Chili. The authorities of Fung-tein-fa, Manchuria proper, have requested the Emperor to leave them an officer, to assist in the work of protecting the coast; just now most important, as "the barbarian mist has not yet cleared off," and piracy is daily on the increase. Kweiliang had applied for more leave on the ground of ill health, and was accorded ten days more furlough. On October 27, another decree was issued, raising Tan-

ting-siang from the fifth to the fourth grade, as a reward for his having contributed handsomely towards the maintenance of the Mongolian troops, but it is not stated where or when these troops were engaged. T'an had an audience on the following day. Hang-fu, Governor-General of Chili, has reported to the Emperor that he has sent a third instalment of the 400 piculs of gunpowder, which he was instructed to make for the army now acting against the rebels at Nankin, and other parts of the Kiang-Nan jurisdiction. He also reports that he has sent 70 piculs of shot, and 7,000 rolls of matches.

SHANGHAI.

Immediately after the departure of the last mail on November 8, Mr. Ward, the American minister, issued the following notification:—

Whereas a treaty of amity and commerce between the United States of America and the Ta-Tsing Empire was negotiated between the plenipotentiaries of those nations, and signed by them in the English and Chinese languages on June 18, 1858, at Tientsin, which treaty has been ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by the Emperor of China; and the said ratifications have been duly exchanged: Therefore be it known that this treaty is now published for the general information and guidance of all whom it may concern; and I hereby call upon all the citizens of the United States residing in, or visiting this empire, to obey its stipulations, and thereby promote the amicable relations now existing between the two nations. At all the ports open to commerce, tonnage duties will be paid on merchant vessels belonging to the United States, according to the provisions of this treaty, on and after November 24, 1859. The ports of Chau-chau, or Swatow in the province of Quan-tung, and Taiwan in Formosa, in the province of Fuh-kien, will be opened to American commerce, and for Americans to reside with their families, on and after January 1, 1860.

We give in another column the treaty, *in extenso*, which consists of thirty articles, and in many points will be found to fall considerably short of ours; and the favoured nation clause will be largely drawn upon, in order to make the privileges of the Americans equal to those of the British.

The *North China Herald* reports that it gathers from its native correspondent, before the arrival from Europe of the late news, that the natives were full of rumours of war, and preparations for defence. Somehow the report has got about that several thousand foreign troops have arrived at Shanghai, and fortifications are rapidly being thrown up along the Hwang-Pu. It is supposed that these reports have originated in the execution of the cleaning and repair of the city trench, a work that is now being carried on with alacrity by the authorities, to the no small annoyance and disgust of the common people, whose houses along the city wall have been demolished. The Governor-General, in some doubt as to the accuracy of these reports, has, however, taken the precaution of sending an official into the interior for the purpose of accelerating the movements of the silk and tea men, whose "contributions" would, in such a case, be looked after very sharply. Lin, the magistrate of the district of Shanghai, has issued strict orders for the apprehension of any one who shall circulate an absurd libel that has gained some ground lately. It is to the effect that three actions have been fought at Tientsin lately, two of them being won by the Chinese; that the English had bought peace; that Sinko-lin-sin had protected 200,000; and that a dinner had taken place, at which the conditions of peace were settled. No account has been given of Mr. Ward's return from the interior, noticed in our last, with the Chinese at Soo-chow.

The American residents of Shanghai have presented him with a congratulatory address, prior to his departure, on the 12th of November. The language of this document is somewhat fulsome. Among other matters noticed in it, we find that in appreciating the course taken by his excellency during his mission in China, they believe that his desire to co-operate with England and France indicated the justice and soundness of his policy. The assistance given by Commodore Tatnall to the English and French forces at Taku is also approved of; and admiration of Mr. Ward's able and energetic endeavours to support the dignity of his country at Peking is also expressed. The gentlemen who signed the address are pleased to understand that the unsatisfactory state of the Imperial customs has attracted his excellency's attention. Mr. Ward's reply is couched in terse and elegant language. With regard to the assistance given by Commodore Tatnall, he declared that no one could understand the painfully trying position he was then placed in. It seems that some of the Americans admit that they are not very proud of Mr. Ward's treaty. When the mail left he was at Macao.

Shanghai races took place on the 11th and 12th November, and passed off with great *celat*, the weather being very propitious, and the company, both foreigners and Celestials, unusually numerous. We give the name of the winning horse of each stake:—The Weosung Stakes, Mr. Peter's *Tariff*; the

Hong Kong Cup, Mr. Florence's *Cheerful*; the Maiden Plate, Mr. Mackenzie's *Takei*; the Arab Cup, Mr. Fitzjames's *Shah*; the Hockley Plate, Mr. Florence's *Cheerful*; the Shantung Cup, Mr. Fitzjames's *Widdicomb*; the Hack Cup, Mr. Mackenzie's *Eepee*; the Champagne Cup, Mr. Fernando's *Spots*; the Shanghai Plate, Mr. Florence's *Cheerful*; the Retiring Cup, Mr. Bramble's *Topaz*; the Hack Stakes, Mr. Chance's *Yellow Jacket*; the Challenge Cup, Mr. Chance's *A. P. Byculla*; and the Consolidation Stakes, Mr. Rarey's *Firefly*.

A case of assault was heard at the British Consulate Office, on the 14th November, the plaintiff being Mr. Alfeld, and the defendant Mr. Maitland. It appeared that the plaintiff had written a letter, which reflects on the character of the defendant, who immediately called on him at Richards' Hotel, and ascertaining from him that he wrote the letter, gave him a blow. The defendant was found guilty, condemned in 100 dols. fine, or one month's imprisonment.

The steamer *Carthage* had left Shanghai for the new Russian port Nicolaieff on the Amoor.

Mr. Bruce appears to be engaged in the revision of consular decisions, &c., at Shanghai, and we find no notice of any correspondence since the Peiho affair with the Court of Peking.

A short time since a Chinese merchant, named Chow-yu-Chow, brought an action against Messrs. Sassoon & Co., at the Consular Court, Shanghai, to recover 2,046 taels, being the balance of an account. After a great deal of evidence had been gone through, the court delivered a judgment in favour of the plaintiff. The defendants appealed against this judgment, and sent a statement to the Hon. Mr. Bruce, the plaintiff sending a counter-statement. Mr. Meadows, the Consul, also sent a statement of the grounds of his decision. Mr. Bruce, after duly considering the case, confirmed the judgment of the Consular Court.

HONG KONG.

The London mails of 27th Sept. reached Hong Kong on the 16th Nov., per *Ottawa*, after a hard passage of nearly ten days, from Singapore. The mail of 10th Oct. arrived on the 29th Nov., but owing to the closing of the (present) outward mail, the post-office could not deliver it until after its departure, at two p. m. on the 30th. The *China Express* was, in consequence of our special through agencies and the courtesy of the P. and O. Company, delivered at 11 30, a.m., on the 29th, thus anticipating the news to our subscribers fully twenty-four hours; and containing as it did, Mr. Bruce's correspondence published here on the Peiho affair, it was a most important service to the community. Previous to the arrival of the mail, a portion of the despatches had been, according to the *China Mail*, made public, and a *resume* is said to be given in its columns; but we can find no source from which it is taken but the *China Express* of the 10th Oct. In another paragraph the *Mail* says:—

NOTE.—By the mail just arrived here, we learn that the communications referred to below, or rather a garbled edition of them, have been published in England; but as newspapers are not to be given out till within half-an-hour of the despatch of the homeward mail, we are unable to correct our information, which, however, we have no doubt will be found to be substantially correct.

As, of course the editor must have received a copy of the *China Express*, we cannot understand this, except by coming to the conclusion that by newspapers some other word was intended.

The *China Mail* expresses its regret that the Government should still persist in carrying out a ridiculous and cruel policy towards Mr. Tarrant. The only amelioration in his condition that seems to have been made is that of separating him from the miscreants, and allowing him to write letters without their being inspected by the governor of the gaol; but he is still confined as a common criminal. In another part of the present issue, it will be seen that an order has been sent by the Duke of Newcastle, to the effect that under any circumstances Mr. Tarrant is to be released at the end of six months.

The Chinese merchants of Hong Hong have sent home by the mail a substantial testimonial to Colonel Caine, in the shape of a solid silver looking-glass, bearing a suitable inscription.

Considerable irritation still exists in Hong Kong on the subject of the exclusion of the Parsees by the officers of the garrison, from the performances, on what are called "Ticket Nights." The Parsees have addressed a memorial to the governor on the subject, and the obnoxious regulation has since been withdrawn.

Referring to the notice in our last on the subject of family emigration from China to the British West Indies, we have now to report that the scheme of Mr. Austin, the Government Emigration Agent, appears to proceed satisfactorily, and the ship *Whirlwind* was to leave in a few days for British Guiana, with

the first batch of emigrants, including a number of women and children.

The Hong Kong branch of the Royal Asiatic Society has been resuscitated by the united energies of Sir Hercules Robinson and the Bishop of Victoria. It is now hoped that this medium for a social reunion will not be allowed to dwindle away again. The first meeting, which was merely held for the purpose of examining the assets, was held on the 23rd of November.

The *Government Gazette* contains a notification of the following returns for the month ending 31st October, 1859:—Oriental Bank: notes issued, 557,928 dols.; specie in reserve, 300,000 dols. Mercantile Bank: notes issued, 263,658 dols.; specie in reserve, 150,000 dols.

The dry dock at Aberdeen, constructed of granite, is nearly finished, the dimensions being—

	ft.	in.

Length of block	310	0
Depth of water on the block	18	0
Breadth at bottom	41	6

MALACCA STRAITS.

SINGAPORE.

THE SINGAPORE AND BATAVIA TELEGRAPH CABLE.—The successful laying of the telegraphic cable between Singapore and Batavia has occasioned the interchange of complimentary messages, not only between the Governments of the two dependencies, but also between the merchants of both places. The utmost cordiality prevails on the subject, and it is hoped that the cable will be the means of cementing a still closer intimacy between the colonists of England and the Netherlands. It will be seen by the following telegram, dated on board the *Bahiana*, on November 30, that a slight accident occurred soon after landing the cable, but it was speedily rectified:—"No sooner was the work done than a ship's anchor broke the communication. Friday, the 25th: broken ends found, and we find the cable broken again since Sunday morning near the North Watcher. It looks like mischief. It is a perplexing time, and makes all my movements uncertain; we are all well, and still blest with patience to relieve us of the yoke of bad luck. We are just starting from the North Watcher." We also give the last message received at Singapore:—"Batavia, December 5, 1859. Arrived: the steamer *Shandon*, from Australia. Lost: the English ship *Elizabeth*, bound to Australia, with tea, crew saved." The *Bahiana* is now engaged in laying down a line from Mintok, in Banca, to Palembang in Sumatra. The *Straits Times* says:—"The erection of a line of posts from Tanjong Pagar to the post-office, for the purpose of conveying the telegraph wire, indicates that the Dutch authorities are active in completing their part of the line of telegraphic communication."

We observe in the *Singapore Free Press* Mr. Tarrant's correspondence, which we alluded to in our last, and which the local government of Hong Kong is said to have attempted to suppress. Most of it has already been given in previous numbers of our journal.

H.M.S. *Coromandel*, Captain Henlock, arrived at Singapore on the 27th November, from Calcutta, with the *Tasmanian* in tow, en route to Hong Kong. The *Coromandel* had on board nine officers and 217 men; and the *Tasmanian*, the head-quarters and 500 men of the 3rd Buffs.

COCHIN-CHINA.

According to the latest intelligence which had reached Singapore, on the 6th December, another battle had been fought in Cochin-China. The French lost, killed, Captain d'Abville, of the *Nemesis*, and two other officers, one quartermaster, and four or five marines; wounded, several. The Cochin-Chinese lost 120 killed and wounded.

BORNEO.

LABUAN.

The *Straits Times* says that their attention has been called by several letters lately, to the Island of Labuan, all of them advocating the establishment of a convict settlement there. They consider that Government ought to take the matter up at once, since no more eligible spot could be found where the purposes of isolation could be secured and where the real value of servitude could be exacted from the prisoner. If the coal mines were thus worked, the colony would soon pay its own expenses.

TREATY BETWEEN THE UNITED STATES OF AMERICA AND CHINA.

SIGNED AT TIENTSIN, JUNE 18, 1858.

The United States of America and the Ta-Tsing Empire, desiring to maintain firm, lasting, and sincere friendship, have resolved to renew, in a manner clear and positive, by means of a treaty or general convention of peace, amity, and commerce, the rules which shall in future be mutually observed in the intercourse of their respective countries; for which most desirable object the President of the United States and the August Sovereign of the Ta-Tsing Empire have named for their plenipotentiaries, to wit: the President of the United States of America, William B. Reed, Envoy Extraordinary and Minister Plenipotentiary to China; and his Majesty the Emperor of China, Kweiliang, a member of the Privy Council and superintendent of the Board of Punishments; and Hwasiana, president of the Board of Civil Office, and Major-General of the Bordered Blue Banner Division of the Chinese Bannermen, both of them being imperial commissioners and plenipotentiaries. And the said ministers, in virtue of the respective full powers they have received from their governments, have agreed upon the following articles:—

Art. 1. There shall be, as there has always been, peace and friendship between the United States of America and the Ta-Tsing Empire, and between their people, respectively. They shall not insult or oppress each other for any trifling cause, so as to produce an estrangement between them; and, if any other nation should act unjustly or oppressively, the United States will exert their good offices, on being informed of the case, to bring about an amicable arrangement of the question, thus showing their friendly feelings.

Art. 2. In order to perpetuate friendship, on the exchange of ratifications by the President, with the advice and consent of the Senate of the United States, and by his Majesty the Emperor of China, this treaty shall be kept and sacredly guarded in this way, viz:—The original treaty, as ratified by the President of the United States, shall be deposited at Peking, the capital of his Majesty the Emperor of China, in charge of the Privy Council; and, as ratified by his Majesty the Emperor of China, shall be deposited at Washington, the capital of the United States, in charge of the Secretary of State.

Art. 3. In order that the people of the two countries may know and obey the provisions of this treaty, the United States of America agree, immediately on the exchange of ratifications, to proclaim the same, and publish it by proclamation in the *Gazettes* where the laws of the United States of America are published by authority; and his Majesty the Emperor of China, on the exchange of ratifications, agrees immediately to direct the publication of the same at the capital, and by the governors of all the provinces.

Art. 4. In order further to perpetuate friendship, the minister or commissioner, or the diplomatic representative of the United States of America in China, shall at all times have the right to correspond on terms of perfect equality and confidence with the officers of the Privy Council at the capital, or with the governors-general of the Two Kwangs, the provinces of Fuhkien and Chehkiang, or of the Two Kiangs; and whenever he desires to have such correspondence with the Privy Council at the capital, he shall have the right to send it through either of the said governors-general or by the general post; and all such communications shall be sent under seal, which shall be most carefully respected. The Privy Council and governors-general, as the case may be, shall in all cases consider and acknowledge such communications promptly and respectfully.

Art. 5. The Minister of the United States of America in China, whenever he has business, shall have the right to visit and sojourn at the capital of his Majesty the Emperor of China, and there confer with a member of the Privy Council, or any other high officer of equal rank deputed for that purpose, on matters of common interest and advantage. His visits shall not exceed one in each year, and he shall complete his business without any unnecessary delay. He shall be allowed to go by land or come to the mouth of the Pehio, into which he shall not bring ships-of-war, and he shall inform the authorities at that place, in order that boats may be provided for him to go on his journey. He is not to take advantage of this stipulation to request visits to the capital on trivial occasions. Whenever he means to proceed to the capital he shall communicate, in writing, his intention to the Board of Rites at the capital, and thereupon the said board shall give the necessary directions to facilitate his journey, and give him necessary protection and respect on his way. On his arrival at the capital he shall be furnished with a suitable residence prepared for him, and he shall defray his own expenses; and his entire suite shall not exceed twenty persons, exclusive of his Chinese attendants, none of whom shall be engaged in trade.

Art. 6. If at any time his Majesty the Emperor of China shall, by treaty voluntarily made, or for any other reason, permit the representative of any friendly nation to reside at his capital for a long or short time, then, without any further consultation or express permission, the representative of the United States in China shall have the same privilege.

Art. 7. The superior authorities of the United States and of China in correspondence together, shall do so on terms of equality, and in form of mutual communication (*chau-hwei*). The consuls and the local officers, civil and military, in corresponding together, shall likewise employ the style and form of mutual communication (*chau-hwei*). When inferior officers of the one government address superior officers of the other, they shall do so in the style and form of memorial (*shin-chin*). Private individuals, in addressing superior officers, shall employ the style and petition (*pin-ching*). In no case shall any terms or style be used or suffered which shall be offensive or disrespectful to either party. And it is agreed that no presents, under any pretext or form whatever, shall ever be demanded of the United States by China, or of China by the United States.

Art. 8. In all future personal intercourse between the representative of the United States of America and the governors-general or go-

vernors, the interviews shall be had at the official residence of the said officers, or at their temporary residence, or at the residence of the representative of the United States of America, whichever may be agreed upon between them; nor shall they make any pretext for declining these interviews. Current matters shall be discussed by correspondence, so as not to give the trouble of a personal meeting.

Art. 9. Whenever national vessels of the United States of America, in cruising along the coast and among the ports opened for trade for the protection of the commerce of their country, or for the advancement of science, shall arrive at or near any of the ports of China, commanders of said ships and the superior local authorities of government shall, if it be necessary, hold intercourse on terms of equality and courtesy, in token of the friendly relations of their respective nations; and the said vessels shall enjoy all suitable facilities on the part of the Chinese Government in procuring provisions or other supplies, and making necessary repairs. And the United States of America agree that in case of the shipwreck of any American vessel, and its being pillaged by pirates, or in case any American vessel shall be pillaged or captured by pirates on the seas adjacent to the coast, without being shipwrecked, the national vessels of the United States shall pursue the said pirates, and if captured, deliver them over for trial and punishment.

Art. 10. The United States of America shall have the right to appoint consuls, and other commercial agents for the protection of trade, to reside at such places in the dominions of China as shall be agreed to be opened; who shall hold official intercourse and correspondence with the local officers of the Chinese Government (a consul, or a vice-consul in charge, taking rank with an intendant of circuit or a prefect), either personally or in writing, as occasion may require, on terms of equality and reciprocal respect. And the consuls and local officers shall employ the style of mutual communication. If the officers of either nation are disrespectfully treated or aggrieved in any way by the other authorities, they have the right to make representation of the same to the superior officers of the respective Governments, who shall see that full inquiry and strict justice shall be had in the premises. And the said consuls and agents shall carefully avoid all acts of offence to the officers and people of China. On the arrival of a consul duly accredited at any port in China, it shall be the duty of the minister of the United States to notify the same to the governor-general of the province where such port is, who shall forthwith recognise the said consul and grant him authority to act.

Art. 11. All citizens of the United States of America in China, peaceably attending to their affairs, being placed on a common footing of amity and good-will with subjects of China, shall receive and enjoy for themselves and everything appertaining to them the protection of the local authorities of government, who shall defend them from all insult or injury of any sort. If their dwellings or property be threatened or attacked by mobs, incendiaries, or other violent or lawless persons, the local officers, on requisition of the consul, shall immediately despatch a military force to disperse the rioters, apprehend the guilty individuals, and punish them with the utmost rigour of the law. Subjects of China guilty of any criminal act towards citizens of the United States shall be punished by the Chinese authorities according to the laws of China; and citizens of the United States, either on shore or in any merchant vessel, who may insult, trouble, or wound the persons, or injure the property of Chinese, or commit any other improper act in China, shall be punished only by the consul or other public functionary thereto authorised, according to the laws of the United States. Arrests in order to trial may be made by either the Chinese or the United States authorities.

Art. 12. Citizens of the United States, residing or sojourning at any of the ports open to foreign commerce, shall be permitted to rent houses and places of business, or hire sites on which they can themselves build houses or hospitals, churches, and cemeteries. The parties interested can fix the rent by mutual and equitable agreement; the proprietors shall not demand an exorbitant price, nor shall the local authorities interfere, unless there be some objections offered on the part of the inhabitants respecting the place. The legal fees to the officers for applying their seal shall be paid. The citizens of the United States shall not unreasonably insist on particular spots, but each party shall conduct with justice and moderation. Any desecration of the cemeteries by natives of China shall be severely punished according to law. At the places where the ships of the United States anchor, or their citizens reside, their merchants, seamen, or others can freely pass and repass in the immediate neighbourhood; but, in order to the preservation of the public peace, they shall not go into the country to the villages and marts to sell their goods unlawfully, in fraud of the revenue.

Art. 13. If any vessel of the United States be wrecked or stranded on the coast of China, and be subjected to plunder or other damage, the proper officers of the government, on receiving information of the fact, shall immediately adopt measures for its relief and security; the persons on board shall receive friendly treatment, and be enabled to repair at once to the nearest port, and shall enjoy all facilities for obtaining supplies of provisions and water. If the merchant vessels of the United States, while within the waters over which the Chinese government exercise jurisdiction, be plundered by robbers or pirates, then the Chinese local authorities, civil and military, on receiving information thereof, shall arrest the said robbers or pirates, and punish them according to law, and shall cause all the property which can be recovered to be restored to the owners or placed in the hands of the consul. If, by reason of the extent of territory and numerous population of China, it shall in any case happen that the robbers cannot be apprehended, and the property only in part recovered, the Chinese Government shall not make indemnity for the goods lost; but if it shall be proved that the local authorities have been in collusion with the robbers, the same shall be communicated to the superior authorities for monitoring the throne, and these officers shall be severely punished, and their property be confiscated to repay the losses.

Art. 14. The citizens of the United States are permitted to frequent the ports and cities of Canton and Chap-chau or Swatow, in the pro-

vince of Kwang-tung; Amoy, Foo-chow, and Taiwan in Formosa, in the province of Fuhkien; Ningpo, in the province of Chehkiang; and Shanghai, in the province of Kiangsu, and any other port or place hereafter by treaty with other powers, or with the United States, opened to commerce; and to reside with their families and trade there, and to proceed at pleasure with their vessels and merchandise from any of these ports to any other of them. But said vessels shall not carry on a clandestine and fraudulent trade at other ports of China not declared to be legal, or along the coasts thereof; and any vessels under the American flag violating this provision, shall, with her cargo, be subject to confiscation to the Chinese Government; and any citizen of the United States who shall trade in any contraband article of merchandise shall be subject to be dealt with by the Chinese Government, without being entitled to any countenance or protection from that of the United States; and the United States will take measures to prevent their flag from being abused by the subjects of other nations as a cover for the violation of the laws of the empire.

Art. 15. At each of the ports open to commerce, citizens of the United States shall be permitted to import from abroad, and sell, purchase, and export all merchandise, of which the importation or exportation is not prohibited by the laws of the empire. The tariff of duties to be paid by citizens of the United States, on the export and import of goods from and into China, shall be the same as was agreed upon at the treaty of Wanghia, except so far as it may be modified by treaties with other nations, it being expressly agreed that citizens of the United States shall never pay higher duties than those paid by the most favoured nation.

Art. 16. Tonnage duties shall be paid on every merchant vessel belonging to the United States entering either of the open ports at the rate of four mace per ton of 40 cubic feet, if she be over 150 tons burthen; and one mace per ton of 40 cubic feet, if she be of the burthen of 150 tons or under, according to the tonnage specified in the register; which, with her other papers shall, on her arrival, be lodged with the consul, who shall report the same to the commissioner of customs. And if any vessel, having paid tonnage duty at one port, shall go to any other port to complete the disposal of her cargo, or, being in ballast, to purchase an entire or fill up an incomplete cargo, the consul shall report the same to the commissioner of customs, who shall note on the port-clearance that the tonnage duties have been paid, and report the circumstances to the collectors at the other custom-houses; in which case the said vessel shall only pay duty on her cargo, and not be charged with tonnage duty a second time. The collectors of customs at the open ports shall consult with the consuls about the erection of beacons or lighthouses, and where buoys and lightships should be placed.

Art. 17. Citizens of the United States shall be allowed to engage pilots to take their vessels into port, and, when the lawful duties have all been paid, take them out of port. It shall be lawful for them to hire at [pleasure, servants, compradors, linguists, writers, labourers, seamen, and persons for whatever necessary service, with passage or cargo-boats, for a reasonable compensation, to be agreed upon by the parties or determined by the consul.

Art. 18. Whenever merchant vessels of the United States shall enter a port, the collector of customs shall, if he see fit, appoint custom-house officers to guard said vessels, who may live on board the ship or their own boats, at their convenience. The local authorities of the Chinese Government shall cause to be apprehended all mutineers and deserters from on board the vessels of the United States in China on being informed by the consul, and will deliver them up to the consuls or other officers for punishment. And if criminal subjects of China take refuge in the houses or on board the vessels of citizens of the United States, they shall not be harboured or concealed, but shall be delivered up to justice on due requisition by the Chinese local officers, addressed to those of the United States. The merchants, seamen, and other citizens of the United States shall be under the superintendence of the appropriate officers of their government. If individuals of either nation commit acts of violence or disorder, use arms to the injury of others, or create disturbances endangering life, the officers of the two governments will exert themselves to enforce order and to maintain the public peace, by doing impartial justice in the premises.

Art. 19. Whenever a merchant vessel belonging to the United States shall cast anchor in either of the said ports, the supercargo, master, or consignee shall, within forty-eight hours, deposit the ship's papers in the hands of the consul or person charged with his functions, who shall cause to be communicated to the superintendent of customs a true report of the name and tonnage of such vessel, the number of her crew, and the nature of her cargo, which being done, he shall give a permit of her discharge. And the master, supercargo, or consignee, if he proceed to discharge the cargo without such permit, shall incur a fine of five hundred dollars, and the goods so discharged without permit shall be subject to forfeiture to the Chinese Government. But if a master of any vessel in port desire to discharge a part only of the cargo, it shall be lawful for him to do so, paying duty on such part only, and to proceed with the remainder to any other ports. Or if the master so desire, he may, within forty-eight hours after the arrival of the vessel, but not later, decide to depart without breaking bulk; in which case he shall not be subject to pay tonnage or other duties or charges until, on his arrival at another port, he shall proceed to discharge cargo, when he shall pay the duties on vessel and cargo, according to law. And the tonnage duties shall be held due after the expiration of the said forty-eight hours. In case of the absence of the consul or person charged with his functions, the captain or supercargo of the vessel may have recourse to the consul of a friendly power; or, if he please, direct to the superintendent of customs, who shall do all that is required to conduct the ship's business.

Art. 20. The superintendent of customs, in order to the collection of the proper duties, shall, on application made to him through the consul, appoint suitable officers, who shall proceed, in the presence of the captain, supercargo, or consignee, to make a just and fair examination of all goods in the act of being discharged for importation or laden for exportation on board any merchant vessel of the United States.

And if disputes occur in regard to the value of goods subject to *ad valorem* duty, or in regard to the amount of tare, and the same cannot be satisfactorily arranged by the parties, the question may, within twenty-four hours, and not afterwards, be referred to the said consul to adjust with the superintendent of customs.

Art. 21. Citizens of the United States who may have imported merchandise into any of the free ports of China, and paid the duty thereon, if they desire to re-export the same in part or in whole to any other of the said ports, shall be entitled to make application, through their consul, to the superintendent of customs, who, in order to prevent fraud on the revenue, shall cause examination to be made, by suitable officers, to see that the duties paid on such goods as are entered on the custom-house books correspond with the representation made, and that the goods remain with their original marks unchanged, and shall then make a memorandum in the port-clearance of the goods and the amount of duties paid on the same, and deliver the same to the merchant, and shall also certify the facts to the officers of customs of the other ports; all which being done, on the arrival in port of the vessel in which the goods are laden, and everything being found, on examination there, to correspond, she shall be permitted to break bulk, and land the said goods, without being subject to the payment of any additional duty thereon. But if, on such examination, the superintendent of customs shall detect any fraud on the revenue in the case, then the goods shall be subject to forfeiture and confiscation to the Chinese Government. Foreign grain or rice brought into any port of China in a ship of the United States, and not landed, may be re-exported without hindrance.

Art. 22. The tonnage duty on vessels of the United States shall be paid on their being admitted to entry. Duties of import shall be paid on the discharge of the goods, and duties of export on the lading of the same. When all such duties shall have been paid, and not before, the collector of customs shall give a port-clearance, and the consul shall return the ship's papers. The duties shall be paid to the sheriffs authorised by the Chinese Government to receive the same. Duties shall be paid and received, either in Sycee silver or in foreign money, at the rate of the day. If the consul permits a ship to leave the port before the duties and tonnage dues are paid, he shall be held responsible therefore.

Art. 23. When goods on board any merchant vessel of the United States in port require to be transhipped to another vessel, application shall be made to the consul, who shall certify what is the occasion thereof to the superintendent of customs, who may appoint officers to examine into the facts and permit the transshipment. And if any goods be transhipped without written permits, they shall be subject to be forfeited to the Chinese Government.

Art. 24. Where there are debts due by subjects of China to citizens of the United States, the latter may seek redress in law; and on suitable representations being made to the local authorities, through the consul, they will cause due examination in the premises, and take proper steps to compel satisfaction. And if citizens of the United States be indebted to subjects of China, the latter may seek redress by representation through the consul, or by suit in the Consular Court; but neither government will hold itself responsible for such debts.

Art. 25. It shall be lawful for the officers or citizens of the United States to employ scholars and people of any part of China, without distinction of persons, to teach any of the languages of the empire, and to assist in literary labours; and the persons so employed shall not for that cause be subject to any injury on the part either of the government or of individuals; and it shall in like manner be lawful for citizens of the United States to purchase all manner of books in China.

Art. 26. Relations of peace and amity between the United States and China being established by this treaty, and the vessels of the United States being admitted to trade freely to and from the ports of China open to foreign commerce, it is further agreed that, in case at any time hereafter China should be at war with any foreign nation whatever, and should for that cause exclude such nation from entering her ports, still the vessels of the United States shall not the less continue to pursue their commerce in freedom and security, and to transport goods to and from the ports of the belligerent powers, full respect being paid to the neutrality of the flag of the United States, provided that the said flag shall not protect vessels engaged in the transportation of officers or soldiers in the enemy's service, nor shall said flag be fraudulently used to enable the enemy's ships, with their cargoes, to enter the ports of China; but all such vessels so offending shall be subject to forfeiture and confiscation to the Chinese Government.

Art. 27. All questions in regard to rights, whether of property or person, arising between citizens of the United States in China, shall be subject to the jurisdiction and regulated by the authorities of their own government; and all controversies occurring in China between citizens of the United States and the subjects of any other government shall be regulated by the treaties existing between the United States and such governments, respectively, without interference on the part of China.

Art. 27.—If citizens of the United States have special occasion to address any communication to the Chinese local officers of government, they shall submit the same to their consul or other officer, to determine if the language be proper and respectful, and the matter just and right, in which event he shall transmit the same to the appropriate authorities for their consideration and action in the premises. If subjects of China have occasion to address the consul of the United States, they may address him directly, at the same time they inform their own officers, representing the case for his consideration and action in the premises; and if controversies arise between citizens of the United States and subjects of China, which cannot be amicably settled otherwise, the same shall be examined and decided conformably to justice and equity by the public officers of the two nations, acting in conjunction. The extortion of illegal fees is expressly prohibited. Any peaceable persons are allowed to enter the court in order to interpret, lest injustice should be done.

Art. 29. The principles of the Christian religion, as professed by the Protestant and Roman Catholic churches, are recognised as teaching men to do good and to do to others as they would have others to do

to them. Hereafter those who quietly profess and teach these doctrines shall not be harassed or persecuted on account of their faith. Any person, whether citizen of the United States or Chinese convert, who, according to these terms, peaceably teach and practise the principles of Christianity, shall in no case be interfered with or molested.

Art. 30. The contracting parties hereby agree that should at any time the Ta-Tsing empire grant to any nation, or the merchants or citizens of any nation, any right, privilege, or favour, connected either with navigation, commercial, political, or other intercourse, which is not conferred by this treaty, such right, privilege, and favour shall at once freely enure to the benefit of the United States, its public officers, merchants, and citizens.

The present treaty of peace, amity, and commerce shall be ratified by the President of the United States, by and with the advice and consent of the Senate, within one year, or sooner, if possible, and by the August Sovereign of the Ta-Tsing Empire forthwith; and the ratifications shall be exchanged within one year from the date of the signatures thereof.

In faith whereof, we, the respective plenipotentiaries of the United States of America and of the Ta-Tsing Empire, as aforesaid, have signed and sealed these presents.

Done at Tientsin, this eighteenth day of June, in the year of our Lord one thousand eight hundred and fifty-eight, and the Independence of United States of America the eighty-second, and in the eighth year of Hienfung, fifth month, and eighth day.

WAR WITH CHINA.

Notwithstanding Capt. Osborn's promises, we cannot bring ourselves to believe that there is any great chance of being able to make this war pay itself. It will be certain to have its rebound in the disagreeable form of inflated estimates and increased income-tax. It is, to be sure, a Chancellor of the Exchequer's war. We are going to fight for some ten millions of revenue. It is also a tea-consumers' war. The transit duties upon tea in China have been upon the rise for some years, and, as the Mandarins have discovered that this is a simple plan for taxing the distant barbarians, they will, of course, continue to increase their exactions. Lord Elgin may make what treaties he can, and the Court of Peking may issue any orders that may be dictated to them; but so long as tea has to be brought through half-a-dozen local jurisdictions and carried upon men's backs over mountains before it can be brought down to Canton, and so long as it has to be gathered from long distant interior localities before it can be sold at Foo-chow, so long will it be in the power of every petty authority in its course of transit to obstruct its passage and levy a black-mail upon it. "Opening up China" means going up to the places where this tea is grown, and buying it of the producer, and bringing it away. We must be strangely ignorant of the ordinary impulses of human nature, or foolishly credulous of some great difference between the instincts of a Chinaman and an European, if we do not understand that this is a privilege which interferes with the gains of all the bureaucracy of China, and that it is a privilege we must fight for if we wish to enjoy it. But still, these considerations do not make us look upon this third Chinese war with one whit more complacency. The Chancellor of the Exchequer's 10 millions will be by no means so pleasant an item of revenue if we have to spend two or three millions every year in order to keep it going. Even to buy tea cheap, or to sell opium dear, or to provide Lyons and Spitalfields with cheap silks, we cannot afford a perennial distant war. We have now seen enough of these barbarians to know that no treaty they may concede will be of use to us any longer than we have force present to support it. It may be that this decrepit and rotten empire is near its dissolution. The Russians have crumbled away large portions of it in the north. A little circumstance which happened the other day in one of the Japanese islands, when the murder of a Russian sailor drew at a moment's notice 12 Russian men-of-war to the spot to resent the outrage, shows how strong the Lords of Siberia have taken care to make themselves in these eastern seas. The French also have come to see that they have something more than a spiritual interest in this part of the world, and that it is not impossible for them to push a barter between French manufactures and China silks. There is one thing to which all our home interests must steadily lay their account, and that is, that we certainly will not continue these Chinese wars. We cannot afford them, either in men or in money, or in reputation. The war in which we are now embarking—if, indeed, it cannot be stayed by negotiation—must be short and decisive. If by any amount of punishment we can once and for all teach the Chinese Government to respect its engagements, we shall not grudge the necessary exertion. But it had better be at once understood by the dwellers in Hong Kong, in Amoy, in Foochow, in Ningpo, and in Shanghai, that in the face of the horrible mortality of seamen and of soldiers, both on the coast and at Hong Kong, and with the knowledge of the expense of such an undertaking, the public at home will never endure the maintenance of a large permanent force in the China Seas, and will certainly never undertake the responsibilities of an Anglo-Chinese Empire.—*Times*.

Our own Correspondents.

FRANCE.

PARIS, Jan. 11, 1860.

I have but few items to communicate on matters connected with your field. I send you the best account I can obtain of the French Expedition to China.

The Abbé Desgodins, Catholic missionary in China, has given us a short account of his adventures in that country, and has appended a few reflections thereto. He says that after a perilous

excursion the natives took it into their heads first that he was a rebel, and then that he was an European, and denounced him to a mandarin; this officer required him to kneel before him, but the abbé took a seat instead, to the intense annoyance of the former, and then afterwards having declared himself a Frenchman, he drew himself up to his full height in a standing position; there was much outcry, he says, and his knees were examined to see whether they would bend like another man's. The abbé, however, must have sat down in an odd manner, if the act of so doing had left any doubt upon that score. When the official had finished his questioning and the abbé's trunk had been examined, the latter took the mandarin to task as severely as he could for the manner in which he had observed—or rather not observed—the treaty of peace, telling him that he had no right to detain a traveller, and demanding to be dismissed immediately. The abbé was compelled, however, to appear three times before a superior Mandarin, who, he says, had the power of life and death, as well as of unmercifully beating those of whom he is called "Father and Mother." To escape the paternal favours of this high dignitary, the abbé says that he assumed perfect equality, or rather superiority over him; he made the best use he could of the treaty of peace, in which he admits he had no confidence, and he spoke in a tone of accusation rather than of supplication. That he declares to be the method in China: "if you would not be domineered over, and even crushed, you must begin by domineering, and never give up the habit." It is gratifying to know that the politic abbé escaped from his difficulties, upon that occasion at any rate. He concludes his account by stating that things are in the same state as they were before the treaties, which are complete nullities in the eyes of the Chinese.

A writer in the *Révue Contemporaine*, published on the 1st of January, who is a French naval officer, makes some remarks on the navies of France and England in a very different spirit to that which we are accustomed to hear on the subject, except when touched upon by men like M. Michel Chevalier, who really knows England and English, both things of rare acquirements amongst even well-educated Frenchmen. The writer in question says that there is no reason why France should have as large a navy as England; and, further, that it cannot be so from the want of men; that it would be of no use increasing the ships, unless sailors were to be had; that if France have a navy only half as large as that of England, there would be good reason for congratulation, while the fact is, that it is far from being the case; and, that the system of maritime conscription, which he thinks excellent, is not sufficient for the supply of sailors; and he proposes that the number of conscripts should be doubled. At present, he says, the French navy is not strong enough to withstand attack, much more to take the aggressive.

Another writer in the same magazine, while treating the question of the war between Spain and Morocco, says, that people in France have not misunderstood the gravity of the question of Gibraltar as regards England. "That rock," he says truly, "is the first link of the chain that binds the metropolis to the great Indies, the starting-point of that train which, by Malta, Candia, Corfu, Suez, Perim, and the stations of the Indian Ocean, attaches the extremities of the British empire. Clearly, England could not, at any cost, suffer a European power to establish itself on the other side of the Strait, so as to command, and subsequently destroy, the strength of Gibraltar. That line once interrupted, the British empire, although not broken up, would be exposed to much danger; and who shall venture to say that, in the present state of the world, it would not be a catastrophe for civilisation? In matters of this kind," he continues, "we must dismiss all narrow views, and even shake off a certain degree of legitimate pride, in the interest of the nation at large. We must have the fortitude to ask ourselves whether a momentary tenderness about certain national susceptibilities ought to be placed in the balance against the good which mankind at large must derive from their being sacrificed."

The *Reveil de l'Orient* says, that two young French merchants are about to start for Japan, to establish two stores, for the sale of French productions on a grand scale; and it adds, the town of Kanagawa is at present the most important point in a commercial point of view, and there are already many English and American firms established there, and doing a good trade.

Chinese guide-books and grammars continue to appear in considerable numbers in France. The last few weeks have brought a *Grammaire Mandarine*, by M. A. Bazin, professor of Chinese at the Paris School of Oriental Languages; a *Manual Pratique de la Langue Chinoise*, by M. L. Rochet; a new edition of the

Dictionnaire Chinois, Français, et Latin, compiled by M. de Guignes, by order of the Emperor Napoleon I.

SIAM.—The *Constitutionnel* contains the following interesting letter from one of the Sisters of Charity who form part of a mission to Siam, giving an account of an interview with the king of that country:—"The consul, at our request, arranged that the visit to the king should take place on October 3. On that day we proceeded from our residence to the palace, which is at some distance, in the barge of *Monseigneur* ornamented with the French flag; the consul and a French missionary followed us, each in his boat. On landing we had to walk under a burning sun through a long street paved with red bricks, and as we passed we saw the stables of the royal elephants. We were received at the palace by a page, under a sort of canopy, and were requested to sit down while he announced our arrival to the king. We had to wait for some time, when the consul, seeing that we were fatigued, sent a second message, and we were immediately admitted. The court of the palace was filled with an immense number of slaves seated on their heels. The king stood to receive us at the door of the audience chamber. He is a man of middle height and very thin, and the expression of his countenance has a sternness which marks the absolute sovereign. His dress consisted of a long loose silk dress, a white shirt, a small thin silk waistcoat and a Scotch cap, and slippers embroidered with gold. The consul presented us, and the missionary addressed a few words to his majesty in the Siamese language. The king looked at us for some moments in silence, and then, holding out his hand to me, asked if I spoke English. On my replying in the affirmative, he said in that language, "Ladies, do you wish to see the queen consort?" and then, without asking the gentlemen to enter, he requested us to follow him. He walked very fast through a large hall filled with princes and Mandarins, who all prostrated themselves with their faces to the ground. A number of little children dressed in silk, and covered with gold chains and bracelets, flocked round us. We followed the king through several passages in the midst of a double row of females all bent to the ground. His majesty suddenly stopped, and asked us if we spoke Latin; he said he did, and to convince us, recited the formula, "In nomine Patris," &c. He then took the crucifix attached to our rosary, saying that he knew a great deal about our religion. We at length reached a handsome saloon furnished in the European style, and where there was an arm-chair in gold, a present from the Queen of England. On entering he introduced the queen consort to us. She was dressed in a long robe, with a scarf thrown over the right shoulder. She is rather a good-looking woman, and about 40 years of age. The king also presented to us the queen's three children, and a number of ladies, with about 30 children. He then asked us to sit down, and himself offered some figs in gold baskets; and next opened a liqueur case, and poured out some curaçao from one of the bottles, and handed a glass to each. He kept one himself, and proposed as a toast, "The Catholic religion and Jesus, the Saviour of the World." The king, who constantly spoke English, talked to us of *Monseigneur Pallegoin*, whom he called "my friend," of Queen Victoria, and of several illustrious men in England. He also spoke of the Pope, and requested us to come and look at a portrait of his Holiness, which he had in a pretty little boudoir. Wherever the king went he was followed by a young girl, one of the body guard, who carried a sabre on her shoulder, and whenever his majesty stopped she placed herself on her knees close to him. We were afterwards conducted by the king to his library, where he complained that the worms had devoured almost all his books. On returning to the queen's saloon, we found the table covered with different dishes of meat and pastry. At the close of the repast, the king handed to each of us a small cake, and took one himself. He expressed to us the pleasure he felt at seeing French *religieuses* at his table. His majesty spoke very correct English, but pronounced the words with some difficulty. During all these ceremonies, the little children played about us with great glee, and fondly caressed us. On our leaving they all held out their hands, and said "Good bye," the only English words they knew. We then took leave of his majesty, and returned to our lodgings, and in a short time after a number of slaves came bringing us the figs which had been served at the royal table.

RUSSIA.

ST. PETERSBURG, January 6.

In one part of the immense Russian empire the abolition of serfdom is an accomplished fact. According to the official report from the Governor of Western Siberia to the Minister of the Interior, the Siberian Kirghese, fully appreciating the benevolent intentions of the Emperor, have declared their readiness to abolish slavery forthwith, and to grant the fullest liberty to any serfs that may in future become their property by purchase, marriage settlements, or in any other mode, so that they shall participate in all the privileges and immunities belonging to the Kirghese nation. This declaration has been well received by the Emperor, and made a favourable impression on the public. Orders have already been forwarded to the local authorities to take the needful steps for the immediate execution of this gratifying measure.

Last Saturday the Imperial Academy of Arts celebrated the semi-centenary jubilee of their well-deserving Professor Utkin, who received from the hands of the Emperor the insignia of the Order of St. Vladimir.

Mr. Collins, the indefatigable and energetic consul of the United States at Nicolajefsk, has sent into the Russian Government his project for connecting the eastern coast of Asia with America, by a successive series of submarine and land telegraphs by way of Kamschatka and Behring's Straits to Sitka, and thence overland to California and St. Louis. He proposes also

to have a branch line from Kiachta to Pekin. The whole distance to be traversed by this route would be 14,000 miles, and the expenses are estimated at 3,400,000 silver roubles. He calculates the annual expense of maintaining the stations and repairing unavoidable damages at one million of roubles. In estimating the receipts he calculates on 200 messages a day, averaging 4,000 words. These, at a silver rouble per word, would give a gross receipt of 4,000 roubles per day, or 1,460,000 roubles per annum, which, after deducting the above million for expenses, would pay a dividend of about eight per cent.

Intelligence has been received that one of the steamers of the Company of the Amoor had been wrecked in the Bay of Castrics, and another was missing; a merchant ship had also been wrecked in the same bay. A steamer belonging to private persons, constructed in America, had begun plying on the Amoor.

The Emperor has conferred upon the Archbishop of Kamschatka, Innocentz, a magnificent diamond cross, to be worn over his pontificals. In the letter accompanying this present, his Majesty expresses very warmly his thanks for the zeal and energy displayed by the Archbishop in the interests of the Christian religion generally, and the Russian orthodox church in particular, concluding with these memorable words: "Owing to your valuable representations the Archbishop of Kamschatka, which owes its existence mainly to your endeavours, will now obtain a new administrative organisation, and will soon, by the Divine assistance, be extended to the frontiers of China, where it is taking such an active part in the vineyard of the Lord."

HOLLAND.

AMSTERDAM, January 10.

After a long succession of fruitless debates on the Colonial Budget, and the best manner of applying the surplus of last year, amounting to thirty millions of florins, the ministers carried it their own way, and the States-General of the kingdom adjourned over till the 23rd inst. During these interminable discussions every member appeared to have something to say on the subject, and seemed anxious to have a fling at the ministers; and it required all the Dutch coolness of the latter to keep their temper, and not be goaded into answering with bitterness the jibes and sneers of the opposition. The Minister for the Colonies in particular had laid himself open to no end of rebukes and cutting remarks for having warned the house not to interfere too much with the duties of the executive. In his explanation, however, he had not much difficulty in showing that he had no wish to limit the power of control vested in the States-General by the constitution of the kingdom, but that, profiting by their own experience and that of the British in India, it was necessary for the safety and existence of the colonies for the executive to wield their authority with absolute and unlimited power and energy.

Before the States-General were prorogued for the Christmas holidays, ministers laid before them the budget for the ordinary expenses of the kingdom for the financial year 1860, and though the subject afforded a fruitful field for the exhibition of opposition oratory, it ended by confirming all the ministerial proposed measures; and the budget is fixed as follows:—The civil list and king's household, 900,000 florins; high offices of state and the king's cabinet, 552,296 florins; foreign affairs, 481,677 florins; courts of law and department of justice, 2,972,070 florins; home department, 6,874,402 florins; reformed church, 1,766,669 florins; Roman Catholic church, 652,868 florins; navy, 8,826,958 florins; national debt 38,061,919 florins; department of finances, 6,621,065 florins; army 11,869,141 florins; colonial department, 136,198 florins; unforeseen expenses, 100,000 florins—total expenses, 79,815,263 florins; ways and means voted, 90,681,223 florins—estimated surplus, 10,865,960 florins.

The directors of the company lately formed in this city for the recovery of the treasure lost in the frigate *Lutine*—wrecked on the coast of Holland more than a century ago—inform their shareholders by circular that the undertaking has proved hitherto so successful, that they are in a condition to pay a third dividend of 12½ per cent. The vessel, with the diving apparatus, has been removed to winter quarters until the spring.

It appears that the embarkation of reinforcements for the army in the East has nearly come to a close, the only case since my last letter being a detachment of 128 non-commissioned officers and recruits, who embarked on New Year's Day at Rotterdam, on board the *Admiral de Winter*, Capt. Jansen, for Batavia. But, on the other hand, I learn from an authentic source that the *personnel* of the ships-of-war in the East have suffered considerable losses from disease and the heat of the climate, to replace which, 300 seamen of the Dutch royal navy in this country have received orders to hold themselves in readiness to embark at an early date for Batavia.

The abolition of slavery in Java, noticed by me some time since, will be on a similar plan to that adopted by England. In Java the apprenticeship is to last six years, after which full liberty will be conceded. Owners receive 150*l.* for slaves worth 1,000*l.* each, a rate which is looked upon as liberal.

UNITED STATES.

The following is an extract from the President's Speech in reference to China:—

THE CHINESE TREATIES.

The wisdom of the course pursued by this government towards China has been vindicated by the event. Whilst we sustained a neutral position in the war waged by Great Britain and France against the Chinese empire, our late minister, in obedience to his instructions, judiciously co-operated with the ministers of these powers in all peaceful measures to secure by treaty the just concessions demanded by the interests of foreign commerce. The result is, that satisfactory treaties have been concluded with China by the respective ministers of the United States, Great Britain, France, and Russia. Our "treaty, or general convention of peace, amity, and commerce" with that empire was concluded at Tientsin, on the 18th of June, 1858, and was ratified by the President, by and with the advice and consent of the Senate, on the 21st of December following.

On the 15th of December, 1858, John E. Ward, a distinguished citizen of Georgia, was duly commissioned as envoy extraordinary and minister plenipotentiary to China. He left the United States for the place of his destination on the 5th of February, 1859, bearing with him the ratified copy of this treaty, and arrived at Shanghai on the 28th May. From thence he proceeded to Pekin, on the 16th June, but did not arrive at that city until the 27th July. According to the terms of the treaty the ratifications were to be exchanged on or before the 18th June, 1859. This was rendered impossible by reasons and events beyond his control, not necessary to detail; but still it is due to the Chinese authorities at Shanghai to state that they always assured him no advantage should be taken of the delay, and this pledge has been faithfully redeemed.

On the arrival of Mr. Ward at Pekin, he requested an audience of the Emperor to present his letter of credence. This he did not obtain in consequence of his very proper refusal to submit to the humiliating ceremonies required by the etiquette of this strange people in approaching their sovereign. Nevertheless, the interviews on this question were conducted in the most friendly spirit, and with all due regard to his personal feelings and the honour of his country. When a presentation to his majesty was found to be impossible, the letter of credence from the President of the United States was received with peculiar honours by Kweiliang, "the Emperor's Prime Minister, and the second man in the empire to the Emperor himself." The ratifications of the treaty were afterwards, on the 16th of August, exchanged in proper form at Pci-tsang. As the exchange did not take place until the day prescribed by the treaty, it is deemed proper, before its publication, again to submit it to the Senate.

It is but simple justice to the Chinese authorities to observe, that throughout the whole transactions they appear to have acted in good faith and in a friendly spirit towards the United States. It is true this has been done after their own peculiar fashion; but we ought to regard with a lenient eye the ancient customs of an empire dating back for thousands of years, so far as this may be consistent with our own national honour. The conduct of our minister on the occasion has received my entire approbation.

In order to carry out the spirit of the treaty, and to give it full effect, it became necessary to conclude two supplemental conventions—the one for the adjustment and satisfaction of the claims of our citizens, and the other to fix the tariff on imports and exports, and to regulate the transit duties and trade of our merchants with China. This duty was satisfactorily performed by our late minister. These conventions bear date at Shanghai on the 8th November, 1858.

Having been considered in the light of binding agreements subsidiary to the principal treaty, and to be carried into execution without delay, they do not provide for any formal ratification or exchange of ratifications by the contracting parties. This was not deemed necessary by the Chinese, who are already proceeding in good faith to satisfy the claims of our citizens, and, it is hoped, to carry out the other provisions of the conventions. Still I thought it was proper to submit them to the Senate, by which they were ratified on the 3rd of March, 1859. The ratified copies, however, did not reach Shanghai until after the departure of our minister to Pekin, and these conventions could not, therefore, be exchanged at the same time with the principal treaty. No doubt is entertained they will be ratified and exchanged by the Chinese Government, should this be thought advisable; but, under the circumstances presented, I shall consider them binding engagements from their date on both parties, and cause them to be published as such for the information and guidance of our merchants trading with the Chinese empire.

Naval and Military.

THE CHINA EXPEDITION.

Her Majesty's screw transport *Urgent*, announced in our last to sail from Dublin for the Cape, with the head-quarters of the 2nd battalion of the 10th Regiment, and there embark for China a portion of the 1st battalion of the 2nd Regiment, has been employed in conveying to Cork, from Portsmouth, the 24th Regiment, ordered from Aldershot, in consequence of an affray which will be found noticed below. In leaving Portsmouth, she, like the *Vulcan*, ran foul of a vessel, and sustained some injury; her machinery was also found defective, and meeting with bad weather, she was compelled to put into Falmouth. According to this rate the *Urgent* rather belies her name, and we should not be surprised to find her steaming into Hong Kong when all urgencies for the expedition to the Peiho will have been provided

for. The *Fawn* and *Mutine* are not intended for the China station, and no other vessels have been announced.

The hired steam transport *Powerful*, No. 2, sailed on December 29; (the *Thunder*, No. 1, sailed on December 15); the *Melbourne*, No. 3; *Mauritius*, No. 4; *Adelaide*, No. 5; *Sir William Peel*, No. 6, have since sailed; and the *Khersonese*, No. 7, will be despatched in all this month. The *Tiger* is reported to be engaged as No. 8; they are all very fine vessels of 1,200 to 2,000 tons; they convey principally stores, ammunition, &c., but on arrival in China will be used as hospitals and transports. The *Sir William Peel* has on board a complete battery of nine-pounder brass guns. In addition to these, several of the vessels on the berth for Hong Kong are taking out stores, &c.

A detachment of the Hospital Corps proceed by the *Mauritius*, consisting of 1 sergeant-major, 1 sergeant, and 10 privates; and 3 sergeant-majors, 4 colour-sergeants, 27 sergeants, and 66 privates by the *Melbourne*.

The *Himalaya* is now embarking at Purfleet the Armstrong guns, batteries, &c., already announced in preparation. The total quantity is said to be equal to 2,000 tons, and it is expected she will sail on the 15th for Alexandria, where they will be conveyed across the desert to Suez, and thence to Hong Kong. Lieut.-Col. Barry and Captain Milward will proceed by the vessel with two battalions of the 4th Brigade of Royal Artillery. No other reinforcements are in progress or announced, and it is, of course, now conclusive that the troops for the expedition are to be supplied from India as announced in our September number. If Sir Hope Grant cannot raise the necessary force there, the expedition to Peking will be thrown over another season, a respite which of course John Chinaman will employ to our detriment.

The Calcutta journals announce that Lieut.-General Sir James Hope Grant is organising at Calcutta the expedition for China, which is to be 10,000 men. The 27th, 53rd, 60th, 76th, and 99th Regiments, with the 1st and 2nd Bengal Europeans, have been warned for service. Two battalions of artillery are to be despatched. The means of transit from Tientsin or Tanchow to Peking are to accompany the forces, and considerable stress is laid on this portion of our difficulties in the coming war, in India and in this country. The *Army and Navy Gazette* (first number) announces the following appointments:—Brevet-Major the Hon. A. H. Anson, V.C., 7th Hussars, and Captain F. R. C. Grant, 5th Lancers, to be aides-de-camp to General Hope; and Colonel the Hon. St. George Foley, C.B., who has been acting as Military Secretary to Major-General Straubenzee, to be British Military Commissioner at the Head-Quarters of the General Commanding the French forces.

The Prussian frigate *Arcona* has arrived at Portsmouth from Danzig for Japan, but owing to heavy weather in the channel she may have to dock. She has 27-68 pounders.

The Royal Marine Light Infantry, being considerably over the first portion of their augmentation, will early in the present year receive the remainder voted, as well as an increase of general and other officers to which they are entitled. Lieutenant-General Travers, ordered home from China, will on his arrival assume the office of Deputy-Adjutant-General, with Major Rodney as his assistant, the established period of five years of the present officials having expired in December last.

H.M.S. *Simoon* and *Sphinx*, with gun-boats *Hardy* and *Havock*, arrived at St. Vincent's, Dec. 6, and the three last sailed on 7th for Rio Janeiro and China. Encounter and gun-boat *Grasshopper* arrived on 7th, and sailed on 11th. On 8th *Odin* and the gun-boat *Weazel*, and on 9th the *Beagle*, and sailed same day. On 10th gun-boat *Flamer*, and on 11th gun-boat *Snap*, and sailed on 11th.

Notice is given that preparations are being made for the intended distribution of the amount awarded for the destruction of pirates in the China seas by her Majesty's ship *Comus*, between the 24th and 27th of August, 1856.

Major-General the Hon. T. Ashburnham, C.B., who was in China in 1857, has succeeded to the colonelcy of the 82nd Regiment, vacant by the death of Lieutenant-General Hamilton. The colonelcy of the 66th Regiment has also become vacant by the death of General Blunt. By this event, Colonel Walker, C.B., of the Scots Fusilier Guards, becomes a major-general, and in consequence of his promotion, Colonel Ridley, Colonel Dalrymple, Captain the Hon. R. Mostyn, and Lieutenant Stephenson respectively gain a step of regimental rank. The *Times*, in noticing the appointment of General Ashburnham, has the following remarks:—"Omitting all mention of the previous incidents of his career, had he not in a recent instance, when the fate of British India was trembling in the balance, by that skilful retrograde movement upon the deck of the homeward-bound steamer, struck terror into the minds of the foe? Had he not—so burning was his patriotism, so overpowering his love of his native land—hurried back to the shores of England, without regard to those rigid rules of military service which are only binding on the pedant and the martinet?"

Lord Clyde will, in all probability, arrive in Dover from India by the overland route, *via* Marseilles, on or about the 15th February.

Major Drummond Stewart, V.C., has been presented with a sword,

value 100 guineas, by his father's tenants, to commemorate his return from India and China.

Vessels from India with the malcontent soldiers are now arriving in quick succession.

A diving-bell has been shipped from London for the Madras Government. An engineer to superintend its use and instruct divers is sent out in charge. This betokens an approaching fishery of the pearl oyster banks off Tuticorin.

The staff of the 12th brigade of Royal Artillery are ordered to proceed to the head-quarters of the brigade at the Mauritius. The officers comprising the staff are Lieutenant-Colonels Turner, C.B.; J. N. A. Freese, C.B.; and Cockburn; Colonels P. Benn and J. McCoy; Adjutant Le Mesurier, C.B.; Quartermaster Keating, and Surgeon Prothero.

The East India College at Haileybury, once the celebrated nursery of the Indian civil service, is about to become a depot for military recruits. By the fresh arrangements contemplated accommodation will be provided for 900 soldiers. The library and quadrangle of the college are to be turned into dormitories.

The Sardinian Government has, it is said, definitely decided that the frigate *Eurydice* shall be sent to China, in consequence of the events which are impending there. It is said that a high functionary of the Sardinian government is to go out in her as Minister Plenipotentiary, charged to negotiate treaties with China, Japan, and Siam.

RESIGNATION OF ADMIRAL BOWLES, C.B.—A correspondence has taken place between the Admiralty and the Commander-in-Chief at Portsmouth, relative to the papers which have been published in connection with the case of the *Princess Royal*. In answer to questions from the Admiralty, Admiral Bowles has stated that those papers were published with his sanction, and he at the same time tendered his resignation in case their lordships disapproved the publication. The gallant Admiral's resignation has been accepted by their lordships, and it is probable that he will be relieved from his command at Portsmouth on the 1st of March next. Admiral Bruce will, in all probability, succeed to the command, and that Captain Hillyar, now of the *Queen* will be appointed to succeed Captain Farquhar, of the flag-ship.

SERIOUS MILITARY RIOT AT ALDERSHOT.—At 10 o'clock on Sunday night the "assembly" was sounded, in consequence of a deadly affray then taking place between the soldiers of the 2nd Battalion of the 24th Regiment and the Tower Hamlets Militia, in the course of which two of the militia were shot dead, and another was mortally wounded (since dead). The bugler who was on duty jumped over the ramparts, and was so severely injured that it is thought he cannot recover. On Monday morning 60 of the 14th Regiment, who had been secured during the night, and whose rifles were loaded with ball cartridge, were marched to the North Camp, where they remain. It appears the men after dinner on Christmas day quarrelled as to who had fared best, and words led to blows, and ultimately to the use of arms. To punish them they were packed like sheep, and put to sea in the *Urgent* for Cork. Opinion has been expressed that they should have been put to road-making for a month at the camp.

The *Steam Shipping Chronicle* announces that the building of the new steam batteries has been awarded—one to Mr. Palmer, of Jarrow, the other to Messrs. Westwood and Baillie, of Millwall. The former has been allowed fifteen months to complete his contract, which has been taken at £43 per ton; the latter have agreed to complete their vessel within twelve months, the price being £44 per ton. The tonnage of each vessel is 3,668 tons, builders' measurement. This will enable us to form some estimate of the enormous cost of these vessels, since the former will cost £157,724, and the latter £161,392. This, it must be remembered, is for the mere hull of the boat; and as her equipment will necessarily be very expensive, and her engines of immense power, we shall take a low estimate of the cost when we assume that each vessel will, when ready for sea, cost about a third of a million of money. This is purchasing vessels at the rate of about three for every million of pounds sterling. These, however, are only the smaller steam batteries; those already building of 6,000 tons will cost upwards of a quarter of a million, or £264,000 for the hull alone; and when fitted for sea, will not cost less than half a million of money.

Our Paris correspondent has forwarded us the following account, which he states is necessarily incomplete, owing to the great difficulty in obtaining information:—

THE FRENCH EXPEDITION TO CHINA.—101st regiment of the line, about 2,400 men; 102nd regiment of the line, about 2,400 men; 2nd battalion of chasseurs à pied (called chasseurs de Vincennes), about 800 men; 16 companies of marines, about 1,600 men; 16 companies of naval; 16 companies of riflemen; two companies of engineers, about 240 men; 5th battalion of artillery; 40 guns; 1st regiment of cavalry (number not announced); two naval engineers and two hydrographic surveyors to construct boats for the rivers, &c.; a well provided hospital staff; strong corps of military labourers.

Ships.—*Andromache*, sailing frigate, fitted as a transport; *Renonance*, 60 gun frigate; *Vengeance*, frigate; *La Flotte*, frigate; *Perseverante*, frigate; *Rhone*, *Dryade*, *Calvados*, *Jura*, *Garonne*, *Entrepenante*, *Cabeados*, *Rhin*, *Nièvre*, screw transports with material; *Racer*, *European*, *Panther*, steam transports of 2,400 tons, purchased in England to carry out the twenty-four small iron gun-boats. It is said that twenty-one sailing transports have left Marseilles with provisions and necessities; these are described as being from 1,200 to 3,000 tons burthen. Some of the vessels named above may be included in the twenty-one.

The remainder of the expedition is now really said to have departed; it consisted of 450 men, which left Toulon a few days since in a *Marseilles* vessel called the *Rheine des Clippers*, taken up by the Government for the special occasion. Besides the men referred to, this vessel carried 1,000 tons of coal, and a quantity of war material. The government of the marine division at Toulon has received orders to prepare the crews for the twenty or twenty-four small gun-boats now

approaching completion. Each of these little vessels will carry one cannon of the new kind—canons, rayées, "No. 3"—and will be manned by a crew of twenty.

It is said that the minister of war is organising a corps of reserve for China, which will be sent overland in case of necessity.

PROMOTIONS AND APPOINTMENTS IN HER MAJESTY'S ARMY AND NAVY.

ARMY.

WAR OFFICE, PALM MALL.

82d Regiment of Foot—Major-General the Hon. Thomas Ashburnham, C.B., to be colonel, vice Lieutenant-General Nicholas Hamilton, deceased.

7th Regiment of Dragoon Guards—Assistant-Surgeon John Noble Shipton, from the 23d Foot, to be Assistant-Surgeon, vice Smith, appointed to the Staff.

8th Light Dragoons—Quartermaster-Sergeant Michael Carey to be Quartermaster, vice Lane, deceased.

10th Light Dragoons—Gentleman Cadet Thomas Astell St. Quintin, from the Royal Military College, to be cornet, without purchase, vice Houston, superseded, being absent without leave; Veterinary-Surgeon William Thacker, from the 15th Light Dragoons, to be Veterinary-Surgeon, vice Phillips, promoted.

15th Light Dragoons—Acting Veterinary Surgeon Martin Mence to be Veterinary Surgeon, vice Thacker, appointed to the 10th Light Dragoons.

17th Light Dragoons—Lieutenant James Duncan to be captain without purchase, vice Seymour, deceased; Lieutenant the Hon. William Henry Curzon to be captain, by purchase, vice Sir George H. Leith, Bart., who retires; Riding Master George Pumfrett, to be cornet, without purchase, and adjutant, in succession to Lieutenant Duncan, promoted; Sergeant Major Thomas Martin, from the Cavalry Depot, Maidstone, to be Riding Master, vice Pumfrett, appointed cornet and adjutant.

18th Light Dragoons—The second Christian name of Cornet Malet is Esdalle, and not Esdale, as stated in the "Gazette," of the 18th October.

Royal Artillery—Acting Veterinary Surgeon Henry Hussey, to be Veterinary Surgeon.

Military Train—Benjamin Simmer, Gent., to be ensign, without purchase, vice Taylor, promoted. The promotion of Ensign Alexander McDonald to a lieutenancy, without purchase, on the 29th November, 1859, to be ante-dated to the 4th of that month.

2nd Regiment of Foot—Gentleman Cadet, Henry Augustin Robinson, from the Royal Military College, to be ensign without purchase, vice Pollard, appointed to the 67th Foot.

3rd Foot—Gentleman Cadet, Archibald William Peyton, from the Royal Military College, to be ensign, without purchase, vice Graves, promoted; John Francis Whitworth, Gent., to be ensign, by purchase, vice Theophilus Jones, promoted.

5th Foot—Francis Goldie Taubman, Gent., to be ensign, by purchase, vice Shoobred, promoted.

6th Foot—Lieutenant Richard Shiel to be captain, without purchase, vice Jones, deceased; Ensign William Smith to be lieutenant, without purchase, vice Shiel; Gentleman Cadet, Henry Adolphus Hebel, from the Royal Military College, to be ensign, without purchase, vice Wilson, promoted; Gentleman Cadet, Sydney George Granville, from the Royal Military College, to be ensign, without purchase, vice Smith.

7th Foot—Gentleman Cadet, William Wheaton Chard, from the Royal Military College, to be ensign, without purchase, vice Frampton, promoted; the Honourable Wyndham Percy Moreton to be ensign, by purchase, vice Rice, who retires.

8th Foot—Captain Frederick William John Dugmore, from the 3rd West India Regiment, to be captain, vice Metge, who exchanges; Gentleman Cadet, Thomas Oliver Wingate, from the Royal Military College, to be ensign, without purchase, vice De Roebeck, appointed to the 60th Foot.

10th Foot—Christopher Campbell Oldfield, Gent., to be Ensign, by purchase, vice Berger, promoted.

11th Foot—Gentleman Cadet John Gordon Deedes, from the Royal Military College, to be Ensign, without purchase, vice F. D. Walker, superseded, for being absent without leave.

13th Foot—Ensign William Nunnington, from the 58th Foot, to be Ensign, vice Hall, who exchanges.

15th Foot—Charles Keir Farquharson, Gent., to be Ensign, by purchase, vice Hawks, promoted.

19th Foot—Lieutenant Charles Hereford, to be captain, by purchase, vice Stuart, who retires; Ensign William Bennet, to be lieutenant, by purchase, vice Hereford.

20th Foot—Henry Lawrence, Gent., to be ensign, by purchase, vice Fraser, promoted.

21st Foot—Edward George Lingard, Gent., to be ensign, by purchase, vice Bussell, promoted; Henry Fielden, Gent., to be ensign, by purchase, vice Hayes, promoted; Thomas William Parke Airey, Gent., to be ensign, by purchase, vice Browne, promoted.

23rd Foot—Gentleman Cadet Anthony Prichard Hutchinson, from the Royal Military College, to be ensign, without purchase, vice Dowler, appointed to the 52nd Foot; William Henry Benyon, Gent., to be ensign, by purchase, vice Tulloch, promoted; St. Aubyn Henry Player, Gent., to be ensign, by purchase, vice Sadler, promoted; Assistant Surgeon Charles Ferran Squire, from the Staff, to be assistant surgeon, vice Shipton, appointed to the 7th Dragoon Guards.

24th Foot—Henry Rich Farquhar, Gent., to be Ensign, by purchase, vice Goodrich, who retires.

25th Foot—Sergeant-Major Henry Wilkinson, from the 32nd Foot, to be ensign, without purchase; Sergeant-Major John Charles Thompson, to be ensign, without purchase, and adjutant.

36th Foot—Gentleman Cadet Thomas Enraght Percy Tyrwhitt, from the Royal Military College, to be Ensign, without purchase, vice Taylor, promoted.

38th Foot—The commission of Lieutenant Philip H. Eyre, as Adjutant, to be ante-dated to the 20th September, 1858.

42nd Foot—Henry Jennings Bramly, Gent., to be ensign, without purchase, vice Coleridge, promoted in the 25th Foot.

53rd Foot—Ensign William Lowry Auchinleck to be lieutenant, by purchase, vice Byrne, who retires.

54th Foot—Gentleman Cadet Michael O'Brien, from the Royal Military College, to be ensign, without purchase, vice Sir C. W. Burdett, Bart., promoted.

56th Foot—Gentleman Cadet William Barnett, from the Royal Military College, to be ensign, without purchase, vice Swinloe, promoted.

58th Foot—Ensign William James Hall, from the 13th Foot, to be ensign, vice Nunnington, who exchanges; Frank Cunliffe, Gent., to be ensign, by purchase, vice T. E. Jones, promoted.

61st Foot—The Hon. Edward John Chetwynd, to be ensign, by purchase, vice Fane, promoted.

64th Foot—John Symeon Walker, Gent., to be ensign, by purchase, vice Daniel, promoted.

68th Foot—William Henry France Palmer, Gent., to be ensign, by purchase, vice Cathcart, promoted in the Coldstream Guards.

70th Foot—Gentleman Cadet Henry Frederick Greatwood, from the Royal Military College, to be ensign, without purchase, vice Garcia, promoted.

73rd Foot—Charles William Henry Richardson, Gent., to be ensign, by purchase, vice Fraser, promoted.

76th Foot—George Alexander, Gent., to be ensign, by purchase, vice Butler, promoted.

77th Foot—George Cook, Gent., to be ensign, by purchase, vice Kirk, promoted; Assistant-Surgeon George Forbes Adams, from the Staff, to be assistant-surgeon, vice Hyde appointed, to the Staff.

81st Foot—Gentleman Cadet William Mitchell Innes, from the Royal Military College, to be ensign, without purchase, vice Curry, appointed adjutant; William Harle, Gent., to be ensign, by purchase, vice Warren, promoted.

86th Foot—Gentleman Cadet Edward James Harris, from the Royal Military College, to be ensign, without purchase, vice the Hon. T. J. Wynn, appointed to the Rifle Brigade.

89th Foot—Gentleman Cadet Thomas Parnell Green, from the Royal Military College, to be ensign, without purchase, vice Dickson, deceased.

98th Foot—Gentleman Cadet Arthur Brett Onslow, from the Royal Military College, to be ensign, without purchase, in succession to Lieutenant Woodward, deceased.

1st West India Regiment—Lieutenant Charles Chevalier, from half-pay late Land Transport Corps, to be Lieutenant, vice Goodman, appointed adjutant of a recruiting district.

3rd West India Regiment—Captain William Frederick Metge, from the 8th Foot, to be captain, vice Dugmore, who exchanges.

Royal Regiment of Horse Guards—C. F. R. Rushout, Gent., to be Cornet, by purchase, vice Maxwell, appointed to the 15th Light Dragoons.

1st Dragoons—W. W. F. Hay, Gent., to be Cornet, by purchase, vice R. Stuart, who has retired; A. Mesham, Gent., to be Cornet, by purchase, vice Osborne, promoted.

Military Train—Ensign H. Adams to be Lieutenant, without purchase; Lieutenant J. Devine to be Adjutant, vice Thompson, who resigns the Adjutancy only.

3rd Regiment of Foot—T. G. C. Caulfield, Gent., to be Ensign, by purchase, vice Hobson, promoted.

4th Foot—Gentleman Cadet J. G. Hepburn, from the Royal Military College, to be Ensign without purchase, vice Durrant, promoted.

6th Foot—Lieut. J. T. Nugent to be Instructor of Musketry.

8th Foot—E. Williams, Gent., to be Ensign, by purchase, vice Rannatne, promoted.

11th Foot—Gentleman Cadet W. M. De Rune Barclay, from the Royal Military College, to be Ensign, without purchase, vice Deedes, whose appointment as stated in the "Gazette" of Dec, 30, 1859, has been cancelled; J. H. Healy, Gent., to be Ensign, by purchase, vice Price, who retires.

12th Foot—J. E. Harris, Gent., to be Ensign, by purchase, vice Thompson, appointed to the 79th Foot.

15th Foot—F. C. Rokinson, Gent., to be Ensign, by purchase, vice Luck, promoted.

23rd Foot—M. A. Saunders, Gent., to be Ensign, by purchase, vice Liddell, promoted.

24th Foot—P. Connolly, Gent., to be Ensign, by purchase, vice Chamberlain, promoted.

25th Foot—Ensign H. W. Scriven, from the 3rd Foot, to be Ensign.

28th Foot—Serjeant Major A. Beere to be Ensign, without purchase, vice Horriblow, promoted.

29th Foot—The promotions of Brevet Lieut. Colonel J. R. Wheeler, Captain L. Farrington, Lieut. J. J. H. Gordon, and Ensign W. Boycott, to be ante-dated to December 2, 1859.

31st Foot—Ensign A. Hamilton to be Lieutenant, by purchase, vice Leeson, promoted; Ensign A. J. Danyell to be Lieutenant, by purchase, vice Fairfax, promoted in the 15th Foot.

35th Foot—W. Tolson, Gent., to be Ensign, by purchase, vice Dillon, promoted.

40th Foot—L. R. Phillips, Gent., to be Ensign, by purchase, vice Lucas, promoted.

53rd Foot—W. E. S. Battiscombe, Gent., to be Ensign, by purchase, vice Auchinleck, promoted.

57th Foot—H. M. Powell, Gent., to be Ensign, by purchase, vice C. M. Clarke, promoted.

58th Foot—Lieut. R. W. Archibald, to be Instructor of Musketry, vice Hingeston, promoted to a company.

59th Foot—H. H. Griffiths, Gent., to be Ensign, by purchase, vice Macnamara, promoted.

60th Foot—T. W. M. Edmunds, to be Ensign, by purchase, vice Nevinston, promoted.

76th Foot—R. Davies, from the Military Train, to be Quartermaster, vice Packwood, whose appointment as stated in the "Gazette" of December 20, 1859, has been cancelled.

77th Foot.—C. C. Welman, Gent., to be Ensign, by purchase, vice Jackson, promoted.

80th Foot.—W. K. Westropp, Gent., to be Ensign, by purchase, vice Ridout, promoted.

83rd Foot.—Captain J. S. Keats, from half-pay Waggon Train, to be Captain, repaying the difference, vice Sweeny, who exchanges; Lieut. J. Wakefield to be Captain, by purchase, vice Keats, who retires; Ensign H. C. Whitlock to be Lieutenant, by purchase, vice Wakefield.

84th Foot.—Lieut. J. H. F. Blyth, from half-pay 88th Foot, to be Lieutenant, vice Magrath, promoted in the 25th Foot; Ensign H. Arkwright to be Lieutenant, by purchase, vice Blyth, who retires.

87th Foot.—Ensign R. G. F. Poynter to be Lieutenant, vice Lynch, promoted.

91st Foot.—H. H. Roberts, Gent., to be Ensign, by purchase, vice Hamilton, promoted.

92nd Foot.—Ensign R. A. Emmet, to be Lieutenant, by purchase, vice Hunter, who retires.

95th Foot.—Lieut. J. Nichols, to be Instructor of Musketry, vice J. N. Crealock, promoted to a Company.

NAVY.

PROMOTIONS.

Lieutenant W. M. Sanctuary to be commander on the Reserved Half-pay List, vice Lloyd.

ASSISTANT ENGINEERS.—J. M. Smith to be chief engineer; H. Payne and J. Critchley to be acting second-class assistant engineer.

APPOINTMENTS.

Lieutenants Samuel H. Laston and A. Butler have been placed on the list of officers on the out-pension of Greenwich Hospital.

CAPTAINS.—Arthur P. E. Wilmot, to command of Sans Pareil; Edward K. Barnard, to Nile; E. S. Sotheby, C.B., to Conqueror; G. E. Patey, to Cumberland; H. D. Rogers, C.B., to Centurion.

COMMANDERS.—John F. C. Mackenzie, to Nile; P. De Saumarez, to Dasher; J. K. E. Baird, to Alacrity (commissioned).

LIEUTENANTS.—J. J. Gregory and W. B. A. F. Paterson, to Alacrity; E. W. Wilson, to Mersey; J. L. Trotter, T. W. Chapman, and W. Jardine, to Nile; V. Williams, to Ariadne; C. M. Le Messurier, to Conqueror; A. Henderson, to be additional to Hogue, for service in Goshawk, tender; W. B. A. F. Paterson, to Cumberland.

MASTERS.—J. Busden, to Mersey; C. J. Polkinghorne, to Nile; T. Pounds, to Alacrity; W. H. Parker, to Emerald.

SECOND MASTER.—Charles W. Ross, to Supply.

MASTERS' ASSISTANTS.—John M. Ross and Charles W. Baillie, to Queen; W. W. Anderson, to Nile; W. H. Mansell, to Ariadne.

STAFF SURGEONS.—G. D. McLaren, to Dauntless; T. W. Jewell, to Pembroke.

SURGEONS.—M. Thomson, to Russell; J. Bower, M.D., to Edinburgh; J. Gallagher, M.D., to Blenheim; T. Nelson, M.D., to Pembroke; J. W. Reid, M.D., to Nile; R. Pottinger, to Neptune; T. Nelson, M.D., and C. M'Shane, to Fisgard; P. W. Govell, to Alacrity; J. Flanagan, to Victory.

ASSISTANT SURGEONS.—W. C. Fairbairn, to be additional to Impregnable; Stephen Sweatman, confirmed to Archer. Acting assistant surgeons—Dr. M. J. Rahilly, to Gladiator; William McCombie, to Imaum; J. F. Kensey, to Renown; William Pattullo, to Queen.

PAYMASTERS.—H. Callaway to Alacrity; H. Perry to be Secretary's Clerk in Victory; G. J. Starr (commissioned); W. E. I. Veule to be additional to Wellington.

ASSISTANT PAYMASTER.—F. O. L. Patch to be Secretary's Clerk in Impregnable.

CHIEF ENGINEERS.—Thomas Brown to Excellent, for service in Bec; Thomas Ramsay to Wellington, for service in Nile; John T. Williams to Cumberland, for service in Galetea; William Pitt to Sans Pareil; T. Ramsay to Nile; F. Foreman to Emerald.

FIRST-CLASS ASSISTANT ENGINEERS.—James G. G. Dunn to Ariadne; Robert C. Reynolds to Excellent, for service in Stork; John Bruce (b) to Alacrity; E. J. B. Bird to Nile; E. Lilley to Conqueror.—Second Class:—Jeremiah P. Lloyd to Sans Pareil; John Osborne (promoted and appointed) to Alacrity. Third-Class:—George T. Crook to Alacrity; George W. Robins to Sans Pareil; G. F. Sutton to Nile.

ACTING FIRST-CLASS ASSISTANT ENGINEERS.—John Davenport to Wellington, for service in Lark. Second-Class:—G. Bull to Asia, for service in the Pitt; John A. Kitt to Sans Pareil.—Third Class:—James Warren to Fisgard, for service in Wiggeon; Walter Brock to Alacrity; James Aitken to Hogue; Gustav Adolph Carl Bencke to Asia, as supernumerary; Edward Carding to Royal Albert; William Fraser to Sans Pareil; J. Gibson to Nile; S. G. Hill to Asia; T. Jones to Asia;

CLERKS.—H. C. T. Medder and W. H. Martin to Nile; C. H. Stone to Britannia; N. D. E. Roberts to Cumberland; S. L. Lancaster to Ariadne.

MIDSHIPMAN.—C. McLaughlin to Ariadne.

Correspondence.

TO THE EDITOR OF THE "LONDON AND CHINA TELEGRAPH."

SIR,—In perusing the first volume of your valuable journal, I found a notice of our consuls in China, wherein you have very justly criticised the late appointments to that country. I wish, however, to draw your attention to one officer, Mr. C. A. Sinclair, at present acting consul at Ningpo, who has been in service as interpreter since 1843, and has always shown great assiduity, ability, and I may even add distinction, in all the offices he has held from that period up to the present time.

He is, in fact, a man on whom reliance has been placed, to discharge more responsible duties on an emergency; thus, in 1850 (you will find on reference to the Parliamentary consular return lately issued), he was entrusted with the consularship at Foo-chow-foo, from June, 1850, to December, 1852; and what is his reward? the consulateship of Ching-kiang-foo, with a salary of £900, while his more influential compeers, Mr. Meadows and Mr. Medhurst, have appointments of £1,300; and young and incompetent men, like the Messrs. Morrisons and Mr. Caine, have similar appointments, with salaries of £900 and £800.

Mr. Caine entered the service from school, in 1850 only, and is now made a full consul. I suppose this is a return for the valuable sinecure office his father has held, as Lieut.-Governor of Hong Kong, the acts of whom have been recently the subject of comment in our daily papers.

I do not advocate that men should be kept till they are grey-headed before they receive promotion, but knowing the great responsibilities attaching to a consul in China, I must say I should hesitate to live at a port where Mr. Morrison or Mr. Caine were in charge.

I observe Mr. Hodgson has been installed at Hakodadi, I hope his experience at Caen and Pau will have fitted him for that Oriental settlement; also Captain Vyse's army experience for Yedo.—I am, Sir, your obedient servant,

REWARD TO WHOM REWARD IS DUE.

Highgate, Jan. 7, 1860.

[Independently of the merits of Mr. Sinclair, which we can confirm, his salary is disproportionate to the importance of the post. Newchwang and Tangchow are allotted £1,300. It is an insult to his superior attainments to put him on a level with the Messrs. Morrison or Mr. Caine.—ED. L. C. T.]

Literature.

Macmillan's Magazine. Parts II. and III. Macmillan and Co., London and Cambridge.

Several papers appear in both of these parts of this magazine which will well repay perusal. That on the volunteer corps is practical and to the purpose; whilst the one on the writings of Louis Napoleon shows that the writer (the editor) has for some years made that extraordinary individual his study, and the reader has here the benefit of his thoughts. "Tom Browne at Oxford," goes on swimmingly; as each number of this serial appears, we find this story increases in interest. Each tale is told with considerable zeal and good feeling, and it will doubtless prove more attractive as it proceeds.

All the Year Round.

The Christmas number of this periodical will be found very interesting. The Tale of Two Cities is being dramatised by Tom Taylor, and will be performed at the Lyceum.

SELECTIONS.

SUPERSTITION IN MANILA.—Far more than the fair portion of domestic and social cares fall upon the Indian female, and she has far less than her becoming share of enjoyments. Barbarous practices are frequently associated with parturition. The Mabuling hilot, the good midwife, is called in. If the birth be delayed, witches are supposed to be the cause, and their dispersion is effected by the explosion of gunpowder from a bamboo cane close to a mat or pillow, and exposed to the air, to facilitate the escape of evil influences from the body, which is brought about by burning three wax tapers placed on the two cheeks and chin of the babe, often to its great peril. These practices are to some extent checked and controlled by the priests, who provide where they can for the baptism and registration of the infant.—*A Visit to the Philippine Islands, by Sir John Bowring, LL.D., F.R.S.*

ARRIVAL AT MANILA.—On anchoring off the city, Captain Vansittart despatched one of his lieutenants to the British Consulate, in order to announce our arrival, and to offer any facilities for consular communication with the *Magicienne*. They had some difficulty in discovering the consulate, which has no flagstaff, nor flag, nor any other designation. The consul had gone to his "ferme wordeli" where he principally passes his time among outcast Indians, in an almost inaccessible place, at some distance from Manila. The vice-consul said it was too late for him to come on board, though during a great part of the day we were receiving the representatives of the highest authorities of Manila. The consul wrote (I am bound to do him this justice) that it would "put him out" of his routine of habit economy if he were expected to fete and entertain with formality "his Excellency the Plenipotentiary and Governor of Hong Kong." I hastened to assure the consul that my presence should cause him no expense, but that the absence of anything which becomingly represented consular authority, on the arrival of one of her Majesty's large ships of war, could hardly be passed unnoticed by the commander of that vessel.—*Ibid.*

NOTES.

MR. LAWRENCE OLIPHANT'S "NARRATIVE OF LORD ELGIN'S MISSION TO CHINA AND JAPAN, IN THE YEARS 1857, 1858, AND 1859," has been published and met with a large sale. A review of this work, so far as regards the movements of the embassy in China has appeared in the *Times*, and occupies upwards of four columns of that journal. It is needless to say that a book coming from the pen of so able an author has met with great favour in the eyes of that great journal. This reviewer has given a rapid sketch of the events which passed in China during Lord Elgin's stay there, and we extract from it the following reference to Admiral Seymour's operation at the Taku forts:—"Mr. Oliphant, being the historiographer rather of the embassy than of the naval and military expedition, is succinct in his account of the capture of the forts. He witnessed this operation from the deck and maintop of the *Nimrod*, and he attributes its complete success, in a great measure, to the fact that the landing was made at the top of the tide, when only a few yards of mud had to be crossed, and when the blue-jackets could leap at once into the embrasures. 'We saw,' he says, 'the leading blue jackets jump into the battery; an instantaneous panic spread itself like lightning along the line of batteries at our feet, and in the *sauve qui peut* which followed some amusing scenes occurred, as Jack at the top of his speed dodged and chased the terrified soldiers, who, with outstretched arms and nimble legs, scattered in every direction.' We must, however, remember, as we contrast Sir Michael Seymour's attack with that of Admiral Hope, that the conditions were very different. In the successful attack the bamboo barrier yielded at once to the rush of the *Cormorant* steaming full power against it; in the unsuccessful attack there were three solid impediments of a breadth so great that no impetus could enable a steamer to break them. Again, Admiral Hope, in landing parties, found ditches in their front, which Sir Michael Seymour's were able to leap into the embrasures. There is no reason to doubt that if our seamen could have got at the Chinamen upon the second occasion, as they did upon the first, the result would have been the same.

The *Athenæum* says that at the "gentle solicitations" of Mr. Thackeray, "backed by the offer of a guinea a line," the poet Laureate has written a poem for the *Cornhill Magazine*. The poem is short, and bears the title of "Jithon."

Amongst the many interesting facts to be found in Captain McClintock's narrative is, that the extreme northernmost point of America had been determined, to which he affixes the name of Cape Murchison, in honour of the distinguished geologist.

Mr. Atkinson, author of "Oriental and Western Siberia," has another work in the press, "The Upper and Lower Amoor," a narrative of travel and adventure, which will be published by Messrs. Hurst and Blackett.

Nearly 50,000 copies of the celebrated pamphlet "*Le Pope et la Congres*," has been sold.

Messrs. Bell and Dalby have in the press an antiquarian work, by the Rev. J. Ridgway, entitled "The Gem of Thorney Island; or, the Historical Associations of Westminster Abbey."

The *Literary Gazette*, in noticing Sir John Bowring's work on the "Philippines," is inclined to be facetious at the learned doctor's expense. It is regretted that the waves of the China seas acted in so unbecoming a manner as to presume to toss the ship which conveyed the veteran diplomatist to Manila, and the conduct of the Philippine officials towards the "pompous" old member of the civil service, is highly approved. To this is added the not very complimentary remark that the most of the chapters could have been compiled at the British Museum by any professional bookmaker.

Foreign Miscellany.

CONSULAR APPOINTMENTS.—R. C. Antrobus, Esq., Belgian consul at Hong Kong, is appointed Chevalier of the Belgian Order of Leopold. The Grand Duke of Mecklenburg-Schwerin has nominated Mr. G. Cramer to be his consul at Singapore. M. G. Schuman has been appointed by the senate of Hamburg consul of Foo-chow-foo, and M. Rudolph Heinsen for Shanghai.

THE "OST".—This vessel, which was lately lost, was one of four clippers built last year, for the trade with the East, by a shipbuilder at Stettin, and called the *Ost* (East), *West*, *North*, and *South*.

MUSIC FOR THE PRUSSIAN EMBASSY TO CHINA.—The *Danzig Gazette* states, that on the proposal of Commodore Sundewall, the Prussian Admiralty have granted the band of the division of marines permission to accompany the expedition to China and Japan; the number of musicians will be considerably increased, and the bandmen have received orders to hold themselves in readiness to start for Portsmouth, where they will join the squadron.

THE GOLD AND SILVER CROP OF THE UNITED STATES.—The *New York Herald* says:—"The *Baltic* has arrived at this port, bringing from California 1,700,000 dols. in gold, besides perhaps a quarter of a million in the hands of passengers. The gold crop of California exhibits no diminution in its yield, notwithstanding the immense returns of the precious metals it has been pouring out for the past 10 or 11 years. Indeed, it has been steadily increasing of late. We find that the imports of gold for 1859, up to the date of the *Baltic's* arrival, amount to nearly 36,000,000, with three more shipments yet to be received between this and the end of the year, which will doubtless bring it up to 40,000,000, and will show an increase over the shipments of 1858 of about 4,000,000, while the increase during that year over 1857 was close on 2,000,000. The returns of gold from the Australian fields, it may be remarked, do not exhibit so favourable a record as this. Then, we have the Pike's Peak and Fraser River mines, both giving promise of a rich harvest in time. Up to the present, Pike's Peak has yielded from half a million to a million, and the work has not fairly commenced there; while the Fraser River mines, which have been longer in operation, have given from 2,000,000 to 3,000,000. Arizona, meantime, opens to us her fruitful fields of silver, which promises to be abundant; and perhaps that territory only requires

the aid of machinery, mining skill, and a ready transit, to render it as valuable as California in the hardly less precious metal. When the contemplated road from Arizona to Guaymas is opened, we shall probably have such another rush of emigration as the gold discovery in California produced, and it is not unlikely that silver will soon come pouring in as plentifully from Arizona as gold from California—a fact which will effect some change in the relative value of the two metals. Before many years, then, we may be counting the gold and silver crop of the United States on an equal footing with our cotton crop in value and importance."

THE COOLIE TRADE.

We noticed in our last that the emigration agent, Mr. Austin, who is acting for the planters in the British West Indies, had obtained the sanction and support of the Chinese Government in his scheme. The following are the regulations laid down by him:—

1. All Chinese desiring to emigrate to the British West Indies, should make application at the British Emigration House; and, if they agree to the conditions offered, and their services are accepted, their names and all particulars relative to themselves and their families will be registered by the British emigration agent, and an officer appointed by the Chinese Government to superintend the said emigration. They will then have the choice of returning to their own home until the day appointed by the emigration agent for their reappearance at the Emigration House, or they will be allowed to reside at the Emigration House, where they will be fed free of charge until the ship is ready for sea.

2. While living at the Emigration House, the emigrants will be at liberty to hold free communication with their families or friends, to visit or be visited by them, or to pass in and out during stated hours. They will, of course, strictly conform to the various rules established by the emigration agent for the order, cleanliness, or health of the Emigration House. They will receive forty-eight hours' notice of their intended embarkation, which, together with the signing of their contracts, will be conducted in the presence of the emigration agent and the Chinese superintending officer, both of whom will previously have inspected the ship, and have satisfied themselves that all the requirements of the law for the provisioning and the comfort of the emigrants have been duly complied with.

3. No emigrant, when once embarked, shall be again allowed to land; and no ship shall be allowed, under any pretence whatever, to protract her departure beyond four days after the embarkation of her emigrants.

4. Any person may obtain copies of the regulations and conditions under which British emigration is to be conducted, by application at the British Emigration House, and these shall also be supplied to any emigrant who wishes to send them to his friends. Copies of the same shall also be posted at the entrance to and about the Emigration House. The Chinese Government will also give these regulations and conditions the utmost publicity throughout the surrounding towns, villages, and districts, in order that the people may everywhere be enabled to distinguish between the emigration which is thus conducted, and the fraudulent proceedings of the "crimps," which are held in abhorrence by the British Government.

5. The British emigration agent will always reside at the Emigration House, and accommodation will also be there provided for the Chinese superintending officer, if he choose to avail himself of it, or if the latter should prefer to live elsewhere, he may obtain access to the Emigration House and see the emigrants whenever he wishes to do so. Thus any statement or complaint that an emigrant may at any time wish to make, either to the British emigration agent or Chinese superintending officer, can at once be heard and attended to.

THE NEW AND SAFE PASSAGE THROUGH THE STRAITS OF BANCA.

A new passage has just been discovered by the officers of the surveying vessel *Saracen*, through the Straits of Banca, the advantages of which are as follows:—The approaches are marked by the well defined mountain of St. Paul and conical hills of Gadong and Tobo Alié Lama, and in fine clear weather the more distant range of Padang. These cannot fail to point out this channel, and the deep water within half a mile of the Dapur P. will give strangers confidence in steering for the land. The water also being much deeper than in the Lucipara Channel, causes banks which are mostly sand to be easily recognised by the light colour or the water on them. The tide flows more regularly in this channel, and also sets directly through it, which enables vessels even in calms to drop through. Whereas ships are often in light airs and calms set over amongst the dangerous banks whilst rounding First Point in their endeavour to get through the Lucipara. The wind in the N.W. monsoon blows off the land on the Banca shore, and throughout the year land breezes generally occur during the night. We have often experienced a strong land breeze from the N.E. even in the S.E. monsoon, when the wind was blowing directly through the Lucipara channel from the N.W. Prominent hills and points are to be seen along the Banca coast, bearings of which will enable a vessel at any time to ascertain her position. The channel is also three miles broad in its narrowest part, whilst the Lucipara is but two miles, and a depth of not less than seven fathoms will enable vessels of the largest size to pass through at any time or tide. This channel therefore possesses many advantages over the Lucipara, and the late Lieutenant Smits, of the Dutch R.N., whose greater experience in these seas give more force to my own observations, states in his direction before referred to, that the passage between Lucipara and Banca would have great advantages in entering or leaving the Straits of Banca (were it not encumbered so much with shores and banks) the position of which are now by the recent survey correctly known.

LONDON, FRIDAY, JANUARY 13, 1860.

RESOURCES AND TRADE OF SIAM.

OF the several countries of the Far East with which we carry on trade, Siam deserves consideration from our merchants, for what it can furnish as well as what it may take in return. Occupying as it does an important position between Burmah and our Tenasserim provinces on the west, and Cochin-China on the east, communicating with the seaboard by several rivers, and with an industrious population, much trade remains yet to be carried on there. With the view of bringing the country and its productions more prominently under notice, we shall condense and collect from prices current and trade reports, and the consular accounts, such facts and details as appear calculated to be useful for guidance and reference. It is only since 1856 that we have carried on any direct trade with Siam. The value of the imports in 1856, at Bangkok, was £375,261; of the exports, £316,619. In 1857, we received from Siam 30,303 cwt. of sugar, 92,516 lbs. of pepper, 3,392 lbs. of salt, 349 cwt. of hides, and a few other commodities. We made in that year a preliminary shipment of goods to the value of £64,251. According to the total returns, the British trade at Bangkok, for 1857, was as follows:—Arrivals: tonnage, 17,454; value of cargo, £213,790; departures: tonnage, 12,318; value of cargo, £128,295. The articles of British manufacture which have been found most suited to Siamese consumption are, white and grey long cloths, madapollams, cambrics, jaconets, and book lappets, velvets, plain and figured, checked fancy muslins, American drills, cotton umbrellas, figured long cloths, white and dyed, dyed cambrics and long cloths, prints, chintzes, furniture, and neutrals; Siam chowls or dresses, Turkey red cloth, grey cotton twist, and Turkey red ditto, imperial red and blue twist, long ells, ladies' cloth, Spanish striped merinos of assorted colours, canvas, iron, steel, lead and spelter, earthenware, glassware and lamps assorted, muskets, gun-locks, brimstone, and bees'-wax. The imports from China and from India are even more varied, and consist of almost every article of manufacture, trifling or important, produced in those countries; these being needed, not only to meet the tastes and requirements of the Siamese, but also to supply the wants of the natives of India and China, many of whom are domiciled in Siam. To the Chinese, in fact, the Siamese are chiefly indebted for the trade which the country possesses. Almost every undertaking requiring skill, enterprise, and industry, is in the hands of the former; they are the principal traders, planters, shipbuilders and farmers of the revenues; and, either through fear or favour, enjoy greater privileges than the people of the soil. Their numbers, which are constantly increased by fresh arrivals from China, amount, according to the most creditable estimate, to 1,500,000, being about one-fourth of the whole population of Siam.

Sugar is looked upon as the principal return for British imports. Its cultivation, as an article of commerce, originated in the enterprise of Chinese settlers, in the year 1810. In 1822 it had reached 3,700 tons; in 1835, 8,036 tons; and in 1840, 15,295 tons. The flourishing condition of the trade was at that time unfortunately interfered with by the king conceiving the idea of taking part in it himself, to the great prejudice of all other merchants. The present king abolished the monopoly which had been started by his predecessor, and cultivators are again free to sell to any customer. The manufacturer, however, still remains burdened with various taxes, which serve to keep up the cost of pro-

duction and to check demand, so that 5,000 to 6,000 tons are now spoken of as an average crop. Rice may be expected to become an important article of export. The extreme facility of irrigation, and the periodical inundations of the Menam, supply with unusual certainty the fertility necessary for the growth of this cereal. The demand for rice, both for home and Oriental consumption, is constantly on the increase, and the annual exportation from our own province of Arracan has risen, in the short course of ten years, to 120,000 tons. In timber much might be done. The teak forests of Siam are situated at some considerable distance up the Menam, and the trees, when felled, are floated down in large rafts to Bangkok. There is always a considerable demand for this timber, both in the markets of China and Singapore. There is a large export of sapan-wood, for dyeing purposes, to China principally, but also to Singapore, to the extent of about 6,000 tons. The hilly and mountainous districts about 60 miles from Bangkok, extending north and south, and running many hundreds of miles in both directions, contain many valuable and rich productions, though the natives do not avail themselves of them by working mines. In these hills a Mr. H. J. Moyle, of Cornwall, detected a few years ago several rich and valuable veins of copper ore, principally in grauwacke, and deemed them of such importance that he applied for and obtained permission from the Siamese Government to work them for five years, on payment of a royalty of one-tenth of the ores to the crown of Siam. He also discovered lead and silver ores, as well as enormous beds of magnetic iron ore, and specular iron ore. The country to the north is carboniferous limestone, with positive indications of the existence of coal. Large beds of coal have been discovered near the sea, in the district of Chantabun, on the eastern coast of the Gulf of Siam. The rivers, creeks, and canals, with which this country abounds, extending in many places to the base of the hills, afford great facilities for transport. Siam bids fair, under proper management, to rival, if not surpass, any country of the East in the richness of its mineral productions. The annual export of tin from Pungah, on the west coast of Siam, is now about 22,000 piculs, of the value of £70,000; and as much as 6,000 piculs, valued at £23,000, has been obtained in one year at Bangkok, but the supply at the latter port is uncertain. Large quantities of antimony ore have been discovered at a short distance from Bangkok. Precious stones are found in great abundance, and might be a most profitable employment to hundreds. Rubies, sapphires, garnets, Oriental topazes, and emeralds are the chief stones. They are all of good water. The sapphires and garnets are sold in the market at Chantabun by the Chinese, at from 5 to 10 ticals per catty (12s. 6d. to £1 5s. per 1½ lb). These stones were formerly largely exported to Bangkok, from whence they were sent principally to Java; but of late years the demand for them has fallen off, and the collection has declined in a corresponding ratio. Silk has been grown during the last 18 years in the rich district of Kocat with considerable success, and the crop is said to have reached 1,500 piculs, representing a value of 150,000 dols.; when, a duty of 12 per cent. being decreed, it fell immediately to one-third. With the large market of China so close at hand, the silk of Siam will probably be an object of no great moment to English merchants.

On the east coast of the Gulf of Siam, from lat. 13 deg. 30 min., the head of the gulf, to lat. 10 deg. 39 min., whence the Cambodian territory terminates, are numerous towns of various sizes and consideration, but only two of which possess the advantage of a safe port accessible to vessels of large burthen—viz., Chantabun and Kampot. The others, though carrying on a considerable native trade with the capital in small boats, are either too insignificant or unapproachable to be of any commercial importance to foreigners. Vessels of moderate draught can ascend the river leading to Chantabun for about six or seven miles, after which the water shoals suddenly, and has but three or four feet depth at low tide. The exports from Chantabun are pepper, sugar, aquila wood, timber for ship building, cardamoms, sticklac, hides, horns, fish, tobacco, gamboge, ivory, rhinoceros' horns, wood-oil, and coffee. Pepper ranks first among the products, both in value and quantity. The usual amount grown is 38,000 piculs. The cultivation is entirely carried on by Chinese immigrants. Brown sugar of excellent quality is grown at Chantabun, the annual quantity produced is about 7,000 to 8,000 piculs. The soil is well adapted for the growth of coffee. Another valuable product of the province is timber.

The port of Chantabun will before long engross much of the trade with Siam, affording, as it does, greater facilities than Bangkok for shipping the produce of the whole Cambodian coast. The Siamese gulf and river abound in fish of excellent quality, which is exported either in a salted or dried state to Batavia and Singapore, to the extent of from 2,000 to 3,000 tons annually; fish maws, fish roes, sharks' fins, &c., are also collected. We commend these facts respecting a country, of which much too little is known, to the careful study of British merchants and manufacturers. We might have enumerated dozens of other important products—the Cutch gum benzoin, horns, hides, &c., but those enumerated are of themselves important, and could be very largely developed. We append a note of the exports from Bangkok, from January 1 to November 20, 1859:—

Sugar, 47,381 piculs; rice, 8,863; sapan-wood, 8,023; hides, 2,891; horns, 1,410; paddy, 600; teal seed, 548; pepper, 500; sticklac, 79; gum Benjamin, 9. This is similar to the export for the same period in 1858, excepting rice, which was only 1,000 piculs.

PEKIN OR NANKIN.

PEKIN or Nankin as the basis of our operations in the approaching China war, is a question which has been agitated in the columns of the *Times* during the past fortnight, the disputants including Captain Sherard Osborn, who commanded H.M.S. *Furious*—the vessel in which Lord ELGIN made his celebrated tour up the river Yang-tze-keang—and from his presence at all the engagements conducted by Admiral Sir MICHAEL SEYMOUR, has had most valuable opportunities of forming opinions on the subject; this remark also applies to another, Mr. LAWRENCE OLIPHANT, late secretary to Lord ELGIN's embassy. Of the other disputants, we have "J. C.," with whom the discussion originated, "M. N.," and "J. D. H. ELPHINSTONE." Now, of all these we should select as the most practicable, the views expressed by "M. N." We consider the demolishing of the Taku forts, and the possession of Tientsin as the all important points to be attained, and such a course will be found sufficient to extract from the Imperial Court the fulfilment of all our desires. On this point, there is of course considerable dissension; but anything calculated to induce us to invest Pekin, is to be deprecated on the score, principally, of its weakening the present Government, which it is necessary to maintain, for the present at all events, the rebels having proved themselves to be utterly devoid of anything like patriotism; nothing but a morbid lust has actuated their movements up to the present time, and a great service would be rendered by adopting the views of J. D. H. ELPHINSTONE on this point. It is grievous to find the fertile valley of the Yang-tze-keang in possession of such marauders. We assume that no correspondence has taken place between Mr. BRUCE and the Imperial Court, since the Peiho affair, but we are under the impression that instructions have been forwarded to him by this Government, to make certain demands on the Court, and to exhaust every means calculated to procure a favourable solution of our differences, before resorting to force of arms, in the premature manner he did in his last visit to the Peiho. One thing there is for us to keep in view, and that is, that the longer we delay entering on the expedition, the greater will be the difficulties to overcome, and we have had sufficient experience of the Chinese in our last engagement to avoid being led into a second disaster. We conceive that it is quite possible that the reinforcements now going forward will not be required. It is, however, to be deprecated that the necessary supplies have not been forwarded more expeditiously, and that so large a proportion of it has been entrusted to our resources in India, which, on more than one occasion, have failed us. On this point we refer to our Naval and Military Intelligence in another column. It is quite certain that with a force at command, the Chinese will better respect our ambassador's demands.

THE THIRD CHINESE WAR.

We give in *extenso* the first letter by "J. C." and "Captain Osborn," and a summary of the others. The first to take up the cudgels is Mr. Lawrence Oliphant, late secretary to the British Legation, who first takes up "J. C.'s" opinion of the impracticability of the "march on Pekin;" and in so doing he expresses his belief, that however much the Chinese may obstinately resist the progress of the army, by means of booms and stakes placed across the rivers, that they will be speedily removed by

the resources of an army of 22,000 Europeans. He then goes on to say:—

"A convenient landing place has been recently discovered within a few miles of the Taku forts. Though difficult of attack from seaward, on account of the vast expanse of mud by which they are protected, it is not too much to predict the capture of these forts in a few hours by a land force. With Taku as the base of operations, the river could be cleared in a few days to Pehtang, a village about ten miles beyond Tientsin, the furthest point reached by our gun-boats in June, 1858, and from which an excellent *chaussée* road, along which I have myself ridden, leads to Pekin, distant 40 miles; beyond this point the Peiho is navigable for large junks, any number of which might be pressed into the service of the commissariat."

Having thus disposed of the 15 days' march over 150 miles of country, Mr. Oliphant contradicts "J. C.'s" assertion, of the existence of obstacles in the shape of "rivers and canals," and contends that there is not a single canal between Tientsin and the sea. Oxen, he says, are extensively employed in the north of China, and whilst he thinks it would be unwise to depend on the Philippines for horses, he urges that plenty of Coolies could be got for all the requirements of the commissariat, and would answer every purpose. Referring to "J. C.'s" argument, that the occupation of Nankin would bring the Chinese to terms, as it did in 1842, he says:—

"This argument applies much more strongly to Tientsin. It was the occupation of Tientsin that brought the Chinese Government to terms in 1858, and there seems no reason why it should not be equally successful now. In fact, I am convinced that it will be successful, and that the capture of Pekin and the flight of the Emperor and officials into Tartary, so much dreaded by "J. C.," is not more likely to be involved by the next occupation of Tientsin than it was by the last."

Pursuing this part of the subject further, he insists upon our holding some point on the Peiho "until the Emperor has thoroughly recognised our power, and the position of the British minister at Pekin is assured;" and concludes by contending that, to take the city of Nankin, could not have the result of bringing the Chinese to book, since it is already in the hands of the insurgents; and that the blockade of the mouth of the Grand Canal was the movement which had greater effect in 1842 than the occupation of Nankin.

"J. C.'s" second letter is, in some measure, a recapitulation of the first. There are, however, a few points which we will give. He still adheres to his own reasons for showing that the march to Pekin would be in the highest degree unavoidable, and adds that, in order to get anything like a supply for the army up the country, 50,000 tons of shipping must be employed, the whole of which must be small craft, since large vessels cannot get up the river, and considers that it would be impossible for combined fleets to furnish such a supply of small vessels. The employment of coolies is met with the statement that the population in the north is nothing like what it is in the south, and they could not consequently be obtained. On the subject of a supply of food being had for the invading armies, he contends that there is not enough to be had for the inhabitants, and therefore, such a thing must not be depended on. The causeway alluded to by Mr. Oliphant is also disposed of by "J. C.," who believes that if it exists the Chinese will be cunning enough to cut it up, and then the armies will have to march through a bog. Assuming that the armies do really reach the Chinese capital, "J. C." is pretty conclusive in his arguments that nothing will be done, because the court will have fled into Tartary; and deduces as a consequence, that "we shall have sent a fleet and an army some 15,000 miles for the purpose of playing a game of brag with the Chinese." In reference to the proposed occupation of Nankin, he considers that the Emperor attaches some importance to that city, since he has been besieging it for the last seven years.

A late resident in China, under the signature of "M. N." then takes the subject up. He starts out with the proposed occupation of Nankin, and cannot understand how such a movement would be likely to bring the court to submission. "It was," he says, "the possession of the entrance to the Grand Canal which settled the first war, but if such a policy was to be carried out now, the only particular mode of doing it would be to issue a notice that all grain junks found inside of the Yang-tze-Kiang would be seized." He then supposes that Pekin is taken, and argues thus:—

But a victory and possession of Pekin would be as unfortunate as a defeat. The Imperial seems the best and only possible government for China at present, but it is weak, perhaps tottering, and the capture of Pekin by a foreign power would be attended by such a loss of prestige that the probability is it would be overturned. Knowing what anarchy is in China, I shrink from throwing a population of over 300 millions into that state, and we had experience enough in Shanghai in 1853 and 1854 of the effects of Chinese anarchy upon our trade to wish a recurrence of it for English interests. But what are we to do? If not too late, the supplies of grain coastwise should be stopped, and we must take and keep

the forts at Taku until the Court of Peking offers to come to terms. The easier we make those, the better both for it and for ourselves, and without giving up a single right that has been already conceded; I am sure it will be wise in us to waive both the reception and the residence of our ambassador at Peking, the opening of all the new ports, except, perhaps, Swatow, and the right of foreigners to travel in the interior for the present.

Then we have Mr. Oliphant again, who, in reply to "J. C.'s" charge, that "from the local knowledge and ready writing of your correspondent, one is tempted to believe that he writes semi-officially," repels the imputation, by stating that he knows nothing of the intentions of the Government, nor had he discovered that "local knowledge," or "ready-writing," were qualifications for which even semi-officials were usually selected. He then goes on to say—

The policy of "J. C.," however, if ineffective, has the merit of being harmless, while that advocated by Captain Osborn seems to me pregnant with such serious and dangerous consequences to our commercial interests in China, that it is of the utmost importance that the measures he urges should not be adopted lightly. Captain Osborn must admit that the residence at Tientsin of a few hundred marines and blue jackets in 1857 obtained us the treaty; but he denies that the occupation of that city again, with 22,000 men, would produce a similar effect, unless we conceded the two most important clauses in the treaty. The result alone can prove who is right; but he surely will not deny that the Government would yield if they saw us in possession of Toong-chow. This, however, is objected to by Captain Osborn, on the ground of its being a petty war.

He then comments on Capt. Osborn's suggestion, that the first Chinese war was a severe lesson to the Chinese, which had its result from one end of the empire to the other, and the consequence was fourteen years' peace, and reminds the gallant captain that the Chinese coast was not then decked with British residencies, which would be in the greatest danger if the same policy was carried out now.

The correspondence is closed by a second letter from Captain Osborn, who thus writes his opinion on the whole question:—

I, of course, expected to be charged with looking at the question from a purely military point of view. As a professional man my opinions are naturally open to such a charge, but no one is more deeply impressed than I am with the importance of the commercial and political interests now at stake on the eastern frontier of Asia, and it is to ensure our Exchequer's receiving the £10,000,000 in taxes upon teas, &c., without an annual drawback of £2,000,000 or £3,000,000, to support a huge fleet and army in China, that I deprecate a petty war and a patched-up treaty. Great as is the sum now flowing into our treasury, as well as that of India, from the present trade with the seven ports of China, it is a mere fraction to what will accrue if the Elgin Treaty of 1858, in its original integrity, be carried out. Now is our opportunity; we have right upon our side, and, if an Asiatic is capable of one generous feeling, the Emperor of China ought to be impressed with the fact that, beyond guarantees and indemnity, we demand no more in 1860 than he conceded to us in 1858.

He then says that the Chinese commercial monopolists are at the bottom of the present war policy in China; that directly our merchants and consuls have access to the western and northern portions of China, the profits of the great commercial guilds will be seriously diminished; that the supply of food for the natives of China will fall into the hands of Europeans, and the manufacturers of Manchester and Leeds will be enabled to enter into fair competition with the hand looms of China.

Another letter has appeared on the subject under the signature of "J. D. H. Elphinstone," who calls attention to the danger and impolicy of a "Third Chinese War," on the untenable grounds we have; he agrees with "J. C." in assuming that the difficulties in the Peiho will be made by the Chinese most formidable. He advocates the taking and holding the city of Nankin and the Taku forts, and proceeding then to negotiate with the Imperial Court at Peking, demanding indemnification for our losses, &c., at the Peiho, and follow that by an offer to restore the whole valley of the Yang-tze-Keang to their sway. He calls attention to the fact, very justly, of the little or nothing Lord Elgin has said on his experiences in China, since his return; and, finally, he calls attention to the introduction of the French into the question, who have no trade to protect, as an imputation that our late raid is unjust.

The *Saturday Review* on this correspondence has the following:—

Captain Sherard Osborn, who has written the best of the letters on the objects of a Chinese war, adds to his arguments for direct communication with Peking a much more disputable suggestion. He places the right of unlimited ingress to the interior of China on the same level, in point of importance, with the establishment of an embassy. If the English and American trader, carrying with him the disdain which seem inseparable from him for everybody who does not speak his language, is to penetrate into provinces where he is only known as a "white devil," are we really prepared to make the Imperial Court responsible for all the disputes he may provoke?

The comment of the *Times* we give in another column.

The following are the first letters of J. C. and Captain Osborn:

I fully admit the necessity of punishing the Chinese for the perfidy of the Peiho, but greatly doubt the wisdom of the means by which the punishment is to be inflicted, and for this I give you my reasons. The French, it is said, are to furnish a land force of 10,000 men, and the English of 12,000. This will make an army of 22,000, while it is to be backed by a numerous fleet of each nation. This will constitute the most powerful armament that has ever been afloat on the Indian Ocean. Its object can, of course, be no other than a march on Peking, the occupation of the Chinese Capital, and the dictation there of our own terms on the Government, including a stipulation for a resident ambassador and reimbursement of the expenses of the war.

The rashness, as well as the impolicy of such a course of action, appears to me to be quite transparent. The distance from the nearest point of the coast to Peking is at least 150 miles, and after our experience of what the Chinese did at the mouth of the largest river we may rest certain that every stream will be staked or boomed, or otherwise obstructed, so that water transport is out of the question, while, even if it were available, it would take our army but half way to the capital. We shall have nothing for it, then, but a land march, and at the rate of 10 miles a-day, allowing for halting days and no obstruction from the enemy, it will take 15 days to reach the Chinese capital. But how is this long march to be effected? We arrive on the coast of China without any ostensible means of transport for artillery or commissariat. The country which we invade—even if they were available to us—has no draught horses or draught oxen, its only draught cattle being small mules and smaller asses, a score of which would not draw a six-pounder. India is the only probable source for the supply of carriage cattle, but it is 5,000 miles distant from the scene of action. The Philippines are only 2,000 miles away, but then the horses there are ponies under 13 hands, and will not certainly draw field or siege artillery.

I will suppose, however, that by some chance or some miracle the means of transport are obtained; the march on Peking is over a dead plain very well suited to cavalry, and as we know that the Chinese, close on the native country of the Tartars, have an abundant Tartar cavalry, we may rationally expect that our line of march will be harassed and our supplies cut off by it. No doubt this would be a contemptible cavalry as opposed to French and English, but then we shall have none, except a few squadrons brought at great cost and risk from India. Of course we should encounter difficulties in crossing rivers and numerous canals, over which every bridge would be broken, and, indeed, after the little expected resistance we met with at the Peiho, there is no obstacle to our progress that Chinese astuteness can supply—and it has considerable resources—that we ought not in reason to reckon on.

Let it, however, be imagined that all obstacles are surmounted and that the army has reached Peking. It is an open town and will easily be occupied; but the Emperor, his Court, and the wealthy inhabitants will not be there, for assuredly they will have retired to Tartary; where we cannot follow them. In this case Peking will be no material guarantee in our hands, for we shall be in a position we cannot hold, 150 miles distant from our base of operations, the fleet itself, from the shallowness of the sea, not within sight of the land. There would be nothing for it but to retreat, which would be equivalent to a defeat.

I think it cannot for a moment be doubted that the occupation of Nankin would be greatly preferable to so hazardous an enterprise. That place is situated on a broad, deep, and navigable river, which cannot be obstructed. It is but 200 miles from the sea, and the whole fleet can safely anchor within a few yards of its walls; while it is situated in a country of abundant supplies, from which no enemy can cut us off. The paltry rebels who suffered a disastrous defeat when they engaged with a Tartar force to the north have been able to hold it for five years against the whole military power of China. If in this position we should find it expedient to extend our operations, the Chinese army which blockades the rebel one is before us, and will be very easily disposed of. It was the occupation of Nankin that brought the Chinese Government to terms in 1842, and there seems no good reason why it should not be equally successful now. The objection urged against this plan is that Nankin and its neighbourhood are in the occupation of insurgents against the Chinese government, and hence of our natural allies. It is not a valid one, for seven years' experience has shown that the insurrection has not the remotest chance of success, and the patriots who were to have substituted a native for a Tartar Government have turned out to be a band of ruthless freebooters, who have succeeded in nothing but carrying murder and havoc over the finest provinces of the empire, and whose destruction would be a boon to the Chinese, and hence to ourselves.

What we want with China is trade, and our trade with it for the last 17 years has been eminently successful, for it amounts at present to £10,000,000 a year, two articles of it alone yielding to the British and Indian treasuries a clear sum of £10,000,000. For its advancement, the treaty made by Lord Elgin is eminently judicious and comprehensive, with the exception of the stipulation for a resident ambassador, apparently forced upon him by his instructions, the suggestion of some indiscreet and short-sighted parties in China. It is the attempt to enforce that stipulation which has, in fact, led to the present war. "In the eyes of the Chinese Government," says his Lordship, "the concessions amount to a revolution, and involve the surrender of some of the most cherished principles of the traditional policy of the empire. They have been extorted, therefore, from it by force." The Government of China is more than any other a Government of opinion, and it cannot serve our purpose or any good purpose to overthrow a constitution which by the prestige of its infallibility contrives to rule, and to rule better than any other Asiatic people is ruled, a population ascertained by a recent census to amount to above 400,000,000. We have not succeeded in bringing the Turks within the pale of European international law, although planted in Europe for four centuries, and our chance of doing so with the Chinese, who in language, manners, and race, differ still more so, is far less.

The third Chinese war will cost a good number of millions, and indemnity for it from the Chinese, Lord Elgin tells truly, is utterly hopeless. They paid £6,000,000 as a mulct for the first war; but that war, the rebellion which sprang out of it, and the second war, have so utterly exhausted them, that they have been compelled to allow even their great works of irrigation and navigation to run to ruin. A force of one-fifth, or, indeed, even of one-tenth, that which the Allies are sending against China would, in my opinion, be adequate, while it would be more easily fed and handled.

J. C.

It would be much better, at this important crisis in the Chinese question, if writers upon the subject would sign their names, instead of putting their initials, in order that we might estimate at their proper value the information that they may have to give, or appreciate the motives which may bias their opinions. So far as "J. C." is concerned, I don't think I ever read more errors within an equal quantity of print. Yet I am hardly prepared to wade through as much manuscript to refute them; but I may tell your readers briefly that the idea of blocking up the Peiho river, which flows through an alluvial plain, is simple folly, and it affords water carriage to within twelve miles of Pekin, to a place called Tung-chow, and that few, if any canals, intersect the province of Pecheli; and this because, between the Peiho and the Great Wall, the province is not over-blessed with water privileges. "J. C." sees nothing but difficulties—nothing but errors. Why should he write down Generals Hope Grant and Mansfield as consummate asses, who are going to throw themselves, with 20,000 men, into the city of Pekin, like the leaders of a mere African razzia, without looking to their supplies, their supports, &c.? He says Pekin is an open town; we all know it to be a walled one. He ignores the fact that for five years, not only Nankin, but an area of 200 miles in a due east and west line of the valley of the Yang-tze, has been in the hands of the Taipings, without in any way alarming the Emperor for the stability of his empire. Our occupation of Nankin, unaccompanied by operations elsewhere, would have about as much effect as the Taiping movement or the holding of Canton has had. Lord Elgin was never coerced by home authorities or "indiscreet individuals" in China to insert those two most important clauses in his treaty—namely, the right of visiting the interior of China by our traders or missionaries, and the permanent residence of an accredited British agent in Pekin. I fancy his lordship knew pretty well that he might as well have stayed at home if he could not wring these clauses from the Court of Pekin, and I have no hesitation in saying that without these clauses we had better leave all treaty-making alone, and trust to our merchants and smugglers fighting and finding their own way to every part of China, and protecting themselves. "J. C." and another writer—"M. N."—advocate drawing in our horns, and remaining where we were in 1856. I will undertake to say that any such policy will be perfectly misunderstood by the Chinese from one end of the empire to the other, and that there is not a consul or a captain of a man-of-war who will not have another "lorcha affair" on his hands within 12 months. And why, may I ask, is it unreasonable for us to seek to trade honestly and fairly with every Chinaman? Why should we, who live by the sale of our manufactures, submit to have prohibitory duties laid on them, when such duties are contrary to treaty? And, above all, why should not English merchants or political agents dwell in Pekin as well as Russian priests, students, and ambassadors? And on that head your news of to-day fully reassures us.

The two objectionable clauses are closely and immediately connected. We cannot have one without the other; yet "J. C." says we want more trade with China; he has hit that nail on the head; but how are we to have that without guaranteeing protection for our traders by being able to lay all grievances or give all explanations direct to the Court of Pekin? Another assertion is made. I am curious to know upon what grounds Lord Elgin says that indemnity for war expenses is out of the question. I reply that the seizure in the winter of 1857-58 of the vast Imperial grain fleet, which was at one time entirely in our hands, would have realised more than enough to meet our expenses in what has been dignified with the title of the "second China war," and an embargo upon all the taxes levied upon European exports in the open ports of China will nearly meet all our current expenses for this third war, and divert them profitably from the defence of the capital. "L. O." says we have but to go to Tien-tsin to get another treaty. I disagree with him, unless he is prepared to forego the two clauses, and, in fact, make concessions to the Chinese, instead of forcing them to adhere to their engagements; and I do most earnestly deprecate any idea of partial hostilities—petty war. If we are in earnest, let us be so, or the Chinaman will soon see through the imposition, and the third war will drag on, as the first one did, for many a long year; or we shall get a worthless treaty, and have that chronic irritation perpetuated under which China and England have been living for some years.

We must teach the Chinese from one end of the empire to the other that peace is far preferable to war with us "outer barbarians." The force that will be there by May next is ample for all purpose. Lord Elgin's policy of war in one quarter, peace in another, has resulted in a blow-up of our treaty within 12 months, for it is folly to tell those who know anything of China that we are merely fighting the Court, Council, or Emperor. There is not a Chinese merchant who has not voluntarily contributed, and who will not contribute, to keep us out of the interior of China until they see we are really in earnest about it, and then they are far too practical a race to persevere in opposition to the point of ruin. It was the great commercial guilds of Northern China who supplied Prince Sin-ko-lin-sin with the funds and means to make one more effort on their behalf to preserve the enormous monopolies which fall to the ground the day the Elgin treaty comes into force; and I do trust that this treaty, and not one jot less than it, will be insisted upon, together with ample indemnity for all expenses. Impoverish the Emperor of China! Impoverish China! Not while there are 400,000,000 of people in it who have but one object in life—the acquisition of wealth.

The first war with China lasted from 1839 to 1842, because we attempted to carry on a petty war in one corner of the empire. It

was only after Sir W. Parker's arrival, in 1841, that we went earnestly into the work, and then nearly one-half the empire was so severely shaken that a peace was obtained that lasted 14 years—a very fair duration for any Asiatic engagement, whether pecuniary or commercial. The second war commenced in 1856 and lasted until June, 1858; it was first a petty war in the South of China, then an equally partial one in the North. We were juggled, and shall be again if we merely undertake a military expedition to fight for the possession of the fort at the entrances of the Peiho. I advocate that the executive be given the means and ordered to operate judiciously and energetically against all the seaboard of Northern China, and to select a good base with a view to an advance upon Pekin after a winter of starvation shall have told court and people what it is to war with us; that an expeditionary force ascends the Yang-tze-kiang, to intercept supplies from Southern China; and that the Quang provinces be thoroughly kept in hand, so that when a treaty is really being signed by a submissive Emperor and Council in the North we shall have no Cantonese braves shouting defiance in the South. Our diplomatists might disport themselves wherever they pleased until the Court of Pekin was ready, without argument or correspondence (for they are sure to beat us in lying and knavery), to sign, seal, and carry into execution upon the spot every clause of the Elgin treaty, with improvements, such, for instance, as an abrogation of our engagements to keep English men-of-war wherever a consul flies his flag, and other such drains upon our exchequer, and, above all, to insist upon indemnification for all expenses. The Government of Pekin will screw the commercial guilds and gentry of Northern China to pay it. Let them do so; for they are really at bottom the cause of the Emperor and Court repudiating the treaty of 1858, and we can always at any rate receive the custom duties collected at the open ports until the charges to which we have been put are defrayed.—SHERARD OSBORN, R.N.

PRUSSIA.

The Prussian Government have increased their expedition to China and Japan, by the purchase at Hamburg of the fine steamer *Columbia*. This vessel is to join the others at Singapore. Capt. Weichmann is appointed to command her.

The *Daily Telegraph* Berlin correspondent, referring to the Prussian Embassy about to visit Japan, says:—The equipment of the embassy connected with this voyage has been carried out in the grandest style, with a view, I suppose, to impress the whole of Eastern Asia with the paramount importance in the universe of this kingdom. If the Japanese should be undiplomatic enough to judge from appearances, they will, no doubt, come to the conclusion that England is but a duchy, and her sovereign the vassal of a tremendous potentate, residing at Berlin. Many hundred photographs of the finest edifices in all Germany are to be circulated by this mission throughout the counties of Siam, Azam, China, and Japan. Thousands of printed views have been likewise added to the ship stores, to serve the same purposes. The bindings of those productions of art, intended to be presented to the rulers of Siam and Japan, are said to excel everything of the kind ever achieved; and to demonstrate to these sovereigns the enormous wealth of the country in the most effective yet simple manner; a collection of all coins current in Germany will be amongst the gifts of the Prussian representative. Unhappily, however, the Prussian people do not share the enthusiasm of the projectors of this notable expedition. There are some persons, indeed, rude enough to prognosticate that a great deal of money will be squandered in the enterprise, without any adequate return; and the opinion of these croakers was shared by the higher officials to such a degree, that the government found it a matter of considerable difficulty to select a man capable, and at the same time willing, to undertake the task of introducing this country to the acquaintance of our good friends in the Far East. The mission, as I have mentioned on a previous occasion, is, to a great extent, a commercial one, and has been furnished with samples of the manufactures and staple products of the Zollverein.

MR. TARRANT'S CASE.—In reference to the notice of this gentleman's case, we are now in a position to state that His Grace the Duke of Newcastle has forwarded positive directions for Mr. Tarrant's release at the expiration of six months, thus remitting one half the sentence; and it is left to the discretion of the Governor, Sir Hercules Robinson, to release him even before that period if he deem it expedient.

LECTURE ON JAPAN AND CHINA.—Dr. Macgowan delivered a lecture in St. Paul's Free Church on Japan and China—W. E. Baxter, Esq., M.P., being in the chair. The admission was by tickets. The attendance was pretty good. The meeting was opened with prayer, conducted by the Rev. Islay Burns. The Chairman, in a few introductory remarks, referred to the very great pleasure he had in taking the chair that evening. He rejoiced in the opportunity of welcoming Dr. Macgowan and his Christian Chinese friend to Dundee, the more so as the doctor was there that night as the representative of an Evangelical Christian Society in the United States, which had worked so laboriously, so energetically, and so successfully in the cause of Christian missions. After the lecture the chairman, in proposing that the meeting tender Dr. Macgowan their cordial thanks, characterised it as one of the most interesting and valuable lectures which he had ever listened to. We find the Right Honourable the Earl of Kintore, who presided at Dr. Macgowan's last lecture in Edinburgh, expressing himself in nearly the same manner.

MAKING THE MOST OF IT.—TELEGRAPH TO JAVA.—We extract the following from the *Globe*:—"From England to the East in 40 minutes" will soon be a reality, and Cleopatra's Needles and the Pyramids of Egypt are just now likely to be turned to some use—perhaps to act the part of poles for the support of the telegraph wires from England to India, and other large British and foreign possessions in the East. A despatch from Singapore states that the submarine telegraph cable from that port to Java had been most successfully laid as far as Mintok Banca, and that it was confidently expected that it

would reach Batavia in two days. This line, when completed, will connect Java, Borneo, Sumatra, and the other islands in the Straits of Sunda and Malacca, and the Java sea, into one community, and thus, by a speedy interchange of commercial and other intelligence, create a kind and mutual intercourse among peoples who have hitherto been living in a spirit of antagonism to each other.

THE BRUCE PEDIGREE.—Mr. G. R. French, in a letter to the *Morning Herald*, states that the Earl of Elgin is not a lineal descendant of King Robert Bruce, for that gallant monarch left only one son, David II., at whose death without issue the crown of Scotland came to Robert II., son of the brave Walter the Steward and Marjory Bruce, daughter of King Robert the Bruce, and continued in the family of the Stewards until James, sixth of that name in Scotland, became James I. of England. It was at the birth of his mother, the hapless Mary Queen of Scots, that her father, James V., then on his death-bed, exclaimed, in allusion of the crown having been brought into his family by Marjory Bruce, "It came with a lass, and it will go with a lass." Our most gracious Majesty Queen Victoria is the direct lineal representative of King Robert the Bruce. The pedigree of the Earl of Elgin, as well as of the Marquis of Ailesbury, is to be traced to John de Bruce, third son of Robert Bruce, "the competitor" for the crown of Scotland with John Balliol, and grandfather of the future King, and descended from the great Norman house of De Brus, one of whom accompanied William the Conqueror to England, and founded the family in Yorkshire, whence sprang the heroic King of Scotland.

AMERICAN MISSIONARIES FOR CHINA.—On the 6th of December, a missionary meeting was held at St. Paul's Methodist Episcopal Chapel in Fourth Avenue, New York, for the purpose of bidding farewell to the Revs. Messrs. Wood and Allen, two pastors belonging to that church who have been set apart for the purpose of undertaking the missionary work for China. Both of these gentlemen made addresses, in which they detailed their Christian experience, and the circumstances which led them to devote themselves to the work for which they are intended. This meeting was closed for benediction by Dr. Bangs. Messrs. Wood and Allen start for China, with their families, in a few days.

THE TAKE YOU FORTS.—Apropos of our recent Chinese mishap, it has been remarked, that after the great success of Mr. Fortune's works in relation to China, we might have been prepared for the appearance of Miss Fortune.

THE HOME MARKET.—By the late mail from Hong Kong, we are informed, in the midst of the commercial intelligence, as follows:—"American Drills.—Nothing doing, and very large stocks on hand." It is quite different with the British drills in our volunteer market, we rather guess. Here the drills could not be firmer nor steadier.—*Punch*.

THE OVERLAND ROUTE.—A passenger by the P. and O. steamer *Nemesis* has addressed a letter to the *Times* complaining of the sad want of accommodation to be found in that vessel. Down the fiery Red Sea, he says, the passengers were packed together worse than emigrants, and little better than galley slaves. He believes that the horrible discomforts from the overcrowded state of the P. and O. steamers in returning to India often neutralizes the improved health gained by a visit to Europe. The whole letter is full of the most serious charges against the company for neglecting the comfort and convenience of the passengers, especially during the journey on the Asiatic side of Alexandria.

Among the cargo brought by the *Delta* steamer, which arrived from Alexandria, was a large package containing photographic negatives, taken in Japan by an artist despatched specially for the purpose by Messrs. Negretti and Zambra, of London.

The *Charkow Government Gazette* announces that its editor is in possession of valuable MSS., being a duplicate copy of the "Report of the Jesuits to Pope Clement II., on their mission to Europe and China in the year 1700."

Theatrical.

MR. ALBERT SMITH.—This esteemed friend of the public made his appearance again on the evening of the 10th, and we are happy to announce he has nearly recovered his wanted health and vigour; and if anything could be calculated to assist him to it, it was the hearty welcome which greeted him on making his appearance at his own little corner. The greeting was the most enthusiastic and prolonged one ever awarded to a public man.

THE PANTOMIMES.—The managers of the metropolitan theatres were not behind-hand on boxing-night in producing the customary pantomimes for the amusement and gratification of the younger portion of the theatre-going public. Old Drury-lane always takes the precedence, and this time the old nursery story of "Jack and the Bean Stalk" was produced with the most unequivocal success. Another nursery tale, "Puss in Boots," is to be seen at Covent-garden; and, according to the critics of the day, is as clever a production as any to be seen this year. Mr. Buckstone, at the Haymarket, has, according to custom, written his own Christmas piece, which is founded on St. Valentine's day, and is said to be a very clever specimen of this style of writing. At the Adelphi, Mr. H. J. Byron has brought out an extravaganza, which is founded on the well-known legend of the Rhine, and is called "The Nymph of Lurleyburg." The same author has also written the piece at the Princess's, entitled "Jack the Giant Killer," in which his most merciless puns are very prominent. "King Thrush-beard" is the title of the pantomime at the Lyceum, which is founded by Mr. Talfourd on a German fairy tale. Tyranny is made ridiculous at the Strand theatre, where "William Tell" is burlesqued with complete success. "Punch and Judy" shine with great splendour at St. James's; and "Alfred the Great" is represented in an extravaganza by our facetious friend Mr. Robson; and at all the minor theatres the Christmas pieces are all characterised by great fun and plenty of amusement for the youngsters.

CHRISTMAS ENTERTAINMENTS.—Besides the pantomimes and the

Crystal Palace, where there was also an unlimited fund of pleasure and amusement, we have had a host of entertainments of a varied character. Of these we may mention Mr. and Mrs. German Reed; Mr. and Mrs. Howard Paul; The Campbell's Minstrels; Mr. Raniston and Miss Poole; the Glee and Madrigal Society; Professor Wiljalba Frikell, the great conjurer; and several others, all of whom we understand had crowded houses on boxing-night.

London Gazettes.

The Queen has been graciously pleased to appoint Edward St. John Neale, Esq., now her Majesty's Consul in Bosnia, to be secretary to her Majesty's Legation in China.

Births, Marriages, and Deaths.

BIRTHS.

ASHBURNAM—On the 21st ult., at Ashburnham-place, the Countess of Ashburnham, of a daughter.
CATHCART—On the 23rd ult., at Thornton-le-street, the Countess Cathcart, of a son.
HALLPIKE—On Nov. 17, at Shanghai, the wife of Julius Hallpike, of a son.
MENDS—On the 5th inst., at Rock Ferry, near Liverpool, the wife of Captain W. R. Mends, C.B., commanding H.M.S. *Hastings*, of a daughter.
MORESLEY—On Jan. 8, at the residence of her father, Philip Scott, Esq., E. P., Bellevue, Queenstown, the wife of Commander Moresley, R.N., of a daughter.
NEILSON—On Dec. 18, at Malvern, the wife of Francis R. Neilson, Esq., of a daughter, prematurely, still-born.
PORTSMOUTH—On the 27th ult., at Eggesford, North Devon, the Countess of Portsmouth, of a son.
SICHEL—On the 29th ult., at 11, Chester-terrace, Regent's-park, the wife of Michael Sichel, Esq., of a daughter.
STEWART—On Jan. 2, at Stoke, Devonport, the Hon. Mrs. Keith Stewart, of a daughter.

MARRIAGES.

BROWNE-GUTHRIE—On the 31st ult., at St. George's, Hanover-square, by the Venerable the Archdeacon of Tuam, the Hon. Geoffrey Browne, only surviving son of the Lord Drummore and Browne, to Christina, only surviving child of the late Alexander Guthrie, Esq. of the Mount, Ayrshire.
ELLIOTT-STEEL—On the 26th ult., at St. George's Church, Everton, by the Rev. A. W. Baily, Mr. John Elliott, second officer of the ship *John Bibby*, to Jane, only daughter of Mr. Gerard Steel, Everton.
INCE-MARZIALS—Dec. 28, at Lewisham, Joseph Ince, Esq., son of the late William Ince, Esq., of Southampton-street, Strand, to Elizabeth Marianne, daughter of the Rev. A. T. Marzials, B.D., Pastor of the French Church in St. Martin's-le-Grand.
VANDERSPAR-AVARNE—On Nov. 9, at Galle, by the Rev. R. Philips, Major W. C. Vanderspar, Ceylon Rifle Regiment, to Georgina Margaretta, youngest daughter of the late J. Avarne, Esq., R.N., and granddaughter of the late Lieut.-General Avarne.
WALKINSHAW-WILSON—On the 10th inst., at 197, St. Vincent-street, Glasgow, by the Rev. Dr. Barr, father of the bride, William Walkinshaw, Esq., of China, to Marion Stephenson, widow of John Wilson, jun., Esq., of Dundee, Lanarkshire.

DEATHS.

BELL—On the 24th ult., suddenly, at Alexandria, Thomas Bell, Esq., merchant, of that place, deeply regretted.
FAREBROTHER—On Nov. 10, at Putney, in the 34th year of her age, Emily, the affectionate and much-lamented wife of the Rev. H. W. Farebrother.
FITZMAURICE—At Bombay, on October 15, 1859, Captain Fitzmaurice, steamer *United Service*.
SYMS—On Jan. 19, at Calcutta, after a long illness, Captain Frederick George Syms, Paymaster 3rd Foot (the Buffs), in his 35th year.
TOOVEY—On Nov. 7, at Decima, Nagasaki, of dysentery, Henry Duppa Toovey, of Shanghai, aged 29 years.

Monetary and Commercial.

Some time since we noticed a shipment of silkworms from China to San Francisco; we have now to report their arrival at Liverpool, en route to Italy, where it is stated they have been sold at 20 francs per ounce. The quantity is 82,000 ounces.

Two of the last messages transmitted from Malta, via Sicily, have reached here in 21 hours. This marks a great improvement, as for some weeks previously most of the messages occupied from five to six days. The remonstrances through official and other quarters have thus borne fruit.

A movement is on foot for a submarine cable across the 30 miles between Land's-end and Scilly Islands, which would then be the best port of call for ships arriving at the Channel for orders.

The official statement of the revenue for the year ending December 31, 1859, has just been published, and the results show a decrease of £216,526. The decrease is accounted for in the falling off of the property tax.

The Board of Trade returns for the month of November present much the same features as those exhibited throughout the year. The declared value of our exports as compared with those of last year, show an increase of £881,565, of which £398,987 is due to the augmented shipments of manufactured cotton goods. The declared value for the month amounts to £10,858,001. The aggregate value of our exports during the 11 months of the year has been £119,613,185, against £106,555,562 in 1858. With regard to the imports, tea, coffee, sugar, spices, wines, and spirits, show an increase.

The importations of bullion into London during the past month has amounted to £1,690,421, of which £959,829 came from Australia; £305,557 from America; £50,641 from Brazil; £8,000 from Africa; £22,394 from the Peninsula; and £344,000 from the West Indies. During the same period the exportations have amounted to no less than £2,397,440, of which £1,841,271 was sent to the continent; £135,717 to Bombay; £3,800 to Alexandria; £30,000 to the Peninsula; £1,117 to Ceylon; £216 to Aden; £9,567 to Madras; £154,738 to Calcutta; £8,150 to Penang; £26,230 to Singapore; £315,955 to Hong Kong; £1,285 to Foo-chow; £63,594 to Shanghai; and £5,800 to the West Indies. The imports of gold from Australia for the year 1859 was £2,457,736.

The specie by the steamer *Ceylon*, on the 4th inst., for Calcutta and China, amounted to £276,177, of which £31,140 was in gold and £245,037 in silver; £2,000 in gold was for Alexandria £5,940 in gold was for Madras, £23,200 in gold and £50,375 in silver for Calcutta, £5,150 in silver for Penang, £2,400 in silver, for Singapore, £139,225 in silver for Hong Kong, £1,075 in silver for Foo-chow-foo, and £46,812 in silver for Shanghai.

The bar silver by the West India steamer has been disposed of at 62d. per ounce, and the Mexican dollars at 61½d., showing an advance of ½d. upon the price realised by the last packet. The quotation for dollars had, however, already reached the present point before the departure of last China mail.

Joint Stock Bank shares have been dull during the last day or two. The Ottoman Bank have been done at 18s. per share; and Bank of Egypt have changed hands at 23½; Bank of India, Australia, and China, 19½ to 20½; and Oriental Bank Corporation, 39½ to 40½; Bank of Turkey, ½ to ⅔ prem.

In the miscellaneous share market the Electric Telegraph Company shares were quoted at 107 to 109; Great Ship Company, ⅔ to ¾; Royal Mail Steam, 52 to 54; Submarine Telegraph, ¾ to 1.

The Exchange on Amsterdam, short, 11-12½ to 13½; do. three months, 11-14½ to 15½; Hamburg do. 13-14½ to 5½; Paris short, 25-7½ to 12½; do. three months, 26-30 to 35; Vienna do. 12-75 to 80; St. Petersburg do. 33½ to 35.

EXCHANGES.

ARTICLES OF IMPORT.

The year has opened with the most favourable prospects in every branch of trade, and the produce markets have been firm during the week, especially as regards sugar and coffee, the transactions in both having been large, although with less animation at the close.

TEA.—A few speculative purchases of black-leaf Congous, in addition to some inquiry for common Congous for export, gave a better tone to things generally, and the trade buying to some extent, a rise was soon obtained upon the previously depressed prices, the supplies on offer being small, to meet any improved demand. Common Congous advanced to 1s. 3½d. to 1s. 3½d., and all grades under 1s. 8d. per lb. showing a rise of 1½d. to 2d. per pound. Fine Congous have been more saleable, at rather better prices, both Monings and Kaisows, especially the latter. Tayshans have sold to a fair extent at full prices. Fancy teas

remain without material change. Common to fair-scented teas have been sold at an advance of 1d. per lb. The new arrivals of good and fine are heavy of sale. Green teas have been taken freely by the trade at about previous prices. In Ping Sueys large sales have been made. The stock of tea in London and Liverpool on December 31, 1859, was 48,824,234 lbs., against 60,380,473 lbs. in 1858. The deliveries in London during the past week have been 1,170,735 lbs., being a decrease on the previous fortnight of 403,232 lbs.

SILK.—In China silk there has been an increased importation of 26,000 bales, and an increased delivery of 1,250; in Canton the increased importation to the amount of 320 bales, and a diminished delivery of 1,800 bales; in Chinese thrown silk the increase in the importation has reached 3,200 bales, with a diminished delivery of 3,400 bales. These differences, however, are more nominal than real, for it will be recollected that last year there were 11,000 bales, which would, under ordinary circumstances, have been included under the year 1858, and this would have gone far towards equalising the two years 1858 and 1859. At the present time there are nearly 6,000 bales off the coast, but these all fairly belong to the new year. The year commences with small stock; little more than sufficient to supply three months' consumption. It is admitted on all hands that the year just closed has been one of more than average prosperity in the silk trade; it opened with an active demand both for export and home consumption, which has continued with slight interruptions throughout the whole year.

SUGAR.—The amount of Penang received has again been moderate, of which great part, brown, has gone off without spirit at easy rates. The good grocery sorts have mostly met a fair competition at relatively full prices. Imports of Manila have been on a large scale, and clayed, which at times has been plentiful; has experienced frequent fluctuations, being in April 38s. to 40s.; in the following month, 36s. to 37s.

COFFEE.—This article has experienced numerous and important fluctuations during the year now brought to a close, produced, on the one hand, by the warlike demonstrations on the Continent, and partial diminution in the general consumption of this country. Plantation Ceylon, good ordinary to fine, is quoted 56s. to 60s.; superior to fine, picked, 61s. to 64s. 6d.; best Mocha, 118s. to 121s.

COTTON.—A decidedly better feeling has prevailed in this market, and offers have been made for large parcels, but owing to the firmness of holders of the better qualities of Surat, which are now becoming scarce, the transactions have been limited. Prices, however, are rather higher. 300 bales of Surat have sold, good fair Oomraivattee, at 4½, good fair Dholerah at 5½.

TIN.—The market continues firm at our last quotations.

RICE.—A good inquiry has prevailed for most descriptions, which holders meet with firmness, but transactions to a fair amount have taken place; Necranzie Arracan 9s. 9d., and Java 11s. 9d. 5,800 mats of old Necranzie Arracan sold at 9s. 6d., and a floating cargo of 500 tons has been disposed of at 10s. 6d., old conditions.

SAGO.—Superior qualities are saleable at steady prices. 1,094 boxes good and fine white small pearl in auction nearly all sold at 17s. to 20s. 6d., and 70 boxes at 17s. 6d. for fair medium pearl.

PEPPER.—The parcels offered by auction have met a good demand and were all sold. 2,533 bags Singapore very good at 4½d.; middling to fair, 4½d. to 4½d.; first-class sea damaged, 4d.; second, 4d.; third, 3½d.; 1,329 bags Penang, fair to good, 4d. to 4½d.; brown dusty, 3½d. to 4d.; and privately there has been a good inquiry on the same terms, and about 1,000 bags Singapore have sold, sound, 4½d. to ½; and first class damaged at 4½d. White pepper ha; sold steadily, 338 bags fair Penang, 6½.

TOBACCO.—Some large sales of Arracan tobacco have taken place at 2d. to 2½d. per lb.

JAPAN WAX.—There has been a better demand for this article, and 250 cases of good quality have sold at 64s. 6d. to 65s. One lot of superior fetched 65s. 6d.

HEMP.—East India descriptions continue to meet with little inquiry; in auction, 364 bales damaged Manila sold at steady rates, first class at £23 10s. to £24, and second to fourth class at

£24 to £20 5s. 175 bales Bombay sold at £17 15s. to £18 for fair, with a small portion inferior, at £16 5s.

MISCELLANEOUS.—Gutta-percha, not adulterated, or falsely packed, 1s. 3d. to 2s.; India-rubber, pure, not drossy, 2s. 0d. to 2s. 1d.; rattans, 2s. 7d. to 3s. 2d. per 100; sapan-wood, Bemah, £6 10s. to £9 15s.; Siam, £8 to £9 10s.; red Sanders, £5 to £5 18s. per ton. Singapore mother-o-pearl shells, 120s. to 140s.; Manila, 100s. to 120s.; Soy, thick and clear, dark red, good flavour, 4s. 6d. to 5s. 3d. per lb.

ARTICLES OF EXPORT.

The development of the iron trade during the year has stood prominently forward, as a significant memento of the extraordinary efforts made by our merchants to develop the vast resources of the country. The exports of iron show an aggregate increase of £1,000,000 sterling, as compared with the year 1858, although a very considerable falling off has been witnessed this year in the export of pig iron to France, Holland, and Prussia, mainly owing to the depression in trade in those countries.

The export of pig iron from the Clyde alone have been no less than 567,000 tons, being 12,000 in excess of 1858. Of this large shipment 254,245 tons went to foreign ports.

IRON.—Although the transactions of the fortnight have not been heavy, a fair business is reported. Welsh bars in London, £6 15s. to £7; nail rods, £7 5s. to £8 10s.; hoops, £9 5s. to £9 10s. single sheets, £9 10s. to £10 10s.; Staffordshire bars, £8 5s. to £8 12s. 6d.; foundry pigs in Wales, £4 to £4 5s.: ditto in Glasgow, £2 18s. to £3.

COPPER.—Copper of all kinds is higher, and the smelters have made an advance of £5 per ton on rough, and ½d. per lb. on manufactured; tough cake and tile, £117; best selected, £120; fine foreign, £113 to £117 10s.

TIN.—English is in steady demand. Block at 138s.; bar, 139s. and refined, 142s.

TIN PLATES.—At the quarterly meeting of the tin manufacturers, the trade was reported to have been better than it had been, and the demand considerably increased. The price for tin plates for the ensuing quarter was fixed at 32s.

LEAD.—Lead remains firm, without change in tone of market or price.

SPELTER.—The demand being moderate, sales do not exceed 400 tons, principally for spring shipment, at £21 15s. to £22 5s.

SALT.—White common, 5s. per ton; butter, 6s. 6d.; stoved, 8s. handed, 10s. 6d.; bagged, 12s. to 17s.; rock Prussian, 2s. 6d. to 3s. 6d.; large lumps, 3s. 6d. to 5s.; and Irish do., 3s. to 4s. To these prices 3s. per ton for lighterage must be added.

HAMBURG MARKETS.

Owing to the holidays and the late frost, our markets have been very quiet during the past fortnight.

COFFEE fully maintains the late rise, and is looking again upwards. Sales amounted to 25,000 bags for pressing orders.

SUGAR.—Within the last few days this article has been very lively, and 8 sch. banco advance is willingly paid. The refined market follows, and all descriptions are ¼ to ½ sch. banco per lb. dearer than before the holidays.

RICE finds purchasers at steady prices.

SPICES.—Pepper is in good request and higher. Stocks getting low. Cassia lignea of easy sale at former advanced prices. Cassia flores very scarce, and what little is in the market is held at very high prices.

DRUGS neglected.

METALS.—Copper is risen from 72 to 74. Spelter experienced a rapid rise, and several large parcels have been taken on speculation.

EXPORTS OF BULLION TO CHINA.

The following return shows the shipments of bullion from England during the present year:—

	Gold.	Silver.
Shanghai.....	— ..	£46,812
Foo-Chow.....	— ..	1,075
Hong Kong.....	— ..	—
Manila.....	— ..	139,225
Singapore.....	— ..	2,400
Penang.....	— ..	5,150

MANCHESTER MARKETS.

There has not been much business done, but the market has been active as compared with the previous fortnight. Some extensive purchases of 40-inch shirtings of 7lb. to 8lb. 4oz. weights, and of T-cloth and water twist for China have cleared off, the small quantities of these goods beginning to accumulate,

and led to a slight rally in prices. There is more buoyancy in the yarn-market, manufacturers and buyers for China and India having displayed rather more confidence than of late, and placed some fair orders.

FOREIGN COMMERCIAL REPORT.

LONDON, 13th JAN., 1860.

The leading item in the mails received this morning is the operation of the American treaty, a copy of which we give in the present issue. The reduction in the tonnage dues was to come in force on the 24th Nov., and the ports of Swatow and Taiwan to be opened on the 1st inst. The Taoutai at Shanghai has decided that Hong Kong is to be included as a foreign port for duty, drawbacks, &c.

At Canton, the new Customs, under Mr. Lay, have made their first seizure; the Portuguese steamer *Shamrock* was taken at Loong Kong in the act of smuggling silk, and conveyed to Canton.

Business at all parts continues on a satisfactory footing, and there is no appearance at present of alarm on the part of Chinese traders at our coming descent on Pekin; and as our operations are certain to be confined to the Peiho, we do not expect any interruption of trade, so long as the Chinese Government are allowed to collect the duties, but no longer.

EXPORTS.

TEA.—At Shanghai the transactions have been large, at a slight advance in rates, owing to the favourable advices from this side. Oopack and Ningchow Congous are quoted at 26 to 32 taels, at which rate about 30,000 chests have been settled. The unsold stock is reported to be from 40 to 50 chops, and 4,000 chests of Pekoe. In greens, about 50,000 half chests have been settled, at 18 to 21 for imperial, 22 to 32 for gunpowder. At Foo-chow, rates have also been slightly in advance. 17,000 chests of Congou have been settled at 17 to 22 taels for middling, and 22 to 23 for Ningchows. The stock on the market consists of about 50,000 packages of Congou, and 15,000 chests of Souchong, Oolongs, &c. At Canton, transactions have been very limited. 8 chops of Congou are reported as settled at 22 to 25 taels for Oonams, and 27 to 36 for finer sorts, 10,000 boxes Orange Pekoe at 20 to 32 taels. Stock, 40 chops of Congou, and 13,000 half chests of Pouchong, Oolongs, &c. In our last issue we gave the export of tea and silk to the 31st Oct. The exports since are as follows:—To Great Britain, from Shanghai: Nov. 2, 801,019 lbs. and 312 bales silk; 4, Beemah, 986,287 lbs. and 942 bales silk; 9, Friar Tuck, 698,178 lbs. and 935 bales silk; Flying Spray, 437,900 lbs. and 555 bales silk; Strathmore, 553,337 lbs. and 319 bales silk; 21, Chieftain, 650,930 lbs. and 89 bales silk; 23, Evening Star, 843,222 lbs. and 334 bales silk; 21, Conheath, 266,095 lbs. From Foo-Chow-Foo: 9, Southern Belle, 587,000 lbs.; Cleveland, 454,600 lbs. From Canton: 8, Aerolite, 1,102,400 lbs.; 9, Lord of the Isles, 913,000 lbs.; 10, Kirkland, 621,000 lbs.; 23, John Scott, 823,600 lbs.; Aden, 403,000 lbs.; 26, Carl von Ribbeck, 444,294 lbs.; per mail steamer, 1,779 bales of silk for Southampton, and 327 bales for Marseilles. To United States, from Amoy: Nov. 5, Kathay, 1,031,188 lbs. From Foo-chow-foo: 6, Phantom, 959,800 lbs. From Shanghai: 12, Eastern State, 720,724 lbs.; 18, Black Prince, 1,191,672 lbs.; 24, Horatio, 490,190 lbs. From Canton: 17, David Brown, 193,403 lbs. To the Continent, from Canton: Oct. 27, Nancy, 79,234 lbs. From Shanghai: Nov. 11, Sea Nymph, 470,692 lbs. To San Francisco, from Hong Kong: Nov. 6, Torrent, 340 packages. To Australia, from Shanghai: Nov. 16, Conradine Lackman, 297,132 lbs. From Foo-chow-foo: 13, Squaw, 153,200 lbs. From Hong Kong: 3, Oithona, 75,000 lbs.; 9, Mercedes, 60,000 lbs.; 17, Spray, 206,425 lbs.

RAW SILK.—The market has had a downward tendency, the dealers in some cases submitting to a reduction of 10 taels. Settlements reported to be 3,000 bales since the last mail. Stock, 8,000 to 9,000 bales. Tsatlees are quoted at 430 to 435 taels for No. 1, and Taysaams at 355 to 370 for No. 1. At Canton there is a

little inferior re-reeled Kumchook on the market, suitable for the United States, for which 425 dols. is asked. The contract rate for the current quality is still high—say, 450 dols. The article generally is scarce and high, there evidently being none produced beyond native requirements. At Japan it is believed that large quantities have been contracted for.

DRUGS AND SUNDRIES.—Cassia lignea—sales are reported to the extent of 300 piculs only, at 18.50 to 18.75 dols. Unsold stock at market, 2,5000 piculs. Cassia buds—5 piculs of new have arrived, for which 36 dols. is asked; 60 piculs of old are on the market, which may be had at 30 to 31 dols. Star anniseed continues scarce, and is quoted at 18 dols.

IMPORTS.

At Shanghai the market for cotton and woollen goods has been active and large deliveries have been made, the stock in importers hands being almost exhausted. There is some improvement also in iron and other metals. At Hong Kong and Canton, the market for these goods has been rather slack. Sales of 8,000 pieces of T cloths are announced and 8,000 pieces of grey and white shirtings. The quotations at Shanghai for 7½ to 10 lb. greys is tael 1-8-7 to 2-4; at Hong Kong the same goods are quoted at 2 dols. 30c. to 2 dols. 90c.

MANILA.—At this place the stocks of cotton goods were comparatively low; sales of white shirtings are reported at 2 dols. 80c. to 2 dols. 95c., and a rise is expected on these rates. In exports 25,000 piculs of current clay sugar had been contracted for at 5 dols. 37c. to 5 dols. 50c. Hemp: about 10,000 piculs met a ready sale at 5 dols. 5c. to 5 dols. 12c.

At SINGAPORE the import market was very dull, but as the stocks were small an improvement was expected. In exports the business also had been small, owing partly to the advance in the rate of exchange and the unwillingness of sellers to reduce their rates.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to one dollar and forty cents, and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

At	Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 8d. to 6s. 8½d.

Ditto	3 ditto	4 9¾ to 4 10
At Manila	6 ditto	4 3
Ditto	3 ditto	
At Batavia	6 ditto	
(guldern.)	6 ditto	

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

The letters delivered this morning have not as yet had any effect on the tea market, but the public sales which were on to day, very materially checked private contracts. The market, however, maintains its firmness, and of 6,264 packages of Assam offered for sale, a large portion found purchasers, at full rates. About 8,762 packages of China teas were offered for sale, 4,337 of which were without reserve. The sale was proceeding when we went to press.

ARRIVALS NOT INCLUDED IN TABLE.—Jan. 8, at London from Manila, Roebuck; 7, from Moulmein, Constance; 9, Indian; 4, off Torbay, from Batavia, Asia, for Amsterdam; 7, at Plymouth, from Manila, Ludwig Koyn; 5, at Texel, from Batavia, Rynbraundt Drie Vrienderen, Alicia Maria; 4, at Brouwershaven, from Batavia, Jane; 5, Maria Anna; 9, at Deal, from Batavia, Sveige; at Cowes, from Java, Torefors; 8, at Helvoet from Batavia, Joan Jacob; Dec. 23, at New York from Amoy, Lucky Star; 25, Penguin and Sea Star, from Foo-chow; 26, at Boston, from Padang, Minstrel; Jan. 10, at Deal, from Shanghai, Rubens; at Liverpool, from Padang, Charlotte Anne; off the start from Hong Kong, Robin Hood.

HELENA.—Nov. 12, Wilhelmina Lucia, Poelman, from Batavia, and sailed 13, for Amsterdam; 13, Torefors, Janson, from Batavia, and sailed 14, for the Channel; 14, Sea Star, Robertson, from Foo-chow-foo, and sailed 15, for New York; 19, Ludwig Heyn, Bodon, from Manila, and sailed 20, for Queenstown or Falmouth; 22, Conference, Webster, from Singapore, and sailed for Liverpool; Harvest Home, Wright, from Singapore, and sailed 24, for Queenstown, or Falmouth; 23, Wm. K. P. der Nederlanden, Zetteler, from Batavia, and sailed for Rotterdam, without anchoring; 24, Drie Vrienden, Anderson, from Batavia.

CASUALTIES.

The Neptunus, Schurman, from Batavia to Amsterdam, put into St. Helena, Nov. 14. She has been since surveyed and ordered to discharge all her cargo.

The Anne Lee, Ramsay, from Shields to Hong Kong, put into Falmouth, Dec. 22, to stop a leak.

The Mary Goddard, Harding, and William III., V. A. Burg, both of Schiedam, and bound from Batavia to Rotterdam, with sugar, got on shore off Brouwershaven during a strong west gale on the night of the 30th Dec. The former got off the following morning without assistance, though with loss of anchors and rather leaky. She has since reached Brouwershaven and proceeded for Rotterdam. The latter vessel has become a wreck, a large portion of her cargo has been saved, and endeavours would be made to save materials.

The Alma Booth, which arrived at Cowes Jan. 2, from Siam, experienced very bad weather; Dec. 25, made much water, lost sails, bulwarks, and several stanchions, and had to throw some cargo overboard.

The Reinhart van den Spreckel, which arrived at Falmouth, January 3, from Batavia for Amsterdam, had lost sails, and had jibboom and bowsprit adrift.

The Rosina, McLaughlin, from Shields for Hong Kong, put into Sunderland, December 31, leaky; she struck the ground in coming out of Shields Harbour, and will probably have to discharge.

The Chili, Captain Grell, bound from Liverpool to Batavia, put into Rio Janeiro, December 6, leaky and dismasted.

The Flying Foam, English ship, from Cardiff to Hong Kong, ran upon the rocks near Porto de Moniz, at the western extremity of the Island of Madeira, in the night of the 19th of December, and was totally destroyed; six of the men out of twenty-one saved.

The Eliza Thornton, Maxwell, from Batavia to London, put into St. Vincent on the 2nd December, to repair damages and land the crew of the Pearl (brig), of Dundee, Nicholson, from Aloa to Barbadoes, which vessel had been totally lost in consequence of collision on the 21st Nov. in lat. 30 N., long. 27 W., with the Eliza Thornton. The crew of the Pearl were all saved, except one man. The Eliza Thornton having repaired, proceeded on the 14th, but the leak having again appeared, she was obliged to put back on the 17th, and she will have to discharge part of her cargo to make a further examination of the fastenings about the stem.

The Baron of Renfrew, from Moulmein to the United Kingdom, was spoken on the 29th Oct. in lat. 48 N., long. 16 W., by the Singapore, Lahore, arrived at Havre, and has not since been heard of.

The Torefors, Swedish bark, Janson, which arrived at Cowes, Jan. 9, from Sourabaya, was towed into harbour on the 11th, reported as leaky and about to discharge.

Twenty-nine cases of old India copper coin were saved on Jan. 9, ex the wreck of the Willem III., D. V. Burg, from Batavia to Rotterdam, which vessel stranded on the middle bank near Brouwershaven on Dec. 30.

The wreck and cargo (coals) of the Flying Foam, Liddell, from Cardiff to China, which vessel drove on the rocks off Porto de Moniz, Maderia, Dec. 19, have been sold.

The Melbourne steam transport No. 4, which sailed from London on Jan. 8, for Hong Kong, put back to Deal on the 11th, with some slight damage to machinery.

JAPAN.

The American bark Hesperian was totally lost on the Okisiri Islands on the 4th September. She was bound to Japan from Shanghai.

HONG KONG.

The captain and crew of the New Granada schooner Hannibal arrived at Macao on the night of the 29th October. They report the total loss of the schooner on the coast of Hainan.

The P. and O. steamer Pekin was obliged to lay to a whole day in the Bay of Bengal, to repair damages to machinery.

SINGAPORE.

The British brig Anna Dixon, from Batavia to Hong Kong, put in to Singapore with crew sick.

H. M. gun-boat Insolent, from Singapore to Hong Kong, put into Manila short of coals, having experienced a heavy gale on the passage.

FREIGHTS AND CHARTERS.

In coal freights to India, &c., the present rates per keel are—Calcutta £30, Bombay £50, Gallo £52, Kurrachee £57, Singapore £50, Aden £60, Suez £70, Hong Kong £63, and Shanghai £68. For Australia we quote—Melbourne £60, and King George's Sound £57.

Rates of freight current to Shanghai 60s. per ton dead weight; 50s. per ton of 40-feet measurement. To Hong Kong, 50s., weight or measurement. To Singapore, 40s., weight or measurement. To Manila 35s. and 40s. To Japan, no vessel loading.

DECREASE IN BUILDING.—Messrs. A. Laming and Co., in their circular, call attention to the decrease in the build of vessels, and augur that with the diminished supply to an increasing demand, we may expect the shipping interest will improve in the present year. Screw steamers have been more remunerative, and their use is largely on the increase. Daily observation is placing it beyond a doubt that they are fast superseding sailing vessels on all voyages within their coaling capabilities. Improvements for economising the use of coal are still the subject of attention. No doubt the depression felt by the owners of sailing vessels is to be attributed to this.

SALES OF VESSELS AT LIVERPOOL.—Messrs. Curry, Kellock, and Co., in their circular, announce that the sale of vessels for the past year have been as follows:—461 ships, equal to 220,421 tons, against 482, equal to 221,419 tons, in 1858, and 586, equal to 258,868 tons, in 1857, showing a decrease of 21 ships, equal to 998 tons, as compared with 1858. The sales of new colonial ships show an extraordinary reduction both as to number and tonnage, being but 42=33,294 tons, against 99=47,966 in 1858. The prices obtained have been considerably less than for many years passed. Very superior 12-year ships can now be purchased at £13 per ton, and for colonial 7-year vessels the price ranges from £7 to £8. Among the losses of the past year iron ships and steamers have been prominent, the low prices contracted by the builders compelling them to use unfit material or unskilled hands.

FOREIGN.

AT SHANGHAI.—For England: £1 10s. To New York, 5 dols.; coasting charters in fair supply: tonnage is still, however, in excess of requirements.

AT HONG KONG, MACAO, and CANTON.—For England, £2 to £2 10s.; for United States, 5 dols.; for Havana, 55 dols. per head; for Australia and San Francisco the rates are forced down to a figure which can hardly be quoted, in consequence of there being so many ships on the berth.

AT SINGAPORE.—For England: 15s. for tin, 20s. for gambier and sago flour, 30s. for pearl sago, pepper, &c. The vessels loading are filling up slowly at these reduced rates.

AT MANILA.—For England: £2 per ton for current sugar.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 50s. to 55s. China and Manila, 60s. to 70s.

COAL FOR THE EAST.—Messrs. Seymour, Peacock, and Co., state the consumption of coal in Dublin and China to be annually 325,000 tons. The contracts made last year amounted to only 109,500 tons, and the inference is that large contracts will shortly be entered on for the supplies for the present year.

LOSS OF THE SIR C. NAPIER.—Government have presented a sextant to Captain Barton, and a telescope to Mr. Thompson, the second mate of the Melanie for the gallantry in rescuing the crew of this vessel from the hands of the natives, on the island of Pulo Brasso. Captain Pettibon, of the French ship, Jean Victor, who also rendered assistance, will receive an acknowledgment of the same.

CAPTAINS' GRATUITIES.—A trial has lately been decided in Liverpool of some importance to the shipping interest. Captain Benson, of the ship Pomona, was indicted on several charges of embezzlement, in having retained certain sums, which had been handed to him by persons at Calcutta, whom he had employed to execute work upon the vessel, and which he had received as commission or gratuities. The jury acquitted him of the charge of embezzlement, but the judge intimated that he was liable to be sued for the amount by his owners.

NEW STEAMER FOR CHINA TRADE.—On the 7th inst., a fine sciew steamer of 400 tons and 100 horse-power was launched from the building-yard of Messrs Thos. Wingate & Co., of Whiteinch. She belongs to Mr. D. Lapraik, and Messrs Lane, Crawford, & Co., of Hong Kong, and is named the Fan-qui (Foreign Devil), and is intended for the Coast of China. The beautiful model of the Fan-qui promises a speed of at least 12 knots.

STEAMER "JAPAN."—This vessel is coaling preparatory to her departure for France, having been purchased by the French Government, and is intended for the expedition to China.

STEAMER "CHEVY-CHASE."—This vessel sailed for Hong-Kong, from Table Bay, Cape of Good Hope, on November 13, and from Mauritius on the 27th.

STEAMER "BURRA BURRA."—This well-known vessel in the Australian trade has been purchased by the Dutch Government, and is now employed as a troop vessel in Java.

THE PENINSULAR AND ORIENTAL COMPANY'S STEAMERS "ORIENTAL" AND "POTTINGER."—These two vessels have been engaged by Government for conveyance of troops from Madras to China.

EXTRA PASSENGERS.—On Jan. 20, for Hong Kong, Mr. Daly; for Singapore, G. Whagon.

PASSENGERS OUTWARDS.—Per Wassenaar, Capt. Hoffstee, from Amsterdam to Batavia: Messrs. A. Strauss, J. A. Wilkens, K. J. Verburgt, A. C. M. Reeuwée, — Kamp Gille, H. J. M. de Munick, and Dessart Brothers; Miss J. L. Engel, Miss S. J. E. Kamphuis, Miss D. E. Loef, and Miss Shluphoven. Per Asia, Capt. Molenaar, from Amsterdam to Batavia: Mr. and Mrs. P. Z. E. Specht Gryp, Messrs. D. J. F. Klinkhammer, C. R. Lohr, jun., C. Rufers, C. J. Alberda, A. Furet, J. A. Allers, and D. J. Soeterik.

PASSENGERS INWARDS.—Per Bellatrip, Capt. Sandberg, at Amsterdam from Batavia: Mr. A. D. Lanoo (died on the passage) and E. D. Lanoo, Mr. Theodor Thies from Bankok, Mr. J. C. Labhart from Manila, Mr. and Mrs G. Cramer from Singapore, and Mr. — Frautmann from Shanghai.

POSTAL REGULATIONS.

LETTERS and Newspapers are despatched to China, Singapore, &c., by two routes, viz. via Southampton, on the 4th and 20th of each month; and via Marseilles, on the 10th and 26th. They reach their destination at the same time.

Books are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of Books or Pamphlets; but it must not exceed 3 lbs. in weight. The Postage on Books is payable in advance by stamps.

The following shows the intended departures of mails, by the P. and O. Co.'s steamers, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo, are despatched, via Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. The departures from Hong Kong for the ensuing year will be:—

Jan. 15 and 30	May 5 and 22	Sept. 12 and 28
Feb. 15 and 27	June 5 and 22	Oct. 13 and 29
March 15 and 30	July 5 and 22	Nov. 15 and 28
April 13 and 23	Aug. 10 and 24	Dec. 15 and 30

Arriving in London, via Marseilles, on the 12th to 15th, and 26th to 29th of each month, and via Southampton five days later.

COMMERCIAL AGENCY.

THE PROPRIETORS of the "LONDON AND CHINA TELEGRAPH" are prepared to execute orders for Eastern produce, for Europe or America, and information can be supplied as to the probable cost, &c.

Shippers to China, Japan, and other Eastern markets, can be introduced to Consignees, and informed as to the class of goods suitable for the respective markets, by the Commercial Editor, who has been long resident there in connection with commerce.

Parties about to proceed to China, &c., can be informed as to the route, expenses, and other details.

OFFICE, 337, STRAND, LONDON, W.C.

J. JENKS,

BOOKBINDER, 337, Strand, London, W. C., opposite Somerset House.

The "LONDON AND CHINA TELEGRAPH" and any other publications bound on the most reasonable terms on the premises.

BURROWS AND CO., WHOLESALE WINE MERCHANTS, LIVERPOOL.

Stores, Lime-street.—Offices, 54, Duke-street.

The proprietors beg most respectfully to call the attention of the Trade, Noblemen, Clergy, and the public in general, to their extensive stock of CHOICE WINES of rare vintages.

B. and C. are not disposed to comment upon the purity of their wines, which is daily most laudably acknowledged by the public and eminent medical men of all countries, as the increasing patronage of the highest families of the land is a sufficient guarantee.

They beg to call particular attention to their pure Tonic Wines, as being so valuable to invalids and persons of weak stomachs.

A sample case, containing 3 full-sized wine bottles, will be forwarded to any address on receipt of Post Office Order for 6s 6d., or a dozen for 24s.

It is a well-known fact that impure and adulterated wines are the greatest foes to health, producing acidity in the stomach and debilitating the digestive organs; while pure wines will accelerate the digestive powers—invigorating, strengthening, and bracing the nervous system.

Their Tonic Wine is admitted to be most essential to invalids, both old and young, and should never be absent from the homes of the weak and sickly. Its properties are duly acknowledged and appreciated by the leading men of the faculty both at home and abroad. To prevent imposition, each bottle is sealed with the name of the Firm. All orders to be made payable to Henry Burrows.

GEYELIN'S PATENTS.—HYGIENIC SPRING LATHS BEDSTEADS, invaluable for invalids and hot climates; cannot possibly harbour vermin. Endless Power Brick and Socket Pipe Machines Universal Gas Burners Regulator, Magic Horse-Tamng Nose Pinchers; fit any bridge.

Agents (wholesale and retail): J. GRIGG, 47, Baker-street, W.; and W. H. KENNEDY, 462, Oxford-street, W.C.

JAMES WYLD, Geographer to the Queen, Strand, and 2, Royal Exchange, London. Agent for the Sale of Ordnance and Admiralty Surveys.

NEW MAP of the EMPIRE of JAPAN, with the Trading Ports of the Treaty of 1854, the Cities, Mines, Roads, and Harbours. Maps of China, Eastern Archipelago, the World, &c., &c.

TO MERCHANTS AND SHIPPERS.

GREEN'S Unrivalled Patent Noiseless LAWN MOWING, ROLLING, and COLLECTING MACHINES, may be had on application to the Depot, 2, Victoria-street, Holborn-hill, London.

The extraordinary demand in England being over, the Patent is now prepared to execute orders from merchants and shippers with prompt attention. A liberal discount allowed.

GALVANISM.—PERSONS desirous of availing themselves of the MODERN DISCOVERIES in ELECTRO-MAGNETISM and GALVANISM as a curative agent in the treatment of various forms of Paralysis, Muscular and Nervous Debility, Chronic Rheumatism, Spasmodic Asthma, &c., can have it applied by properly-qualified medical men of experience at the Galvanic Institution, No. 52, Euston-road, every day (except Sunday), from 12 to 4 o'clock. Accommodation for board and attendance of a first-class character for those coming from a distance.

MILLINERY ROOMS,

QUEEN'S-ROAD, HONG KONG; Consulate-road, Shanghai; Praya Grande, Macao.

MRS. MARSH begs to inform Ladies visiting China that they will always find at her show rooms, in any of the above places, everything they may require in articles of dress and fashion. A large and superior assortment suitable for the climate always kept on hand. The latest fashions received every mail from Paris.

BOTTLED ALES AND WINES, &c.

"**NO BUYERS** for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—*Melbourne Journal of Commerce*, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS and COOLERS.

Price 7½d. per doz. BOTTLEERS contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at ONE THIRD LESS price to SHIPPERS, who will find it most profitable to order their goods to be so packed in future.

SEYMLER and Co., 37, Fenchurch-street, E.C.

Extract from the *Lancet*, February 4, 1854, and from Dr. Hassall's recent work on "Food and its Adulterations":—

"The Samples of Messrs. Crosse and Blackwell were entirely free from Copper."

CROSSE AND BLACKWELL,

Purveyors in Ordinary to Her Majesty,

RESPECTFULLY invite attention to the following, all of which are of the very highest quality and of a pure and wholesome character:—

PICKLES of various kinds; prepared in pure malt vinegar.

BOTTLED FRUITS, FOR TARTS AND PUDDINGS; preserved in their natural state and not coloured artificially.

JELLIES of unequalled brilliancy and purity; consisting of Calf's Foot, Orange, Lemon, Noyeau, Punch, Madeira, &c.

ESSENCE OF REAL GORGONA ANCHOVIES. Essence of Shrimps, Royal Table, Soko, and numerous other Sauces, the whole of which are well established in public estimation.

THE CELEBRATED SOHO SAUCE; for Game Venison, &c.

ANCHOVY PASTE, BLOATER PASTE, STRASBOURG and other POTTED MEATS; for the Breakfast and Luncheon Table.

ORANGE, MARMALADE, JAMS, and JELLIES; perfectly pure, and prepared by a process which effectually retains the fine aroma of the Fruit.

Of Marmalade, the *Lancet* of January 22, 1853, remarks—"6th Sample, purchased of Crosse and Blackwell, 21, Soho square. Ash of a Yellow Colour. Does not contain COPPER."

C. and B. are also Wholesale Agents for M. SOYER'S SAUCES, RELISH, and AROMATIC MUSTARD, all of which the *Lancet* declares to be pure.

The above, together with all other condiments and delicacies, may be obtained of most respectable Sauce Vendors in the United Kingdom, and the principal Stores in India, America, and the Colonies; and wholesale of

CROSSE AND BLACKWELL,

By Special Appointment, Purveyors to the Queen, 21, SOHO SQUARE, LONDON.

Open from half-past 10 till 5, and from 6 till 10. Admission to the whole building, 1s.—Leicester-square.

BLAIR'S GOUT AND RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Pratt, 229, Strand, London," on the Government Stamp.

OVERLAND ROUTE.

For Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall street, London, E.C.; or Oriental-place, Southampton.

ROBERTSON and Co. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Tns. Comdr.	To sail.
Hong Kong...	Robin Hood	852 J. Cobb	January 28.
Calcutta	Saladin	949 J. Baillie	January 23.
Kurrachee ..	Stamboul ..	1,274 J. Reid	January 25.

London, St. Michael's-house, St. Michael's-alley, Cornhill; or York-chambers, 55, King-street, Manchester.

WITH quick despatch, having a large portion of her cargo engaged. For SHANGHAI, Direct, the magnificent British-built ship MORAYSHIRE, A 1, 12 years, 783 tons register. Loading in the East India Docks. This fine Vessel has excellent accommodation for passengers. Will be followed by the BALLARAT, A 1, 12 years, 712 tons, H. Jones, Commander.

For freight or passage, apply to Mr. EDWARD GELATLY, with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse, E.; or to W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

FOR HONG KONG and WHAMPOA.—The celebrated Thames Built clipper NORTHFLEET, 951 tons, A 1, 14 years, BENJAMIN FREEMAN, Commander; will load in the East India Docks. Intending passengers will find this regular trader a very superior opportunity.

For freight or passage, apply to Mr. EDWARD GELATLY, &c., with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse; or to W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

MANILA.—Important to Passengers.—The magnificent frigate-built ship AMOOR, A 1 at Lloyd's, 1,344 tons register, GEORGE HAMLIN, Commander; loading in the Victoria (London) Docks. Has elegant and spacious cabin accommodation disengaged.

For terms, &c., apply to JAMES THOMPSON & Co., No. 6, Billiter-square, E.C.; or to JULIUS H. THOMPSON & Co., No. 20, Billiter-street, E.C.

SHANGHAI direct (to follow the Morayshire), the celebrated Aberdeen clipper-built ship BALLARAT, A 1 12 years, 713 tons register, HENRY JONES, Commander; loading in the East India Docks. This favourite vessel, well known in this and the Australian trade, has superior accommodation for passengers. Apply to Mr. Edward Gelatly, with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse, E.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP.—To follow the Polmaise.—For HONGKONG and CANTON, the celebrated American clipper FLYING CLOUD, classed 3 T, French Lloyd's, as per certificate, dated 18th November, 1859, 1,300 tons, ALEXANDER WINSOR, Commander, lying in the East India Docks. This ship has made two of the shortest passages to San Francisco on record, and offers a favourable opportunity to shippers desirous of despatch. Her accommodations for passengers are very superior. For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

REGULAR LINE OF PACKETS.—For BATAVIA, the fine fast-sailing barque WILLIAM SIMPSON, A 1 13 years, 396 tons per register, coppered and coppered fastened throughout, JOHN SPLATT, Commander, lying in the St. Katharine Dock. Has superior accommodation for passengers. For freight or passage apply to the Owners, Messrs. Thornton and Wests, Old Swan Wharf; or to Rangel, Woollett, and Co., 1, Lime-street-square.

SINGAPORE direct.—Notice to Shippers.—The beautiful river-built clipper FLORENCE NIGHTINGALE, A 1 13 years, 464 tons register, R. B. BEARD, Commander; loading in the West India Docks. Has the greater portion of her cargo engaged, and will shortly be despatched. Has superior accommodation for passengers.

Apply to JAMES THOMPSON & Co., 6, Billiter-square; or to DOUGLAS & MILLS, 23, Billiter-street.

REGULAR line of packets. Will be quickly despatched for BATAVIA and SINGAPORE, the fine fast-sailing ship PRINCE ALBERT, A 1, 13 years, 931 tons per register, coppered and copper fastened throughout, G. HAMPER, Commander, loading in the West India Docks, has a full poop, with superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGEL, WOOLLETT and Co., 1, Lime-street-square.

"KISS-ME-QUICK,"

And several other novel Perfumes for exportation.

As there are numerous imitations of our FRANGIPANNI, purchasers are requested to see that the names of PIESSE and LUBIN are impressed upon the Bottles.

LABORATORY OF FLOWERS,

2, New Bond-street, London.

(Perfumery in Bond, Duty Free.)

JOHN TANN'S PATENT RELIANCE LOCKS AND FIREPROOF SAFES are the best and cheapest safeguard against Fire and Robbery.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

HOLLOWAY'S PILLS.—HEAD COMPLAINTS.

Towards the end of the year, when the nervous power is low, and the circulation languid, the cases of apoplexy, paralysis, and all affections of the brain, rapidly increase in number, as every newspaper-reader must have remarked, Holloway's Pills have the power of radically removing the earliest symptoms, as headache, flatulence, dimness of sight, and giddiness; to them may the threatened look for safety; they soon rectify the digestion, rouse the drooping nerves, purify the blood, and regulate the circulation through every organ of the body. These admirable pills control every function, and restore every secretion to its proper quantity and quality. Epileptic, Apoplectic, and Paralytic fits are averted by the timely use of these pills.

JEAN MARIE FARINA, COLOGNE; LONDON: 2, Salter's-hall-court, and 16, St. Swinith's-lane, E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond—Double, at 9s.; Single, at 5s. 6d. per dozen. Duty Paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

To Hong Kong: Mr. Lloyd.—From Marseilles, 28th Feb. to Hong Kong: Senor Collioni. To Shanghai: Mr. and Mrs. Don, Mr. N. Bickham. To Singapore: Mr. and Mrs. Heliars, Mr. and Mrs. Paterson, Mr. E. Busing, Captain John Ross.

Summary of News from the Far East.

THE EXPEDITION FROM INDIA TO CHINA.

According to a telegram received on the 28th inst. from Bombay, it appears that 12,000 Europeans, and 8,000 Sepoy troops, are preparing to embark for China.

JAPAN.

YEDO.

Mr. Alcock, the British Consul at Japan, has issued two notifications recently, having reference to the trade carried on between the Japanese and foreigners. The first of these is on the subject of the currency of the dollar. It has been asserted several times that the Japanese have refused to carry out those provisions of the treaty which provide that all foreign coin should pass current in Japan for their corresponding weight in Japanese coin. But the British consul has intimated that the Japanese Government has been led to believe that British merchants have placed unfair obstacles in the way of this arrangement, by objecting to receive the dollar back in payment. At the same time that Mr. Alcock doubts whether this has been done, he expresses a hope that it will be determined that such shall not be the case. The other notification refers to the choice of ground for the erection of buildings by British subjects. This document is very decisive, and lays down in plain terms that British subjects are not to have the option of choosing where they shall have ground, purchase buildings, and erect dwellings and warehouses, because it is provided that the British consul and Japanese authorities shall themselves determine these matters. The notification further enumerates that any British subject violating this provision of the treaty, not only does so to his own peril, with regard to the protection of his person and property, but incurs severe penalties thereby.

By H.M.S. *Highflyer*, which reached Shanghai on November 25, having left Kanagawa on the 12th; we learn that on the evening of the 11th, the Tycoon's palace at Yedo was totally consumed by fire, which was supposed to have been caused by an accident. The Japanese, who had committed a murderous assault on Mr. J. Laurevio's Chinese servant, had not been arrested; but the Japanese authorities were persevering in the matter, and it was expected he would be speedily brought to justice. The wounded Chinaman was doing well. Captain Shadwell, whose wound was satisfactorily progressing, had charge of both the English and French ratified treaties, which were to be conveyed to Europe *via* Hong Kong. This intelligence is a sufficient contradiction of a report which has been in circulation to the effect that the *Highflyer*, a Russian frigate, and a Dutch frigate had been lost in a typhoon off the coast of Japan.

CHINA.

PEKIN.

Although there is no actual information of the movements of the Chinese, yet there are rumours that the fortifications of

Pekin are being strengthened under the direction of Russian engineers, and that large bodies of Tartar troops are being concentrated on the banks of the Peiho. Another account says that the Taku forts are being dismantled, and that on the appearance of a large English force they will be deserted. Should this be done, the *China Mail* cautions the English commanders to exercise the greatest caution in ascending the Tientsin, lest their vessels are caught in masked batteries at the turns of the river. The *Daily Press* says:—"The exhibition of a large British force off the Peiho, and the occupancy of the Taku forts, may most probably lead to negotiations, especially if the British will change the residence of a minister at Peking, to that of a High Mandarin in London, which may answer all purposes even better. It is said that the Emperor is determined to levy the ground tax at an increased ratio, one year in advance. Various other modes are being adopted to levy contributions for the maintenance of the troops, and there cannot be a doubt that immense bodies of Tartars are being concentrated about Peking."

The Imperial army has been defeated by the rebels of the north at Ngan Hwui, through the perfidy of a Mandarin whom the Emperor had named "The loyal man of his age," in consideration of past services for the empire. The result of this action was that Fung-pau, the commander of the Imperial force, had been allowed to resign his post. Notwithstanding this victory, it is asserted that the rebels are losing ground.

Among the *Pekin Gazettes*, which date down to the 10th Nov., we notice that Tan-Tin-Siang, the ex-Governor General of Chili, whose recall from banishment and reinstatement in office we gave in our last, is fast returning to the Emperor's favour. Tsang-Wang-yen, who was famous twenty years ago for his anti-barbarian propensities, has also, after a long banishment, been recalled to the government of Shen Si. Both these officers have been decorated with a button of the third grade. The other matters mentioned in the *Gazettes* are purely Chinese, and uninteresting to foreigners.

SHANGHAI.

EMPLOYEES FOR THE CHINESE CUSTOMS.—A correspondent at this place draws attention to the extreme hardships of the case of several young men who have arrived there in order to take service in the customs, and find that after having paid their passage from England to China, and in some cases having taken their wives and families with them, their services are not required; and although we believe in every case they have received a quarter's salary (say £150), still the hardship is very great, as many of these young men, to our knowledge, have given up good situations at home, on the faith of the representations made to them. It appears that although they have written contracts with Chinese agents, our plenipotentiary cannot, in the present state of affairs, assist them in any way. Moreover, until our relations with China are placed on a firm, satisfactory, and lasting basis, the new ports, which would otherwise absorb some of these engagements, are not likely to be opened at present. We have also heard of the same effect from Canton, and thus while warning our readers against entering the service of the Chinese customs, we do trust that his excellency Mr. Bruce may be enabled to do something for the benefit of these unfortunate young men; unless, indeed, far better still, he is enabled, by judicious diplomacy, to settle the "vexatious question" of the customs satisfactorily and permanently.

Some serious fighting has taken place on more than one occasion between the Canton and Shanghai Coolies, and the authorities have been compelled to interfere.

The *North China Herald* gives the following curious illustration of the practice of Chinese courts:—"The year before last, a contractor, named Wang-kin-yung absconded, leaving various debts unpaid. He had been specially pressed by two creditors surnamed Chin, and, on his disappearing, certain members of his family suborned witnesses to prove that the two Chin had put him in such fear of his life as to induce him to commit suicide, and had then made away with his corpse. The magistrate not having full faith in the accusers, determined to put the Chin in prison, but to allow them three years to produce the missing Wang; if he did not turn up within the time, the law was to take its course. The son of Chin was therefore imprisoned as proxy for his father, who commenced a search for Wang. He found him a few days since, and took him before the magistrate, calling loudly for redress. Wang was severely flogged and imprisoned until his debt should be paid, and his relatives have also been brought to trial for their false accusation of Chin."

A match of cricket was played here on November 29, between the officers and men of the *Sampson*, and the officers and men of the *Inflexible*, when the following was the result of the score:—*Inflexible's* first innings, 34; *Sampson's* first innings, 71; *Inflexible's* second innings, 37; the *Sampson's* one being a "tie" with the *Inflexible's* two; one man was put in to complete the score, and the *Sampson's* remained the winner with 11 wickets to go down.

At the Consular Court on November 29, E. Smith, an A.B., of the *Meclanthon* was sentenced to a fortnight's imprisonment for various mutinous acts whilst on the voyage from London to Shanghai.

At the regular monthly meeting of the North China Branch of the Royal Asiatic Society, held on the 15th November, a paper, contributed by the Rev. Griffith John, was read by the Rev. J. Edkins, "On Chinese Ethics, with especial reference to the Doctrines of Human Nature and of Sin."

FOO-CHOW-FOO.

A letter from this place describes the weather as "sharp and cold," although a smart shock of earthquake was felt on Dec. 15. The celebration of New Year's Day by the natives had commenced, and the military examinations had closed by 100 successful candidates receiving the degree of military "Ken-jin." A "strike" amongst the native pilots has been experienced, which has proved highly detrimental to the shipping interest. About the latter end of November, they formed a company and determined not to take any ship out of port, or allow the use of their sampans to aid foreign pilots in towing a vessel out, until their grievances had been inquired into and settled. It was generally considered amongst foreigners that they had just cause of complaint, and the matter was settled, but not until some vessels with valuable cargoes, amongst them the *Landerdale*, were detained some days. The supposed cause of this "strike" is not given, but the writer hints that the murder of a native, by a foreign pilot, a few weeks before, had caused the ill feeling towards all foreigners. The culprit was an American, who, having been arrested, was examined at the United States Consular Office, was found guilty, sentenced to imprisonment, a fine of 200 dollars to the family of the murdered man, and ordered to quit the port under heavy guarantees.

SWATOW.

From the following notification, it would appear that every facility was given by Government to the trade of Swatow:—

"It is hereby notified for general information, that a packet agency has been established at Swatow, and pending the confirmation of his lordship, the Postmaster-General, Charles W. Bradley, Esq., has been appointed to do and perform the duties of such office.—Signed, F. W. MITCHELL, Acting Postmaster."

HONG KONG.

A gun-boat has recently paid a visit to Namtow for the purpose of remonstrating with the Mandarin with regard to the conduct of some villagers in that neighbourhood, who had seized a Chinaman whilst on his way to Hong Kong to emigrate with his family to the West Indies. The gun-boat having reached Namtow, the authorities were communicated with, and a messenger was sent to the village by order of the Mandarin. The next morning the officer in charge of the boat was informed that the man had been brought from the village, but the officer was requested not to enter the town. Subsequently he conversed with the Mandarin on the subject of emigration, when it was elicited that the village to which the man belonged was constantly engaged in fighting with another clan, and that the man had been induced to sell his land and emigrate in order to get out of these continual broils. The officer reminded the Mandarin that fighting was constantly going on in his neighbourhood, to the great destruction of lives and property; that he had done nothing to put a stop to it until urged by foreigners, although the laws of his own country were very stringent on the subject; and that in future emigrants must be released, and the captors brought to justice.

Another libel case is likely to occupy the attention of the gossips of Hong Kong. The *Daily Press* has published an article against the Rev. Mr. Lobschied, who has accordingly applied at the Magistrates' Court for a preliminary inquiry, in order that the proprietor and editor may be brought before the Supreme Court for criminal trial.

The Chinese on the mainland at the head of Deep Bay have been engaged for several days in a severe clan fight.

The Scots of Hong Kong celebrated St Andrew's Day (Nov. 30) in a manner worthy of the occasion, and with great credit to their nationality. The *Overland China Mail* alluding

to the proceedings, which partook of rather a public character says:—"Scotland has always been strong in China, and up to a few years ago almost all the Englishmen in the South of China hailed from the north of the Tweed. The old firm of Jardine, Matheson, & Co. is essentially a Scotch house. The Colonial Secretary, Colonial Surgeon, the P. M. O., and two-thirds of the naval and military doctors have all a touch of heather about them. Mr. Fortune, who has travelled so much in the North of China, is a Berwickshire man. The splendid granite docks at Aberdeen and Whampoa have been constructed by sturdy Scotch heads. The *Hong Kong Register* is Caledonian. The diplomatist who is going to go to Peking is a descendant of Robert the Bruce. When any reference is made here in regard to shipping and other disputes, it is usually to a knowing Scotsman in the neighbourhood of the Club. The *China Mail* is Scotland all over, and so is the *Daily Press*, its editor, being descended from a number of Scotch emigrants who seized upon the mountains of Wales."

Although the scheme of emigration to the British West Indies is going on but slowly, there is every chance of a favourable progress. Three ships have been taken up, but a sufficient number of emigrants has not yet been obtained for one of them to be despatched. A large number of emigrants have now been secured, as many as 150 coming to the depot at Hong Kong in one day. All agree that it is almost impossible to over estimate the advantages which will be conferred, both on the Chinese and the West Indies, if this scheme succeeds, since the long desired outlet will then be obtained, in a legitimate manner, for the redundant population of the Chinese empire. The kidnapping for the Cuba market has received a check in the neighbourhood of Hong Kong, but the Portuguese lorchas people are still endeavouring to do some business in this line.

The garrison authorities at Hong Kong are laying out a camp which extends from the Government-House to half-way up the peak, from this it is assumed that the force now on its way to China is to be put under canvass until the time shall arrive when operations can be commenced at the Pehio. This site is represented as being extremely well chosen, and with the climate that prevails at Hong Kong during the winter, it is confidently reported that the troops will be kept in good health, and rendered efficient for their duties in the north.

The Acting Attorney-General, Mr. Green, comes to England by this mail, in consequence of the state of his health. This gentleman has fulfilled his duties during the last few months with considerable acumen, and has won the respect of all the residents. It is said that the acting appointment has been offered to Dr. Bridges, who has declined the honour, and therefore Mr. Kingsmill is expected to accept it.

It appears that the residents of Hong Kong are to have an abundance of amusements during the ensuing winter. The sore place between the garrison officers and the Parsees has been healed up, and the consequence has been that the representations have gone off with great success, Sir Hercules and Lady Robinson honouring them with a visit. Lewis's Hippodrome, from Australia, has just commenced business for a short time; then they have the Alleghany Bell Ringers, who have placarded the whole place with their "posters;" then a French conjurer is expected from Manila; and finally, the races are expected to prove the greatest attraction of all.

LEGISLATIVE COUNCIL, NOV. 21, 1859.—An ordinance sanctioning the expenditure of a sum not exceeding £90,000 for the current expenses of the colony, for the year 1860, was passed *nem con*, when the council went into committee on the details. The Governor explained, that in introducing the ordinance on the first reading, he had over-estimated the surplus that would be available at the end of the year. He had made it £45,000—but owing to the impetus given to the Surveyor-General's department, that officer was expending more money lately, and that although the reduced surplus would probably exceed £42,000, his excellency preferred fixing it at £40,000. Before discussing the expenditure *seriatim*, the Governor explained that the council had the power to reduce or reject any item, but they could not increase it. The Acting Attorney-General said that he wished to move for an increase of salary for the Registrar of the Supreme Court, his salary was so low (only £600 per annum, his predecessor having had £750), that unless it were raised, he would seek employment elsewhere. His excellency the Governor replied that the matter had his best attention, and that he intended to apply to the council on behalf of the Crown, for a civil list for the maintenance of H.M. Government on the island, such list to include the salaries of all permanent officers, which would obviate the necessity of such salaries being voted yearly

by the council. It would be in the shape of an ordinance, subject to the approval of her Majesty. It would be revocable at the pleasure of the council, and therefore did not infringe on the privileges. Any increase could then be suggested.

The estimates were then read:—The Governor's establishment, £3,300; Colonial Secretary's establishment, £3,050; Colonial Treasurer's establishment, £1,735; Auditor General's establishment, £1,550; Surveyor General's establishment, £2,570; Clerk of Councils, £205; Registrar General, £1,994 10s.; Harbour Master and Emigration Officer, £2,002 10s.; and Police Rate Collector, £672 10s.; Judicial establishment, £6,585; Ecclesiastical establishment, £800 17s.; Charitable allowances, £50. Educational establishment.—It was explained that the sum was larger than last year, owing to another school having been opened. The sum now applied for was £1,162 for salaries, and £380 for rent; total, £1,542. The Medical establishment, £3,362 11s. 8d.—say £1,897 11s. for salaries; £1,285 expenses for Lock and civil hospitals; and £108 11s. 8d. for rent of Lock Hospital. Chief Magistrate, £3,320. Police, £12,980 10s.—of which £9,580 was for salary and pay, &c., £3,385 for clothes and accoutrements. Gaols, £3,305—of which £950 are for salaries, £2,345 for the food and clothing of the prisoners, and £10 for the hangman. Pensions, £150—this amount is paid to Mr. E. R. Mitchell, the ex-harbour-master. The Governor said that he had applied to Government to relieve the colony of this sum. Miscellaneous services, £50. Works and buildings, £22,550, besides £4,000 odd, not expended in last year's estimates. Of this, £5,100 was for the gaol; £1,000 for the boat-house; £1,500 for the Lock Hospital; £1,000 for two additional police-stations; £1,000 for repairs; £300 for trees; £5,000 for water. Roads, Streets, and Bridges.—£17,500, of which £3,000 was for the continuation of the Praya here and there. (It seems £1,100 remains of what was voted last year for completing the Praya off Bonham Strand.) £500 to the pathway to the Sanitarium—£2,900 for Culverts. Total expenditure £89,625 16s. 8d.

The civil list ordinance above referred to was then read for the first time. The Acting Chief Justice moved for a committee, consisting of the non-official members, to draw up a report of their ideas on the subject, for the information of the council, which motion was granted. The Acting Attorney-General presented a petition from the Crown Solicitor, complaining of his inadequate salary of £150 per annum—which, with the insufficiency of the salary of the Registrar of the Supreme Court, were entered on the minutes.

Among the police paragraphs we find the following items:—On November 1, as a man, named Reynolds, belonging to the United States steamer *Powhattan*, was walking through Mercer-street, in the afternoon, he was suddenly seized by three Chinamen, who divested him of 12 dollars. One of the thieves was subsequently met by Reynolds, and given into custody. On the evening of the same day, the residence of Lieutenant Johnson, of the Madras Commissariat, was entered, and a box containing some money and a silver watch stolen.

The *Daily Press*, remarking on the preparations for the coming conflict, says:—

We hear that orders have been received from England to engage 3,000 Coolies to accompany the force northward, as a Coolie corps, similar to those employed in the Canton war, in 1858, for the purpose of carrying the artillery, assisting the sappers, conveying the stores, &c. This is nothing but fair—if the Chinese Government will engage Englishmen, as they have done Messrs. Lay and Fitzroy, to assist them in procuring the sinews of war, surely they cannot object to our availing ourselves of the services of these poor Coolies for an equally necessary purpose; and as we do not object to this renegade system, neither should they.

The *Daily Press* has shifted round, and now abuses Lord Elgin and Mr. Bruce most unmercifully, it takes up the cudgels in favour of Sir Michael Seymour and Mr. Alcock, in a long article on "British Officials in China." The appointment of Mr. Fitzroy, Lord Elgin's private secretary, to an inspectorship in the Chinese customs, is objected to; and the Colonial Surgeon is also said to have owed his appointment to the patronage of Lord Elgin. The conduct of Mr. Alcock in Japan, and Mr. Bruce in China, is also criticised, to the great detriment of the latter.

The French agent here is said to have purchased some ground and buildings for the purpose of establishing a hospital for the sick and wounded of the army, but nothing is done yet towards towards carrying out the plans. H.M.S. *Furious* has left here for Shanghai, having on board a captain, three lieutenants, and 1,000 men of the Royal Marines for distribution among the ships. The admirals have returned from Canton, after making a reconnaissance of the defences at Fatsan Creek. Admiral Jones has since left for Shanghai in the *Furious*, for the purpose of making arrangements for next year's campaign.

The editor of the *Friend of China* is still suffering incarceration, no alteration in his treatment having taken place since last mail.

It is understood that the *China Mail* has lost the Government printing, having been underbid. There is also a report about the *Register*, to the effect that it has been purchased by the well-known house at East Point, but this statement has been stoutly denied.

The Rev. Mr. Chalmers' new Chinese pocket dictionary, the first production of the London Mission press, has been highly spoken of by the Hong Kong press.

A court composed of Captains M'Cleverty (president), Jones, and Willes; Commanders Commerell (acting captain) and Martin, assembled on board her Majesty's ship *Princess Charlotte* on November 16 and 17, J. W. Ashby, secretary to the Commander-in-Chief, officiating as Judge Advocate, to try Lieutenant Jenkins, of her Majesty's gun-boat *Banterer*, on the two charges of oppression and drunkenness. He was found guilty on both, and sentenced to be dismissed her Majesty's service. Also on the 17th a court, composed of the same members, was opened to try Mr. Stephen Cook, boatswain of her Majesty's gunboat *Drake*, for insubordination to his commanding officer. He was found guilty, and sentenced to lose two years' servitude.

The steamer *Coromandel*, towing the *Tasmania*, with 670 rank and file and 21 officers of the 3rd Buffs for Hong Kong, put into Manila for coals on Dec. 9.

CANTON.

Some rumours are afloat that the population outside this city are still displaying a spirit of unfriendliness towards foreigners, and that some missionaries, who had gone into the neighbouring villages for religious motives, had not been well received, and in some instances had met with resistance; a party of officers, however, went out for the purpose of ascertaining the truth of their statements, but could find nothing to justify them. The *Overland China Mail* says:—"It is not to be wondered at if the Cantonese should not yet be well satisfied with foreigners. By the special clause appended to the new British treaty, it is provided that the indemnity money and the expenses of the last war, amounting in all to four millions of taels, are to be levied on Canton, and it is to be held in possession till the money is paid. In that case Canton may be held till doomsday." A fire broke out on the river on December 7, which threatened for some time to do considerable damage to the shipping. Some meat sheds on the Sin-taou-lan jetty having caught fire, the flames, after burning for some few minutes, communicated to some cargo boats, which were lying at the jetty; they soon spread to a Chinese armed cruiser, which drifted immediately afterwards up the river with the tide, her guns in the midst of the flames, and the explosion of her powder magazine expected every moment. The tide soon brought her alongside the steamer *Hong Kong* and her powder exploded near that vessel, although no harm appears to have been done to her; she then passed on near the American and Spanish consuls' ships, but they luckily escaped, as did the *Cumfa*, after being compelled to slip her anchor. The burning vessels then got foul of a yacht belonging to Messrs. Jardine & Co., which would have been destroyed had not a custom-house boat fortunately been able to get up her anchor, cut her cable, and cast her adrift. The cruiser is supposed after this to have gone with the tide up the river.

Mr. Parkes has recently taken a tour into the country some 40 miles, and was received everywhere with every manifestation of friendship on the part of the native population, nor did he discover the presence of any armed men beyond the retinues of the different Mandarins.

MACAO.

Mr. G. Nye, jun., gave a diplomatic dinner on December 18, on board the United States steamer *Hartford*, to the American commissioner and part of the officers of that vessel. The *Hartford's* band played some very fine pieces during the evening.

Some of the leading members of the Macao community are desirous to make arrangements for facilitating the landing and debarkation of passengers off the Praya Grande. The plan suggested is to run a jetty off the San Francisco fort in the direction of the typha, into deep water, which will not only form a breakwater to the eastern end of the Praya (which is greatly required when the wind blows hard from east to south), but steamers can go alongside of the end of it, and discharge or receive passengers without the aid of a boat. The well-known cry of the Tanka boat girls, of "come my boat la!" will in that case cease, and residents would miss very much what was once one of the institutions of that dreary place Macao. We must confess a weakness for such institutions and places, they are eminently useful in their way, and we believe we are not singular when we say that we shall be sorry to see Macao become like its sister settlement, Hong Kong, a bustling, go-ahead, exciting, and last not least, emporium for scandal. What resident in the South of China has not enjoyed it?

In reference to the Coolie trade, the following letter from Mr. G. Nye, the United States consul, to Mr. Cooper Turner, has been published.—"I am happy to acquaint you that I have succeeded in rescuing one of the two men whose names you gave me: 'Say-Qui-Wing,' who has given me a very interesting history of his case. I am sorry not to have found also the Hakka man whom you sought, but trust you will be able to recover him at some of the barracoons in the place.—I held myself responsible to the ship for the sum she had incurred for this rescued man, which I have told him shall not be demanded of him, his sufferings of the past four months being enough for him to bear. Briefly I may say that he was captured when asleep on board a small boat returning from Fat Shan at night, having been too late for the large passage boats of the P. M. four months ago, as you before heard. He is a respectable intelligent man connected with the Hoppo department and known to several of the linguists."

COCHIN-CHINA.

We are enabled to give some further particulars of the engagement between the French forces and the Cochin-Chinese, as noticed in our last. On November 18, Admiral Page attacked the north side of the Bay of Touron, where there were two large forts protecting the road to Hué; these were taken, and now remain in the hands of the French. Communication between the capital and the north is thus cut off, so that the Cochin-Chinese cannot possibly remain in charge of the outposts. Lieut.-Col. Derouledé, of the Engineers, lost his life in this action, being cut in two by a ball whilst on board the *Nemesis*. His death is a great loss to the army in Cochin China. There were a few other casualties in the French army. The mortality from disease is on the decline, and the army is in good spirits at the prospect of a campaign in China. The death of Captain d'Abbeville, as stated in our last, is incorrect, that officer being at the time at Canton.

A serious quarrel had taken place between the Jews and Christians at Ennacolla, the former having attacked the latter, and carried away several things belonging to the altar, and committing other outrages. The Cochin Chinese encourage the Jews in these proceedings, and it is feared blood will one day be shed.

MALACCA STRAITS.

SINGAPORE.

The value of the dock at the new harbour is now proving itself in the great central station of the India Archipelago. The British ship *Harry Puddensay*, 800, has been docked, the leak discovered and stoppered, and the vessel undocked again in the short space of three days. The dock is capable of receiving much larger vessels. A powerful steam engine for the use of the dock has just arrived from England.

The election of the municipal commissioners took place on December 17, when the following gentlemen were placed at the head of the poll:—Messrs. W. H. Read, G. Angus, and R. C. Woods.

THE SINGAPORE AND BATAVIA CABLE.—The submarine cable is working in the most satisfactory manner; telegrams from Batavia regularly appear in the Singapore papers. The steamer *Bahiana* returned to this place on Dec. 12, and would proceed shortly to Bombay.

JAVA.

BATAVIA.

According to the Batavian newspapers, Boni is represented as still being in a state of blockade. It is reported that the Queen in Council with her heidat had sent a messenger to Wadjo, soliciting advice how to act in the present state of Boni affairs. The Wadjo state, in reply, declared its intention to remain neutral between the Dutch and Boni Governments. The Queen of Boni still remains at Pasempa. Heavy earthworks are said to have been constructed along the entire coast of Sandjai, but they were by no means secure or well defended. The mouth of the river was partially closed, and the boats removed from the banks. It is reported that a plan had been agreed to that the forts of Badjoa should be attacked during the Queen's festival day, when she would give her daughter away in marriage to the commander-in-chief of her army.

Intelligence received from the west coast of Sumatra notices that a fire broke out at Padang, which caused the destruction of 61 houses and 200 sheds filled with paddy, involving a loss of 60,000 florins. The fire was caused by carelessness.

Our own Correspondents.

FRANCE.

(OUR OWN CORRESPONDENTS' LETTERS.)

PARIS, January 24.

The Emperor's programme of agricultural and commercial improvements, and the expected treaty with England, occupy the attention of all who give any ear to political, or rather ministerial, matters, to the exclusion of nearly every other subject. The announcement was expected, and the form of it had nothing startling in it. The gist of the plan consists in this—the reclamation of waste lands by the commercial authorities, or, in case of their inability or refusal to act, by the State, which will indemnify itself for its outlay by the sale of a portion, never to exceed one-half, of the improved land; the removal of the duties from the raw material of manufactures; and the substitution of protective duties of 25 to 30 per cent. for prohibitions and duties which amount to prohibition. The proposals are all excellent in kind, and the only exception that can be taken to the last of the three is that it is not radical enough; it is reported, besides, that the per-centage is not to be calculated as at present on the foreign, but on the French value, which of course would raise the 30 per cent. to 40, 50, and in some cases, such as cotton, velvets, and other articles, in which British machinery, capital, and energy have succeeded in producing a better article than the French, at one-half the price, while the workmen who produce them in England receive, according to the evidence of French Protectionists themselves, "twice, and in some cases, three times the rate of wages." There is, unfortunately, no enthusiasm about the subject—the prevalent expression is fear; the ridiculous eulogies which some of your London contemporaries have indulged in have no echo in France; they have even had the unfortunate effect of producing the impression that England will be the only gainer by any alterations that may be made.

The work to be done is gigantic. First, as regards the waste lands, the *Moniteur* of this morning informed us that the marshy lands requiring to be drained amounted to upwards of 185,460 hectares, or nearly half a million of acres English; but this is nothing compared to the landes and other waste lands, which approach seven millions of acres—to put the matter in general terms, about one-tenth of the whole of France is now waste, and is proposed to be brought into cultivation. But every step made in this direction will be a benefit; the same may be said of the abolition of the duties on raw material; but the reduction of the duties on manufactured articles is a very different question. Has French industry muscle enough to struggle in competition with England, Belgium, and other manufacturing countries? Have Frenchmen sufficient confidence, and sufficient self-reliance, and sufficient heart, under present circumstances, to enter the arena with a chance of coming off without loss. A great many declare that without political liberty, without public spirit, no such plan can succeed. On the other hand, it must be admitted that neither the Bourbonists, nor the Orlanists, nor the Republicans, wish it to succeed; they know its success would be their condemnation and its failure the end of the Empire. The case is a difficult one, no doubt; and in consequence of the condition of the press, and of the habit of concealing their thoughts which the Frenchmen have acquired, it is very difficult to form an opinion upon the subject. However, this much is certain, Louis Napoleon is determined to try the matter, and his former successes, of all kinds, prevents the feeling that he is foolhardy.

The only really lively feeling that is exhibited here just now is the anxiety for the opening of the British Parliament. "For," say the French, "we never know anything worth knowing except through the English Parliament and press."

There is one vessel of the China expedition still at Toulon, the *Duperré*, which is now being armed, and will soon be ready for sea. This vessel is to be placed at the service of Capt. Bourgeois, who, it is said, is to have the command of the iron gun-boats. These latter will be ready at the time appointed, several are actually finished, and one was tried the other day. The *Euro-pean* will commence embarking the six gun-boats allotted to her, and the other steam transports shortly after.

It is announced on good authority that the Belgian Government intends sending out an expeditionary force to China, to act in concert with the Anglo-French troops, as well as with the view of establishing a Belgian colony in that country for the purpose of commerce.

The *Moniteur* of yesterday contains the following:—"The Minister of Finance congratulates himself that the state of the Treasury is flourishing. The arrears, which were 886,000,000*fr.*, now do not exceed 660,000,000*fr.* The budget of 1858, though deprived of all foreign aid, and charged with

the expenses of the Chinese war and of public works, is balanced nevertheless with a surplus of receipts of more than 12,000,000*fr.*"

A project has been set on foot for establishing a telegraphic line between Spain and the Philippine Islands.

The draft of a bill for the establishment of a line of steam packets between France and China has been laid before the council of state. It is proposed that the steamers shall sail from Marseilles to Alexandria, and from Suez to Shanghai. The first part of the service is to be performed by the steamers of the Messageries Impériales Company; the second by a new company to be formed for the purpose, with a subsidy from the French Government. The establishment of this line is considered to be absolutely necessary owing to the expedition to China which has been decided on.

RUSSIA.

St. PETERSBURG, Jan. 19.

Accounts received here overland from Siberia announce the return of the Governor-General, Count Mouravieff, from his late visit to Japan, having arrived September 19 (October 1), in the Imperial steam-corvette *America*, at Nicolajefsk, whence he proceeded up the Amoor in the steamer *Argoon* as far as Khabarovka, where he transferred himself and suite to the little steamer *Zena*, in which he ascended till his further course was obstructed by floating ice, when he then proceeded by land on his return to Irkutsk.

Steam navigation on the Amoor has been successfully established this last summer by private owners, the first vessel launched being the *Admiral Kozakowitch*, built in America, brought over in pieces, and put together at Nicolajefsk. She is constructed of timber, and of a peculiar build, having only one paddle-wheel, which is placed astern. In her first trip she went up the river as far as the confluence of the Shilka, then returned to Nicolajefsk, where she took in a cargo for Blagovessensk. She then again went up the Amoor, as far as the thriving town of Michaelo-Semenofsky, at the mouth of the Soongari, one of the tributaries of the Amoor, and finally went up to Manchour-sky, near Aigoon, where she remained for the winter.

A sensation has been caused in our commercial circles by a letter from the agent of the Amoor Trading Company, dated Nicolajefsk, September 28, in which he states that one of the vessels, called the *St. Innocent*, belonging to the company, was totally lost in De Castries' Bay on the night of the 8th of that month; crew saved. This vessel had on board the Imperial steamers destined for service on the Amoor, and as part of her hull is visible at low water, hopes are entertained, the agent writes, of saving a part of the cargo, especially the machinery of the steam-boats, doubly valuable in that distant part of the country. No news had been received of the *Theodosia*, the second of the company's vessels. About the same time another vessel, freighted by the merchants of Kiachta, with tea, silk, and other China produce, and bound from Shanghai to Nicolajefsk, had been wrecked on the island of Okotri. Thus the season has been particularly unfortunate for the commerce of that region, and especially for the Amoor Trading Company, who are the losers of two of their vessels. Notwithstanding these disasters, the shares of the company are in great demand, and easily saleable at a high premium.

Admiral Popoff, naval aide-de-camp to the Emperor, had quitted De Castries' Bay, with the screw corvettes *Rynda* and *Voyvoda*, together with the clipper *Plustroon*, on their return to Cronstadt.

The ecclesiastical missionaries have returned from China, after a residence of ten years at Pekin. No former mission has buried so great a number of its members as this one. The survivors give a most interesting account of the state of affairs in the Chinese capital, to which I shall probably refer in a future letter. In the meantime, I may state, that they describe the feeling of the Chinese as perfectly easy respecting the revolution going on in some parts of the empire, and that at Pekin the inhabitants are wilfully misled and purposely kept in happy ignorance of the danger threatening the Manchu dynasty; nor do they seem to care much about it, appearing to be as complete and thorough-going fatalists as the followers of the Prophet. In this state of affairs the Chinese empire, they say, is crumbling to pieces, and requires but a very small impulse from abroad to give it the *coup-de-grâce*. Perhaps it is reserved for the approaching Anglo-French expedition to lead to greater results than any of us have hitherto dreamed of.

The *Northern Bee* contains Pekin and Kiachta correspondence respecting the fate of the Coolies kidnapped on the coast of China and conveyed to French and English colonies. I have reason to believe that Russian papers, whenever they publish intelligence of this nature, are industriously circulated by the Embassy at Pekin. Two Russian commercial companies have resolved to add the publication of a journal to other speculations

of a more purely business nature. The South Russian Company proposes to bring out a first-class paper of miscellaneous contents at Odessa, while the Amoor Company will establish a weekly journal at Irkutsk, devoted exclusively to political and geographical topics.

GERMANY.

HAMBURG, January 23.

The Board of Trade at this city has just published the following official communication from their Consul General in Java, which is of importance for the merchant vessels of all maritime countries, and cannot therefore be too extensively circulated:—

"The net-work of telegraph wires, placing the principal commercial towns in Java in mutual telegraphic communication, has now been extended by the opening of the submarine telegraph from Batavia to Singapore.

"Captains of vessels passing through the Straits of Sunda, or the Straits of Bali, are thereby enabled to receive advices of the state of the markets in all the adjacent commercial places in the shortest possible space of time, by telegraphing either from Anjer to Batavia, or from Banjoewangie to Sourabaya.

"For the greater convenience of the public, arrangements have been made for receiving telegrams from vessels passing, or at anchor in the roads, communicated by flag signals, the system selected being the 'universal code of signals for the mercantile marine of all nations, by Marryatt and Richardson.'

"As the Dutch Colonial Government requires a guarantee from some respectable person resident at Batavia for the eventual payment of the charges for telegrams, which, under the above circumstances, cannot well be paid in advance, the Hamburg Consul General is ready to undertake such guarantee for all vessels sailing under the Hamburg flag."

HOLLAND.

AMSTERDAM, January 23.

The States-General of the kingdom, which adjourned before Christmas for the holidays, will reassemble to-day for the first time. As there was a ministerial crisis in the interval, and two ministers (for the colonies and the interior) tendered their resignation, and only hold office temporarily, some important disclosures and explanations may be expected in a few days. The two subjects which form the great bone of contention are, the proposed new system of railroads to intersect the whole kingdom in every direction, and the great ship canal from this city to the sea direct, cutting through the peninsula or long slip of land that runs up to the Helder in its narrowest part. It is expected that these two questions will give ministers a deal of trouble, and it is not at all improbable that, if lost, the whole of the cabinet will resign.

On the representation made to the government by the corporation of Leyden, that in consequence of the draining of the lake of Haarlem, the city has lost the revenue they used to derive from the leasing of the fishery, the government has agreed to compensate them for their loss by granting them a sum of 15,000 florins.

Orders have been sent out to Java to have H.N.M. steam-corvette *Groningen* got ready as soon as possible, to start from Sourabaya on a special mission to China and Japan.

Orders have been sent to the East India military dépôt at Harderwyk for 150 recruits, under the command of Captain van Floten, of the East India infantry, to embark on the 26th instant at Nieuwe Deep, on board the *President Plate*, Captain Harten, for Batavia; and another detachment of 150 men, under command of Captain J. H. Moomes, returning to India from expired furlough, are under orders to embark at the same port on board the *Prince Frederick of the Netherlands*, Captain de Wit, also for Batavia. The total number of supplementary troops sent to the East from the dépôt at Harderwyk, during the year 1859, amounted to 3,099 men.

Mynheer J. H. Donker Curtius, hitherto the Dutch commissioner in Japan, having resigned that appointment, the king has been pleased to accept his resignation, with his majesty's special recognition of the important and valuable services rendered by him to the state under circumstances of great difficulty.

The number of vessels that arrived at Amsterdam from foreign countries in 1859, was 1,798, of which 197 were from Java, 1 from Japan, and 7 from Sumatra. During the same period the vessels that sailed amounted to 1,685, of which 63 were for Java, 5 to Singapore, 1 to Hong Kong, 1 to Japan, and 1 to Padang.

Major-General Baron Nahuys, who lately died at his estate

of Burgst, near Breda, and who was for nearly thirty years a member of the Supreme Council of Java, had during that long period formed a very extensive and valuable collection of papers and documents relating to the ethnography, statistics, and languages of the nations of the Eastern Archipelago. This valuable fund of Oriental information and research has now been presented by the general's widow to the University of Delft, and incorporated with the library in that city, where it is open to the inspection of the public.

The presents and legacies received by the Netherlands Missionary Society during the past year amounted to 38,677 florins.

A pamphlet has just been published here, the object of which is to urge the government to increase the export duty on sugar shipped at Java to foreign countries from two to five florins per picul, in order to insure its being sent exclusively to the Netherlands.

Amongst the valuable articles lately sent from this city to Batavia may be mentioned a splendid testimonial, intended as a present to His Excellency General van Swieten, late Governor of the West Coast of Sumatra, from the merchants residing at Padang, in grateful remembrance of his uniform kindness and unremitting zeal in furthering and facilitating the valuable trade of that important district. It consists of a magnificent Epergne, representing a palm-tree of solid silver, about three feet in height, above which is a highly ornamental candalabra, surmounted by a beautiful cut-glass basin for flowers. At the foot of the tree is a shield, on which are engraved the names of the donors, with a suitable inscription.

The king has conferred the insignia of the military order of Willem (4th class) on Captain J. C. Steenberg, of the Dutch East India Army, in recognition of his gallant services in the expedition against the pirates on the north coast of Minahassa, in the month of April, 1856.

The Chamber of Commerce at Rotterdam has, by unanimous resolution, signified its perfect concurrence with the principles laid down by the public meetings of Hamburg and Bremen, for the security of private property at sea in time of war, and has sent in a petition to the Minister for Foreign Affairs requesting the Dutch Government to take the needful steps to have this important subject brought before the approaching Congress at Paris. Fifteen German maritime cities have held public meetings, and notified their adhesion to the principles enunciated by the merchants at Bremen.

Naval and Military.

CHINA EXPEDITION.

The Urgent screw store ship, after discharging the refractory 24th Regiment at Cork, as noticed in our last, sailed for the Cape of Good Hope and China on the 14th inst. The Melbourne transport put back into Plymouth from stress of weather, but sailed again on the 16th. The Adelaide, Sir William Peel, and Mauritius, have all sailed, the Tiger and Khersonese will follow in a day or two, loaded with shot, shell, and hospital stores, they will convey a number of the Royal Marines. The Mauritius has on board Lieut. Spofforth, Ensign Gunter, of the 59th and 85th Regiment, and 220 rank and file, with a medical staff, including Surgeon-Major Thomson, Staff-Surgeons Rutherford and Rennie, Assistant-Surgeons Thompson, Moffit, Devlin, Kinahan, White, Longmore, Barnwell, McCarthy, Kerens, Low, Murtagh, Bailey, and Watson. A Scripture reader is also on board.

The Himalaya sailed on the 15th, for Alexandria, with two complete batteries of Armstrong guns and ammunition. The *Army and Navy Gazette* states that in hoisting in one of the gun-carriages, the portion hooked, gave way, and was in fact rotten. The statement has been denied—it is at least exaggerated. The following officers and men composing the first and second batteries of the 4th Brigade Field Artillery proceeded by the vessel for transmission with the guns, &c. by the overland route to China:—Lieut.-Col. and Brevet-Col. E. W. Crofton, in chief command; Capt. R. J. Hay, belonging to the 2nd Brigade, Garrison Artillery; Capt. L. B. Brabazon, as Deputy-Assist.-Quartermaster-Gen.; Lieut. H. J. Hickes, as Adj.; Capt. and Lieut.-Col. W. L. Barry, in command of No. 1 battery; Second-Capt. R. H. R. Rowley; Lieuts. H. M. Hozier, H. P. Phillpotts, and Briscoe; Capt. T. W. Milward, in command of No. 2 battery; Second-Capt. Harrison; Lieuts. W. G. Branker, L. Gye, and Harvey; Assist.-Surg. in charge, Prescott, W. T. Morgan, M.D., and H. Harrison; Veterinary Surgeon G. Longman; 22 serjeants, 12 corporals, 18 bombardiers, 200 gunners, 150 drivers,

2 farriers, 12 shoeing smiths, 6 collar makers, 4 wheelers, and 4 trumpeters—forming a total of 447 officers and men of all ranks. This vessel is to bring from Alexandria to Kingstown about 500 men and officers of the 14th Light Dragoons on their passage through Egypt.

The Arcona, one of the Prussian expedition for Japan, is at present at Southampton, waiting to be docked, in consequence of injuries sustained on her passage from the Baltic. The other vessels, *Franenlob* and *Thetis*, will have to await the completion of the Arcona. The expedition has been delayed some three months by similar misadventures.

Rear-Admiral Sir Alexander Milne, K.C.B. was yesterday appointed Commander-in-Chief of the North American and West Indian stations, vice Rear-Admiral Sir Houston Steward, whose period of service has expired.

Vice-Admiral Bruce is to succeed Admiral Bowles, at Portsmouth.

The new iron plated ship *Warrior*, building by the Thames Iron Ship Building Company for the Admiralty, is making rapid progress. She will carry 60 or 70 of the Armstrong guns and will be able to fight an opponent at four miles distant. Her own sides are said to be capable of resisting a 68 pounder shot, fired at 1,000 yards distance.

It is announced that the augmentation of the army will be by increasing the strength of the regiments to 1,200 rank and file.

The Hon. Mr. Anson, M.P. for Lichfield, who served under Sir Hope Grant in India, is about to join his staff in China, as announced in our last.

In a general regimental order recently issued the following changes are announced in the Royal Artillery:—Lieutenant R. B. Butt is transferred from No. 8-battery, 4th brigade, to No. 7 battery, 2nd brigade; and lieutenant R. N. Young from No. 5 battery, 1st brigade, to No. 4 battery, 4th brigade. Lieutenant Gubbins is transferred from No. 4 battery, 1st brigade, to No. 9 battery, 6th brigade, and will join and do duty in the depot brigade at Woolwich, until required to embark for Malta to join his battery. Captain and Brevet-Major Henry Rogers is removed from the half to the full pay list, and will be absorbed in the first vacancy; in the meantime he is to join at Plymouth for duty. Second Captain Major Francis Downes, having resigned his situation in the Staff College, is transferred from the supernumerary to the effective list and will join an duty with the depot brigade at Woolwich until absorbed. The following changes have been sanctioned:—Between Captain H. Heyman, of the 5th brigade, and Captain and Brevet Major E. J. Carthew, of the 10th brigade; between Lieutenant E. S. Burnett, of No. 2 battery, and Lieutenant C. H. Pickering, of No. 3 battery, 11th brigade; Between Lieutenant L. P. Walsh, of No. 1 battery, 4th brigade, and Lieutenant H. T. M. Hozer, of No. 6 battery, 4th brigade; and between Lieutenant C. French, of No. 5 battery, 4th brigade, and Lieutenant T. C. Martelli, of No. 1 battery, 1st brigade. In consequence of the above the undermentioned officers will proceed to stations to join their batteries, as follows:—Captain Heyman, to Alderney. Major Carthew, to Gibraltar, Lieutenant French, to Woolwich, and Lieutenant Martelli to Gibraltar.

Lord Cardigan, it is rumoured, will resign the office of Inspector-General of Cavalry, and rumour states that Major-General Lawrenson will succeed to that post, Lord George Paget obtaining the cavalry brigade at Aldershot.

LAUNCH OF THE PRINCE OF WALES.—At half-past 12, on the 24th, the Prince of Wales, 131, screw, was most successfully launched from Portsmouth Dockyard, amid the cheers of assembled thousands. Length, extreme, 272 ft. 1 in.; breadth, extreme, 60 ft. 2 in.; depth in hold, 25 ft. 6½ in. Her propelling power consists of a pair of 400-horse power (nominal) trunk engines, by Messrs. Penn and Sons. Armament: Upper deck, one 68-pounder, 95 cwt., pivot gun, 10 ft. long; and 20 32-pounders, 25 cwt., 6 ft. long. Main deck—38 32-pounders, 42 cwt., 8 ft. long. Middle deck—30 32-pounders, 56 cwt., 9 ft. 6 in. long; and 6 8-inch guns, 65 cwt., 9 ft. long. Lower deck—26 32-pounders, 56 cwt., 9 ft. 6 in. long; and 10 8-inch guns, 65 cwt., 9 ft. long.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, PALL-MALL, JAN. 13, 17, 20, & 24.

Capt. A. R. Wragge, Royal Artillery, to be major.

Brevet-Colonel Randal Rumley, Lieutenant Colonel on half pay Unattached, to have the temporary rank of major-general, while acting as Vice-President to the Council of Military Education, vice Major General Cameron, C.B., who resigns that appointment.

Brevet-Colonel Robert Henry Lowth, C.B., retired full pay 86th Foot, to be major-general, the rank being honorary only.

Captain Frederick George Pym, of the Royal Marines, to be major in the army.

The undermentioned promotions to take place consequent on the death of Lieutenant-General Chesborough Grant Falconar, Colonel of the 73rd Regiment, on Jan. 10:—

Major-General William Thomas Knollys, Colonel of the 62nd Regiment, to be lieutenant-general.

Brevet-Colonel Thomas Armstrong Drought, Inspecting Field Officer of a recruiting district, to be major-general.

Captain and Lieutenant-Colonel Francis William Henry, Earl of Westmoreland, C.B., Coldstream Guards, to be colonel.

Brevet-Major William Mauleverer, Captain, half-pay, 58th Foot, staff officer of pensioners, to be lieutenant-colonel.

Captain Robert Henry Price, 35th Foot, to be major.

NAVY.

PROMOTIONS.

COMMANDERS.—John S. W. Grundy, to be captain; F. A. Herbert, to the Excellent; G. T. S. Winthrop, to the Argus.

LIEUTENANTS.—Joseph Ray, to be commander on the reserved half-pay list; Marcus Lowther, to be commander; C. H. Murphy, to the Ajax; Jocelyne J. W. Jervis, from the Mars to the Hawke; W. C. S. Sullivan, to be additional to the Hawke; G. Poole, to the Chesapeake; C. E. Stevens, to the Britannia, for the Sealark; G. D. Buske, to the Trafalgar; B. S. de R. Hall, to be flag-lieutenant to Rear-Admiral Sir A. Milne, commander-in-chief on the North American and West India station; C. J. Carey, to the Queen; H. F. Nicholson, to the Cambridge; J. H. Hatchard, to the Impregnable; E. J. Jermain, to the Excellent; J. Short, to the Melpomene; T. Wilcox, to the Hawke; and R. Sterne, to the Argus.

ENGINEERS.—A. Watt, to the Niger; J. C. Williams, to the Princess Royal; G. F. Williams, to the Centurion; D. P. Steady, to the Doris; H. W. Tregilas, to the Cockchafer. Second-class Assistant Engineers: J. W. E. Baron, to the Buzzard; E. Taylor and R. W. Jones, to the Chesapeake; as acting and second-class engineers.

APPOINTMENTS.

CAPTAINS.—C. F. Schomberg, to the Cumberland, vice Captain Patey, whose appointment has been cancelled; and D. Curry, to the Aboukir, vice Captain Schomberg.

MASTER.—A. Thomas, to be additional to the Cumberland.

STAFF SURGEON.—Lenox T. Cunningham, M.D., from Algiers, to the Formidable.

SURGEONS.—Samuel Donnelly, to the Cumberland; Charles Smith, to the Hawke; John S. Davidson, to the Algiers, vice Cunningham, appointed staff-surgeon of Formidable.

ASSISTANT SURGEONS.—William H. Lloyd, M.D., from the Formidable to the Nile; Robert Murphy, from the Imaum, to be additional to the Formidable; R. S. B. Head, to the Impregnable, for Nautilus. Acting Assistant Surgeon, G. W. L. Harrison is confirmed as assistant surgeon in the Ariadne; Dr. T. A. O'Flaherty, to the Brunswick.

SECOND MASTERS.—George H. Downing, to the Nile; Guido Harris, to be additional to the Impregnable.

MASTER'S ASSISTANTS.—G. W. Burnett, to be additional to the Chesapeake; R. H. Hebden, H. S. Edwards, T. L. Mourilyan, W. Garner, G. Royle, and T. Potter, to the Chesapeake, as supernumeraries; H. Husband, to the Nile; F. W. Raikes and P. C. Smith, to the Himalaya; R. S. Evatt, to the Ariadne; H. W. Davidson, G. J. H. McCarty, F. W. Moffat, J. F. Atkinson, W. Terry, R. P. Tully, B. M. West, and T. H. Flood, to the Marlborough, as supernumeraries; R. H. Hawes, to the Saracen.

PAYMASTERS.—C. W. McDermott, to be additional to the Asia; W. J. Stevens, to the Hydra.

ASSISTANT-PAYMASTERS.—J. Bright and E. A. M. Chaffers, to the Nile.

CHIEF ENGINEER.—T. T. Murray, to be additional to the Figsard.

FIRST-CLASS ASSISTANT-ENGINEERS.—W. Cockshott, to the Edinburgh; J. M. Sales, to the Wellington. Second-class:—C. Homer, to the Firebrand; J. Watson, to the Edinburgh, for service in the Erne; E. T. Read, to the Hogue, for service in the Jackdaw. Third-class:—G. H. Newbury, to the Figsard.

ACTING THIRD-CLASS ASSISTANT-ENGINEERS.—R. Spiers, to the Industry, W. W. Smith, to the Asia, as supernumerary; J. Gordon, to the Wellington, as supernumerary; J. Anderson, to the Conqueror; P. M'Allister, to the Firebrand; Ashley Richard Moxham, to the Asia.

CLERK.—J. W. Silverlock, to the Diadem.

MIDSHIPMEN.—G. E. Price, F. M. S. Osborn, and G. Jervis, to the Algiers; C. Laprimandave, to the Queen; L. R. Moncrieff, and H. G. Audoe, to the Mars; M. J. Dunlop, to the Royal Albert; T. H. Falcon, and W. B. Littlehales, to the Ariadne; C. R. T. Russell, to the Scylla; J. Fellows, R. H. Bogle, and W. D. Barrow, to the Diadem; E. C. Foot, to the Mutine; F. Rougemont, to the Neptune; R. J. F. Edgecombe, J. C. Best, J. J. F. Bell, C. J. C. St. Clair, and W. J. Boteler, to the Nile; R. S. Crompton and N. S. F. Digby, to the Emerald.

Literature.

A Visit to the Philippine Islands. By Sir JOHN BOWRING, LL.D., F.R.S. London: Smith, Elder, and Co., Cornhill.

We remember reading in a letter of Sir John Bowring's to a friend at Exeter, soon after the wreck of the *Alma*, a statement that "all his papers, the result of a long literary life, had been lost." We presume, however, that some must have been recovered, or otherwise, the learned doctor's memory must, indeed, be most retentive. At any rate, the volume now before us could not, in our opinion, have been compiled from data and documents in the British Museum, as the *Literary Gazette* somewhat harshly suggests. However this may be, the indefatigable Ex-Governor of Hong here gives us another proof of his literary talent. "A Visit to the Philippines" is written in a pleasant, chatty, but instructive style. A great amount of useful information is afforded; indeed, we have never yet met with any work giving so thorough a description—social, physical, political, and commercial—of these interesting islands as the book now before us. The author appears to have travelled where no European ever went before, at least, we have no record of such; and to this cause, in addition to his knowledge of the Spanish language, may we attribute the fact that in this work we obtain a clearer insight into the domestic life of the natives and Mestizos, their habits and peculiarities. Sir John, from his own statement, invariably met with the utmost attention from all classes, indeed he speaks in loud praise of their great hospitality, especially on the part of the priests or pachas, as they are called. Thus, from the Captain General, who "called for him every afternoon during his stay at Manila, and took him for a drive in his carriage and four, escorted by Cavalry Lancers," to the more humble Alcalde de Tayabos, who welcomed him with "a gathering of graceful young women, clad in the gayest dresses, and all on ponies, which they managed with admirable agility" (these damsels, by-the-by, the Alcalde called his Amazonas), all vied with each other in showing honour to the veteran diplomatist. Thus, everything appeared *coulour de rose* to the worthy knight; but we can, nevertheless, recommend this work to our readers as a truthful and painstaking account of these islands.

SELECTION.

LORD ELGIN'S QUARTERS AT YEDO.—Some of our party inhabiting the rooms near the entrance gateway were more highly honoured. They were separated from an adjoining house only by a paper screen. One morning, while dressing, their attention was arrested by a scratching upon the paper, followed by a suppressed tittering. Upon investigating the cause, a pair of sparkling eyes were visible at two little peep-holes expressly constructed; it was evident that a toilet, as performed by an English gentleman, was a spectacle which afforded intense amusement to the young ladies of the family next door.—*Narrative of the Earl of Elgin's Mission to China and Japan. By Laurence Oliphant.*

NOTES.

Mr. Mudie, it is said, took no less than 2,000 copies of Mr. Oliphant's "Narrative of Lord Elgin's Mission to China" (a two-guinea book).

It is announced that the fifth volume of "Lord Macaulay's History of England" is quite finished, and abounds in interest chiefly of the Queen Anne period; and the sixth volume is so far advanced as to need little arrangement from Lord Macaulay's great friend, Mr. Ellis, who is left his literary executor.

We have, on the authority of the *Literary Gazette*, that the notorious chartist leader, Mr. Ernest Jones, is about to publish a poem, entitled "Corayda," which is to be dedicated, by permission, to E. B. Lytton, late secretary for the colonies for the Derby government.

85,000 copies of the first number of the *Cornhill Magazine* were sold, and it is understood that the advertisements stitched up in it amounted to more than £700.

The Hon. E. Everett, of Boston, is to contribute the biography of Washington Irving to the new edition of the *Encyclopædia Britannica*.

Besides a new work on China, which is about to appear from the pen of Sir John Bowring, we find that "Twelve Years in China, by a British Resident," is the title of a work in preparation by Messrs. Thomas Constable and Co.

The first part of a new "History of England" may be expected ere long from the pen of Mr. J. A. St. John; and Dr. Stebbing has nearly ready for the press his "Lives of Italian Poets."

Mr. Tom Taylor has dramatised Mr. Dickens' last serial story, "A Tale of Two Cities," and it will speedily be produced by Madame Celeste at the Lyceum Theatre.

Mr. Cunningham states in the *Illustrated News* that a late article in the *Times* produced contributions to the amount of £8,000 to a charitable society.

An Italian translation of "Macaulay's History," by Cesare Rovigo, has been published at Turin. Another, by P. Emiliani-Giudici, is to appear at Florence.

There are only eighty-five printing establishments in the capital of France; what a contrast between Paris and London is shadowed forth in the statement of the bare fact!

Messrs. Kent and Co. have in preparation a library of fiction, on a new plan. It is to be entitled "The Pocket Novels." Each shilling number will contain two original novels, with illustrations, for a shilling. No. 1 is to appear on the 1st of February.

Washington Irving has left a large fortune to be divided among his nephews and nieces. For the last eight or ten years he has probably received from his books alone an average annual income of 20,000 dollars.

THE TREATY WITH JAPAN.

The Treaty with Japan, signed August 26, 1858, and ratified on July 11, 1859, at Yedo, has been published and presented to the House of Commons. The text of this treaty, as also the regulations of trade, was given in our first number, and on comparing the same with the documents now before us, we find it to be a correct version.

Parliamentary Intelligence.

The following is an extract from her Majesty's speech, at the opening of Parliament, on the 24th inst., in relation to China and Japan:—

My Plenipotentiary and the Plenipotentiary of the Emperor of the French having, in obedience to their instructions, proceeded to the mouth of the Peiho River, in order to repair to Peking to exchange in that city the ratifications of the Treaty of Tientsin, in pursuance of the 56th article of that Treaty, their further progress was opposed by force, and a conflict took place between the Chinese forts at the mouth of the river and the naval forces by which the Plenipotentiaries were escorted. The allied forces displayed on this occasion their usual bravery, but, after sustaining a severe loss, were compelled to retire. I am preparing, in concert and co-operation with the Emperor of the French, an expedition, intended to obtain redress and a fulfilment of the stipulations of the Treaty of Tientsin. It will be gratifying to me if the prompt acquiescence of the Emperor of China in the moderate demands which will be made by the Plenipotentiaries shall obviate the necessity for the employment of force. I have directed that papers on this subject shall be laid before you.

I have concluded a treaty with the Tycoon of Japan, and directed that it should be laid before you.

HOUSE OF LORDS.

THE ADDRESS.—Lord GREY alluded to the Italian affair, and said he was glad to observe that in that part of the address relating to China there was undoubtedly a laudable desire manifested on the part of her Majesty's Government not to pledge the House to any opinion upon some of the most important points. They were asked to thank her Majesty for having informed them of what has occurred, and the preparations that were making for the expedition to China. For giving this information, and taking no notice of the delay which had taken place in bringing the subject under the consideration of Parliament, the House had no right to complain. By admitting that her Majesty's Government would not be to blame for having failed to bring this subject at an early period under the notice of Parliament, the House would be surrendering one of its most important rights and privileges. The conduct of relations with foreign powers belonged to the Crown, and the Crown also had the prerogative of making war and peace. But her Majesty's ministers were to be held strictly responsible for the manner in which this power was exercised, and whenever the condition of the country was such that it was necessary to arm with a view to repel hostilities, it was the duty of her Majesty's ministers to make this known to Parliament, and to call upon Parliament to make provision for defraying the expenses which would be thus incurred. He then referred to the past rules and practices of Parliament in this respect, and quoted the examples of the seizure of some British vessels by the Spaniards in 1790, and the assistance rendered by the British Government to the Princess Regent of Portugal, in 1826. He then went on to say, that on the 16th of September last, we received in this country the account of the repulse in the Peiho. We had no information as to how soon afterwards the decision of her Majesty's Government was taken as to the course which they should adopt; but it was known from the newspapers that at a very early period the preparations were commenced. It was now four months since this intelligence was received, and during three of those months our ports and arsenals had resounded with the din of preparation, and measures had been taken for despatching artillery, stores, and gun-boats to China, and for sending land forces of not less than 10,000 men, in addition to our naval forces. Therefore much expense had been already incurred, and he asked them to contrast the course taken, without any communication to Parliament until this moment, with what had been done on the former occasions. If they were to admit that a minister might, without blame, during so long a period, continue warlike preparations without the sanction of Parliament, then they would admit that principles, which our greatest statesmen and most distinguished writers had held to be of the very essence of the constitution, were no longer to be considered binding on us. He admitted the power of the Crown to enter upon war; but it was always held that that great power should be entrusted to the executive of the day, because they were not at liberty to take one step towards involving the country in war without informing Parliament of the course which they intended to adopt, and then the council of the nation had it in its power to check them in the beginning, in taking any steps which might be deemed inexpedient or calculated to involve the country in an unjust or impolitic war. But what became of this security if a minister was to be allowed to go on all the time he had described, taking measures with a view to hostile proceedings? It was true that by postponing for a moment to the more urgent demands of the Chinese war, measures which could not ultimately be abandoned, no technical irregularity might have taken place; but of this he was sure, that a large, a very large expenditure had been already incurred, which Parliament would ultimately have no alternative but to provide for—an expenditure which might lead to one far larger than anything they dreamed of, and might be the beginning of the cost of a mighty war. But he would point out that this was not mere technical expenditure of so many pounds, to be laid out under a technical head of the estimates. What he maintained was, that the country was not to be committed to any heavy expenditure, above all in the way of war, without giving the great council of the nation an opportunity of considering the propriety of that course. He was the more surprised to find that this should have happened under the present Government, because the present Chancellor of the Exchequer had, on the occasion of the Persian war in 1857, declared that the practice of commencing the war without first referring to Parliament was unconstitutional. Now, the object of the amendment which he (Earl Grey) would think it his duty to move, would be simply to enforce this sound view of the law and practice of Parliament. There were many other most important questions which he hoped their lordships would have to consider at an early period; but the question now was, whether we had any just cause to quarrel with China at all? Whether the Chinese, having experienced that the access to their capital by the Peiho being undefended was a source of serious danger, they were not justified in fortifying it? Whether having made an announcement to that effect in the *Peking Gazette* afforded any just ground of complaint to this country? Whether the treaty of Tientsin having given us a right to send an ambassador to Peking, but having been altogether silent about the route he was to take, the ambassador was entitled to say, when offered another route, that he would proceed by no other than the Peiho, and that if the route were not opened, he would open it by force? Whether, if he had such right and were entitled to use such force, he should not have previously appealed to the authorities of Peking to see whether by more peaceable representations they would not have been induced to admit him? Whether it made any difference that these fortifications were, as stated, defended by militia, and not by regular troops; and whether, if the French ambassador were to come to London by Gravesend, he would have been entitled to remove any obstructions by force because they happened to be manned by militia? ("Hear, hear," and laughter.) Whether a war with China could by any possibility promote the interests of this country? ("Hear, hear.") Whether any treaty which might extort from China any amount of degradation would place us in a better position; or whether, if did, such a treaty would be observed one hour after the

force by which it was extorted was withdrawn? Whether our trade with China, which directly and indirectly contributed more than any other to the advantage of this country, with the sole exception of that of the United States, was rightly to be promoted by burning the cities and slaughtering the people of China; and whether they should become better customers, or produce more of the goods which we desired to buy, by our spreading fire and devastation through the land? (Hear, hear.) Whether it was right to enter upon a contest which, once entered upon, there was no retreat without pulling down the ancient dynasty of the Chinese empire, and, in all probability, leaving the vast empire and that countless population a prey to anarchy? (Hear, hear.) These were questions which they would have to consider, but they would open up too extensive a field on the present occasion. They were questions upon which Parliament would have to pronounce, although they could not be considered with the same advantage which they might have been three months ago. If Parliament should disapprove of the policy of the Government it might be too late to correct a great part of the errors which had been committed. At present, too, we were far more deeply committed to France, who was to act as our ally, than we were at an earlier period. It was not a mere theoretical objection that he took to the line of policy which the Government had pursued, but he believed that there was in it a practical and substantial injury to the country by this departure from the law of the Constitution? He thought they were bound to notice this, and therefore he was prepared to move the addition of a paragraph, embodying this view, after that portion of the address which thanked her Majesty for the information which she had given, without saying one word of the time when the communication was made. He had drawn up this amendment in the most temperate terms which he had been able to devise, and if any noble lord could suggest anything more temperate, he would readily adopt them. He proposed to add to that part of the address relating to the expedition to China the following amendment:—"But humbly to express to your Majesty our regret that when the preparations for the intended expedition were commenced, her Majesty's servants did not advise her Majesty to communicate to Parliament, without delay, the measures which had been decided, in order that Parliament might have an opportunity of forming a judgment thereon, and that its previous sanction might be obtained to the expense that might thereby be occasioned."—On the question being put, the Duke of NEWCASTLE regretted that his noble friend should have found it inconsistent with his duty to allow the address to proceed to her Majesty without an amendment. He would not enter into details on this subject; but he must make a few observations on the amendment of his noble friend. He started on the assumption, that it was the custom to lay before Parliament the intentions of the Government to enter on hostilities with foreign nations. He must confess he was surprised that he laid his propositions on so broad a basis. Writers on international law wrote very differently. What the noble lord asserted to be the general practice had been over and over again departed from, in Portugal in 1831, and in many other instances which might be named. As to the defences which the noble lord set up for his proposition, he (the noble duke) was prepared to maintain that this country was not, and had not for some time past, been at peace with China. They had not been so for the last two years—(hear, hear)—and they were even now in possession of one of the most important ports of China. Peace never was established. (Hear, hear.) A treaty was offered, and the fleet was proceeding to secure its ratification, and it was in execution of this duty that new hostilities were commenced. He did think his noble friend need hardly have brought these matters forward when so many other and more opportune occasions would arise. His noble friend had stated that they had no right to take possession of the Peiho. (Hear, hear.) Now, he would at once join issue, and declare that they had a perfect right to do so. In the treaty between China and Russia, not only was the latter nation entitled to make use of that way or the overland route, but of any other which might suit their convenience. He would not urge the fact that under the treaty of 1843 the English had a right to such passage; he might do so without any great special pleading, although he admitted a question might be raised as to its superseeding by subsequent treaties. He admitted that there were grave questions of commerce which might be raised, but surely where national honour and the blood of many of their countrymen were involved, such considerations should not altogether weigh down the balance. But really he did not think that such matters as these should be entered into when so many subsequent and fitting opportunities would arise. He simply rose to answer a few of the observations of his learned friend, and he was sure he should be excused if he did not go into the general subject; but of this he was quite sure, that the House would not agree to the amendment of the noble lord (Earl Grey).—Lord BROUGHAM then rose and addressed the House. His lordship alluded to the China question in the following words:—"It is not my intention to enter into a discussion on the merits or demerits of the China question, but I am quite aware that great allowances have to be made for the conduct of officers placed in a situation of great difficulty, such as Mr. Bruce was placed in. He had to rely on his own resources and discretion under circumstances which could not be foreseen in the instructions which he had received; but whether Mr. Bruce was to blame I will not discuss, as another opportunity now will be afforded when fuller information will be had. (Hear, hear.) One subject I cannot pass: I mean the heroic conduct of the admiral and seamen engaged. (Hear, hear.) You will concur with me in feeling that the meed of praise and honour ought not to be the meed of success alone. Unsuccessful as the expedition was, I know of none in which the daring, gallantry, and perseverance of British seamen and troops were ever more signally displayed than on that unhappy occasion. (Cheers.) I think it will soothe the sufferings of those gallant men, who have suffered severely in person and mind in that expedition, to know, although it was not successful, and whatever may be the merits or policy of the expedition, their countrymen even in their failure do justice to the almost unparalleled efforts

by which they sought to obtain success, and by which even, though worsted and defeated, they did maintain—and nobly maintain—their country's honour. I do not quite concur in the complaint of the noble earl (Grey) that Government ought to have called Parliament together to have consulted them on the Chinese question. But there are other circumstances which must be taken into consideration. I think that the Government acted with great imprudence in sanctioning the act of an officer on the spot, who took upon himself to decide whether or not there was a cause of war. (Hear, hear.) It has been said, indeed, that we never had been at peace with China; but that argument at once disposes of another argument of the noble earl; for, if we were not at peace with the Chinese, what objection, then, is there to their having blocked up the mouth of the Peiho? (Hear, hear.) Now, upon the question of the international right, I object to the principle laid down—that we had a right to force our way up that river. There is nothing whatever said in the treaty as to the manner in which we were to go to Peking. We were informed that our advance by that river would be resisted, and under those circumstances we had no more right to force our way up the river than, as the noble earl (Grey) remarked, a French ambassador would have had in similar circumstances to force his way up the Thames. (Hear, hear.) But that is not the point. We call upon the Chinese to observe all the international duties of civilised nations—we expect them to deal with us according to those duties; well, then, I entreat the Government to take care that we deal the same measure of justice to the Chinese which we demand from them. (Loud cries of "Hear, hear.") And if hostilities should unhappily be renewed, I beg that they may be renewed on a more regular footing than we have hitherto renewed them. (Cheers.) My lords, without a declaration of war we have no right whatever to institute a blockade; and if it so happened in the course of the last hostilities that we, in the exercise of the rights which we claimed, seized a vessel of any other power than the Chinese, that capture would have been illegal, and we should have been liable to all the consequence of the act. (Hear.) The treaties with the United States and with Russia have been already ratified by the Chinese—treaties giving them full commercial rights; and I ask the Government to consider what would be the consequence, if we, undertaking a blockade of the Chinese rivers, should stop a vessel of the United States or of Russia, in the prosecution of their legitimate trade, treating that blockade, as it would be, a wholly irregular proceeding? (Hear.) Therefore, while I hope by the exercise of prudence that the war may be avoided, I trust that her Majesty's Government will see, if it must be carried on, that it should be carried on as a legitimate war, and according to all the forms recognised in civilised countries. (Hear, hear.) But with respect to the amendment, not seeing in the tone of the Royal Speech anything which calls for a serious difference of opinion, and not concurring with the noble earl in the strong views which he takes of the *laches* of Government, I certainly shall not support him by my vote, should he press the amendment to a division. (Hear, hear.) I think it is rather a fortunate circumstance that Parliament was not immediately called together upon the news of those proceedings, because from the feeling excited in the country I think that the feelings of Parliament, imperfectly informed as to facts, might have led them to more rash and hasty conclusions than upon further consideration, and at a later period, they might be inclined to think consistent with justice.—Earl GRANVILLE declined to argue the Chinese question until a more suitable opportunity.—Earl GREY replied in a few words, in which he stated that he could not withdraw his amendment, but should not press it to a division.

HOUSE OF COMMONS.

PAPERS ON CHINA AND JAPAN.—Soon after the House had resumed business, subsequent to the delivery of the Royal Speech, Lord JOHN RUSSELL laid on the table the correspondence with Mr. Bruce, and the treaty of commerce with Japan.

THE ADDRESS.—Mr. ST. AUBYN, in moving the address to the Queen, briefly adverted to European politics, and then continued:—"Last year the Chinese Government, in direct violation of existing treaties, and either in ignorance of, or wanton violation of, the usages which regulated the public negotiations of civilised nations, attacked and nearly destroyed the expedition which was advancing into the centre of the country with the view of carrying out the conditions of the treaty of Tientsin. It had been determined to exact reparation for the outrage, and the Emperor of the French had determined upon sending an armed force to act in concert with ours. But, notwithstanding the insults and indignities which had been put upon this country, he believed it was still in the power of the Chinese Government, by full, prompt, and timely atonement and reparation, to avert actual hostilities from their country. (Hear.) Should they unfortunately be so obstinate as to refuse to accede to our terms, England must trust to the skill of her commanders, and the tried valour of her forces, which had never been more conspicuously displayed than in those waters, to redeem the honour of the country.—Lord HENLEY seconded the motion, and confined his observations entirely to European and home questions. They, of course, coincided with the tenor of the Queen's speech.—Mr. DISRAELI then addressed the House at considerable length. In adverting to the Peiho affair, the right hon. gentleman declined to discuss the question there, but was glad to observe that her Majesty had recognised the great bravery which had been displayed by our troops on that occasion.—Viscount PALMERSTON denied the assumptions implied in Mr. DISRAELI's questions, and declared that Government had entered into no engagement whatever respecting Italy. As to the commercial treaty with France, his lordship said it was conditional upon the sanction of the House of Commons, as far as financial changes were involved. His lordship made no reference whatever in his speech to the conduct of Government on the Chinese question. The motion was then put and unanimously agreed to, and the House adjourned.

January 25.

THE REPLY TO THE QUEEN'S SPEECH.—Mr. ST. AUBYN brought up the report on the address in reply to the speech from the throne:—Sir H.

WILLOUGHBY said, with regard to the China question, he was sorry to observe that, in the address, there was no expression of regret that her Majesty had found it necessary to prepare and send out a hostile expedition against the Chinese empire. That sentiment he took the liberty of expressing, because he was totally opposed to entering upon these hostilities, believing that in doing so we made a great mistake. Neither commerce nor civilisation would be extended by the adoption of such measures; and if ever there was a question which required the deepest consideration of the House it was the commencement of a war with 300,000,000 of half civilised people, 15,000 or 18,000 miles from our own shores. If the noble earl who was supposed to have managed matters so well in arranging the treaty of Tientsin thought that he was right to get the treaty ratified at Peking, why did he not go himself? Why leave it to a subordinate? Surely it was a pity that he did not conclude his diplomatic career in China by going to Peking, assuming that it was really necessary to go there at all. To leave the ratification to a "subordinate button," as the Chinese would term it, was to infuse a suspicion in the mind of the Emperor and the people that they were not treated with the respect to which the "flowery land" was entitled, and thereby create an exacerbated feeling. Nor did he know why the expedition was sent up the Peiho, nor why a peaceable minister should be attended with a hostile force. (Hear, hear). Moreover, the House, by expressing an opinion in favour of the expedition would also imply approval of the operations being carried on conjointly with a neighbouring country, which he confessed he would rather not see. In giving his vote for the address, therefore, he should do so under protest; but he considered that he was not bound in any way, nor did he presume that any other member regarded himself as bound, to an opinion in favour of the policy which was pursued towards China. He believed the result would be the derangement of our finances, and the setting aside of all control by this House over the public purse.—Admiral WALCOTT, as an old naval officer, had heard with gratification the testimony borne in the speech from the throne to the gallantry of our forces engaged in the action at the mouth of the Peiho; and he now offered his acknowledgments to Mr. Disraeli, and not less to Lord Palmerston, for the graceful and generous manner in which they had adverted to the proceeding. He had heard the country had reversed its ancient character, and declined to confer any honour upon the force engaged on the occasion. For his part, he had no doubt that the conduct of the gallant admiral who commanded in the action would prove a valuable lesson, not only to the officers and men under him, but to the naval profession at large. It was true that temporary success had fallen to the lot of the Chinese; but the conduct exhibited by the gallant admiral in the most bitter and trying moments reflected honour alike upon himself and the British navy. (Hear, hear.) If a brave man, fallen into adversity, was the saddest, it was not less one of the grandest sights under Heaven; and he would moreover express a hope that the breasts of the brave men who had accompanied the gallant admiral would not remain without a decoration. It was what the country owed to those brave and gallant men. It was due to the memory of the dead. It was due to the gallant survivors themselves; and also to every one who bore the arms of England, in whatever clime. When he reflected upon the advance through that treacherous pass, and the exciting moment when the little force dared even to approach the walls of the forts and to struggle over them; when he reflected on the hour of their retreat, and that when their comrades were falling fast around them, they could stop midst the withering fire, raise the wounded men upon their shoulders and bear them to the boats, he owned that he felt proud of his countrymen. (Hear.) And he believed that the struggle would bear as honourable mention in the page of history as that which commemorated the ride of the immortal 600 into the "valley of the shadow of death" at Balaklava. The bravery thus displayed would not be in vain. It would strike dismay into the hearts of the enemy when the hour of retribution came. And he hoped that every member of that House would take to himself the grand and memorable sentiment of the illustrious and stout-hearted soldier of Rome, when in the hour of defeat he uttered the words, That it was ordained that the winning cause should rest with our foes, but that which had been lost most commended itself to us.—Sir J. PAKINGTON, before the Address was put, wished to ask the Government with regard to that part of her Majesty's most gracious Speech which referred to the commercial treaty with France. After what had fallen from the honourable baronet, he could not help expressing the satisfaction which he felt at the circumstances that both in the discussion yesterday and to-day, justice has been done, though late, to the great gallantry which had been displayed by Admiral Hope in the Peiho. (Hear, hear.) There had been previous occasions on which the Government might have recognised that gallantry, but it was done. Nevertheless, he was glad that at last the distinguished service of the gallant and heroic admiral, and of those who fought under him, had been recognised. For his own part, he believed that no more heroic conduct had been exhibited by the navy of England than that of Admiral Hope and his forces at the mouth of the Peiho. He would not then enter into the state of our relations with the empire of China.—Mr. HADFIELD protested against the course that was about to be pursued in China. We called them semi-barbarians, but they called us downright barbarians; and he was sorry to say that in many respects they had too good reason to say so. We were raising up in China a military feeling. They had already gained one victory over us, and there was no telling what the consequences might be. He hoped the papers would be presented full and entire, and not mutilated as in the case of the Afghan papers, which it had lately been demonstrated were in the first instance presented to Parliament in a shamefully and perversely mutilated condition. The Americans had managed their affairs much more reasonably, and were now in terms of friendship with the Chinese Government.—Sir M. SERMOUR would be sorry to lose this opportunity of expressing his cordial admiration and praise for the gallantry of the operations of his successor, Admiral Hope, on the Peiho. As to the political state of the question, he would limit himself to this remark, that from his own observation he could not understand how the ambassador could approach to Peking, except by the accompaniment of an armed force. He should be glad if, after all that had occurred, a pacific settlement was still possible, but he had little hope of it; and he thought the conduct of his friend, Admiral Hope, and his companions, could not be too highly praised for the very distinguished gallantry they had shown on that occasion. (Loud cheers.)

—Sir DE LACY EVANS asked the Government when the debate on China was coming on, for he thought that it would be desirable that the House should express its opinion both as to the extent of the operations proposed, and whether they were to be carried on or not. The noble lord seemed yesterday to hold out a hope that an arrangement might be yet made. The House, however, had been told in the House of Lords if we were to have a war it would be merely a continuance of the last war. Had the proofs which had been given of the capacity of the noble lord who was responsible for the administration of our Chinese affairs as recently displayed been such that it was desirable he should be continued in such administration? He considered that a very hard measure of responsibility had been cast upon Admiral Hope. Our diplomatic representative appeared to be entirely in ignorance of the resistance which the fleets would have had to encounter at Peiho, and, though Admiral Hope might have been taken by surprise, he gave the highest proof of personal heroism. The French had a small force there, which suffered as complete a defeat as we did; but what did the French Government do? They inquired into the circumstances, and awarded marks of merit to their officers; but though there were testimonies both from the French and American representatives of the gallant conduct of the British forces under Admiral Hope, no word of condemnation, as far as he knew, had been addressed to them. He thought that they ought to have this matter fully gone into, and a distinct statement made of the intentions of the Government in reference to future operations. Mr. BUCHANAN inquired of the Government whether we were now, or in reality ever had been, at war with China, and whether Chinese junks seizing commercial cargoes were to be regarded as Queen's enemies?—Mr. W. WILLIAMS strongly advocated the immediate placing of the Reform Bill on the table of the House. If the cabinet was agreed upon it he could not conceive why, after its long process of incubation, the bill should not at once be laid before Parliament. It was clear that there was to be a great debate upon the Chinese war; and if the Reform Bill were not brought in before, and the Government should happen to go out, they would be charged with stifling the question of reform altogether.—Lord PALMERSTON said, with respect to the observations of my right hon. friend (Mr. Horsemann), as to the notice of the introduction of the Reform Bill, I would remind him that it is impossible for the Government to satisfy the wishes and opinions of all parties as to the course of the public business. My right hon. friend, and others, would have been desirous that the Reform Bill should be the first measure we should propose. The hon. and gallant member for Westminster (Sir De Lacy Evans) attaches great importance to the decision of subjects connected with China. Other hon. members think that whereas a treaty has been concluded with France to regulate our commercial system, that ought to be the first measure taken into consideration in this house. Other hon. members attach great importance to a general review of our finances, and would prefer that we should take the earliest opportunity of bringing on the budget. It is impossible for her Majesty's government equally to satisfy gentlemen of all shades of opinion, and their aim must be to make such distribution of the public business as may be most conducive to the public interest. When we enter into discussions upon these various subjects we must have the opportunity of justifying the course we have pursued, in order to bring the deliberations of the house to a satisfactory and useful result. I can assure my right hon. friend that there is no reason to suppose that if the Reform Bill is introduced on February 20 there will not be ample opportunity for discussing the details of the measure and passing it into law in the present session. My right hon. friend has intimated that until this bill has passed we are not to expect from him any vote of a hostile character that will at all affect our position. I am obliged to him for that intimation (laughter) but I should hope that that indicates that he will give us fair play to the bill be passed, to which he attaches, very properly, great importance, and till it shall be numbered among the statutes at large (hear, hear). With respect to China, it might be out of place for me to follow my hon. and gallant friend (Sir De Lacy Evans) into an argument on those transactions. Papers relating to the subject will be laid before us at an early period, and then will be the time to enter into an examination of the course we have taken relative to those operations. But my hon. friend behind me wishes to have it explained whether we are at war or not at war with China. He stated very correctly that, as regards the relations of the Queen with the Emperor of China, we never have been, in these late transactions, at war—that is to say, the Emperor of China has never chosen to consider the operations at Canton, for the purpose of obtaining satisfaction for outrages committed, as amounting to a disruption of relations between the two empires, and at Canton, Amoy, and Fow-chow-fow commercial relations have continued to be carried on. That is the state of things at present. If the Chinese treaty had been ratified the relations of the two countries would have been placed in a more satisfactory position, but the ratification of the treaty not having taken place, we are in the same state that we were before Lord Elgin negotiated the treaty, and the Emperor of China has made known that he did not wish the commercial relations of the two countries to be interrupted in consequence of the affair at the Peiho or the antecedent events at Canton. If a declaration of war had been issued it would be impossible for us to carry on commercial relations at Shanghai and other ports, and I think the House will see that it should be matter of grave consideration whether any disturbance should be occasioned to commercial arrangements, which may be carried on as long as they are consistent with the treaty, and whether such a course is not most promotive of the interests of the country (hear, hear). The CHANCELLOR of the EXCHEQUER said he wished to observe, in the first place, in reply to a statement which had fallen from the right hon. gentleman opposite, that the Government were not aware that they had let pass any legitimate opportunity of testifying their high sense of the bravery which had been displayed by our troops in the recent operation on the banks of the Peiho. They had always entertained a feeling of unqualified admiration of that bravery, and he thought that feeling had been expressed on the preceding evening by his noble friend at the head of the Government; but if it could be shown that they had been guilty of any omission in that case they would gladly take the earliest possible opportunity of repairing it. The Address was then agreed to.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

Dr. Macgowan will deliver his First Lecture in this Metropolis on "Japan," at the Society of Arts, on February 1.

Dr. T. B. Watson, late of Macao, will oblige by sending his address to this office.

R. U.—The Japanese ambassadors for the United States will embark from San Francisco by the *Pouchattan*, and from thence, *via* Panama, to Washington.

The "LONDON AND CHINA TELEGRAPH" is published on the evening of the day of delivery of the Mails.

The London & China Telegraph.

LONDON, MONDAY, JANUARY 30, 1860.

THE PARLIAMENTARY DEBATES ON CHINA.

THE China question will apparently have the first consideration of our legislators. Our readers are aware that we have condemned the action of Mr. BRUCE, our plenipotentiary in China, and in our Parliamentary intelligence it will be seen we are not without supporters. Earl GREY commended the opposition to Mr. BRUCE's proceedings at the Peiho, and the action of ministers in making preparations to carry out his policy, by an armed force despatched from this country and India, without calling Parliament together, and receiving the assent of the country on so important a subject as entering on a war with China. On the conduct of Mr. BRUCE in forcing a passage up the Peiho, the noble earl asked whether he should not have previously appealed to the Court of Peking. Lord BROUGHAM concurred in this view of the case, and said we had no right to force our way up that particular passage, and he hoped that, if it were decided on entering again into hostilities with the Chinese, we should do so in a regular manner, by declaring war and otherwise dealing with them as we should, with any other country; any other course, he argued would lead us into difficulties with Russia and the United States. Sir H. WILLOUGHBY, and Mr. HADFIELD, and Sir DE LACY EVANS, convened generally in protesting against our renewed hostilities, and the manner in which they had been induced. Admiral SEYMOUR said he did not see how our ambassador could proceed to Peking except with an armed force, but the gallant admiral did not give an opinion on the very large one that accompanied Mr. BRUCE; he, with all other speakers, spoke strongly of the gallant conduct of Admiral HOPE and his companions. The Duke of NEWCASTLE acted as the chief for Government, and contended that we had not been at peace with the Chinese for the past two years, inferring that the reinforcements sent out lately by Government were merely in support of the expedition which was placed at the disposal of Lord ELGIN in 1857. Now, force the matter as they like, the present Government know that they have virtually left the question of peace or war in the hands of Mr. BRUCE; what result that will be attended with we need scarcely intimate. The month of May, we make quite certain, will find our forces collected in the Gulf of Pecheli; and as on last occasion of course the junk bearing a reply to Mr. BRUCE's demands will arrive the day after hostilities have commenced, or it will not be superscribed in a proper manner. Lord PALMERSTON, in replying to the remarks of Sir DE LACY EVANS, said he considered it more to the interests of this country to abstain from a declaration of war, as in that case we could not carry on our important trade at Shanghai. It will be observed that Lord JOHN RUSSELL, our Foreign Secretary, who has conducted the correspondence with Mr. BRUCE, and must assuredly be better informed on the subject than the Duke of NEWCASTLE, or any other member of the Cabinet, did not address the House on the subject; and if we may judge from the extract of his letter of the 10th Oct., which will be found in our summary of Mr. BRUCE's correspondence, we may conclude that he has not been a willing party to the support of Mr. BRUCE's policy. This letter, however, confirms the statement made in our last and previous issues, that instructions had been sent to Mr. BRUCE to exhaust all means of procuring a peaceable solution of our present difficulties; but, as already intimated, we feel quite

certain he will not succeed. England will ever have cause to regret that Lord ELGIN left his post before completing his mission, but we must do him the justice to say that it was no fault of his, that lies with the late Derby Government. He was not consulted in the matter, and was perfectly sincere in his intentions in returning from Canton to the north to ratify the treaty; and quite sure are we that had he done so our Taku disaster would have been avoided.

THE JAPANESE CURRENCY.

ONE of the most important subjects in connection with Japan, and which, judging from the silence observed by the press generally, appears to be so little understood, is the question of the intrinsic value of the native coins, and the relative par of exchange between them and foreign money. There is in Japan a native currency of gold, silver, copper, and iron. The gold *kobang* is equal to 4 silver *itizibous*, the *itizibou* is worth $4\frac{1}{2}$ copper *mace*, and the latter passes for 100 iron *cash*. When we say that the *itizibou* is worth $4\frac{1}{2}$ copper *mace*, we speak with reference to their relative value, according to the latest advices which quote the *kobang* as worth 18 *mace*; for it must be borne in mind that the relative value of these two coins fluctuates, and consequently includes in its fluctuation the worth of the silver *itizibou*.

According to the analysis made by BERZELIUS, the gold *kobang* is worth 12 florins, and 40 kreuzers Dutch currency, which would give it as nearly as possible the value of a guinea. Colonel von SIEBOLD estimates it at $12\frac{1}{2}$ Dutch florins, which, reckoning the florin at 2 francs and 10 centimes, would be equal to 26 francs 25 centimes. In the table of foreign coins given in the *Annuaire du Bureau des Longitudes*, for 1848, we find the value of the old *kobang* put down at 51 francs 24 centimes, and that of the new *kobang* at 39 francs 69 centimes. Now these quotations, though not absolutely incorrect, and coming from such high authority, may easily lead to false conclusions, and it may, therefore, be well to explain that they may be termed superannuated; for the "old *kobangs*" alluded to by the *Annuaire* are really ancient coins now no longer in circulation, whilst the *kobang* now-a-days called "old," is the one analysed by BERZELIUS. The new *kobang* is not always equally pure, and according to an analysis lately made at the Bank of England, is scarcely worth 11 Dutch florins. In order not to over estimate its value, let us take it at 10, which would make it equal to 21 francs. By this calculation the *itizibou*, being a quarter of a *kobang*, is equal to 5 francs 25 centimes.

So much for the Japanese native currency. Now let us take another view of the case. The American dollar is ascertained to have an intrinsic value of 5 francs 30 centimes, and it requires rather more than 3 silver *itizibous* to make up the weight of an American dollar. Now, as it is stipulated in Article 5 of the treaty between Japan and the United States, that in all commercial transactions the Japanese currency shall be taken *weight for weight*, to be equal to foreign coins of similar description, the result is, that the Americans require 3 *itizibous* for their dollar, which makes the latter equal to $15\frac{3}{4}$ francs, when, as we have just seen, its real value is only 5 francs. What financial nonsense! And yet it is not so wholly obscure as not to be easily intelligible; on the contrary, the facts of the case are simple enough. The value of the *itizibou* is not intrinsic or unfluctuating like that of the *kobang*, but only represents a certain value. To refuse to take it, except at its real worth, would be similar to buying a bank note at the value of the paper on which it is printed. But in spite of this misunderstanding one ought to be cautious in blaming anybody, either the European merchants or the Japanese Government. It is their mutual ignorance that does the mischief. It is an incontrovertible fact that, if the stipulations of the treaty were observed to the letter, 100,000 dollars (worth 530,000 francs) would be equal in value to 300,000 *itizibous*, which at four to the *kobang* would produce no less than 1,475,000 francs; a very pretty profit, which would soon have the effect of attracting dollars from all parts of the world, and draining Japan of its gold *kobangs*. But, unfortunately for the speculator who may feel induced to enter on such a brilliant financial operation, the Japanese Government steps in with its veto, without anybody's being able to contest its right to do so. The text of the treaty is to be sure in existence, but it is wholly impracticable as long as some fundamental modifications are not introduced in the monetary system of Japan, exposed as they are, moreover, to the more or less fraudulent speculations of the manufacturers

of base metal. The measures hitherto adopted by the Government of Japan, to remedy these evils and inconveniences to commerce, are not sufficient to counteract the abuses. That government has lately created a sort of paper money, and permits every European to exchange each day 2 dollars, and no more, for 6 itzibous in paper. It is scarcely needful to say that these 2 dollars' worth of itzibous a day are of no commercial importance, nor do the Europeans individually derive much advantage from what was ignorantly granted as a boon, and considered as a great concession; for the retail shopkeeper, the domestic servant, or the native boatman, all testify the greatest repugnance to be paid for their labour, or goods, by this paper money, and in most cases prefer not to work or not to sell, than to be remunerated in this ambiguous manner. But in spite of all these difficulties and drawbacks, business is transacted, and sometimes even with a brilliant profit, though the European commerce can take no part in it, as it is chiefly confined to a sort of bartering trade, carried on between Shanghai and Nagasaki, and varies so much in its nature, and the articles composing it, as to make it impossible to specify it or go into details without exceeding the limits of our columns, besides which, what is a profitable investment one day becomes a dangerous speculation the next. What concerns us most is, to obtain a clear insight into the monetary system of Japan and its influence on the trade with Europe. Upon the whole, then, it seems that the difference between the nominal and the intrinsic value of the itzibou acts at present as a damper to all extensive commercial enterprise, which, though devoutly wished to be entered into on both sides, cannot be undertaken without the mutual fear and risk of a loss in squaring their accounts.

It is impossible that this unsatisfactory state of things can last much longer. Some definite and equitable measure must be introduced and generally adopted by mutual agreement to put a speedy end to this financial crisis, and permit honest commercial transactions to take place between the Japanese and those Europeans with whose governments treaties have been concluded. Attempts to find this desideratum have been made, but hitherto without success. On July 8 last, the Japanese Government proposed to introduce a new silver coin of the real value of the itzibou and equivalent to the dollar, or five francs 30 centimes, but the European and American merchants opposed this measure—which was intended to be carried into execution the very next day—with all their might, as it would have depreciated the value of the dollar, which is the only coin in general circulation in those parts, by 200 per cent., and the consequence was that the project was abandoned. In the meantime, trade is languishing, and what is still worse is, that these misunderstandings and haggings have the effect of creating suspicions towards Europeans in the breasts of the hitherto so confiding Japanese, and preventing that close and friendly connection which, whilst it leads to their mutual advantage, must eventually open the door to European civilisation, and the introduction of the blessings of Christianity. It would be well worth the while of England, France, Holland, Russia, and the United States, to concert some well-digested plan, and propose it collectively by their respective representatives in Japan. Till this question is definitely settled, and the value of the currency placed upon a simple and satisfactory footing, it is an illusion to expect to see the trade with Japan develop itself in a manner commensurate with the enlightened views of the present day. Here is a nation of some 30 millions of inhabitants, who have been locked up and left to their own resources for two centuries, perfectly willing to trade with us—now that the barrier has been broken down—and ready to take our manufactures, our instruments, arms, tools, and articles of use and luxury, in exchange for their silk, copper, wax, and other valuable articles of home produce, and yet no business of any importance can be transacted, on account of the difficulty of regulating the value of the native currency, and the par of exchange for foreign coin.

Since the above was in type we have received from our Paris correspondent the following extract of a letter from Yedo, dated last November:—

Foreign merchants had acquired the right of exchanging daily 150 dols. into itzibous, but as this exchange is against the Japanese treasury, it is doubtful whether it can be long maintained. The consuls represented that 150 dols. a day to exchange was a very small matter, and the Japanese authorities allowed the exchange to be carried the cypher to 500 dols. or 1,555 itzibous. This was a magnificent affair for the proprietors of dollars, who exchanged their itzibous against kobangs, the value of which ran from 1 dol. 90 cents. to 2 dols. 60 cents., according to the age of the pieces, nearly double the market price of

Shanghai. As the point was to exchange as many dollars a day as possible, Europeans, and especially Americans, did not scruple to descend to certain discreditable "tricks of trade." For example, Jabez could only exchange with the Treasury for 500 dols. a day; but Jabez soon found that he could exchange in the names of his friends, real or imaginary, Mr. Jeremiah, Mr. Elias, Mr. Charles, and Mr. Habakkuk. Mr. Jabez found that by exchanging 2,000 dols. for 6,220 itzibous, he could purchase a million of kobangs or ten bales of silk, which in a month brought him in a profit of 1,000 dols.

The same letter states, that the merchants of Shanghai are so rich that they can freight a vessel with dollars. Thus, no sooner had the *Powhattan* brought the news that silver was worth gold in Yoku-Hama, than a whole flood of silver inundated the town. The *Powhattan* alone, on her return, brought over 400,000 dols., and other vessels followed her in all haste. The Japanese could stand this no longer however. At length it said, in answer to the demands made upon it. "I shall give as much as I can, and to every one in proportion to his demands. Apply to me." The merchants hastened to obey. Some limited themselves to 500 dols., others wished to exchange for 1,000 or 5,000 dols. One, more cunning than the rest, said to himself, "Why stick at trifles!" He informed the treasury that he wanted change for 20 millions of dols. Only 20 millions! The treasury set about its calculations. The gentleman of 500 dols. obtained nothing, he of 1,000 obtained a dozen itzibous, he of 5,000 some twenty. The rest of the money fell into the pocket of the man of 20 millions. As he had the laugh against the others, the latter saw the mistake they had made, and the day after each presented himself at the treasury with a reasonable demand; that is to say, for fabulous sums. The government of Japan refused, and very properly. The writer considers that the conduct of the Europeans, in face of a people with whom they have just formed a treaty, is disgraceful.

ALBERT SMITH'S "PIGEON."—Between the repulse at Peiho and the illness of ALBERT SMITH, Chinese affairs have not been on a satisfactory footing of late. It is therefore highly gratifying to know that our French ally has actually sent off his General to the East, and that our English entertainer has re-appeared in Piccadilly. We hope that it is not unaffectionate to say so, but with certain Crimean recollections strong upon us, we are rather inclined to believe that the new Chinese campaign will be carried on with most loyalty by GENERAL ALBERT. At all events we are certain he will not bring it to a conclusion without due consideration for his allies, and that he will give them all due recognition of their presence, and of their zeal in taking places—a trifling attention to facts which is occasionally pretermitted over the water. *Seriatim*, as VISCOUNT WILLIAMS says, we deplored, in company with the QUEEN, and in common with the public, the affliction which interrupted Mr. ALBERT SMITH's entertainment, and are exceedingly happy to "depend" upon a French General (on this occasion only) a congratulation to our pleasant-faced, pleasant tongued lecturer, upon his resuming his nights with the pigtails. In the words of CONFUCIUS (whom we never read, and have not the least intention of reading), "May our EGYPTIAN Fisher always have a good HAUL."—*Punch*.

TRADE WITH CHINA.—At the meeting of the Glasgow Chamber of Commerce on the 20th inst., Mr. W. P. Paton in the chair, Mr. Buchanan, M.P., of the firm of Messrs. Buchanan, Hamilton, and Co., of Glasgow, said—The matter I am going to refer to is one of considerable consequence, and it is one which has never yet been brought before this Chamber. I allude to the anomalous position in which our trade with China is placed in the event of hostilities going on. During the second, and if I am not mistaken, during the first war also, it was alleged by lawyers and others well versed in international law, that really there was no case of war at all; in the case of the second war at least, it was a mere mob and riot at Canton, and the question was never thoroughly raised as to whether or not we were in reality at war. Now you will see how important the matter is, when I mention that a bill of lading—a charter-party—contains a clause by which all parties are relieved of their obligations when the country is actually at war, and when it has been officially declared. During the last war a most serious inconvenience arose from the very circumstance that ships had great difficulty in getting up the Canton river, and had to return with very little cargo. Mr. Dunlop: You therefore wish that Government should now declare war against China?—Mr. Buchanan: No; but I say that before they commence hostilities in any way they should declare war.—The Chairman expressed an opinion that although troops were going out war would not be declared.—Mr. Buchanan: When you broach the subject to Government they turn round and say, "Oh! it was a mere riot. But it involves considerations of the most injurious kind. I am one who has suffered, and am likely to suffer again." Some conversation ensued, and it was eventually agreed to take up the subject at another meeting.

MR. TARRANT'S CASE.—It appears that the positive release of this gentleman at the expiration of six months, as stated in the last number of the *London and China Telegraph*, is finally left to the discretion of his Excellency the Governor of Hong Kong; his transfer to the debtor's side of the jail at that period, if not before, is however positively ordered by his grace the Duke of Newcastle.

TRINIDAD.—A meeting of the council of Government was held on Dec. 19, at which supplementary estimates were passed to the amount of £24,683. There had been another arrival of Coolie immigrants. The *Labrador*, from Calcutta, landed 217 men, 61 women, and 39 children. There were 41 deaths during a voyage of 81 days. The *Labrador* brought, besides the Coolies, a considerable cargo of rice, &c. Among the immigrants that arrived in the *Labrador*, there were 20 Coolies who went home from this colony last year in the *Morayshire*, and seven who left in the previous year, and who have now returned in all probability to make a permanent settlement after their indentured time has expired. It has been stated that the contribution to the colonial revenue in the shape of customs dues on the cargo exceeds £3,000.

LECTURE ON CHINA.—On Wednesday evening, the 25th inst., Dr. Croft, late Staff Surgeon and Medical Officer of H.M. Ceylon Rifles, in

China, delivered (by invitation) a lecture on China, its geography, geology, mineral wealth, &c., at the Lecture Hall, in Aldersgate-street. Robert U. Fowler, Esq., occupied the chair, and the attendance was large. The lecture was illustrated by paintings and diagrams, and a numerous assortment of Chinese curiosities. Votes of thanks to the chairman and lecturer concluded the proceedings.

HANOVER.—The King of Hanover has established a consulate at Shanghai, and appointed Herr W. Probst to be consul.

THE THIRD CHINESE WAR.

Captain E. W. Vansittart, of H.M.S. *Ariadne*, in a very able letter, argues, that those acquainted with the Chinese character must know full well the construction that would now be placed on the display of any hesitation on our part; that we must either go beyond the forts of Taku, or not approach the Peiho at all. He argues, that the capture of Nankin would matter little. We have threatened the capital, and to save our prestige must advance upon it. The gallant officer gives as the result of his "experience of the Chinese character, and much intercourse with their officials during several years' active service on their coasts," that any policy of much forbearance defeats its object—produces, indeed, an effect directly opposite to the one desired. The concluding portion is as follows:—

Had Sir Hugh Gough been permitted to take Canton instead of accepting that city's ransom, in all human probability the subsequent attacks on various parts of the coast, and the final advance on Nankin, in 1842, would have been avoided; and again, a few days later, by the forbearance shown in relinquishing the right to enter Canton, a right especially secured by treaty, the foundation was laid for that intolerable system of arrogance which at last exploded under Commissioner Yeh, brought on a little war, led to a subsequent "settlement" under Lord Elgin at the Peiho, and is parent to the present so-called third Chinese war.

MR. BRUCE'S DESPATCHES.

In our 22nd number, of the 17th October, we gave the official correspondence between Mr. Bruce, the Chinese, and this Government. We now append the substance of those laid before the House on the 27th inst. Most of the inclosures have already appeared in previous numbers.

No. 13 is from Mr. Bruce to Lord Malmesbury, inclosing a copy of a letter addressed by him to M. de Bourbillon, mentioning Pehiang as the place to which the British and French ministers ought to have gone. Mr. Bruce urges the advisability of insisting upon the Taku route, and believes the reason the Chinese wished him to proceed by land was, that through the plausible excuse of want of transport they would reduce his retinue, and thus give to his mission the character of a visit to the capital by an agent for the transaction of business.

In No. 14, Lord John Russell says: "There are no reasons for interrupting friendly relations with the Chinese at Shanghai, Canton, and elsewhere. Preparations are being made both in this country and in France in order that the treaty of Tientsin may be fully carried into effect. But it is to be hoped that when our conditions and the extent of our preparations are known to the Chinese Government, peaceful relations may be placed upon a permanent footing without further effusion of blood."

No. 15, from Mr. Bruce to Earl Malmesbury, incloses copies of a letter from Ho, and of Mr. Bruce's reply. This letter gives a slight sketch of the proceedings of both the American and Russian ministers.

No. 16 is addressed to Mr. Hammond by Acting Consul Winchester, forwarding copy of a despatch addressed by him to Mr. Bruce. Inclosure No. 1 is the above despatch, in which Mr. Winchester reports that uninterrupted quiet has prevailed at Canton. Inclosure No. 2, is an imperial edict just hinting at the affair at Tientsin, and stating that should the English repent, friendly relations with them even now may be restored. Inclosure No. 3 is another edict to the same effect.

No. 17 is from Mr. Bruce to Lord John Russell, transmitting a letter from Ho in reply to Mr. Bruce's of 9th August. Inclosure No. 15, Mr. Bruce states that Ho still endeavours to make the exchange of treaties merely a question of trade, thus showing that "he still holds to the old principle, of considering the relations of China with foreign nations as purely commercial."

Inclosure No. 1 is to this effect. Inclosure No. 2 is Mr. Bruce's reply to Ho.

No. 18 is from Mr. Bruce to Lord John Russell, giving a detailed account of the U. S. minister's visit to Peking. Inclosure No. 1 is an extract from the *North China Herald*, of August 22, giving an account of the return of the American minister from Peking. Inclosure No. 2 is an extract from Sir G. Staunton's "Embassy." Inclosure No. 3 is the Imperial Decree, with reference to the reception of the U. S. minister. Inclosure No. 4 is the translation of an Imperial Decree, drawing attention to the turbulence of the English barbarians.

No. 19, from Mr. Bruce to Lord John Russell, merely incloses extract from the *Pekin Gazette*. Inclosure in No. 19 is the extract itself, giving an account of the defeat of the English at Taku.

Spirit of the Press.

EMANCIPATION OF SLAVES IN JAVA.

Consideration for number one, thrift and money-making, are characteristic of the Dutch in so high a degree, that few who know this people well would give them credit for acting, from mere sentiment, adversely to their interests. Accordingly, when the fact is announced that the Dutch are taking measures for the gradual abolition of slavery throughout their East Indian possessions, the inference naturally suggests itself that the Dutch have calculated the expense of manumission; have cast up accounts as between profit on the one hand, and philanthropy on the other; and have come to the conclusion, finally, that the two are not so antagonistic as they seem. At any rate, the great work of Dutch negro emancipation has begun. In its leading features the Dutch scheme resembles the plan of gradual manumission conceded by ourselves to the West Indies, where, by the Act of 1834, it will be remembered, emancipated negroes were placed on the footing of apprenticed labourers, the apprenticeship terminable, according to the provisions of 1 Vict., cap. 19, on the 1st of August, 1840; but which term was further abridged by Acts of the Colonial Legislature. In Java, the period of apprenticeship is to last six years, counting from the beginning of 1860 to 1866, after which the negro obtains his complete freedom; and, being placed on a footing of legal equality with Europeans, will have to accommodate himself to the new order of circumstances. Borrowing another precedent from ourselves, the Dutch start in their career of philanthropy with a recognition of the principle that negroes are property—property objectionable, indeed—else the work of emancipation would not be needed; but property still—goods and chattels; which, having been recognised as fitting in times gone by, and bequeathed to posterity, should, according to every notion of equity and justice, involve pecuniary compensation to owners of such property, whenever government might call upon them to give it up. —*Morning Chronicle*.

THE DEBATES ON CHINA.

A few dropping shots tell the variety of antagonist opinions current in Parliament on our abnormal relations with China, and they also betray the unwillingness of public men to come to close quarters with this difficult and multifarious subject. Lord Grey, who has a special talent for looking at everything in a point of view entirely his own, thinks that Parliament should have been called together in the autumn, in order to be asked whether a treacherous attack upon an English flotilla ought to be followed by punishment. Lord Derby suspends his judgment as to the course pursued by Mr. Bruce, but declares that his conduct is not to be justified by the instructions he received. In the House of Commons Mr. Disraeli is silent upon the policy of the British Ambassador at the Peiho. Sir John Pakington does not wish to express any opinion upon the main question, and Sir Michael Seymour commits himself to no more decisive dictum than that he does not see how any public officer can go to China without a large force to back him. All parties seem to be playing a waiting game, watching to see signs of what the sentiment of the country is upon this Peiho disaster, and careful not to repeat the error which brought about a certain dissolution which they have not forgotten. Lord Derby's attempt to slip out of the responsibility is not very successful; for although, when he sent away an ambassador to the Antipodes, he could not very wisely have fettered him with instructions so precise that unexpected circumstances might probably render them impossible of execution, yet, seeing that he sent him accompanied by an English admiral and an English fleet, he must have contemplated the use of the force intrusted to his envoy, if that envoy should be interrupted in his mission. There is only one point connected with this unfortunate subject upon which all men of all parties are unanimous. Lords Grey, and Derby, and Palmerston, Mr. Disraeli, Admiral Walcott, and Sir John Pakington, all unite in celebrating the valour of the Admiral who behaved so heroically under circumstances so adverse. Here there is no note of discord, and no hesitation. The public voice had already made itself heard upon the matter, and it must be grateful to the officers and men who suffered this defeat to find that their exertions are acknowledged in both chambers of the legislature in much the same terms as they had previously been recognised by the press and the general public. This is the only point relating to the new rupture with China upon which the parties have hitherto ventured to declare themselves. Yet this subject of our third Chinese war must enter largely into the after-discussions by which this Session will be occupied. If we could only let that great stagnant mass of Chinese humanity quite alone, if we could watch it from a distance with only that abstract interest which a philosopher may feel in witnessing the working of some moral law or the progress of some physical change, we should all be well content to do so. It is no mission of ours to stay the decomposition of that rotting empire. It is not our desire to emancipate the Chinese from the rule of their Tartar conquerors, or to teach them how to throw off a system of government which oppresses, but never protects. We would willingly, if we could, keep far away from such a people, where the practical rule of right is force, where the practical defence against force is fraud, where the whole system of government is a network of bribery, and where the established religion of the country is Atheism. Unfortunately, however, our appetites and our necessities force us into connection with these people. They possess a country fruitful in articles without which we cannot, or, at any rate, we do not choose to live. Their teeming population has forced upon them that hard condition in which a man cannot cease from industry, even although he may have no security for enjoying its fruits. If they work, they are almost certain to be robbed, but enough may be left them just to keep themselves alive; if they do not work, they are certain to perish, so they labour as their own silkworms labour—spinning homes they are rarely destined to enjoy, but producing what foreigners desire to purchase, and what their own

masters take from them by violence. If we could do without tea and silk, if India could discover some innocent crop to supersede the poppy, and if we could find other sufficient markets for our manufactures, we might wisely leave this part of the world alone. But, so long as our people will have tea, we have to pay for the bad government of China. The rapacity of the Mandarins keeps pace with the knowledge of the necessities of European tea-drinkers. We are at this moment paying £2,000,000 a-year to those local authorities who keep the passes through which the teas now travel in that tortuous path by which the corrupt Chinese Government forces them to reach the coast. When such a people have a monopoly of one of our necessities of life, we cannot keep out of a connection with them. If a man has his finger and thumb on your throat, you must persuade him, or parley with him, or fight him. This is very much our case with the Chinese. Under the existing system they can tax one of our greatest necessities of life, or they can stop our supply; they would lose that power if the treaty of Tientsin were carried out in its integrity. This is the whole question. Of course, the gainers by the present system will strive by force and by fraud to support that system. The producers have no voice in the matter, and the question is and must be between the English tea-drinkers and the Chinese Mandarins. We also have our Mandarins. Our Chinese merchants are, many of them, as much interested in the continuance of the present mode of trade as the Chinese Mandarins are. They make rapid fortunes in a course of business they know, and they have no desire to begin competing with a crowd of European tea and silk buyers in the interior of China. It is not of much consequence to them that tea should be cheap, but it is of great consequence to them that all the tea should pass through their hands. Our Chancellor of the Exchequer also is *ex officio* a great Mandarin. He looks to China for ten millions of revenue. Whether tea be cheap or dear, provided it and the other products come, he gets his money. Our Chancellor of the Exchequer, therefore, is very sensitive to any interruption of this Chinese trade, and our merchants look not lovingly on any very radical changes. These are the material interests that affect the question. Unfortunately, also, statesmen have chosen the Chinese question as a party shuttlecock, and professional philanthropists have talked visionary nonsense about it, both being encouraged by their ignorance of the people of England upon this distant and not very amusing subject. In the coming debates we must expect a great deal of this mischievous ingenuity, and we shall, no doubt, see the most recondite doctrines of international law brought to excuse the treachery of Tartar savages who lured our countrymen to destruction, and all sorts of allowances demanded for those innocent Confucians who outwitted Lord Elgin by encouraging him to omit from the Treaty of Tientsin that exact itinerary to Peking which the more far-seeing Russians had taken care to stipulate. We do not, however, apprehend that any political party in this country will venture to countermand the Chinese expedition which the Queen has announced. China is becoming daily more important to us. The door which Lord Elgin thought he had forced open is yet hardly ajar, but our manufactures are pouring in through the cranny at an unexpected rate. The last returns were read everywhere with astonishment, and almost with incredulity. A very large portion of the prosperity upon which the Queen congratulates her people is due to this great source of increased employment. Our population is gradually beginning to understand this, our factory operatives are thinking it out, and all our tea-drinkers are getting an inkling of it. A proposition equivalent to giving up the Treaty of Tientsin, and sitting down meekly under the destruction of an English fleet, would not suit the humour of our English people. On the other hand, we have not the least idea of spending £2,000,000, for nothing, or of keeping up a constant drain of taxes into those seas. If we go there we must go there in some force, for, friendly as we are with the French, China is a long way off, and no one can tell what might happen if the French were greatly our superiors in number, and things were to take an adverse turn in Europe. If we go there in force we must settle matters so as not to have to go there again. But at any rate, we are engaged in a third Chinese War, and the only hope we can form in such a disagreeable conjuncture is that it may be the last.—*Times*.

Legal.

COURT OF EXCHEQUER.

SPANISH SHIP "GERTRUDIS MAGNA."—*LOZANO v. DURANT*.—The jury found for the defendant—that the loss was only partial (as reported at the time in the *London and China Express*). It was now submitted that the verdict was against evidence.—The court took time to consider whether they would grant the rule for a new trial.

BANKRUPTCY COURT.

HEERJEEBHoy RUSTOMJEE, LATE OF MACAO.—This was a meeting for choice of assignees under the failure of Heerjeebhoy Rustomjee, general merchant, of Bishopsgate-street. The bankrupt had been about five years in this country. In October last he filed a petition for arrangement, offering to pay his creditors 20s. in the pound if time were allowed. It turned out, however, that the list of creditors, which formed the basis of this calculation, contained several important omissions, and ultimately at his own wish, and in order to protect the furniture, Heerjeebhoy Rustomjee was made bankrupt. The bankrupt's business consisted principally in exporting drapery and other goods to India. The statement of the affairs of the 22nd October, 1859, as prepared by Messrs. Johnson and Wilson, shows that the creditors unsecured are £10,396; creditors partially secured, less value of security held, £479. The property is thus stated:—Debtors doubtful, £293; property consigned, £16,668, less advances thereon, £10,587, leaving an expected balance of £6,130; other property, £7,255; surplus property in the hands of creditors, £989; but it is questionable whether realisation will at all bear out the bankrupt's estimate. The creditors con-

sist principally of English and foreign merchants and manufacturers. The bankrupt says he is liable for his acceptance of the draft of W. C. Reins, of Liverpool, due 3rd December, for £172. This acceptance, according to his statement, was given as the purchase money of a steam engine, which was delivered at the Great Western Railway to his order, but subsequently obtained from the company without his authority. He is also liable upon his acceptance of the draft of Hyder Jung, due 24th October, for £200; and also for his dishonoured cheque drawn on Glyn and Co., in the hands of Mr. Jay, for £31.

Criminal and Police.

ROBBERY OF GOVERNMENT STORES FOR CHINA.—Daniel Foley, a labourer, was charged on the 20th inst. with stealing a case containing about two dozen bottles of ale, brandy, sherry, and calves' feet jelly, prepared for her Majesty's Government for exportation to China. Mr. Reynard Skinner, manager for Messrs. Cooper and Hayes, Wapping-wall, Lower Shadwell, stated that, on Dec. 1, he was informed that the prisoner had taken the case down a place called the boarded entry. It was safe in the warehouse with others at half-past five o'clock in the evening, and at a later hour was missing. The prisoner, in defence, said the case was given to him by two men, who told him to carry it, and gave him one shilling for his trouble. A police-constable said that the prisoner had been out of the way since the robbery, and that he met him on the 19th inst., and took him into custody. Mr. Selfe had no doubt the prisoner had committed the robbery. It was very likely, indeed, there were two or three persons concerned in the robbery. He sentenced the prisoner to be imprisoned in the House of Correction for two months, and kept to hard labour.

A LADY PASSENGER FOR HONG KONG.—On the 18th inst., a lady-like young woman, about 19 years of age, who gave her name as Lola Fernandez, presented herself before Sir Robert Carden (who sat for the Lord Mayor), and earnestly prayed his assistance. She said she had recently come from Gibraltar, for the purpose of obtaining a passage to Hong Kong, where her only near relations, a brother and uncle, resided. She obtained permission from Mr. Richards, comptroller of the transport service, to occupy a cabin in the *Mauritius*, and went down to Greenhithe with her luggage to take possession. Unfortunately the cabin assigned to her had been previously appropriated to a medical gentleman and his wife, consequently she was thrown into a difficulty, which, being a stranger here, she hardly knew how to surmount; and, to make matters worse, while going to the railway-station on the 13th her pocket was picked of her purse, containing £32, every farthing she had in the world. By the advice of a Roman Catholic priest, she applied to Mr. Richards for permission to occupy a berth in the *Sir William Peel*, a transport vessel appointed to sail from Greenhithe on the 19th inst., the owners of the vessel being willing to find her in provisions on the understanding that her relations should pay upon the arrival of the ship at Hong Kong; but Mr. Richards did not feel himself justified in granting permission a second time, unless Miss Fernandez brought a letter from some one of influence, recommending her as a person worthy of credit. Having no friends in the metropolis, she asked Sir R. Carden to speak to the comptroller of the transport service on her behalf. Sir Robert, having no doubt as to the truth of her narrative—which from her manner, it was impossible to doubt—at once instructed one of the officers of the court to obtain audience of Mr. Richards. That gentleman interested himself warmly in the case, and said that upon the receipt of a note from Sir R. Carden, intimating his belief that her tale was true, he would grant her permission to occupy a cabin in the *Sir William Peel*. Sir R. Carden hastily wrote a few lines, upon the receipt of which Mr. Richards proceeded to the Admiralty, and obtained the documents necessary to enable Miss Fernandez to sail in the *Sir William Peel*. Sir Robert Carden also ordered that £2 should be given to her from the poor-box, and directed the officer to go with her to the railway-station.

Theatrical.

DRURY LANE.—"Jack and the Bean Stalk" is still being acted at this theatre, and such is the success, that all the boxes and stalls have been engaged a fortnight in advance.

COVENT GARDEN.—"Puss in Boots" is continued at this house every evening with very fair success.

ADELPHI.—The "Christmas Carol" at this place has introduced Mr. Toole as an actor capable of more than amusing extravagance. His *Bob Cratchit* contains homely natural touches that enable it to stand its ground beside the *Mrs. Cratchit* of Mrs. Mellon, one of the neatest possible stage pictures of a bustling, bothered, scolding, and kind-hearted mother of a poor man's family at home with many cares. The piece, however, is not at all successful.

STRAND.—A new piece by Messrs A. Mayhew and Sutherland Edwards has been produced under the title of "Christmas Boxes." The selection of the subject and treatment are both eccentric, an idea being taken, and worked out in any shape that happens, without regard to probability or moral consistency. The farce, however, has the merit of originality, and is not unfavourably received.

ST. JAMES'S.—A wild affair, a mixture of burlesque and ballet, has been produced at this place, entitled "My name is Norval." The ballet part is exquisitely carried out by Miss L. Thompson, who performs the part of *Norval*, the jealous *Randolph* being vociferously spouted by Mr. C. Young. Highland flings and Scottish songs abound. The extravaganza has a framework. It is assumed that some shopmen and apprentices have engaged a private theatre for Boxing-day, and with the assent of their master, *Mr. Lindsey Woolsey* (Mr. Barrett), who presides over the revels with a mock dignity, which adds to the zest of the performance, proceed to enact an adaptation of the tragedy of "Douglas," adapted with dancing and singing. The

result was ludicrous and noisy in the extreme, and was well accepted by a numerous audience.

PRINCESS'S.—The "Cricket on the Hearth" is remarkably well acted by the company in every part, and Miss Wadham takes the public by surprise with her right sense of the way to present *Tilly Slowboy*. Mr. Ryder is of essential value to the cast. This actor, who was led into a tendency to rant by the fashion in which Shakspeare's verse was executed under the old management, has very cleverly adapted himself to the better way of the new company. He assists quietly and most effectively in the establishment of that excellent character for neatly acted dramas which is now beginning to attach itself to the Princess's Theatre.

LYCEUM.—The "Tale of Two Cities," from *All the Year Round*, is being dramatised for performance at this theatre.

Births, Marriages, and Deaths.

BIRTHS.

- CONNOLLY**—On the 18th inst., at Clunagh House, King's County, Ireland, the wife of A. Connolly, Esq. (late of Shanghai, China), of a daughter.
- HENDERSON**—At Shanghai on December 3, the wife of J. Henderson, of a daughter.
- HILLIER**—On the 12th inst., at 21, Upper Gower-street, the wife of Dr. Hillier, of a son.
- JAMIESON**—On the 9th inst., at Portswood, the wife of Thomas Jamieson, Esq., Commander P. and O. S. N. Co.'s ship *Pera*, of a son.
- JOY**—On the 14th inst., at Woolston, near Southampton, the wife of J. R. Joy, Esq., Commander P. and O. S. S. *China*, of a son.
- KENT**—At Palace-villa, East Moulsey, on the 22nd inst., the wife of F. Kent, jun., Esq., of a daughter.
- LAING**—On the 13th inst., at Southampton, the wife of James Laing, Esq., chief officer of the P. and O. Company's Service, of a son.
- LIVINGSTON**—On the 21st inst., Mrs. Wm. Potter Livingston, of 33, Cleveland-square, of a son.
- MORESBY**—On the 8th inst., at Bellevue, Queenstown, the wife of Commander Moresby, R.N., of a daughter.
- SMITH**—At Foo-chow-foo, on November 20, the wife of Arthur Smith, of a son.
- SNOW**—On the 17th inst., at 23, Tredegar-square, Mrs. F. A. Snow, prematurely, of a son, who lived only a few hours.

MARRIAGES.

- BORRADAILE**—**M'LEAN**—On the 19th inst., at St. Mary's Church, Birkenhead, by the Rev. Abraham Borradaile, assisted by the Rev. William Theodore Vale, Thomas Salkeld Borradaile, Esq., of Hong Kong, to Maggie Watson, third daughter of John M'Lean, Esq., of Hamilton-square, Birkenhead.
- BURTON**—**DAWES**—On the 26th inst., at St. John's Church, Chatham, by the Rev. J. L. Roberts, M.A., Vicar, assisted by the Rev. Henry Pelham Dawes, B.A., Vicar of Asheldam, brother of the bride, Cuthbert Ward Burton, Esq., Lieutenant and Quartermaster Royal Marines, only surviving son of the late Captain Alfred Burton, R.M., to Ellen, youngest daughter of the Rev. Henry John Dawes, M.A., of Gillingham.
- FITTOCK**—**WHITE**—On the 7th inst., at All Saints' Church, Rotherhithe, by the Rev. R. Jones, M.A., Edwin, second son of Captain J. R. Fittock, R.N., to Lavinia Rivers, youngest daughter of the late Lieutenant Peter White, R.N.
- KOCH**—**M'KEE**—On November 2, at Sarawak, by the Lord Bishop of Labuan, the Rev. Charles Alexander Koch, son of C.G. Koch, Esq., Proctor of the Supreme Court, Ceylon, to Rosina, daughter of John M'Kee, Esq., merchant, London.
- RAWSON**—**LORD**—On Tuesday, the 10th inst., at Bathwick Church, Bath, by the Rev. Dr. Steele, James Rawson, Esq., of Java, to Charlotte Emily, third daughter of John Lord, Esq., of Australia.

DEATHS.

- BUTT**—At sea, on October 1, three days after leaving Macao, on board the *Northfleet*, John Butt, formerly of Canton.
- DAY**—On the 24th inst., at 9, Vicarage-gardens, Kensington, the wife of John C. E. S. Day, Esq., barrister-at-law, of a son.
- DUMAYNE**—At the Seamen's Hospital, Hong Kong, on December 4, of disease of the heart, Captain Dumayne, of the *Good Success*, aged 48 years.
- HALLEY**—On the 23rd inst., at 7, Harley-street, Cavendish-square, Alice, the beloved child of Alexander Halley, M.D., in her 3rd year.
- ROBSON**—On August 31, at sea, on board the bark *Waverly*, Captain William Robson, of Newcastle-upon-Tyne, aged 32 years, deeply and deservedly lamented by all who knew him.
- VINCENT**—Drowned at Woosung, in December, A. Vincent, second officer of the P. & O. S. N. Co.'s steam-ship *Granada*.

Monetary and Commercial.

It appears by statements received from St. Petersburg that of the £12,000,000 Russian Loan, introduced last autumn, only £5,400,000 was placed in the continental and London markets.

At a meeting of the London and Westminster Bank, a dividend and bonus were declared at the rate of 10 per cent. for the half year. The total distribution in 1858 was 16 per cent., and 1858, 17, while in 1859 it advanced to 18 per cent. Compared with last year, a slight diminution is shown in the amounts due to customers from a decline in the deposits at interest. A short

discussion took place, chiefly congratulatory. Mr. Gilbert, the late manager, was elected as extra director, in anticipation of the next vacancy.

The first meeting of the Mercantile Discount Company has been held. The report stated that the net profits in the seven and a half months the company has been in operation amounted to £7,922, and a dividend and bonus were recommended equal together to 12 per cent. per annum.

A meeting of the Union Bank took place to-day, Alderman Sir Peter Laurie in the chair, when the report, announcing a dividend and bonus for the past half-year at the rate of 15 per cent. per annum, free of income-tax, was adopted unanimously.

The National Discount Company have issued their report. The available balance is £14,740, and a dividend is recommended at the rate of 5 per cent. per annum, absorbing £9,633, and leaving £5,107 to be carried to the reserved fund, which will then amount to £25,604.

The bar silver by the West India steamer has been sold at 5s. 2½d. per ounce standard, showing a rise of ½d. compared with the price obtained for the previous supply.

The arrival of the Imperatriz at Ceylon, en route to Kura-chee, with a portion of the Red Sea cable, has been announced 59 days from Liverpool.

The specie, by the steamer China, on the 20th inst., was as follows:—For Calcutta, silver, £243,595, and gold, £85,000; Shanghai, silver, £98,381; Hong Kong, silver, £64,270, and gold, £10,000; Madras, silver, £19,500, and gold, £8,473; Ponang, silver, £8,650; Alexandria, gold, £7,500; Ceylon, gold, £1,700; and for Foo-chow-foo, silver, £540. Of the remittance to Hong Kong, £32,313 is on Government account.

At a meeting of the Great Ship Company, the directors offered to resign. A committee has been formed to investigate and report on their management. The financial statement showed that £353,971 had been received, including £298,733 from the shareholders, £10,133 for admission of visitors to the ship, and £40,000 on loan; and £347,483 expended, including £166,164 on purchase account, £142,290 on completion account, £11,842 for general stores, £15,311 for wages and ship's expenses, and £11,067 general charges, leaving a balance of £6,474. The estimated liabilities and assets showed a balance against the company of £36,641.

The Board of Trade returns for 1858 have just been issued, showing the details of our import and export trade.

The grand total value of the imports of goods and merchandise in 1858, was £164,583,832, and that of the exports £139,782,779, making a gross total trade, on the part of the British empire, of £304,366,611. The trade of 1856 and 1856 was larger, in the ratio of £334,018,742 and £611,764,507. In 1855 the imports and exports together stand at the sum total of £260,234,150; and in 1854 at £268,210,148.

The imports are thus classified according to countries:—From Russia, £11,000,000 to £12,000,000; from Prussia, £4,107,609; from the Hanseatic cities, £4,319,065; Holland, £6,265,257; Belgium, £3,060,585; France, £13,271,890; Portugal, £1,079,778; Spain, £2,258,288; Cuba and Porto Rico, £3,798,778; the Two Sicilies, £1,656,253; Turkey, Moldavia, and Wallachia, about £4,000,000; Egypt, £6,026,191; the United States and California, £34,258,498; Brazil, £2,275,497; Buenos Ayres, £1,194,977; Chili, £1,900,322; Peru, £4,822,253; China Hong Kong (inclusive), £7,073,509; and Africa (West Coast), £1,563,085.

From the colonies the imports stand as follows:—From Canada, £2,663,034; New Brunswick, £1,102,111; West Indies, £4,890,488; British Guiana, £1,461,341; New South Wales, £1,930,147; Victoria, £2,110,277; British East Indies, or India proper, £14,989,039; Ceylon, £1,679,852; Mauritius, £1,534,952; Cape of Good Hope, £1,669,920. In every other case the imports are under a million.

The exports from England to foreign parts may thus be stated:—To Russia, £2,724,609; Prussia, £1,956,199; Hanover, £1,640,189; the Hanse Towns, £9,031,877; Holland, £5,473,312; Belgium, £1,815,257; France, £4,683,131; Portugal, £1,432,238; Spain, £2,071,219; Cuba, £1,797,219; Sardinia, £1,174,580; the Two Sicilies, £1,569,166; the Austrian territories, £1,298,199 (our imports from Austria are under a million); Turkey, £1,255,612; Egypt, £1,985,829; United States, £13,994,815, and California, £426,663; Brazil, £3,994,817; Buenos Ayres, £1,008,819; Chili, £1,117,580; Chili, £1,119,580; Peru, £1,163,155; and China (exclusive of Hong Kong), £1,730,778. To Canada were exported, £1,737,751; the West Indies, £1,792,323; New South Wales, £2,919,544; Victoria, £5,417,601; Hong Kong, £1,135,669; India, £16,785,386; and the Cape of Good Hope, £1,602,613. The imports above specified represent the computed, and the exports the declared, real value of the goods.

The comments of the *Times* on these returns are as follows:—

Next to the description of the business, the most important point is that of our customers, and here the account presents some very striking features. The United States are, beyond all comparison, the largest customers with whom we have any dealings, but they do not buy of us half as much as they sell. Germany, on the other hand, takes from us, through the Hanse Towns, twice as much as she sends, while Spain and Turkey keep the balance pretty even. India also is a most important customer to us, for the account between the two

countries is not only very large—£30,000,000 and upwards both ways together—but is somewhat in our favour. From the Chinese, of course, we buy immense stocks of tea and silk, whereas at present we sell them next to nothing. Russia, again, is more of a seller than a buyer, which is not extraordinary, considering how much we want of her produce and how little she actually needs of ours; but there is another example which is of more importance than all. Nothing can be plainer than that our dealings with France are unnaturally restricted. We ourselves do not go to France for so much as we really want, though we do take £13,000,000 worth from her; but when it comes to the turn of Frenchmen to be buyers, the figures are less satisfactory still. They literally only deal with us to the amount of £4,000,000 or £5,000,000; whereas Holland does more than this, and Brazil nearly as much.

ARTICLES OF IMPORT.

TEA.—Since our last there has been a steady and general demand from the trade, and the market has an upward tendency, although, up to the present time, there has been no excitement, and but little speculation. Common Congous, fair to good flavory kinds of old import have been in request at 1d. per lb. advance. Ho Hows and Ning Chows also show a rise of 1d. to 1½d. per lb. The new arrivals of Monings and Wopaks have met with a ready sale, at a further rise of 1d. per lb. Good to fine Kaisows have also been in demand, and may be quoted 1d. to 1½d. per lb. dearer. Tayshans have sold freely from 1s. 5d. to 1s. 9d. per lb. Oolongs and Souchongs present no feature for remark. There has been more inquiry for Flowery Pekoe, at rather better prices. Scented Orange Pekoes have been difficult of sale, and prices have ruled in favour of the buyers. Common kinds have been better supported. Fine Scented Capers have sold at former rates; common and medium have been less in demand. Green Teas have been sold to a fair extent at former prices; and in some cases, on the lower qualities, a slight advance has been paid. Young Hysons are scarce, and command full prices. Taiping Gunpowders in boxes have been sold at from 1s. 11d. to 2s. 1d. per lb. Ping Sueys continue to be taken from time to time at former rates. Canton Young Hysons are in improved demand, also the better class of Gunpowders. There have been two public sales, comprising 30,376 packages, of which 8,600 were sold, including 670 packages Assam Teas. Another tea circular announces Common Congous have advanced to 1s. 5½d., this is partly owing to the small quantity of this kind on offer, for, at 1d. more, much better tea can be had. A parcel of half chests of Congou dust, per the *Anglo Saxon*, sold at 1s. 3½d.; some chests, rather better, per the *Spirit of the Deep*, were placed at 1s. 4d. Foo-chow medium kinds have advanced ½d. Black leaf Kaisows sell at 1s. 8d. to 2s. Low-scented teas are sought for, and if on the market would sell at last week's rates. Holders keep back large quantities of Scented Orange Pekoes, at about 1s. 9d., in the hope of getting better rates, but the quantity on hand will prevent an advance if it does not cheapen them. The new arrivals by the *Wolverine* are much out of condition, and a more liberal allowance than the rule permits must be made by the merchants for the underliners. Oolongs, per *Spirit of the Deep*, sell easily at 1s. 8½d. to 1s. 9½d., and a large quantity of medium Congous, per *Northfleet*, were settled at 1s. 9d. The new arrivals of greens have not satisfied those who are looking for the finer kinds, none being equal to those brought by the *Challenger*, from Shanghai.

SILK.—The arrivals per *Cambula* and *Wagoola* afforded nothing of special interest, the only sales being 150 bales, and a forced sale of Chinese throws at nominally low prices, but of this class we have had repeatedly to report a heavy market; any one desirous to sell had no alternative but to submit to a reduction.

SUGAR.—Transactions have been on a contracted scale, but previous notes have been generally obtained. Penang, 4,325 bags went off slowly, but found buyers at tolerably steady rates, good middling to fine brown, 35s. 6d. to 38s.; low and middling yellow, 88s. 6d. to 10s. 6d.; good middling and good, 41s. to 42s. 6d., a small lot fine 45s. Privately, 500 bags Gupattah Date have been taken at 40s. to 43s. 6d. Clayed Manila, 27,347 bags bought in at 41s., 86 baskets Java, low to good strong grey, sold at 41s. to 43s.

COFFEE.—The public sales have gone off with a fair degree of animation at the previous value, the greater part being sold. 196 cases, 71 barrels, 125 bags Plantation Ceylon, mixed and triage, 52s. 6d. to 64s. 6d.; fine ordinary, 65s. to 66s.; middling, 70s. 6d. to 71s.; good middling, 79s. 6d.; superior, 83s. to 92s. Of 121 casks 32 barrels native Ceylon, one half, superior quality, sold at 62s.; 35 cases 247 bags Neilgherry sold, fine ordinary, 68s.; superior pale, 79s. to 80s. 6d., a few lots 91s. 6d.; 1,256 bags Madras, all sold, brownish fine and fine ordinary, 65s. 6d. to 70s. 6d.; 8 cases Tellicherry 63s. 6d.

TIN.—For Banca the quotation is nominal at 139s. About 1,000 slabs Straits of good quality were sold at 131s., three months prompt; for small quantities it is difficult to quote a price.

HEMP.—East India descriptions are not in any demand. Manila sells at steady rates. First class, £24 to £25; second to fourth at £23 10s. to £25.

PEPPER.—Has again commanded stiffer prices, and a rather large business has been transacted, viz., by private treaty, about 8,000 bags common to fair Singapore at 4½d. to 4½d., with old import at 4½d.; 500 bags, for arrival, at 4½d.; and 900 bags offered by auction, fair to good black, 4½d. and 4½d.; 200 bags Penang, held for 4½d., were withdrawn. For white pepper, a rather active demand has arisen, and the quantity on offer being small, prices have been driven up to 7d. and 7½d., at which about 800 bags have been sold, besides about 700 bags to arrive, at 7d. per lb.; of 303 bags of Singapore brought forward, one-third, good quality, fetched 7½d. to 7½d.

TOBACCO.—Java: much inquired after; only a few bales for sale. Manila: very little on sale, and extreme prices asked. Arracan and Akyab: several lots sold at low prices, and not remunerative to the importers. Manila cigars and cheroots dull.

JAPAN WAX.—The market is very quiet, at the same prices, viz. 65s.

SAGO.—At public sale, 1351 boxes Pearl, were mostly realised at tolerably steady rates; fine small, Borneo make 20s. to 21s., common to fair, 16s. to 17s., fair large 16s. to 16s. 6d., good medium 17s.

RICE.—A more active demand has prevailed in this market, and good old Necranzie has sold at 9s. 3d. to 9s. 6d., and some parcels of soft grain descriptions on terms which has been kept secret. Holders have lately stood out for firmer prices, and 10,509 bales of common new Necranzie have been withdrawn at 9s. 6d.

RUM continues in fair request and business has been again done at full rates. 350 puncheons Penang have sold at 1s. 7d.

DRUGS AND SPICES.—Camphor, China and Japan, 160s. to 170s. 0d.; Cassia lignea, in bond, 95s. to 108s.; do. in buds, 175s. to 185s.; do. oil, 15s. to 15s. 6d.; cinnamon, Ceylon, 9d. to 2s. 3d.; cloves, Amboyna and Penang, 4½d. to 1s. 5d.; Galangal, root, 30s. to 35s.; ginger, Calicut and Cochin, £3 10s. to £6 10s.; gum, Benjamin, middling to fine, £4 to £16; do. drossy, £1 to £3; damer, 30s. to 50s. 0d.; gamboge, picked, £6 to £8; do. in sorts, £4 10s. to £6; mace, 1st quality, 2s. to 3s.; do. 2nd quality, 1s. 2d. to 1s. 6d.; nutmegs, 1st quality, garbled, fine, bold, even, and heavy, 2s. 6d. to 3s. 9d.; do. ungarbled, 1s. 4d. to 2s. 4d.; oil, aniseed, 8s. 6d. to 8s. 9d. per lb.; Cajuputa, 1d. to 1½d. per oz.; cinnamon, 2s. to 4s. per oz.; mace and nutmegs, 2½d. to 3d. per oz.; rhubarb, Dutch, trimmed, sound heavy breaking, bright and fresh, 5s. to 6s.; common flat, not dark coated, spongy, or wormy, 1s. 4d. to 3s.; common round, 1s. 2d. to 2s. 9d.; star aniseed, fresh, bright, bold, unbroken, not grey, 95s. to 100s.; sticklac, Siam, fine black, 50s. to 80s.; Terra Japonica, Cutch pegue, 27s. to 28s.; gambier, in squares, 16s. to 16s. 6d.; turmeric, sound, bright, and bold, 12s. to 17s.; vermilion, bright, deep colour, and pure, 3s. 9d. to 4s.

MISCELLANEOUS.—Gutta percha, not adulterated, or falsely packed, 1s. 9d. to 2s.; India-rubber, pure, not drossy, 2s. 1d. to 2s. 1½d.; rattans, 2s. 7d. to 3s. 2d. per 100; sapan-wood, Bemah, £6 10s. to £9 15s.; Siam, £8 to £9 10s.; red Sanders, £5 to £5 18s. per ton. Singapore mother-of-pearl shells, 120s. to

140s.; Manila, 135s. to 160s.; Soy, thick and clear, dark red, good flavour, 4s. to 4s. 3d. per lb.

ARTICLES OF EXPORT.

Mr. Samuel Griffiths, in his Wolverhampton circular, observes that few transactions have taken place in pig-iron; the price, however, for good all mine brands is well maintained, makers holding firmly. Considering the new year, the state of trade is as good as can be expected.

IRON.—The quotations have been—for common Staffordshire bars, £7 10s. at the works; best bars, £8 10s.; sheets, £9; doubles, £10 10s.; nail sheets, £8 10s.; boiler plates, £9; best and best in proportion, common rods, £7 10s.; hoops, £8 10s.; and Canada plates, £12; Staffordshire cold blast pigs, £4 10s.; superior make of all mine melting irons, £3 10s. to £3 15s.; favourite Shropshire and Forest of Dean brands, £4 10s.; Scotch pigs brisk, from 57s. to 58s. 6d. cash. Shipments have been 7,479 tons.

SPELTER.—Several transactions are reported, principally for India and China, at £21 7s. 6d. and £21 10s. The market must be considered firmer, and though there are sellers who forward delivery, the general indication is more favourable.

COPPER.—The market is firm at fixed rates for English. Burra Burra at £119, Copiapo at £114 10s., Baltimore, £118 10s.

TIN.—Market quiet with moderate demand. Stock of Banca decreasing. Price of this kind not quite so firm. Straits, £131 to £132 per ton. Banca has been as low as £139.

LEAD.—Market very firm; the late improved rates well maintained. Sheets have sold at £22 12s. 6d. to £22 15s., during the week.

TIN PLATES.—Market without change. Moderate business doing.

EXPORTS OF BULLION TO CHINA.

The following return shows the shipments of bullion from England during the present year;—

	Gold.	Silver.
Shanghai.....	— ..	£145,193
Foo-Chow Foo	— ..	1,615
Hong Kong.....	£10,000 ..	203,000
Manila	— ..	—
Singapore.....	— ..	2,406
Penang	— ..	13,800

(The sum of £139,225 was incorrectly stated in our last number, as having been shipped to Manila instead of Hong Kong).

LATEST STATE OF THE HAMBURG MARKETS.

Although the desultory character of this winter, continually vacillating between alternate frost and thaw, cuts off all commercial communication with the north of Europe, so, on the other hand, it prevents our markets from being overstocked by large arrivals of produce from other ports, and opens the door for speculative purchases.

COFFEE.—Firm and looking up. Sales 30,000 bags of different sorts, and 80,000 lbs. Domingo at full prices. Purchasers are ready to do business, and the sales would have been much more extensive if importers had given a little more encouragement.

SUGAR.—The late advance is fully supported both for raw and refined. For the latter the market was very active, everything offered finding a rapid sale.

RICE.—The opinion for this article is favourable, the market firm, and higher prices demanded, which has rather tended to check business, the sales of the fortnight being principally limited to the requirements of the local trade.

DRUGS AND SPICES.—Large sales of *Cassia lignea* have again taken place, and not only is the late advance fully established, but prices may be quoted fully 1 sch. bco. per lb. higher, with every probability of a still further rise, as stocks are short and only limited supplies expected. Pepper quiet, there being but little in the market. Pimento in good demand. Some large transactions have taken place in this article on speculation. Camphor has run up to an enormous height, partly from the great demand and small stocks, and partly from the late rise of prices in other markets. Of the raw article there is no more to be had, and every parcel of refined is bought up as soon as it comes to market. The last sale was 10,000 lbs. at 20 sch. banco per lb., and the price is likely to go higher.

METALS.—There was some inquiry for Banca tin, but as the orders were limited the business done was not large. Copper is higher, owing to the rise of this article in England, and some large operations were effected at the advanced quotations. Spelter neglected, and even a trifling reduction in the demands of the holders failed to awaken speculation, whilst the ice on the river prevents the execution of orders for shipment.

Discount 2 and 3 per cent. Money plentiful.

MANCHESTER MARKET.

There has been a gradually improving market for both yarn and cloth during the week, and sellers report an exceedingly extensive business. The letter of the Emperor of the French, indicating a free-trade policy, coming about the same time as the better accounts from Calcutta, gave a strong impulse to the market on Monday and Tuesday, and the sales of cloth were large almost beyond precedent. Shirtings, madapollams, jaconets, and other light fabrics for India were in active demand ; and as stocks had been cleared off, some heavy contracts were placed at a slight advance of prices. Of course, contracts for early delivery were those commanding the best prices, but so much is production pre-engaged, that orders have been placed for which the deliveries cannot take place before March and April. Heavier and better cloths, suited to other markets, including the home trade, have improved in firmness under these circumstances, and long cloths. T-cloths, domestics, and printers, are in good request, and as there were many of the makers of these who had not come out of order, they are now scarce, so that buyers have to pay very full rates to place contracts for reasonably early supplies. There has been rather less done in India goods within the last day or two, but it is a good deal owing to the difficulty of getting the goods, and the firmness of prices is not affected. For yarns there was a very large business done on Tuesday, and nearly all kinds suitable for India, China, and the Mediterranean markets were in request, at an advance of $\frac{1}{4}$ d. to $\frac{1}{2}$ d. per lb. According to a circular of Mr. Charles Oldham, of Manchester. the aggregate exports to China of plain and printed calicoes in 1859, compared with those five years back, show an increase of 480 per cent., and of cotton yarn 377 per cent. Of the total export of plain and printed calicoes from the United Kingdom last year more than half was to India and China.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

Tea : Prices still continue very firm, although there is comparatively nothing doing, holders being positive and buyers shy. Common Congou is held at 1s. 5d. to 1s. 5½d., with a decidedly buoyant tendency. A public sale will be held on Friday, for which there are already (30th Jan.) upwards of 8,000 packages down.—Silk: The market still remains without alteration, and only just supporting the last quotations.—Colonial produce: The markets are steady, but there is only slight business doing.

Arrivals not included in Table.—January 21, at Texel, from Batavia, Reinhard; 22, at Brouwershaven, Aryscheffer; 23, Noord Brabant, 25, at Deal, from China, Abdul Medjid; off the Wight, from Batavia, Amsterdam; 26, at Waterford, from Singapore, Harvest Home.—Departures: January 26, from London, for Hong Kong and Canton, Polmaise; from Liverpool, for Woosung, China Lebanon; 25, from Cardiff, for Hong Kong, Carin Tollens; 23, from Sunderland, for Shanghai, Emperor; from Liverpool, for Singapore, Falk; for Batavia and Sourataya, Eleanor; 26, for China, Charma.—Put back to Deal Jan. 26, Earl of Windsor, for China.—Laid on at Glasgow, for Batavia and Sourataya, Daniel Jefferies; for Hong Kong, Fanqui, S.S.; at London, for Shanghai, Anglo Saxon; at Table Bay: Nov. 26, from Singapore: Christian lover,—from Hong Kong, Susannah, both for Falmouth; From Rangoon: Boomerang, for Queenstown; 27, from Penang, Time, for New York; from Singapore, Volant, for Boston.—Casualties:—The Charles Brownell ashore on Bernard's wharf, in the River Mersey, is logged, and on the afternoon of the 23rd inst., had nine feet of water in her; her cargo is being discharged into lighters. The Erasmus and Heiningen, from Rotterdam for Hong Kong, put into Portsmouth on Jan. 27 leaky, having experienced very heavy weather in the channel.

Additional Passengers outwards.—Per P. & O. steamer, Feb. 4, from Southampton to Hong Kong: Deputy Assistant-Commissary-General Bailey; Meers, Williams and Howard. From Marseilles, February 12, to Hong Kong, Mr. J. B. Harroine. From Gibraltar to Hong Kong, Mr. W. J. McKittrick. February 20, from Southampton to Singapore, Mr. J. B. Brooke; to Shanghai, Mr. A. Howell. Per P. & O. steamer, February 28, from Marseilles to Hong Kong: Mr. A. Turning.

FOREIGN COMMERCIAL REPORT.

LONDON, Jan. 30, 1860.

The mails with dates from Shanghai to the 7th, Hong Kong, the 15th, and Singapore, the 22nd of December, were received

this morning, and advise an uninterrupted course of business. The English news of October 26, it is reported, arrived per *Lancefield*, outside Hong Kong, two days in advance of the mail steamer. In consequence of the reduction of the tonnage dues on American vessels from five to four mace per ton, an application has been made under the favoured nation clause, for the admission of British vessels on the same footing, on the grounds, that as the new treaty has not been ratified, the last one is still in force. We cannot see how Mr. Bruce arrives at this conclusion, and quite certain are we that the Chinese Government will not concede that or any other point in the present state of affairs. It is obvious that if one point can be claimed, all those now enjoyed by the Americans can be equally so.

It is rumoured at Canton that 150,000 dols. have been received by the American commissioner, on account of their claims for damages done in the war at Canton in 1856-57. The foreign inspectors of the Canton customs appear to adjust themselves more to the requirements of the native and foreign community. The seizure of the Portuguese steamer *Shamrock* ended in confiscating the cargo, and a fine of 3,000 taels. At Japan, a notice will be found, issued by our consul at Yedo, on the still vexed question of currency. It appears the export of gold still yields some 60 per cent. profit, and the Japanese are not able to prevent its export. A notice has been issued in reference to purchasing land. Another vessel has been sacrificed on the Pratas Shoals, laden with tea and silk; particulars will be found in our shipping. How many more are required to induce the body of underwriters to take steps for the erection of a lighthouse on this maelstrom.

IN EXPORTS:

TEA.—At Shanghai the teamen have met an increased demand with caution, and an advance in rates has resulted. The export, although in excess of the previous years, is not a criterion that the season's stock will prove larger. The anxiety of foreigners to ship off before hostilities are resumed fully accounts for the excess. The settlements are announced as 7 chops Congou, at 32 to 25 for Ho Hows; common and Shanghai packed 19 to 20. 1,000 packages flowery Pekoe at rates from 25 to 40. In greens, settlement small, both for England and United States. Imperial Taiping is quoted at 18 to 21. At Foo-chow, rates have also advanced from 2 to 3 taels, about 15,000 chests and 10,000 halves were settled at 18 to 23 taels. At Amoy, rates had been for Congou, 14 dollars to 16 dollars; 3,000 chests of Oolong and Ningyongs fixed at 15 dollars to 16 dollars for Ankoï sorts. At Canton, the teamen are so exorbitant in their demands, that business has been much restricted, and rates can hardly be given; 2,500 half chests of Taysaams settled at 21 to 25 taels.

RAW SILK.—At Shanghai transactions are restricted, owing to the increased demands of the holders. About 1,500 bales, and 1,000 of Japan settled. Quotations are, Tsatlees No. 1, taels 430 to 435, Taysaams No. 1, taels 355 to 365. At Canton no business to report.

IN IMPORTS:

COTTON GOODS.—Stocks at all parts are small with a fair demand, the quotations at Shanghai for 7½ to 10 lbs. Grey Shirtings is 1.8.4. to 1.8.5.; at Hong Kong 2.25 dols. to 2.90 dols. Cotton yarn at the latter was 33 dols. for Nos. 16.24. Woollens and metals are also in good demand, and coal had been sold at 18 dols. for good English steam. American cotton goods were very dull.

At **MANILA.**—The import market for cotton goods is active, and the stocks of some goods very small. In exports, sugar was quoted at 5.25 dollars for clayed, but no transactions. Unclayed sales at 3 dollars 35 cents. Hemp for United States at 5 dollars, 5 cents. for current quality.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to one dollar and forty cents, and is divided into decimal parts of ten.

VESSELS PASSED STRAITS OF SUNDA.—From China to England and Continent:—Nov. 22, Nancy; 24, William; 28, Beemah; 29, Aerolite, Southern Belle, Lord of the Isles; Dec. 1, Friar Tuck.—To New York: Nov. 22, Kathay; 28, Phantom; 30, Western Continent. To Melbourne: 27, Mercedes; 28, Elizabeth and Ann. To Sydney: 30, Oithona. From Manila to Liverpool: 29, J. D. Marshall. For Falmouth: 28, Boldon Lawn; Dec. 2, Diana.

FREIGHTS AND CHARTERS.

Outward freights to India continue weak, with a downward tendency. For the berth in London, 70s. per register ton is the extreme rate for Calcutta, 65s. Bombay or Madras; and for coals considerable tonnage has been engaged during the week for India and China, the rate for Aden having declined to 50s., the ships chartered including the General Hewitt, Dinapore, and European. For other East Indian ports rates are unalterable, and for China they continue firm. The French Government are in the market at 75 to 77 francs per ton; and for Hong Kong 62s. 6d. has been done for English account. Homeward freights continue without animation. The Areta was fixed this week at 50s. from Calcutta, but the inquiry is very limited. 45s. from Java, 50s. from Ceylon and the Malabar Coast, and 50s. from the rice ports, are offering for Continental account. £6 teak is offered on the round; coal port to Rangoon and back from Moulmein, or £6 10s. taking the coals out to Aden.

Rates of freight current to Shanghai 70s. per ton dead weight; 55s. per ton of 40-feet measurement. To Hong Kong, 60s. weight, 50s. measurement. To Singapore, 40s., weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 dols.

FOREIGN.

At SHANGHAI.—For England: £2 for tea; and £3 10s. for silk. For New York, 5 dols. for tea; and 15 dols. for silk. The number of ships in harbour have decreased, but only small smart craft find employment readily, large vessels not being required.

At HONG KONG, MACAO, and CANTON.—For England: the St. Ja is loading at 20s. For New York 5 dols. In consequence of the failure of the rice crops, it will promote emigration free and hired, and tonnage will become more valuable. The F. P. Sage has been chartered to Sydney, Melbourne, and back for £3,000. A superabundance of large ships is still in harbour, but there is an active demand for small vessels for the rice and coast trades at advanced rates.

At SINGAPORE.—For England: the current rates are as last quoted. From Akyab: 32s. 6d. For New York: as last quoted.

At MANILA.—For England: there has been nothing done since last mail. For New York: the Nabob has been laid on at 4 dols. per ton.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila, 50s. to 60s.

SHIPPING CASUALTIES.

The Cornelis Smet, from Cardiff to Hong Kong, put into Falmouth Jan. 23, with loss of sails, three boats, bulwarks, spars, cookhouse, and damage to decks.

The Anandale, from Hong Kong, met with heavy weather on the 21st; was struck by a heavy sea, which carried away yards and sails, bulwarks, stanchions, and two boats. Two seamen, named Stanley and Campbell, were washed overboard and drowned. Captain Aitcheson died on the 10th inst., of dysentery.

The Charles Brownell, Bedford, from Singapore to Liverpool, arrived off Fleetwood Jan. 21; lost most of her canvass during the night, and was driven into Morecamber Bay. She had seven feet water in her hold, and subsequently drifted high on Bernard's Wharf.

The Magdalena, which arrived at St. Helena Dec. 8, from Batavia, for Falmouth, reports having experienced heavy gales off the Cape of Good Hope for 14 days.

The Neptimas Schursmann, from Batavia to Amsterdam, which put into St. Helena Nov. 14, and was ordered by surveyor to discharge her cargo, was again surveyed on Dec. 12, and, it is said, has been condemned.

The Ocean Pearl, Crowell, arrived at New York, December 31st, from Manila, had experienced heavy weather, sprung foremast, jib-boom, split rudder-head, &c.

The Charmer, bound from Liverpool to Shanghai, was in collision in the river Mersey on the night of the 17th of January with the Derritt Clinton, bound to New York, when the former received considerable damage.

The Tory, bound from Liverpool to Hong Kong, and the Robert Kelly, from New York, were in collision above Rock Ferry on the morning of the 18th of January; the former vessel has been surveyed, and ordered into dock to discharge.

The Jacobus Martinus, from Sunderland to Singapore, put into Falmouth, Jan. 13, leaky.

The Beatrix, from Sunderland to Singapore, put into Plymouth Jan. 12, leaky.

The Emilie (ship), of Nantes, from Marseilles to Daigon (Cochin China), was stranded on the coast of Cape Huerta, near Alicante, 4th Jan., and filled; part of the stores and sails saved. She has since broken up, cargo totally lost.

The Margaretta Simonetta, from Amsterdam to Batavia, came in contact with the Wassenaar, at Nieuwe Dieppe, lost bowsprit, &c., and received other damage.

The Pestonjee Bomanjee, which arrived at Scilly, Jan. 13, from Maulmein for Falmouth, was leaky and had lost bowsprit and fore and mizen masts, having been struck by a heavy sea, 27th Dec., in lat. 41 N., long. 32 W.

The Prins van Oranje (s. s.), which sailed from the Clyde, Jan. 9, for Sourabaya, put into Queenstown on the 11th, short of water.

The Chile, Grell, from Liverpool to Batavia, which put into Rio Janeiro, Dec. 6, dismantled, was discharging her cargo there on the 15th Dec., and was recommended to have new masts, &c.

The Earl of Eglinton, London to Calcutta, got on shore near St. Margaret's Bay (Downs), yesterday morning, at 2.30, and remains. Cargo must be discharged previous to her getting afloat.

HONG KONG.

The British ship Chieftain, which left Shanghai for London on the 26th November with a cargo of tea and silk, was totally wrecked on the Pratas Shoal on December 1st. Fortunately a China Junk which was there agreed to take the captain, crew, and passengers to Hong Kong for one-third of the cargo saved. On December 6, they arrived safely at Macao; but the vessel is a total wreck, a few bales of silk only having been saved.

The Romance of the Sea, from New York to Shanghai, put in here with rudder seriously injured.

The C. E. Tilton, which left here December 1st, put back on the 6th leaky. She will dock at Whampoa.

The American ship Live Yankee, bound to Shanghai, put in here in consequence of the heavy weather experienced outside, in which she lost sails, broke her trussle trees, and started some of the channel bolts.

The British ship Parisian lost sails, sprung the cross-jack-yard, lost maintop-gallant-yard, and had a most tedious passage.

The Siamese barque Africa was totally destroyed by fire at Che-foo, on the Shantung promontory. She had 25 kegs of powder on board, which exploded.

THE P. AND O. Co.—Another addition to the powerful steam fleet of the Peninsular and Oriental Steam Navigation Company has been made, by the launch of the Masilia from the building yard of Messrs. Samuda, Brothers, Poplar. This fine vessel is 310 feet long on deck, 36 feet beam, and 1,919 tons measurement tonnage. She is intended to receive engines of 400-horse power, which it is expected will be set to work on board her, and the vessel ready to proceed to sea, within two months from this date.

THE OVERLAND MAILS.—The India, China, and Australian mails, via Marseilles, have so much increased, that a portion of the last mails (215 boxes) had to be sent in a special packet from Dover to Calais. The continental mails and passengers proceeding at the same time by the regular mail packet.

EXPORTS FROM SINGAPORE.—Per Danish barque Esbern Snare, to Cowes for orders: 1,032 bales gambier, 1,993 piculs, 1,415 boxes pearl sago, 1,570 piculs, 1,100 bags black pepper, 917 piculs, 3,307 bundles rattans, 144 piculs, 4,811 buffalo horns, 91 piculs, 200 bundles Malacca canes, 20,000 piculs. Per French ship Bangkok, to Bor-

deaux: 3,469 bundles rattans, 388 piculs. Per American ship Borodino, to New York via Penang: 310 slabs tin, 301 piculs, 4,258 bags coffee, 1,510 piculs, 1,622 tea, 10,023 barrels rattans, 283, 466 bales gambier, 1,000 piculs, 745 bags black pepper, 500 piculs. 52 cases nutmegs, 11 cases mace, 189 boxes tea, 3,843 cow hides, 425 piculs, 1,446 buffalo hides, 299 piculs, 32 baskets india-rubber, 74 piculs, 232 cow hides, 417 buffalo hides, 139 piculs, 132 boxes tea, 27,170 barrels rattans, 1,001 piculs, 70 boxes gum dammar, 70 piculs. Per Hamburg barque Buenos Ayres, to Cowes for orders: 512 bales gambier, 1,008 piculs, 911 boxes pearl sago, 1,001 piculs, 510 bags black pepper, 431 piculs, 3,535 bundles rattans, 144 piculs, 637 buffalo horns, 13 piculs, 100 bundles Malacca canes, 10,000 piculs.

EXPORTS FROM MANILA.—Per Joseph L. Hale, to New York: hemp, 7,916 piculs; sugar, 10,000; sapanwood, 945; hides, 720; indigo, 67.—Per Fortuna, for Singapore and Boston: hemp, 1,000 piculs; sugar, 6,400; sapanwood, 250; cigars, 10.—Per Helen Douglas, for London: hemp, 4,126; sugar, 8,295; sapanwood, 1,440; copper, 224; cigars, 1,558; mother-'pearl shell, 885; and 357 catties tortoise shell.—Per Eastern Star, for New York: hemp, 11,724; sugar, 5,077; sapanwood, 1,063.—Per Belvedere, for Boston: hemp, 14,684; sugar, 8,000; sapanwood, 1,200; coffee, 20; cigars, 1,070; mother-o'-pearl shell, 120.—Per Trafalgar, for London: hemp, piculs, 62; sugar, 10,707; sapanwood, 1,414; cigars, 430.

THE WRECKED P. AND O. STEAMER AVA.—A further sum of 57,000 rupees has been recovered from the Ava, and made over to the Madras Treasury. The Government of India has issued instructions to the Madras Government to dispose of the wreck by public auction.

WHALEERS IN THE SEA OF OKOTSK.—From a statement in the "Hong Kong Daily Press," it appears that the whalers in the Sea of Okotak made 59,735 barrels of oil, principally on American account.

ARRIVAL OF THE TUNG-YU.—This steamer arrived at Hong Kong, on Dec. 2, after a passage of 201 days from Glasgow.

THE PEIHO.—We noticed this vessel lately, and have now to record that she made the passage from Hong Kong to Shanghai, calling at all ports, in eight days against monsoons, and down in five days six hours.

THE CHEVY CHASE.—This vessel arrived at Singapore on the 14th Dec, 76 days from Swansea. She proceeded to Hong Kong after coaling.

PASSENGERS INWARDS.—Per Zeenymph, Captain Visser, at Amsterdam, from Batavia: Captain B. Logger, of the E.I. Infantry, and family; Lieutenant J. Huyzer; Mrs. F. Van Schmidt and son; Mrs. Tenbroek and children. Per Baron Hardenbrock, Captain Henny, at Amsterdam, from Java: Commander E. Baak, N.R.N. Per Amelia Augusta, Captain Marie, at Amsterdam, from Batavia: Mrs. J. Young and family.

PASSENGERS OUTWARDS.—Per Koning en Vaderland, Captain van Bruggen, from Rotterdam, to Batavia: Mr. and Mrs. Godefroy and three children; Messrs. M. S. Kinderen and A. Rambalda, with three Javanese native servants.

SUBMARINE HELMET DRESS AND APPARATUS,

which enables a diver to remain any length of time under water. For the Recovery of Property from Wrecks, Making and Repairing Foundations of Harbours and Bridges, and also

FOR PEARL AND SPONGE DIVING.

Extract from the *Lancet*, February 4, 1854, and from Dr. Hassall's recent work on "Food and its Adulterations":—

"The Samples of Messrs Crosse and Blackwell were entirely free from Copper."

CROSSE AND BLACKWELL,

Purveyors in Ordinary to Her Majesty,

RESPECTFULLY invite attention to the following, all of which are of the very highest quality and of a pure and wholesome character:—

PICKLES of various kinds; prepared in pure malt vinegar.

BOTTLED FRUITS, FOR TARTS AND PUDDINGS; preserved in their natural state and not coloured artificially.

JELLIES of unequalled brilliancy and purity; consisting of Calfs Foot, Orange, Lemon, Noyeau, Punch, Madeira, &c.

ESSENCE OF REAL GORGONA ANCHOVIES, Essence of Shrimps, Royal Table, Solo, and numerous other Sauces, the whole of which are well established in public estimation.

THE CELEBRATED SOHO SAUCE; for Game Venison, &c.

ANCHOVY PASTE, BLOATER PASTE, STRASBOURG and other **POTTED MEATS;** for the Breakfast and Luncheon Table.

ORANGE, MARMALADE, JAMS, and JELLIES; perfectly pure, and prepared by a process which effectually retains the fine aroma of the Fruit.

Of Marmalade, the *Lancet* of January 22, 1853, remarks—"6th Sample, purchased of Crosse and Blackwell, 21, Soho square. Ash of a Yellow Colour. Does not contain COPPER."

C. and B. are also Wholesale Agents for M. SOYER'S SAUCES, RELISH, and AROMATIC MUSTARD, all of which the *Lancet* declares to be pure.

BLAIR'S GOUT AND RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 9d. per box. This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

MEDICINES FOR EXPORTATION

Depot: 10, CURSOR-STREET, CHANCERY-LANE, LONDON.

LEA & PERRINS' CELEBRATED

WORCESTERSHIRE SAUCE.

PRONOUNCED BY CONNOISSEURS

TO BE THE

"ONLY GOOD SAUCE,"

AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a **MEDICAL GENTLEMAN**, at Madras, to his Brother, at WORCESTER, May, 1851.

"Tell **LEA and PERRINS** that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—**Lea and Perrins** having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the Labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of **L. and P.** forged; they have deemed it their duty to caution the public, and request purchasers to see that the names of **Lea and Perrins** are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, **Lea and Perrins, Worcester;** **Crosse and Blackwell**, and other Oilmen and Merchants, London.

HOLLOWAY'S PILLS.—In London, and all large cities, where, from the multitudes congregated together malaria and fogs are breathed over and over again, because the coldness of the higher regions prevents its rising far above their heads, the blood at this season becomes more or less impure. The strongest and healthiest lungs are incapable of producing pure arterial blood from suffocating fogs, hence the sluggishness, mental and corporal, the weariness and irritability of many persons at this season of the year. **Holloway's Pills** remove all these impurities, relieve the pulmonary irritation, lessen the spasmodic choking in the throat, restore quietude to the provoked lungs, renew their elasticity, and permit more oxygen to be absorbed, rendering respiration free and healthy.

PERSONS PROCEEDING TO CHINA can effect assurances on favourable terms with the **COLONIAL LIFE ASSURANCE COMPANY.**

Loans given to civil or military officers proceeding to India on Her Majesty's service.

Agents at Calcutta, Madras, and Bombay, and in all the British colonies, where premiums can be paid and claims settled.

The Colonial was established in 1846, and its present income is upwards of £100,000 per annum.

Subscribed capital, £1,000,000 sterling.

Constituted by Act of Parliament.

SAMUEL R. FERGUSSON, Res. Sec.

London—81, Lombard-street, E.C.
Edinburgh—(Head Office), 5, George-street.
Dublin—65, Upper Sackville-street.

OVERLAND ROUTE.

 COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., via EGYPT. THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.

For further particulars apply at the Company's Offices, 129, Leadenhall street, London, E.C.; or Oriental-place, Southampton.

 A Regular China Trader, with despatch.—For HONG KONG and WHAMPOA, the splendid British-built clipper ship VERBENA, A 1 for 10 years; 467 tons Register; coppered and copper-fastened JOHN WOOD-GATE, Commander; loading in the St. Katharine Docks.

This magnificent Clipper, having just delivered her Cargo of Tea from China in first-rate order, is now on the berth, and being admirably adapted for the China trade, offers an excellent opportunity for the shipment of fine goods. Has superior passenger accommodation.

For terms of freight or passage apply to ADAMSON & RONALDSON, 1, Leadenhall-street, E.C.

 FOR HONG KONG and WHAMPOA.—The celebrated Thames Built clipper NORTHLEET, 951 tons, A 1, 14 years, BENJAMIN FREEMAN, Commander; will load in the East India Docks. Intending passengers will find this regular trader a very superior opportunity.

For freight or passage apply to Mr. EDWARD GELLATLEY, &c., with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse; or to W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

 SHANGHAI direct (to follow the Morayshire), the celebrated Aberdeen clipper-built ship BALLARAT, A 1 12 years, 713 tons register, HENRY JONES, Commander; loading in the East India Docks. This favourite vessel, well known in this and the Australian trade, has superior accommodation for passengers. Apply to Mr. Edward Gellatley, with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Limehouse, E.C.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

 REGULAR LINE OF PACKETS.—For BATAVIA, the fine fast-sailing barque WILLIAM SIMPSON, A 1 13 years, 396 tons per register, coppered and coppered fastened throughout, JOHN SPLATT, Commander, lying in the St. Katharine Dock. Has superior accommodation for passengers. For freight or passage apply to the Owners, Messrs. Thornton and Wests, Old Swan Wharf; or to Rangel, Woollett, and Co., 1, Lime-street-square.

 TRIESTE ROUTE TO INDIA.—The STEAMERS of the Austrian Lloyd's Steam Navigation Company leave TRIESTE for ALEXANDRIA on the 11th and 27th of every month, at 10 a.m., in correspondence with the P. and O. Company's steamers leaving Southampton on the 4th and 20th, and Suez on the 21st and 6th of each month. Passengers' baggage may be shipped at Southampton for Alexandria.

For further information apply at 127, Leadenhall-street, London; or Oriental-place, Southampton.—HICKIE, BORMAN, and Co., Agents.

 HOLLAND, SINGAPORE, and CHINA. Loading at AMSTERDAM, for SINGAPORE and HONG KONG, the fast-sailing Prussian frigate, DER WEST, Captain PUST, 333 veritas, 613 tons Dutch register, to sail March 15.

For freight apply to DORCHLAG and GERBAULET, 1, St. Michael's-alley, Cornhill, London, and at Rotterdam.

 A Regular Trader, with quick Despatch. For SHANGHAI direct, the celebrated Thames-built Clipper, WYNAUD, A 1, 13 Years, 546 tons Register, DAVID REID, Commander; loading in the West India Docks.

This beautiful vessel offers a first-rate opportunity to Shippers, being well known alike for her rapid sailing qualities, and the good order in which she invariably delivers her cargoes.

W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.) Gentlemen who are subject to pains in the back or loins, rheumatism, Lumbago, or who are given to corpulency, are advised to wear NELSON'S MEDICATED BELT, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventative of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for putting aside its use on board ship, it is invaluable as a Riding Belt, fitting easily, and supporting the back."

These Belts are sold by Mr. WHITBURN, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, WM. ELSTOB, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to WM. ELSTOB, at Cavendish-street. These Belts can be had of any tailor in the kingdom.

Messrs. Jardine, Matheson, and Co.'s steamer, Chevy Chase, beat the P. and O. steamer Malabar, from Singapore to Hong Kong, four days with the mail news of the 10th November.

Dates from Hong Kong to 21st December were received on the 4th instant, via Calcutta and Bombay, and a summary slip of news was issued to our subscribers. A telegram of the above mails was received on the 9th instant, announcing that 100,000 Tartar troops had encamped round the Peiho, and that trade at Japan had been stopped.

List of Passengers.

PASSENGERS INWARD.

By this Mail.—From Hong Kong for Southampton, Messrs. H. Chevalier and D. L. Rhind. 2nd Class.—Messrs. E. K. Williams, Thomas Feilder, and E. Ingledue. From Singapore, Mr. Van Tropin.

PASSENGERS ARRIVED OUTWARD.

Per St. "Malabar," at Hong Kong, on the 27th December, Mrs. Gee and child, Mrs. Menzies, Mrs. Davis, Mrs. Carr, Messrs. W. Lay, Walters, Little, Day, Thwaites, Johnson, Gibb, Drew, Clasmadoux, Forbes, and Marshall, Assist. Com. Gen. Robinson and Dr. Currie. For Shanghai.—Mr. Lang. For Manila.—Mr. and Mrs. Guichard, Gen. and Mrs. Escario and Mr. Escario, M. Agundo, P. Hugue, Mrs. Petel and child.

PASSENGERS OUTWARD.

Per P. and O. str., 4th Feb.—From Southampton to Hong Kong: Mrs. Fernandez, Dep. Asst. Com.-Gen. Baily, Messrs. Williams and Howard. To Shanghai: Mr. Holdsworth. To Singapore: Mr. Boyd.—From Marseilles, 12th Feb., to Singapore: Mr. Pilliet, Mr. H. L. Von B. Waanders. To Hong Kong: Lieut.-Col. Livet, Messrs. T. Langley, J. B.

Hamoine, and F. De Veaux, the Rev. M. McGhee, and Captain Moequart. To Singapore: Mr. Van Dolder, Mr. and Mrs. Bovries. From Gibraltar to Hong Kong: Mr. W. J. McKittrick.

Per P. and O. str., 20th Feb.—From Southampton to Shanghai: Messrs. W. Thorburn, A. Howell, and Krayer. To Singapore: Mrs. Mooyer and two infants, Mr. C. Klein, Miss Sail, Mr. J. B. Brooke. To Hong Kong: Mr. Lloyd, Mr. Ontorio.—From Marseilles, 28th Feb., to Hong Kong: Senor Colioni, Mr. A. Twining. To Shanghai: Mr. and Mrs. Don, Mr. N. Bickham, Admiral Charnier, Captain L. Ladebat, Messrs. Du Quille, Jaures, Dancyan. To Singapore: Mr. and Mrs. Helliars, Mr. and Mrs. Paterson, Mr. E. Busing, Captain John Ross. From Gibraltar to Hong Kong: Mrs. Crespo.

Per P. and O. str., 4th March.—From Southampton to Hong Kong: Mr. H. Piper.—From Marseilles, 12th March, to Hong Kong: Mrs. McKenzie.

Per P. and O. str., 28th March, to Shanghai: Mr. and Mrs. Marr. To Hong Kong: Mr. and Mrs. Walkinshaw.—From Alexandria to Singapore: Mr. and Mrs. Cramer, Mr. and Mrs. Puttfarcken.

Per P. and O. str., 12th April, to Hong Kong: Mr. Geo. Moul.

Per P. and O. str., 20th Feb.—From Southampton to Singapore: Mr. J. A. Robertson.

To Hong Kong: Lieut. H. C. Lees, R.N.

Per P. and O. str., 4th April.—From Southampton to Hong Kong: Mr. W. Chapman.

DETENTION OF MAILS.

THE detention of the present mails, which were due on the 13th instant, is partly owing to an accident to the rudder of the steamer Valetta.

THE NEW AMBASSADOR TO CHINA.

It is announced by the *Times* that Lord Elgin has consented to return to China and endeavour to get us out of our difficulties.

That Government have for some time asked him to do so we know, but the weight of our information has been that he positively declined the offer. If he has accepted it, it must, we think, be at the request of Her Majesty the Queen. It is obviously a most invidious duty to supersede, or even to be sent as a co-operator to, his own brother. From the reply made by Lord John Russell to Mr. Osborne's question on the 16th instant, this view of the case is confirmed.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The *North China Herald* publishes a long despatch from Mr. Consul-General Alcock, addressed to the Acting Consul at Kanagawa, with reference to the serious misunderstandings between the Japanese and Europeans at Yekuhama.

After stating that the natives make little or no distinction between one nation and another, or even one individual and another, he argues that the acts of any one member of the European family in Japan, for good or for evil, must always react and exercise a direct influence upon the interests and position of all. He then severely censures the foreigners for their indecorous and violent conduct, and believes that they have themselves to blame for so deplorable a state of affairs. The despatch adverts to the circumstance of sailors having been permitted to land without any responsible officer, and thus having frequently brought the British name into disrepute through their violence.

With reference to Mr. Telge's complaint, Mr. Alcock says he must be better satisfied than he had hitherto had reason to be, that he had not by his own conduct provoked incivility from the Japanese officials.

He thinks that the "difficulty" of the Exchange may have

partly occasioned the present deplorable position of affairs, but throughout the despatch most severely censures the Europeans.

The despatch mentions that with reference to the stoppage of trade—

Things had come to such a pass that I am not sure it was not the best thing the Japanese for the moment could do. In presence of the insane demands pressed upon them, often with menace and violence, (for such beyond doubt is the fact,) and for sums which not only the applicants could not produce in dollars, but which could not be expressed otherwise than by a long line of figures; while a lifetime would not suffice to count many of the sums claimed in itzibous. It is difficult to say whether the indecent levity and bad taste which mark many of the requisitions now under my eye, or the disregard of all treaty conditions and national interests or repute, equally manifested, are most worthy of reprehension. Some are a positive disgrace to any one bearing the name of an Englishman, or having a character to lose. Not only the sums, in their preposterous amount, are an insult to the Japanese Government to whose officers these requisitions were presented, but they are documents essentially false and dishonest as purporting to bear the names of individuals having a real existence and entitled to demand facilities for trade; whereas mere words are used as names, and made to convey gross and offensive comments. That there may be no question upon the strict correctness of this description, I annex true copies of several of these documents so disgraceful to the authors; and I have to direct you to circulate those, together with a copy of this despatch, for general information amongst the British subjects at your port. There are some outrages against society and the common interests of nations only to be fitly dealt with by giving them publicity, that the reprobation of all honest and rational men may overtake those who permit themselves such licence even where the law may fail to reach them. Some have been careful not to sign their names to the documents presented to the treasury; but you will have no difficulty in tracing them to the authors by the hand-writing and other circumstances, and I forward you the originals, that in the event of the Japanese officials who received being able to certify to the names of the parties presenting them, a copy of the same should be appended. With so much to deplore and to be amended on the one side and the other, it is not easy to apply a remedy. For the present stoppage in the issue of Japanese coins, it is quite certain the foreign applicants have themselves chiefly to thank, and they are responsible for any loss or inconvenience that may result to them or their constituents. Mr. Keswick, I observe in the correspondence you forwarded, adopts a tone of injured innocence which I must say is very ill borne out by the facts. In the face of a notification limiting all demands of British subjects or firms to a maximum of 5,000 dollars, Mr. Barber and he together, both in the same firm, do not scruple to send in requisitions on one day, the 3rd November, the first for four millions of dollars, and the second for one million four hundred thousand. Mr. Keswick alleges as an excuse (he could hardly mean it to be a justification) that others were permitting themselves the same licence, and that he took his course "as an act of protection" to the interests confided to his care, when he saw others adopting the system for the exchange of more money than they really possessed. The defence, if possible, worse than the act defended, for if the fact of others adopting a confessedly dishonest and unworthy system (which Mr. Keswick himself seemed too much ashamed of to go on with the following day), could be any justification, the argument would be equally valid to justify his taking the officials by the throat and seizing their money without any form or requisition whatever, provided only that others could be found to set the example! I should be sorry to think, at all, that this can be Mr. Keswick's real opinion; and I have no doubt whatever that at all events the firm of high and established reputation whom he and Mr. Barber represent at this port, will be the first to condemn it, whether regarded as a question of good judgment or commercial morality. The proceeding had not in truth the poor excuse of being profitable; for the Japanese, under pressure from some they hardly knew how to resist, and clamour and irregular demands from all, seemed to have been utterly bewildered at last, and to have adopted no principle of division or proportion whatever. Thus, while Messrs. Keswick and Barber, for their collective five million four hundred thousand, received only seven hundred and forty-six dollars' worth of itzibous, others at the same time received different quota. The alternative open to Mr. Keswick and others in such circumstances, consistent with the duty they owed to their employers or constituents and the interests confided to them, was to appeal to you, that a fair proportion should be observed, and not to set aside, as of no authority, a consular notification, and ask for "exaggerated sums." This disposition to treat with open disregard and insult and injunction alike when officially communicated by notification, I have already observed on more than one occasion. But it is for you, in the exercise of the authority with which you are legally invested in the interest of both nations, to punish all whose acts tend to turn such authority into contempt. Offences and misdemeanours have been committed by those who appear to have thought themselves safe in only disregarding the consular notifications issued by competent authority for their governance; but the Queen's Order in Council gives ample power to deal with such persons, and authority not only to punish by fine and imprisonment, but to send out of the country, those who are incorrigible.

Mr. Alcock, in conclusion, trusts that every effort will be made to allay the irritation and alarm of the Japanese Government at the shipment of their gold currency, and believes that it was this, even more than religious quarrels and encroachments, which led to the total expulsion of the Spanish and Portuguese, and the long isolation of Japan from western nations. Some of the gentlemen whose names are mentioned in this despatch have written to the *North China Herald*, stating that they feel satisfied that Mr. Alcock had been misinformed of the facts of the case. Our readers must bear in mind that these transactions originated in Kanagawa, while Mr. Alcock is resident at Yedo.

The applications to the Japanese Treasury for itzibous, by

the following published account, confirm the statement given by our Paris correspondent in our last. On 2nd Nov. Thomas Latham and others applied for exchange to the extent of one sextillion, two hundred quintillions, six hundred and sixty-six quadrillions, seven hundred and seventy-eight trillions, two hundred and forty-four billions, six hundred and one millions, sixty-six thousand, nine hundred and fifty-three; the names of friends being designated as Snooks, Jack Ketch, &c.—Rather unbusiness-like this!

CHINA.

PEKIN.

We can find no confirmation in any of the papers arrived by this mail of the rumour received by telegram, to the effect that 100,000 Tartar troops were concentrated around Peking. We are at a loss to know how this telegram originated, and must leave our readers to draw their own conclusions, although it is somewhat *significant* that it should have been published in time for the debates on the China question. It will be observed, however, that our Ningpo correspondent mentions the same rumour; still it is far too obscure to be made the subject of a telegram, thus giving it great authentic import. The public, after this and several previous cases, such as the blockade of the Peiho, must be chary of "Chinese telegrams," both political and commercial, the exchanges on a late occasion being in error 2d. per dollar.

The Peking Gazettes from the 11th to the 23rd Nov. possess but very little interest. Shingpaie recommends numerous officers to the favourable notice of the Emperor, and Kiling, the late Governor of Kiang Si, and who is about to move to the Governorship of Kwang-tung, prays that the whole provincial establishment may be rewarded for their restoration of order in August last (when the rebels were expelled from the province).

The Emperor is requested to allow the imposition of a duty on trade in the Kharashae country. Said duty to be 3 per cent. on the value of cattle, &c., and one large cash of a coinage called the pu'-rh, and equal in value to ten ordinary cash, per catty of cotton and tobacco-leaf. Raw silk and piece goods to pay 600 pu'-rh cash transit duty per picul, and sundries from Peking and Canton, 150 pu'-rh cash per picul. The pu'-rh are a pure copper cash, coined at Aksu, one of the Mahomedan colonies, for the use of which alone are they issued. They are counted in tanggo, (hundreds, Manchu), and strings (ch'uan) of ten tanggo each. The tanggo should be worth a tael silver. The city ditch of Peking is being widened and deepened, but as yet on the north side of the city only.

CANTON.

The excavations for many of the houses about to be built are nearly completed, but there still appears to be some uncertainty as to the limits of the factories.

A fire has taken place in the Commissioners' Yamen, which has destroyed a great part of it. A new Hoppo has been appointed; and the Customs Service, after having to undo two or three false steps, seems to be settling quietly down as a settled and important institution.

NINGPO.

A correspondent writes:—"All remains quiet here. The rumours of war seem to be regarded with great indifference by the Chinese. The general feeling among them seems to be, 'If the foreign soldiers do not attack this city, we care not a fig what they do at the north.'

"The only derangement occasioned here by the prospect of war with the allies, that has come to my knowledge, is a difficulty to procure sailors to man the junks, about to proceed to Tientsin with the customary revenue of rice. The men are so afraid of falling into the hands of the 'red-haired soldiers,' that they can hardly be prevailed upon to go at about double the usual wages. The Grand Canal, formerly the usual route for the Imperial rice, has been for a few years blocked up by the rebels, and is so out of repair, it is said, as to be unfit for use, so that the rice must go by sea, or not at all. Intelligent Chinese express the opinion that the seizure of the revenue rice would be about the most serious thing that could occur to the Emperor, and calculated soonest to bring him to terms. The Emperor is poor; according to recent Peking gazettes, he is obliged to practise the utmost economy. The selling of titles and offices still continues. Recently the Emperor rewarded the donor of two thousand taels with a red coral button, thus conferring upon him the title of a civilian of the second rank. Notwithstanding the embarrassed condition of the Go-

vernment, the general feeling at Pekin, as gathered by the American Minister and suite during their brief stay there, is that of security and invincibility. The Manchus and Mongolians have yet to learn the power of western nations, and the great superiority of their arms and military discipline and prowess. Even the Chinese of this port, though taught some very severe lessons in their former war with England, express the opinion that the capital is invincible. They seem to found their opinion chiefly upon the following reported facts:—That the Emperor has at the capital more than 'ten myriads' (100,000) of disciplined soldiers; that he is preparing strategic engines of destruction, and improving to the utmost his means of defence. Recently pirates have much annoyed the small Chinese craft in the vicinity of the Chusan group of islands. A few days since a boat, loaded with Government rice for the soldiers at Chusan, was taken. The leaders of these piracies are Cantonese, belonging to a small fleet of pirates who were bought off by the Ningpo officials for their own safety. On their recommendation, the whole force was taken into the service of Government, and the leader made a military mandarin at Chinhai, which is situated at the mouth of the river off Ningpo. Those of the band who are not out pirating are at Ningpo, spending their time in gambling, and smoking opium, and at brothels. This is a specimen of the contemptibly weak and abominably corrupt state of the Chinese Government."

SHANGHAI.

His Excellency Mr. Bruce is still at this place, but there is nothing public to indicate his occupation or intentions. As he would shortly be in possession of the news from Her Majesty's Government, we may expect the next mails to bring some signs of his intended action.

A Chinese paper is in circulation, prophesying great calamity to China: whether it is to proceed from rebels or foreigners is not quite plain. The mystic characters chosen are from the most ancient of the classics.

The *taoutai*, finding that the charitable institution usually charged with the distribution of warm clothing is not issuing any this winter, has desired that it shall be supplied, at his expense, to any pauper who gives in his name, age, and residence to the institution aforesaid. This establishment is called the Tung Jin Pu Yuen T'ang, the Hall of Common Charity applied to keep up life; but its issues of clothing are limited to every third year in the cycle.

It is rumoured that the Roman Catholic Missionaries have been interdicted from travelling in the interior in disguise.

Portion of the cargo of the Spirit of the Age, from London, was transhipped at Batavia on that vessel being condemned, and has arrived here.

Dr. Williams has delivered a lecture at the Royal Asiatic Society on the present state of affairs, including a "Narrative of the American Embassy to Pekin." It appears that the American Treaty had no stipulation that it should be exchanged at Pekin. The town of Pehatang, at which the American Commissioners procured the ratification of the treaty, derives its name from the river which flows north of it, a stream in size and appearance similar to the Peiho, or White River. It lies on the coast, five or six miles above Taku, in the eastern circuit of the metropolitan prefecture of Shuntien, and in the district of Ningho, a town about twenty miles up the river. Judging from the scores of junks at its jetties, and the docks for building them, it possesses a large trade. The population is reckoned to be over 30,000, including the people of a few hamlets thereabouts. They mostly dwell in houses made of the soil, a tenacious mud that needs to be strengthened with millet stalks when made into walls. Whether from the saltiness of the soil, or other causes, almost no grass or grain, trees, or anything green, are seen near the place.

In concluding his narrative, Dr. Williams makes the following temperate and judicious remarks:—"The reception of the embassy was courteous, rather than cordial or open; while all the antecedents of its visit might, in the minds of some persons, have justified the Chinese Government in granting it no more than a mere entry to its capital for specified purposes in a manner previously stipulated. After starting on his mission, the Minister committed himself entirely to the authorities, and they treated him in a manner to prove that some degree of confidence may be placed in them, and that they designed to carry out that part of the treaty of Tientsin which related to the visit to their capital.

"While I am ready to concede that many of the objectionable points in Chinese policy will be maintained by the rulers until

a stronger power adds force to arguments drawn from reason and humanity to induce them to alter their proceedings, there are, I think, others which are better left to the gradual advance of knowledge and intercourse between foreigners and natives. To have this Government upheld by the people, its authority must be consonant to their views, and as these change its policy will correspond; but to force the Government to act against its supposed best interest will surely produce reaction. The treaties of Tientsin were all distasteful to national pride, and jeopardised, in the opinion of many loyal subjects, the vital interests of the empire. But, with a better understanding, the fears of all classes might reasonably be expected to subside, and even give place to co-operation.

"At present Christendom stands before paganism, in this its last stronghold, in a doubtful position. Ignorance adds untold power to fear in the efforts the latter is making to resist the advancing tide, and we should be careful not to strengthen the worse side. The interests of humanity are not always strong enough to bear up against those of ambition, commerce, or conquest. But in this part of the world, at least, the arguments in favour of a peaceful progress of all the best interests of both natives and foreigners coincide. What seems to be most wanting just now is a better acquaintance with each other's motives, plans, and condition, especially among the influential classes of the empire, who, if they could believe that their own authority was not endangered, would probably be less indisposed to resist changes."

It is evident that Sir John Bowring's idea of the phrase "the Peiho river" being a mistake, is quite a delusion, and that it is called the Pei-ho, or White River, from the colour of its mud-charged waters. The country round Pekin is described as very well cultivated, but the roads, temples, and farmsteads exhibit marks of neglect. The Mission entered Pekin at the gate of the "Morning Sun."

The question of the reduction in the tonnage dues on British vessels under the American treaty still remains in abeyance. The consignees who applied to the British Consul for the privilege to be extended to their ship have not yet received a definite reply.

The second cricket match between the officers of H.M. steamers Sampson and Inflexible has been played, resulting in favour of the former. The first innings they scored 51. Inflexibles then went in and beat them by 16. In the second innings the Sampsons made up their loss, and scored 45 against their adversaries' 24, making them winners on the grand total of 5 runs.

FOO CHOW FOO.

A correspondent at this place says:—"We have as a community been somewhat pleased by the urbanity of the Chinese officials. They have given notice, it appears, that on the Loochoo group an English vessel has been wrecked, and twenty-four shipwrecked seamen cast away. The ship, they say, has gone to pieces, but the foreigners have been rescued, and are now at Napa, provided and cared for by the native authorities. The means through which this intelligence reached the Foo Chow officials was the tribute junk that has just arrived. Being already under way, and some distance from Napa, this junk was unable to bring the distressed men; but an express messenger was sent from the Napa officers on board to instruct the tribute-bearers to advise the Foo Chow mandarins, that the fact be communicated to the British Consul. The name of the ship has not been ascertained, but no doubt it is the Joseph Fletcher.

The Camilla and gunboat Bustard are both out for relaxation of a few days, and on a benevolent trip too. They are gone to rid this part of the coast of pirates, who infest it as a nuisance to native and foreign trade. Information has reached us this morning of the Bustard having been fired into and hit by a fleet of them just outside. This shows the audacity of these vagabonds daring to open fire upon one of her Majesty's vessels. However, the gunboat returned it double-quick, sharp, and strong, and destroyed four of the junks. That was only the day after she left, viz., Dec. 17.

SWATOW.

It will be observed in another place that this port was to be opened on the 1st of January, by the American Consul and by the British Consul, by virtue of the favoured nation clause in the old treaty.

HONG KONG.

So confident were the Chinese themselves that a war must be

the result of the recent proceedings, that the contractors for buildings on this island have refused to enter into any new contracts, on the ground that an Imperial edict will be issued, commanding all Chinese subjects to return to the mainland.

Mr. Green having been compelled, by ill health, to return to England, to the regret of every person in the colony, it became necessary to appoint some other barrister to act as Attorney-General so long as Mr. Adams shall continue Acting Chief Justice. It was assumed by everybody that the appointment would, as a matter of course, be offered, in the first instance, to Mr. Kingsmill, who held it before; but, to the astonishment of the public, it seems that the Governor actually made an offer of it to Dr. Bridges, relative to whom Mr. Anstey has made some extraordinary charges. It is rumoured that this offer did not receive the sanction of the real Attorney-General, Acting Chief Justice Adams.

On Mr. Tarrant's imprisonment, the *Daily Press* says: "It is said that the governor cannot alter the nature of a sentence, and that a man sentenced to the common gaol cannot be put into the debtors' prison. This is pure twaddle, as all the women so sentenced are put into the debtors' prison. The judge has stated, we believe, that he had no idea, when he passed the sentence on Mr. Tarrant, that the common gaol was such a disgraceful place. His honour has interceded for Mr. Tarrant, but in vain. It cannot be denied that a spirit of vindictiveness is displayed which is far from dignified or becoming. He is treated like a felon. It must be remembered that the high crimes and misdemeanours which he brought home to certain members of this administration have never met with even a rebuke from H.M. Government."

A most extraordinary revelation of lawyers' fees has been made in Mr. Tarrant's case. It appears, from a statement published in the *China Mail*, that Mr. Pollard's bill in the case was no less than 1,314 dols., of which was disallowed, on taxation, 322 dols.; while Dr. Bridges' bill was 1841 dols., of which also 501 dols. was disallowed. Amongst the extraordinary items, we find in Dr. Bridges' bill, "Perusing newspapers," 25 dols., though Mr. Pollard appears only to have read one, as his bill states, "Perusing newspaper," 19 dols. Further, in addition of course to the fees, we find such charges as Sunday notices, attendances, instructions, letters, &c.; the total amount disallowed on both these gentlemen's bills being no less than 823 dols. Preserve us from such sharks!

Building is rapidly increasing. Mr. Remedios has built at Pokfoohun a very fine summer retreat. There is a fine carriage road, and the piece of ground attached is being laid out in gardens. The road to the Sanatorium on the peak is being fast proceeded with. In a few days there will be a flagstaff erected on the summit, which will be used to signalise all vessels seen in the offing. Building lots in the vicinity have been advertised for sale, and will shortly be sold by auction. Round the high road they are also building magnificent houses. The water-works are being very much improved, and the granite dock, at Aberdeen, noticed in a previous issue, is almost finished. Evening amusements are rising up; there is a performance at the Hippodrome, which is crowded every evening, some of the troupe having come from Astley's; this is quite a new feature here. Theatrical performances are also very frequent.

The coolie slave trade is proceeding on a larger scale than ever. The scheme for sending free coolies to Demerara may be very good *per se*, but its effects are likely to be attended with most pernicious consequences, for, whilst the Chinese authorities were induced to legalise emigration under its provisions, the French and Spanish have moved for and obtained the same privilege on the strength of specious promises which are never meant to be carried out. As these will both pay and promise more than those charged with the British emigration scheme—or in other words are quite regardless as to what they pay or promise—a great impetus is given to the slave trade, which is thus denuded of the odium of kidnapping. Only one ship (the *Whirlwind*, with 336 males, 66 females, and 13 children) has yet sailed for British Guiana, but two more are likely to follow soon. Owing to the scarcity of rice and consequent distress in the country, no doubt coolies in abundance can be obtained for a very moderate inducement.

A fire broke out on the 29th of December, in the packhouse of Messrs. Encarnacao and Co., at the end of Endicott's Lane. The P. & O. Co.'s engine and the police engines being quickly on the spot, the fire was extinguished before the adjoining buildings were communicated with. A great many bales of cotton were

consumed. The fire is supposed to have originated from the spontaneous combustion of the cotton.

The libel case noticed in our last of Mr. Lobscheid against the *Daily Press*, has been compromised by an ample retracation and apology.

Some most exquisitely wrought Japan ware has lately been brought to this colony and sold at auction at extreme rates. It is far superior to anything of the kind ever brought here before, and seems to be procurable at Kanagawa, doubtless from Yedo.

At a meeting of the Legislative Council on the 16th of December—Present, H. E. the Governor, the Acting Chief Justice, the Colonial Secretary, the Colonial Treasurer, the Auditor-General, Messrs. Jardine, Dent, and Lyal—Mr. Kingsmill was sworn in as Acting Attorney-General, and took his seat accordingly. The Governor submitted an ordinance for regulating hospital accommodation and other arrangements on board Chinese passenger ships; also, one for the deportation of mendicants.

COCHIN CHINA.

SAIGON.

By the French war steamer *Phlegeton*, arrived at Singapore, accounts have been received from Saigon. Admiral Page had arrived with several vessels, French and Spanish, containing troops of both nations, for the purpose of extending the French possessions at Saigon. It is to be hoped that this important commercial place will be opened shortly for the commerce of all nations. The sanitary state of the troops at Saigon was good; at Touron the health of the force was improving.

JAVA.

The second expedition sent by the Dutch Government to operate against Boni has, apparently, rapidly and effectually accomplished what the first expedition failed to do. The resolution of the Bugis appears at last to have fairly given way, and after making a brave stand at Boni, they abandoned, without a struggle, Pasempa, which is described as being almost impregnable. The following are the details as furnished by the *Batavia* papers:—On the 10th November a sufficient number of vessels had arrived at the rendezvous at Bulekomba, to permit a commencement of the campaign to be made at Sinjai, and the sailing vessels, therefore, proceeded there, in tow of the steamers, while a column, consisting of three companies of infantry, a section of the three-pounder mountain battery, two mortars, twenty-one sappers, twenty-seven cavalry, and a field ambulance, all under the command of Major Staring, was directed to march overland. To this column were also attached Aru Palakka, with about 200 followers, and the auxiliary troops of Bonthion and Bulekomba, about 500 in number. These auxiliaries were led by the Assistant-Resident, Mr. Bakkers. All the troops having been disembarked on the 3rd at Bajoa, on the 6th they marched in three divisions in the direction of Boni. No opposition was encountered until they arrived in front of that place, when the Bugis opened a sharp fire from the different works they had thrown up, which was returned by the Dutch artillery, and under cover of this the place was assailed in different quarters and the enemy driven out. In this affair the 4th battalion had 3 killed and 17 wounded. Amongst the latter were Major Kroesen, who was wounded in the breast and right arm, but not dangerously, and Lieut. Royen, who received two wounds, one in the right shoulder, and the other in the right arm. The cavalry had 1 trooper killed and 3 wounded. Lieut. Koenen received a wound in the right side. After the wounded had been attended to, and the total disappearance of the enemy ascertained, the march was resumed towards Palakka, which was reached about two o'clock in the afternoon. A heavy gull of rain, which lasted about two hours, proved a source of great discomfort to the troops, and it was not until next day that they could all be got under cover and provided with sufficient rations. A reconnaissance was made in the direction of Pasempa, and preparations commenced for attacking the enemy. After about a quarter of an hour's sharp engagement, the Bugis forsook their entrenchments, and tried to retire upon Pasempa, but in this they were frustrated by the cavalry, which intercepted them, and inflicted considerable slaughter, the Bugis refusing to throw down their arms and receive quarter. The great body of the enemy, finding their retreat cut off, returned to the campong, and, covered by the jungle, proceeded northwards in the direction of Chirana. Informed by fugitives of the previous defeats of her forces, and rightly judging that on Pasempa being taken she

would fall into the hands of the Dutch, the Queen quitted that place in the greatest haste. So great had been her panic, that at a short distance from her house her palanquin was found, which she had abandoned to mount on horseback.

MALACCA STRAITS.

SINGAPORE.

The branch telegraph from Mintok to Palembang has been laid without accident, and Singapore is now in communication with the important islands of Java and Sumatra. The line hence to Batavia has not yet been opened to the public, but the whole will be handed over by the contractors to the Dutch Government within a few days, and we may then hope to be able to pass private messages.

Mr. T. Neubronner, senr., has been appointed to act as Assistant to the Resident Councilor, Police Magistrate, and Coroner at Malacca, as *locum tenens* for Lieut. F. L. Playfair, leaving on medical certificate. Mr. T. Neubronner's duties as Deputy Sheriff will, in the mean time, be discharged by Mr. J. Neubronner.

The Dutch Mail steamer from Batavia was compelled to anchor in Rho Straits, in consequence of the breaking of her piston. On information of the accident the steamer Hooghly was at once despatched to render assistance, and both vessels have arrived. The overland passengers and mails for Java, of the 26th Nov., were detained in consequence. The steamer Sir James Brooke was offered, but the Dutch Government replied by telegraph that the cost was too great. The Dutch steamer was to be ready to proceed by the 16th of January.

The Agri-horticultural Society have resolved to throw the gardens open free to the general public on Tuesday, Thursday, and Saturday in each week; whilst strangers, arriving from distant places, will be allowed to visit the gardens at any time. In addition to donations of 25 dollars and monthly subscriptions, His Honour the Governor and other gentlemen have subscribed additional sums of money for annual prizes.

The horses in the settlement are suffering from glanders. About twelve months ago no less than one thousand horses and ponies died of this disease.

The Governor has decided that the police force appointments shall be open to members of the uncovenanted service.

The Governor is about to proceed for a short residence on the hills of Penang.

PENANG.

Besides the steam saw mill which Messrs. Tyler and Purse have erected, they intend to add rice and flour mills. These, when set going, will be found useful to the shipping, as well as to the inhabitants of the place, and will help to draw more trade to the port.

The death of an aged veteran, Cpt. J. Cross, aged 83, has been reported.

Our Own Correspondents.

FRANCE.

PARIS, 11th Feb. 1860.]

THE EXPEDITION TO CHINA.

The French Government has, in consideration of the importance of the naval force included in the expedition to China, determined to send out a Vice-Admiral to take the command, and the choice has fallen on Vice-Admiral Charner, who goes out by the next overland mail. This officer has been in China before, and commanded the French squadron in the Black Sea during the Crimean war. Rear-Admiral Page will, it is said, remain in Cochin China. It is said that the number of French vessels of war in the Chinese seas will amount to sixty when the transports with the gunboats have arrived there. The steam despatch-boat Forbin was at the Cape on the 3rd December, when several English transports were loading horses for India. The following officers have been appointed to command gunboats:—Lieutenants de Saisset, Th. Brosset, Salmon, Bého, Racaud, Jurin, Devarames, James, Peyron, and Dol.

The gunboats themselves are made in fifteen separate pieces; one of them has been put together in the dockyard basin at Toulon. It is said that the three English steam transports, which are to carry out the gunboats, will positively be employed afterwards in the establishment of a regular service between Suez and China; so it seems probable that the proposed French mail will be commenced before long, thus putting Europe in connection with China three if not four times a month. Until further orders, all the dispatches addressed to the French expedition in China are to be sent to Hong Kong. The charge on letters for soldiers or sailors is 30 centimes the 1 oz.

I have just heard that Vice-Admiral Charner has appointed for the chief of his staff Capt. Laffon de Lébat; Capt. Lecourian-Duquilio, and Lieut. Jaurès, as his aides-de-camp. There will be two general officers under his orders, — Rear-Admiral Page, now in China, and Rear-Admiral Protet, who left here lately. The naval division of Indo-China will consist of one ship of the line, two steam frigates, five sailing frigates, a sailing corvette, the *Capricieuse* which carries the flag of Capt. d'Aboville, military commandant of Canton; 3 steam corvettes, 5 steam dispatch boats, 24 of which are of iron, and a number of transports, pontoons, and flat-bottomed boats for the navigation of rivers, making together about 65 vessels of war. Vice-Admiral Charner will proceed by the next overland boat from Marseilles. He will hoist his flag on board the *Renommé*, which left Brest for Canton late in November last.

Captains Lefraper, Langavant, and Libaudière, of the French navy, have been appointed to the command of the three steamers, the *European*, the *Weser*, and the *Japan*, which the Government recently purchased in England to serve as transports to China. It was supposed that each of these vessels could have carried out six of the gunboats which take to pieces, together with the officers and crews belonging to them; but it has been found that four boats and their respective crews will be quite enough to fill each steamer, and accordingly the French Government has chartered some merchant vessels to carry out the remainder of the gunboats and crews.

COCHIN CHINA.

The bulletin of the attack and capture of the north-east fort of Tournon, on the Hué road, in Cochin China, signed by Col. Bernarda Ruiz de Lanzarote, and dated the 19th Nov., 1859, has been published in the *Gazette de Madrid*. In consequence of a council of war held on board the *Némésis*, on the 17th Nov., the *Marne* took on board 400 French and 200 Spaniards, forming the reserve under Col. Reibaut. The colonel who signs the bulletin embarked on the *Don Jorge Juan*, with 200

chasseurs. On the 18th the *Némésis*, towed by the steamer *Regent*, was put in motion. All the vessels were at their posts—the *Némésis* frigate, the steamers *Regent*, *Phlégéton*, *Jorge-Juan*, the *Marne*, and the gunboats *Avalanche* and *Alarme*. The enemy opened fire from the under north-west battery. The *Némésis* and other vessels replied. After half an hour's firing the enemy was silenced. The admiral then gave orders for landing, and M. Despalier, with 200 men, attacked the under battery, while the Spanish colonel, with his companies, directed his attack against the north-west battery. The enemy abandoned their guns as soon as the attacking party had climbed 300 feet of the height which dominates the fortress. They were pursued, but took refuge in a wood. In the fortress were five 32-pounders, a quantity of gunpowder, lances, and sabres. The under battery was defended by two bronze 16-pounders, two other smaller pieces, and the piece which had opened fire. There was found a quantity of ammunition and many muskets. The occupation of this point intercepts the communications between the capital and the Cochin Chinese forces. These advantages cost the allies dear. The commander of the artillery, M. Deroulède, was killed by a bullet on board the *Némésis*; another officer was killed, and several persons wounded. Two hundred French are in position to guard the pagoda and lower battery.

Last October twelvemonth the silk-growers of Lombardy, alarmed by the *épizootie* which destroyed the worm, organised an expedition to China to collect eggs exempt from malady. Some three months ago the arrival at Kouang-Tcheou was announced of Count Castellani, one of the chiefs of this expedition, to which the French Society of Acclimation had contributed assistance. The traveller has now returned, and can furnish for the crop of 1860 regenerated eggs to the French and Italian subscribers. Thanks to the assistance rendered him by the French and English Governments, Count Castellani was able to penetrate into the interior of China, and to practise on a large scale the preparation of the most valuable varieties of eggs. With the aid of the Chinese Catholics he was initiated into all the secrets of the Chinese sericulture, which is never known to be attacked by the malady. Having completed his studies and observations by a voyage to Japan, Count Castellani returned to Europe, having divided and sent the 108 cases of eggs by three different routes—36 by way of North America, the same number by way of California, and the same by Suez. The latter 36 cases were accompanied by the Count himself, in order that he might give them all his care on account of the high temperature of the countries through which they had to pass. All went well as far as Suez; but, in spite of all he could do, the Egyptian officials left the cases exposed four days to the sun, by which great loss was caused. Count Castellani is at this moment at Cairo, claiming indemnity for the same. The remaining 62 cases, which have arrived safely in Italy, will more than supply the quantity subscribed for in advance.

A pamphlet has appeared on the subject of the Belgian expedition to China, which we noticed in our last. The semi-official tone of the pamphlet betrays high patronage. It proposes that the Belgian expeditionary force should be placed under the orders of the command-in-chief of the Anglo-French forces. Having taken part in the war, Belgium would be entitled to a share of the same advantages that might accrue to the English and French in the war-indemnity imposed upon the Chinese, and one of the islands at the mouth of the Yang-tze-Kiang ought to be given to Belgium for establishing a colony. The Belgian writer settles the whole affair as if the campaign was already terminated in the most amusing manner.

RUSSIA.

ST. PETERSBURG, February 5.

Some time ago unpleasant rumours of the hostile feeling of the Chinese towards the Russians were in circulation here, and created such alarm that the official journals were ordered to contradict them. It now appears, however, that, though perhaps exaggerated, there was some foundation for these reports. I have seen a letter from Kiachta, in which the writer says he has received accounts from China stating that since their victory at the mouth of the Peiho, the Chinese have greatly altered their tone, and affect to treat with supercilious contempt all foreign barbarians, and try continually to pick a quarrel with even the Russians, whom they had hitherto treated with civility and respect. It says further, that the Chinese cannot be brought to understand the Russian character, or the peaceful intentions of their powerful neighbours. They have no idea of the immense military forces at the command of the emperor, and fancy that Russia only exists upon sufferance, and because China has hitherto graciously abstained from declaring war.

The letter lays great stress on the very precarious state in which China is at this moment placed, as the insurgents are moving towards Peking, and the Anglo-French expedition is looming at the distance of a few short months. "What will become of China," says the writer, "if the insurgents at home unite with the foreign allies, and make a joint attack on Peking? There will be no other course left then but for the court to retire to their own original home in Manchuria."

From Nicolajefsk, on the Amoor, the arrival of four Russian ships of war is reported. On the 30th of September (12th of October), the *Oxus*, from London direct, arrived in De Castries' Bay with a valuable cargo. A Hamburg barque with American goods on board had also arrived at Nicolajefsk. The Amoor Company's transport *St. Theodosius* was preparing to sail for Kamtschatka, to load furs for Japan, with which latter country the Company intend to trade on a large scale. Several English and Belgian engineers and mechanics had arrived out by the above vessels, as well as fifteen Russian fishermen from Archangel, and several other persons engaged by the Company in different capacities.

In a scientific point of view, the late cruise of the Russian ships of war in the Japan seas has been attended with some successful results; for in the beautiful bay of Corea they discovered three large islands not to be found on any existing charts, and named them America, Nachodka, and Voyvoda respectively. America Island lies at the furthest end of the island of Chu-sim, in the Gulf of Corea. The geographical position of Nachodka is laid down as in 42° 45' N. lat., and 133° 2' 30' E. long. from Greenwich; whilst Voyvoda, with very dangerous reefs surrounding its approaches, is given as lying in 42° 14' 30" N. lat., and 137° 17' East of Greenwich.

Dispatches have been received here by the Government from Count Murawieff, in which he confesses the intention he entertained to bombard the Japanese town of Jokshama as a signal revenge for the murder of the Russian officer, but states that he refrained from doing so at the instance of Captain Unkofsky, the commander of the frigate *Askold*, as the Japanese authorities expressed the greatest concern for the unpremeditated act, and their perfect willingness to punish the offenders. He adds that the Japanese Government have further promised to build a chapel for the Russians, and keep it always in repair at their own expense. I am not aware of any similar concession being made to any other Christian nation.

The Minister of Finances is busily occupied with the tea question, which, as I learn from good authority, will be very shortly settled, and that too in a most liberal spirit. If the Czar does not yet go so far as the Emperor of the French in adopting the principle of free trade generally, he will probably as much astonish the world by deviating in this case from the hereditary policy of Russia. The tea trade has been hitherto, as most of your readers are aware, little better than a monopoly carried on by a few wealthy houses at Kiachta, in Siberia, on the Chinese frontier, the importation by sea being totally prohibited, and that by land restricted to the above town. This fully accounts for the very high price of tea in Russia; for, besides the import duty, which amounts to nearly 100 per cent., the enormous expense of land carriage for several thousand miles, and the profit of the numerous dealers through whose hands it passes, tend to swell the price to the consumer. Common tea, which fetches not more than 15 to 25 copecks per Russian lb. of about 14 oz. (or 6d. to 10d. per lb.), costs at St. Petersburg 2½ to 3 roubles (or from 8s. 4d. to 10s. per lb.). The above-mentioned high protective duty naturally opens a wide door for smuggling across the frontiers, which in that distant and thinly-populated region is by no means difficult. And indeed there can be no doubt that it is carried on to an extent scarcely to be credited; and I am enabled to state, on the authority of a high official functionary in the Finance Department, that this demoralising traffic, by which the Government are the chief losers by the non-payment of duty, is fully equal to the quantity of tea imported in a legitimate manner. The wonder is, why this state of things should have been permitted to exist so long, the Government being perfectly aware of it; and it is therefore not surprising to learn that the system will now be abandoned, and the importation of tea opened up to public competition by sea and by land. For some time past a commission has been patiently examining the whole question, and going through a most voluminous mass of evidence in detail. This commission has at length completed its labours, and sent in a report to the Finance Department. The exact nature of the proposed measures contained in this report has not

publicly transpired, but I have good reason to believe I am warranted in preparing your readers for a most wonderful change in the system, which may be expressed in a few words, and summed up as follows: a moderate duty on tea, and permission to import it by sea and by land into any port of the empire, and by any part of the frontiers.

The *Abeille du Nord*, of St. Petersburg, publishes the following:—"What can European nations want in China but security and liberty of commerce in the seaports? It is there that the power of European nations can be sensibly felt without being exposed to considerable losses in men and money. Would it not be better, instead of treating directly with an impotent Government, to make arrangements with the local authorities? Let the *Pekin Gazette* occupy itself with chimerical attacks on Europeans, your honour will not suffer. The principal object is to convince the Mandarins in the provinces on the sea coast that an exemplary chastisement awaits them every time a Chinaman shall commit a crime, or even an offence, against a European. The population in the interior laugh at the idea of an invasion of their provinces. In our opinion, it would not be bad policy to accept the Emperor of China's apology for the lamentable incident of the Peiho. In this manner a campaign in the interior of the Celestial Empire might be avoided. At all events, after having obtained satisfaction in one way or another, it will become necessary to revise the treaty of Tientsin, and substitute clauses favourable to commerce, in place of those which are insulting to the Chinese, and cannot be executed. Any other arrangement will lead to permanent collisions most injurious to trade."

HOLLAND.

AMSTERDAM, February 10.

In consideration of the difficulties to which the trade of this country with Japan is exposed, and the unpleasant position in which the Dutch subjects residing in that empire are placed, the merchants of Amsterdam, Rotterdam, Dordrecht, and Middelburg have drawn up and signed a memorial, and forwarded it to the Minister for the Colonies. In this document the memorialists acknowledge with gratitude the favourable commencement of their trade with Japan, and pay a high compliment to the Dutch Government for the wisdom and statesmanlike conduct they displayed in gradually breaking down the barriers which stood in the way, and inducing the Japanese to make concessions step by step. But they cannot help calling the attention of the Minister that they are placed at a great disadvantage as compared with the subjects of other foreign Powers, who are always supported and protected by an imposing naval force. Although the petitioners do not entirely agree with this principle of moral coercion, yet it so far coincides with their opinion that the government of every country is bound to afford its merchants just protection in carrying on their lawful trade; and they see with regret that the Dutch man-of-war that was for some time past stationed in the waters of Japan had been withdrawn, by which the lives and property of the Dutch merchants were left without any protection whatever, and exposed to the violence of a semi-barbarous people, in case of any sudden outbreak and conflict. Lastly, they deprecate the system hitherto followed of intrusting the interests of the merchants in Japan to one of their own body, instead of appointing an influential and independent diplomatist to that important office. They conclude by requesting the Minister to take the subject into his serious consideration, and hope he will take immediate steps to station a ship of war permanently either at Nagasaki, Kanagawa, or Jeddo, and appoint a representative of the King to further the interests of the mercantile community without himself belonging to it.

The ravages lately made by the so-called pile-worm at Nieuwendam have undermined the foundations of so many buildings, and to such an extent, that a number of houses have literally fallen in, and their ruins so encumber the entrance to the harbour that all navigation in that busy port with its industrious fishing population is for the present suspended. This little worm attacks in myriads the piles on which all the houses in Holland are built, consuming them with a rapacity and quickness second only to the ravages of the white ants in India. They seem to appear periodically. Some years ago quite a panic was caused in this city by the sudden ravages of this little insect, fears being entertained for the immediate and irreparable destruction of the whole city, as every building in this swampy locality is constructed on an artificial foundation of wooden piles driven into the mud. Under the Hotel de Ville alone there are no less than 80,000 such piles. It was with reference to this mode of building that the learned Erasmus, on his arrival at Amsterdam, facetiously wrote to a friend that "he had arrived at a city where the inhabitants lived like crows on the tops of trees."

The revenue of the Kingdom of the Netherlands for 1860,

contained in the Budget for the financial year, presented to the States-General by the King's order, is composed as follows:—

	Florins	cents.
Direct taxes.....	20,052,987	89½
Customs	4,409,409	00
Excise	17,964,757	44
Registrations, legacy duty, &c.	11,980,191	03½
Certificates of nationality on gold and silver articles.....	233,247	74
Post-office	1,853,110	05½
Lottery.....	401,542	00
Total.....	56,895,245	16½

APPOINTMENTS, PROMOTIONS, AND RESIGNATIONS.

The King has been pleased to accept the resignation of the Baron de Kock, Vice-President of the Supreme Council in India, who retires from the civil service 30th June next, with most honourable certificate and a pension for life.

Mr. A. Prins, hitherto member of the Supreme Council in India, is promoted to be Vice-President of the same from the 1st July next, vice Baron de Kock, resigned.

Mr. H. C. van der Wyk, hitherto Resident of Soerabaya, to be member of the Supreme Council in India, vice Prins, promoted to be Vice-President.

Mr. T. H. van Rees to be member of the Court of Justice at Batavia.

Mr. L. Hovy to be President of the Court of Justice at Amboyna.

Mr. W. Jonas to be member of the Court of Justice at Macassar.

The following officers of the East India Civil Service have received two years' leave of absence for the benefit of their health:—Messrs. W. E. van der Hout, J. van Ooyen, J. F. Lange, K. Graafland, J. S. van Coevorden, and J. Nettekoven.

In my letter of October 7 last (see *China Express*, No. 22), I mentioned that a detachment of colonial troops had been sent from this country by the Wassenaer, Dutch frigate, to Lisbon, where they were transferred to the chartered transport Alcor for further passage to Java. By the overland mail, accounts have been received of the safe arrival of the Alcor at Batavia on the 3rd December, and the troops—124 men, under the command of Captain van Harreveldt—immediately proceeded to the garrison dépôt at Weltevreden. During the voyage one of the men was washed overboard in a gale off the Cape of Good Hope.

The Dutch East India Company have issued a notice that their first periodical coffee sale will be held on the 21st March, at Rotterdam, and promise to sell no other Java and Samatra coffee, except damaged parcels, till their usual sale in the autumn. In the March sale the quantity to be offered for public competition will consist of 331,154 bags, and the samples will be ready for inspection on the 24th February.

LECTURE ON JAPAN BY DR. MACGOWAN.—SOCIETY OF ARTS.—At a meeting of this society, held on the 1st instant, Sir Thomas Phillips, Chairman of Council, in the chair, Dr. Macgowan delivered his first lecture in London on Japan. The Doctor, after a brief glance at the volcanic origin of the islands, proceeded at once to the precious metals and their relative value, upon which he gave much valuable information. From his statement gold is most abundant, being, indeed, in its relative value to silver, as 1 to 5, instead of as 1 to 15, as it is in Europe. Silver is not plentiful; but copper, which is a government monopoly, is particularly abundant; numerous articles, even their gutters and house-shutters, are made of it, and they are most ingenious in blending it with other metals. There is scarcely any iron in Japan, and their cutlery, consequently, is poor and coarse. Their swords, however, are of admirable workmanship and temper. The learned Doctor said that these swords are scrupulously preserved in the family, and carefully handed down from generation to generation; in fact, they are quite historical, and regarded in the same light as we look upon our old castles and abbeys. There are mines of antimony, tin, lead, and mercury. Sulphur is plentiful, and coal may be had in great abundance, but, owing to the want of good machinery, is at present procured with difficulty. Japan affords to the botanist a wide field of discovery, the forests in the ravines being as yet unexplored. Their paper manufacture is most extensive; numerous articles are made of this, that western nations could scarcely credit; not only pocket handkerchiefs, umbrellas, &c., but overcoats are made of it, and these are quite impervious to the rain. Velvet, satin, gauze, and silk are produced there, the latter being 50 per cent. cheaper than in China; their maps, also, are admirable, and wonderfully cheap, being about a farthing each. All these topics were illustrated by a large and very interesting collection of the products of the country, consisting of arms and other works in metal, ceramic ware, silks, and woven fabrics, as well as specimens of raw produce of various kinds. The Doctor concided his lecture with a brief sketch of the people, whom he described as sensual, and decidedly not sober. The population he estimated at 30,000,000, and expressed his earnest hope that the opium traffic would not be extended to this the perhaps most interesting country in the East. The proceedings terminated with a most cordial vote of thanks to the lecturer. We are glad to find that Dr. Macgowan purposes giving a course of similar lectures in London.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA DEBATE.—On the 13th inst., Mr. B. COCHRANE brought forward his notice of our relations with China, and argued that our first differences were attributable to Lord Elgin demanding the right of a British resident minister at Peking, and the subsequent acts of our ambassador in forcing the passage of the Peiho.—Admiral Sir M. SEYMOUR offered some remarks on the origin of our troubles at Canton with the *Opium Arrow*; he observed that if hostilities were carried up to Peking, we should find, as at Canton, no one to negotiate with, and recommended great moderation towards the crumbling Chinese Government. He referred to the disagreement between him and Lord Elgin, and complained of certain despatches written by his lordship to the Government, in which he had strongly declaimed against his official conduct. The gallant admiral also noticed these matters having been brought forward by Mr. Oliphant, in his late work on Lord Elgin's mission, with a view of poisoning the public mind. He moved for the production of the following papers, and throughout his speech was most attentively listened to. Sir Michael moved for copies of the letters of the Earl of Elgin, the Secretary of the Admiralty, and Foreign Secretary on the questions alluded to.

On the following day Mr. Oliphant wrote to the *Times* as follows:—

"The 'whole story' is to be found in certain unpublished documents, containing an account of Sir Michael Seymour's proceedings, reflecting so little credit upon the conduct of that officer, that, so far from seeking to 'poison the public mind' against him, I carefully abstained from referring to them. As, however, he has now seen fit to make so grave a charge against me, I shall cause the whole of the suppressed papers to be moved for in the House of Commons, a few of which, I see, only are included in the motion of Sir Michael Seymour for to-night, in order that the public may have an opportunity of judging for themselves how far this charge is justified."

The *Times*, in noticing Sir Michael's speech, condemned his discretion for bringing forward the squabbles which should have been allowed to sink in the muddy waters of the Peiho. Now, this is rather hitting the wrong man; the real offender is the one who first brought them before the English public, in a work of such notoriety as Mr. Oliphant's narrative of Lord Elgin's mission. The gallant admiral could not allow it to pass unnoticed, and very properly used his privilege as an M.P. in giving equal publicity to his side of the case. It will be remembered, however, that when intelligence reached this country in July, 1858, the *Times* condemned the admiral's conduct most roundly, alleging that the French were waiting for him to "move on," &c. It was subsequently demonstrated, however, that the reverse was the case; and Mr. Oliphant, in a late speech, narrated how our officers helped the French boats out of the mud, &c. A correspondent of the *Manchester Guardian* quoted the French admiral's words to one of his officers:—"Why, sir, the Cormorant had silenced the fort before you got abreast of it."

LORD JOHN RUSSELL proceeded to justify Mr. Bruce for acting in accordance with his instructions, and stated that after the arrival of the next (present) mail he should be prepared to state the course intended by Government.—LORD PALMERSTON and SIR JOHN PEARSON hoped the House would be satisfied with this statement, and defer the discussion, which was agreed to, after some remarks from Sir De Lacy Evans, Sir C. Napier, Sir J. Elphinstone, Admiral Walcott, and Lord C. Paget.

In the House of Lords, on the 14th, Lord MALMESBURY said he could not assent to the assertion of Lord John Russell that Mr. Bruce had followed exactly his instructions, and on the 21st he will explain his interpretations.—On the 16th, Mr. C. BRUCE moved for the correspondence between the Earl of Elgin, Lord Malmesbury, and the Earl of Clarendon.

THE DEMANDS UPON CHINA.—MR. SEYMOUR FITZGERALD inquired of the Secretary of State for Foreign Affairs whether any convention had been entered into between her Majesty's Government and the Government of the Emperor of the French with reference to the demands to be made by both Governments on that of China.—LORD J. RUSSELL said there was no such convention as that to which the hon. member alluded, but only the ordinary understanding subsisting between Powers so engaged.

PETITIONS (CHINA).—By Mr. H. Berkeley, from Bristol; Mr. Hadfield, from Sheffield; Mr. Baines, from Leeds; Mr. Beecroft, also from Leeds; Mr. Salt, from Bradford, and Lord Grey, in the House of Lords, from Newcastle, praying the House to adopt some means to avert the impending hostilities with China.

NOTICES OF MOTION (CHINA).—MR. LINDSAY moved for a select committee to inquire into the operation of the burdens and restrictions especially affecting the merchant shipping, and the Chinese Passenger Act (1855). MR. EDWIN JAMES.—Address for copies or extracts of all correspondence or other papers on the following subjects, or any of them:—The resignation of the Justiceship of the Peace for Hong Kong by Mr. Thomas Chisholm Anstey, sent in to the Local Government on the 13th day of May, 1858; his suspension, on the 7th day of August, 1858, from the Attorney-Generalship of the colony of Hong Kong, and from the office of Counsel to the Superintendent of Trade in China; the case of the Queen v. Tarrant, for libel, tried at the November Sessions (1858) of the Hong Kong Supreme Court (criminal side); the charge of alleged complicity of Mr. Caldwell, J.P. and Protector of Chinese at Hong Kong, with Hong Kong pirates; the charges made against the acting Colonial Secretary (Dr. Bridges) with reference to the foregoing subjects, and also the opium farm monopoly; the proceedings against Mr. May, Superintendent of Police at Hong Kong, Mr. Tarrant, Registrar of Deeds there, and the Police-court Interpreter, Tong Akou, and the dismissal of the Police-court Interpreter Asam, for having severally given evidence against the said parties, or any of them; and the imperial regulations (if any) by which the several suspensions or removals beforementioned were authorised.

Spirit of the Press.

THE DEBATES ON CHINA.

THE Chinese correspondence offers a conclusive vindication of the course pursued by Mr. Bruce and Admiral Hope. It unravels the whole web of studied duplicity and persevering hostility practised by the Chinese officials throughout the negotiation for the ratification of the treaty of Tientsin. A strong and numerous war party at Peking had gained the ascendancy in the councils of the emperor; the defeat of the objects of the treaty, and therefore of its ratification, had been predetermined; and the method of defeat was to be such that the British and French governments should, if possible, be precluded from viewing it as a *casus belli* on the Emperor of China. From the instructions given by the Chinese commissioners to the British envoy to sail for the Peiho, and, after anchoring his vessels of war outside the bar of the river, to proceed with a moderate retinue to Peking, it is clear that, finding they could not overcome the resolution of Mr. Bruce not to be tamboled at Shanghai, they were resolved to resort to force, and to stop his advance at the mouth of the river. In order to throw the best veil over this act of treachery, the Chinese government takes care that there shall be no personage of authority to receive Mr. Bruce at the mouth of the river, as Kwei-liang had promised, and that his progress shall be arrested without any show of imperial authority. It was found convenient, therefore, to term the garrison of the forts at this point an "armed rabble," acting without authority, and to haul down the imperial flag, as though the garrison had been a body of Malay pirates. The Chinese government accordingly require us to believe that an armed body of men would fire upon our envoy and his fleet without authority; while the commissioners assert to Mr. Bruce that even they could not venture to choose for themselves a sea route, in place of one by land, without the sanction of the emperor! No sooner does Admiral Hope anchor his vessels outside the bar, and send the *Fury's* gig across it, than permission to land is refused, and the boat's crew are threatened by the garrison. Here is the first resort to force, and it is on the side of the Chinese. The imperial government, too, in ignoring the authority of their own troops, would have justified even the initiation of force by ourselves, in order to effect the landing which the commissioners had desired Mr. Bruce to effect. Mr. Bruce and M. Bourbillon agree that they have a right to regard the river as the natural highway to the capital, and to clear the way against "unauthorised persons."—*Morning Post*.

THE case of Mr. Bruce and of his subordinates is shortly this:—"We knew that we were going to be taken in. We were, as Englishmen, characteristically determined that we would not be taken in. We assumed the initiative. We were beaten. But still we maintain that we had good reason for what we did." Although we believe, and, as far as we can see, shall continue to believe, that the case is not complete, we cannot deny that the state of facts, as disclosed by the recent publication of papers, is entitled to consideration. It is very difficult indeed to comprehend what the Chinese Government require of us. If we are to believe reports, they yield everything to Russia and America which they refuse to France and England. The despatches published in this journal during the past week, evidence at once sturdy Toryism on the part of the Cabinet of Peking; but that Toryism, if it be compatible with Russian inspiration, is inexplicable when measured by the open-handed manner in which the United States Mission was received. In this, more than in any other way, must Admiral Hope's achievement of the Peiho be judged. On the principles of international law, it is inexcusable. As a question of discretionary action regulated by difficulties, we cannot say that, in the position in which he and Mr. Bruce were placed, we might not have done likewise. Among the most important features in these negotiations, we cannot shut our eyes to the shuffling of the Chinese authorities who dealt with Mr. Bruce. The ratifications were positively guaranteed by treaty to be exchanged within a given period. Commissioners at Shanghai intimated to Mr. Bruce that "they were the only authorities by whom the exchange of the ratified treaties at Peking could be effected," and they themselves allowed that the ratification could not take place at the capital until a month later than the period named. Whether they were really honest or not in their intentions, their acts were largely in antagonism with the appearance of good faith and honesty. Mr. Bruce was justified in what he did by the rules of human forbearance; but, on the higher rule of international integrity, we might have done what the envoy of the United States did. The latter was patient, reliant, and powerful. We were impatient, suspicious, and powerful. Mr. Ward could not even enforce his mission, and succeeded. We had force to compel ours, and failed. The papers lately published, if they exonerate Mr. Bruce, as to a certain extent we think they do, cannot excuse his policy. We may, and we do, acquit the man; but the principle is as indefensible as ever.—*Morning Chronicle*.

THE position of parties as to the China question is like the situation in the *Critic*. Ministers in and Ministers out have something to defend that places them in attitudes of embarrassment and awkwardness. We think with Lord Derby, that Government was wrong in approving the conduct of Mr. Bruce. He should have considered his mission at an end when he found his progress resisted, instead of attempting, with an insufficient force, to fight his way to the ratification of a peace. But hardly out of the mouth of Lord Derby are the words that Mr. Bruce was to blame for deciding whether there was or was not a sufficient cause of war, when he exonerates him by declaring that we had never been at peace with China! A door, say the French, must be either open or shut; and the door of the Temple of Janus must, we suppose, be like all other doors in this respect. In English, indeed, we have the middle term of ajar, just fitting the case as the China jar. The bravery which a commander exhibits in common with the humbleness of his followers is not to exonerate him from faults in management, involving a grievous disaster and frightful carnage. For errors of judgment there must always be large allowance, but with this condition, that all care

has been taken to form a correct judgment. Now Admiral Hope had his council of war before the landing for the attack on the forts; but did he call to it all whose military rank and experience gave them a title to a place in it? It is confidently asserted that he did not, and that an officer in command of a part of the forces was left out of the council whose voice would have been most decisively against the landing in the mud. That disastrous landing was specially recommended by an officer of inferior rank to the one so invidiously excluded from the council of war.—*Examiner*.

THE language of Mr. Bruce, in his letter to Lord Malmesbury of January 31, shows that, like many of his countrymen, the mission would have had no value in his eyes unless it had been accompanied with circumstances which made it humiliating to the Chinese Government. He was determined to be indebted for nothing to the good will of the Chinese, but to ascend the Peiho with military parade. The conclusion we have come to on reading his despatches, with a recollection of the observations of Lord Elgin and the Consul, contained in the last Blue-book on China is, that it was not at all necessary for Mr. Bruce on the one hand to expose himself to indignity, after all we have done in China, by going to Peking with less than proper state; nor, on the other, to plunge the two countries again into war; but that with firmness and patience, and a reasonable regard for the weakness of the Chinese Government, he might have obtained the fair and pacific execution of the treaty. The stipulations of that instrument are too comprehensive and far-reaching for the advantages they promise to be realised all at once. As Lord Elgin observed in transmitting them to his Government, they involve a revolution in the policy of China; and revolutions, we know, cannot be made in a day. Whoever pretends that this treaty can be at once enforced in all its provisions by any amount of bloodshed and devastation is a charlatan. We can never enjoy its full operation without gaining the confidence of the Chinese Government and people—a difficult task, looking at the education of both in history; but quite practicable by the observance of mingled firmness and moderation.—*Daily News*.

MR. BRUCE neither agrees in opinion with the English nor the Chinese Government. He has planned out for himself a course of action different from that proposed by both; and what are the means which he takes to promote his own views and purposes? Why, by writing despatches to the Foreign Office which are not only unworthy of the dignity of his position, and not only afford proof of his utter incapacity to negotiate on the side of peace, but despatches that are filled with ill-will and malice to the Chinese, which contain disgracefully perverted statements of fact, which are confuted by the representations made by Mr. Oliphant and others of high authority, and which are, altogether, the most shamelessly narrow-minded and evil-disposed communications we ever read in any diplomatic correspondence. The complete success of Mr. Ward's mission is, indeed, the decisive answer to all that can be urged in justification of the policy of Mr. Bruce; and as our Minister feels that such is the case, instead of forwarding Mr. Ward's own account of his reception at Peking, or the accounts of those who were with him, he presents a partisan narrative of his own concoction, of the truth of which he has no personal experience, and which is utterly opposed to every narrative that has come from the pens of those American gentlemen who went to Peking in connection with the Embassy. Mr. Bruce can only see in a guard of honour the evidence that the Americans were kept under arrest, and he reproduces some of the traditions connected with the old Macartney mission to prove that the less honourable mode of conveyance in China is in carriages, and not in chairs. On the great chair question Mr. Bruce is as profound as the learned pig Toby was on the question of mashed turnips; but while Toby performed simply for the sake of support, Bruce perverts so that he may have an empire humbled at his feet. He can even tell us what Mr. Ward would not have done if Mr. Ward had been possessed of Mr. Bruce's information, for, says he, the American Envoy would have refused to do what was agreeable to the personal vanity of the Chinese had the matter been properly explained to him. Mr. Bruce, indeed, wishes the Foreign Office to understand that Mr. Ward is a simpleton; and Mr. Bruce is just the very last man who has the sense to perceive that good manners alone, if there were no higher consideration, ought to dictate that we should be content with Mr. Ward's own account of his own mission, and all the more so since it has received the approval of the Government under whose instructions he acted. Now, we want to know, are we to be at peace or at war with China? For, if it is to be war, as Mr. Bruce says, he hims is the very man to promote it; but if it is to be peace, as the Foreign Office intimates, he is the very man who should not be allowed to remain where he is a single hour beyond the time when the communication for his recall can be placed in his hands. What matters it though he may be the brother of Lord Elgin himself? Or who, with any sense of public responsibility, cares whether he has relatives connected with the Administration or not? Is the character of a nation to be imperilled because it may be a delicate matter to remove an individual? Or are we to encounter all the risks of hostile operations against the most populous empire in the world simply because our Minister belongs to a particular family? Let the House of Commons look to it. Those who represent the country are now in full session assembled: it was not so when the first batch of Mr. Bruce's humiliating epistles was given to the public. The House of Commons has the case in its own hands, and it is bound to protect the honour and dignity of the country. This the House can do, without any need for censuring the conduct of Ministers. Indeed, there are, in the present Administration, gentlemen who never could make up their minds to offer any apology or defence for conduct like that to which we are alluding; and all the House has to do is to give such an expression of its feeling on this subject as will induce the Government to take steps for the recall of one who is totally unfitted for the grave responsibility of representing the British Crown, and who ought in reality to be impeached and punished for the disrepute and disaster he has entailed upon his country. We cannot, for a single hour, be guaranteed from war with China if Mr. Bruce remains at Shanghai; and our Legislature should remember the practice of the Romans, not to allow a prætor who had suffered defeat to remain at his post, relieving him thereby to be totally incapable of judicious negotiation.—*Star*.

MR. BRUCE AND LORD JOHN RUSSELL.—The *Morning Advertiser* has

the following comments upon the late transactions in China:—"Unhappily for Great Britain, Mr. Bruce had an escorting fleet on his embassy of peace; unhappily for Mr. Bruce, he had the gallant Admiral Hope, to whom he could dictate the commencement of hostilities; and unhappily for Admiral Hope, he had to carry out the views of such an inexperienced, and, though long-bearded, in one sense, unfledged negotiator as Mr. Bruce." Whilst the *Morning Herald* severely censures the despatches of Lord John Russell, and considers him the "feeblest Minister who was ever intrusted with the direction of foreign affairs in this country." The *Herald* further states that the Chinese have been guilty of a base act of treachery, and that as we are not dealing with a Western people who can appreciate motives of humanity, in such a case the worst policy is that of submission.

Correspondence.

TO THE EDITOR OF THE "LONDON AND CHINA TELEGRAPH."

SIR,—In a despatch, No. 32, of 23rd March, 1858, Sir John Bowring, the late Governor of Hong Kong, forwarded to the Secretary of State for the Colonies' Ordinance No. 2, of 1858, intitled "An Ordinance for Licensing and Regulating the Sale of Prepared Opium," soliciting the approval of Her Majesty's Government for same. In so doing, the learned Knight remarks that, in 1845 and 1846, a system existed in Hong Kong similar to that existing in the Straits' settlements, viz.: "Subject to certain limitation as to quantity, a monopoly was created of raw and prepared opium; and the revenue produced during these two years, when the population of the colony was only a fourth of the number it was in 1858, produced £4,118."

Sir John then goes on remarking, "In 1847 the monopoly system was abandoned upon grounds of which no official records remain satisfactorily accounting for the change, and in its lieu was substituted an issue of yearly licences." I do not go into the merits of Sir John's ordinance, and in alluding to it only wish to show if it cannot be satisfactorily accounted for why Sir John Bowring's predecessors should have abandoned a system of raising a revenue, which, even in 1846, was, considering the number of the population in that year and in 1858, more productive in 1846 than in the latter year. In 1846, the population was 22,533, and in 1858 near to 80,000. The opium revenue, in 1846, was £4,118; in 1858, according to Sir John's despatch, £7,500.

However that may be, it seems strange to me that Sir John Bowring, above all other men, should not have discovered grounds upon which the opium monopoly was abolished, considering that whilst a member of Parliament, previous to his appointment as Her Majesty's Consul for Canton, he was one, if not the most active member of the select committee on commercial relations with China, commonly called "Lord Sandon's," which committee, of course, produced a voluminous blue book, in the report on which, dated 12th July, 1847, the committee, and consequently also Sir John, say, as regards the colony of Hong Kong:—"In addition, however, to these natural and necessary disadvantages (!), it appears to have laboured under others (poor Hong Kong!) created by a system of monopolies and farms, and petty regulations particularly unsuited to its position and prejudicial to its progress." Sir John Francis Davis, the then governor, seems to have anticipated the wishes of this committee, because I find that he abolished the opium farm or monopoly on the 5th July, 1847—seven days previous to the committee's report—and substituting therefore the licence system.

Who would have thought it, that the freetrader, in 1847, should, for fiscal reasons, censure, in 1858, his predecessor for having adopted the views recommended by the committee eleven years previous?

Yours respectfully,

O.

Naval and Military.

THE CHINA EXPEDITION.

The Khersonese (Capt. Hurst) transport, No. 7, has sailed with, it is said, nearly 2,000 tons of war stores. Mr. R. Day, who served in the field train in the Crimea, proceeds by her. Lieut. Grant, who has been appointed to the Chesapeake, Lieut. Douglas, as Admiralty agent, and twelve naval cadets, also proceed by her. She is supplied with a disconnecting screw, which will only be made available in case of contrary winds or a calm.

The Thunder and Powerful made the passage to Cape de Verde in ten and twelve days respectively. The Centaur and Cockchafer were at Ascension on the 27th Dec.

Capt. Manners, of the 1st Royals, has been posted to the second battalion, and is ordered to join it at Hong Kong. Major Grantham, of the 23rd company of Royal Engineers, and Lieutenants Malcolm, Pritchard, Harrison, and Shire are also to proceed from India. Mr. Thomas Hunt has been appointed paymaster to the force of the Royal Artillery and Royal Engineers serving in China.

It has been announced from India that the following regiments proceed.

(* Supplied by Bengal, † by Madras, ‡ by Bombay.)

EUROPEAN TROOPS.

- † No. 7 Battery 14th Brigade Royal Artillery.
- * Cavalry (not detailed).
- † H. M. 1st (King's) Dragoon Guards—200 men and horses.
- † 23rd Company Royal Engineers.
- † A and K Companies Sappers and Miners.
- * H. M. 3rd (East Kent, or Buffs) Foot.
- * H. M. 6th (Royal 1st Warwickshire) Foot, 1st battalion.
- * H. M. 8th (King's) Foot, 1st battalion.
- † H. M. 31st (Huntingdonshire) Foot.
- * H. M. 37th (North Hampshire) Foot.
- † H. M. 44th (East Essex) Foot.
- † H. M. 56th (West Essex) Foot.
- * H. M. 60th (King's Royal Rifle Corps, 1st battalion.
- † H. M. 66th (Berkshire) Foot.
- * H. M. 67th (South Hampshire) Foot.
- * H. M. 73rd Foot.

NATIVE TROOPS.

- † A Company 5th Battalion Artillery (Golundauze).
- † 1st Supplemental Company (Golundauze).
- * Irregular Cavalry (not detailed).
- * Five battalions Infantry, including 15th Regiment Punjab Infantry (each 800 strong).
- † 3rd Regiment N.I. (1,000 strong).
- † 5th " " "

The 8th, 31st, and 73rd Regiments will be reinforced from Chatham—in all about 1,000 men—and, having been trained, will be able to take the field at once. The 8th Foot has been fourteen years in India, having embarked in 1846, and was about returning to England during the present year. The 73rd embarked in 1845, and has been fifteen years in India. The 31st Regiment arrived in India in 1853. The whole of these regiments experienced hard service during the rebellion of the native troops.

The details of the European Cavalry and Native Irregular Cavalry to be furnished by Bengal are not yet known. It is reported that Major-General Sir J. Michel, K.C.B., temporarily commanding the Malwa division, is to command the Bombay column. To secure uniformity of ammunition, the Native force is to be armed with the smooth-bore musket, such as is used by the regiments of Bengal and Madras N. I. now serving in China.

GENERAL ORDER BY HIS EXCELLENCY THE GOVERNOR-GENERAL OF INDIA.

Camp Meerut, 20th December, 1859.

His Excellency the Governor-General issues this Notification for the information of the Bengal Native Army.

2. It is likely that an army will shortly be required from India for the Queen's service in China.

3. This army will be composed partly of European and partly of Native troops.

4. The European portion of it will consist of seven regiments of infantry (in addition to the two regiments recently sent to China), and some cavalry; but respecting this portion of the force, his Excellency the Commander-in-Chief will in due time issue the necessary directions.

5. The native portion of the army will consist in the first instance of five battalions of infantry, of which four will be selected from such Punjabi regiments as may volunteer for the services, and one from the Hindostanee regiments which may volunteer. Some irregular cavalry will also be sent.

6. The strength of the battalions will be 800 privates each, with the due proportion of native commissioned and non-commissioned officers, in eight companies.

7. Each man, whether belonging to a regiment volunteering collectively, or coming forward separately, will be required to sign or seal a paper declaring himself to be a volunteer. This precaution for securing individual willingness will be taken after the offer of a regiment, or of any man belonging to it, shall have been accepted by the Governor-General.

8. The period for which volunteers are now required is two years. If it should happen that the service in China extends beyond two years, any man who may wish to be relieved at the end of that term will be relieved.

9. Depots will be formed in India of regiments volunteering, to which men who do not proceed on foreign service will be attached; and the property left behind by the men, and any of their families, will be carefully looked after at these depots.

10. The native volunteer battalions proceeding to China will enjoy the established privileges of foreign service, viz.:

I.—The privilege of granting family money certificates.

II.—The nomination of heirs to family pension in case of their decease.

III.—Pay and full batta in addition to free rations. The full batta will be drawn from the date on which each man's offer of service is accepted.

IV.—Rations (gratis) on board ship, and on shore while on foreign service, and until re-landed in Bengal. The commissariat department will issue the rations, of which the cost will be defrayed by Government.

V.—On embarkation, haversacks, canteens, and hammocks, and a great-coat per man, at the public expense; the articles to be accounted for by quartermasters in the periodical returns.

VI.—Half-batta during leave of absence on medical certificate.

VII.—After the return of a regiment from foreign service, if in time of peace, a quadruple proportion of native officers and men will be entitled to furloughs, for periods in proportion to the distances of their homes, and with the privilege of half-batta during such furlough.

11. The native force will be armed with the smooth-bore musket, such as is used by the regiments of Bengal and Madras Native Infantry now serving in China; and in order that uniformity of ammunition may be preserved throughout the entire native force in that country, corps now armed with rifles will, before embarkation, have them exchanged for the smooth-bore musket.

12. Each volunteer regiment will have the following complement of European officers:—

A commandant.

A second in command.

An adjutant.

An interpreter and quartermaster.

A medical officer (surgeon or assistant-surgeon).

Eight (8) officers doing duty.

An apothecary.

13. His Excellency the Commander-in-Chief is requested to issue such further subsidiary orders as may be necessary, respecting the formation of the force, European and native, proceeding to China.

B. J. H. BIRCH, Major-General, Secretary to the Government of India, with the Governor-General.

The *Army and Navy Gazette* announces that it is intended to form a naval brigade at Calcutta from the unemployed merchant seamen. On second lieutenant-colonels proceeding to China, the following remarks are made:—"We have heard it stated that the second lieutenant-colonels of the regiments proceeding to China are about being reduced to half-pay on their quitting the Indian establishment; and that it is in contemplation to allow regiments in India in future only one lieutenant-colonel. As regards the latter portion of the rumour, we have only to say that we doubt very much if four field officers be more than sufficient for a regiment serving in a climate where so many officers are obliged to be on leave for sanitary reasons, and where in many cases regiments are split up into wings and detachments. We do trust the question will be reconsidered before a step is taken which appears to be suggested by no consideration save one of indiscriminating economy. It so happens that some of the second lieutenant-colonels of regiments going to China are among the best officers of their rank in the army, and we hope they will not be taken from their respective corps just at the moment their presence with them is most to be desired."

In our issue of the 28th Nov. we made the following remarks:—"It appears that instructions have lately been issued from the War-office, placing the Queen's troops serving at Hong Kong on the colonial scale of allowances instead of the Indian. The privations and monotonous life of officers and troops destined to serve in that unhealthy colony entitle them at least to allowances equal to the Indian scale. Ceylon and other parts of India are perfect sanatoriums compared with Hong Kong; provisions, servants, &c., are also only about one-half the cost. This fact of course increases the injustice, and on what grounds the authorities at the War-office arrived at their conclusion we cannot conceive. Surely they could have obtained the evidence of gentlemen who had been resident there, competent to give an unbiassed opinion on the subject."

Capt. S'adwell, R.N., has arrived from Hong Kong. He is the bearer of the ratifications of the treaty concluded between Great Britain and Japan. This officer was severely wounded in the attack on the forts of Pihoo, and has come home on sick leave.

The distribution of the amount of prize-money awarded for the destruction of pirates in the China Seas, by her Majesty's ship *Comus*, between the 24th and 27th of August, 1856, has commenced. The following are the shares due to an individual in the several classes:—Commander, 185*l.* 0*s.* 5*d.*; third class, 37*l.* 6*s.* 2*d.*; fourth, 23*l.* 19*s.* 8*d.*; fifth, 13*l.* 6*s.* 6*d.*; sixth, 11*l.* 19*s.* 11*d.*; seventh, 7*l.* 19*s.* 11*d.*; eighth, 3*l.* 19*s.* 11*d.*; ninth, 2*l.* 13*s.* 4*d.*; tenth, 1*l.* 6*s.* 7*d.*

The 4th company of Royal Engineers is ordered from India to England, with the exception of 20 men, who are ordered to proceed to Mauritius under the command of Captain Scratchley. The 11th and 21st companies are ordered from India to the Mauritius, under the command of Lieutenant-Colonel Brown, C.B., and Lieutenants Gossett, Swetenham, Paterson, Lloyd, and Crozier. On the arrival of these companies the 22nd company will leave the Mauritius for England, under the command of Lieutenant W. B. Gossett.

The 2nd Battalion of the 24th Regiment (late notorious in the riot at Aldershot), now at Cork, is under orders to proceed to the Mauritius, to relieve the service companies of the 61st Regiment, which have been on foreign service since 1845.

Colonel J. Clark Kennedy, C.B. (late of China), Assistant Quartermaster-General at Aldershot, has been appointed to succeed Colonel McMurdo as Commandant of the Military Train.

As the progress of the department engaged in the production of Sir William Armstrong's guns is a subject of special importance to the public, it may be interesting to learn that the manufacture of 12-pounder guns at Woolwich has been this week increased from 20, the late weekly ratio, to 45, 15 having been turned out on Tuesday and provided at the Royal Arsenal on Wednesday, and an additional number of 15 was yesterday completed and proved fit for any amount of service. Arrangements are in progress for making a number of 25-pounders, which will be commenced as soon as the requisite implements are prepared.

The museum attached to the Royal Engineer establishment at Chatham has just been enriched by a number of very interesting specimens of fire-arms of all descriptions, captured in China, which have been deposited in the department devoted to those descriptions of objects. Most of the pieces are of very extraordinary design and character. Two enormous bamboo canes, each measuring upwards of 40 feet in length, which were likewise

brought from China, have also been placed in the museum at Brompton barracks.

General Sir De Lacy Evans has given notice, for an early day, of his intention to move an address to the queen, for the abolition of the system of sale and purchase of commissions, due regard being had to existing interests.

The *United Service Gazette* regrets to learn that Vice-Admiral Sir Richard Dundas is at present unwell. His supersession of Vice-Admiral Fanshawe is, we have reason to believe, determined on. The post to be vacated by Sir Richard Dundas will, it is said, be offered to Sir Michael Seymour, M.P. for Devonport; but with the present prospects of the Government it is not probable Sir Michael will accept it, and run the risk attending a new election.

Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., will succeed Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., as Commander-in-Chief of the Cape and West Coast of Africa station, and will shortly hoist his flag on board the *Forte*, 51, screw, at Sheerness, which ship has been commissioned for that service by Captain E. W. Turnour. Mr. Matless G. Autey, Paymaster, now serving in the *Racer*, is to be appointed secretary to Sir Henry Keppel, and the Rev. J. Thompson (late of China) is to be chaplain.

The screw steam frigate *Euryalus*, 51, Capt. Tarleton, C.B., with his Royal Highness Prince Alfred, from the Mediterranean, is daily expected at Plymouth. The heads of departments have received instructions regarding the reception to be given to the Prince, who is expected to remain some days.

The following is the scale for engineers:—Vessels under 200 horse-power, 3 assistants; at 200 horse-power, and under 350 horse-power, 1 chief and 3 assistants; at 350 horse-power, and under 500 horse-power, 1 chief and 4 assistants; at 500 horse-power and upwards, 1 chief and 6 assistants.

The King of Sweden and Norway has awarded a medal to Commander Monagu O'Reilly, R.N., in acknowledgment of his services in heaving off the rocks, last October, in Gibraltar Bay, the Swedish corvette *Ornen* (Eagle), and the Admiralty have sent this decoration to the Commander-in-Chief in the Mediterranean for presentation.

One of the lanterns composing Mr. H. Ward's apparatus for marine signals called the "ocean marine telegraph," was again tested at Woolwich, in the presence of Commander Superintendent the Hon. Jas. R. Drummond, C.B. presence of Commodore Superintendent the Hon. James R. Drummond, C.B. The Commodore expressed himself extremely gratified with the invention.

Capt. Moorsom died at his brother's house at Brighton. Captain Moorsom was within a few days of forty-four years of age. He entered the navy at fourteen. Although he obtained the "gold medal" of his year at the Naval College, he was not made lieutenant till seven years after he had served his full time as mate, and then his hope of further promotion appeared so small that he was frequently on the point of quitting the service. The invention of his "shell," however, brought him into notice. He served in the first Chinese war, and soon after the breaking out of that with Russia, being then a post-captain, he was appointed to the *Firebrand*, whose commander had been killed at the mouth of the Danube. Capt. Moorsom was a C.B., a Chevalier of the Legion of Honour, and had the Order of the Medjidie, together with, of course, the Chinese, Crimean, and Turkish medals. He gave his invention of the "shell," or, more properly, "percussion fuse," to the Government, and it has been for some years adopted in the service. He wrote a treatise on the Manœuvring of Steam Fleets.

The Navy estimates for 1860-61 has been published. The grand total sum required to be voted for the ensuing financial year is stated to be £12,802,200, against £11,775,718, thus exhibiting a net increase of £1,026,482.

Two de-patch gunboats, named the *Pelican* and the *Steady*, were launched yesterday from the shipbuilding yard of Messrs. W. C. Miller and Son, Sifton-street, Liverpool. Their dimensions are: Length between perpendiculars, 145 feet; extreme breadth, 25 feet 4 inches; depth of hold, 13 feet; tonnage, 425 tons; draught of water when fully equipped, 9 feet 5 inches forward, and 11 feet 6 inches aft. The engine, of 80-horse power, will be supplied by Napier, of Glasgow. They are to carry each one 95-cwt. pivot-gun and four 24lb. carronades, and are to be rigged as three-masted schooners.

MUSKETS FOR THE CHINA EXPEDITION.—The *Morning Post* had an able article on the 9th, strongly deprecating the alleged intention of supplying the troops proceeding to China with the old smooth bore musket (brown Bess) instead of the Enfield or Minié rifle.

MEETING ON CHINA.—At a meeting held lately in Newcastle, under the auspices of the Foreign Affairs Association, for the purpose of "stopping the supplies" for the conduct of the Chinese war, a singular epistle, says the *Manchester Guardian*, was read from Sir W. C. Trevelyan, stating that the writer cordially joined with the association in deprecating another Chinese war, as being most impolitic and absolutely unjustifiable; for whatever was morally wrong could never be politically right, and must eventually bring disaster on those who pursued such a policy, as had unhappily been the case in China, from the first war in defence of smugglers down to this new project to avenge a disaster which was brought on ourselves by our own most unjustifiable and impolitic proceedings, in endeavouring to bully a nation into compliance with unreasonable demands. Like the case of the Indian mutiny, caused by the reckless and headstrong folly of the commander of the forces at Meerut, we had been led into this war by the worse than foolish, by the unjustifiable and dishonest proceedings of our merchants or political agents, and involved in the crime of inflicting a civil and a foreign war on one of the fairest portions of the globe, and on a very large portion of the human race, and that one of the most industrious and peaceful, whilst we Christians taught them to fight. We had now felt the fruit of our own lesson in the successful repulse of a treacherous attempt, under cover of an embassy, to introduce such a hostile force into the heart of the empire as might enable our rash and ill-advised ambassador to enforce his measures at the cannon's mouth—an argument truly worthy of a civilized and a Christian country. It was high time, the letter concluded, that the authors of these disasters should be brought to the bar of public opinion.

PROPOSED AMERICAN INTERVENTION IN CHINA.

A special meeting of the Board of Trade was held at the rooms yesterday afternoon, the President, E. S. Tobey, in the chair.

The President read a communication from Hon. William Appleton, suggesting the expediency of memorialising the President of the United States upon the subject of offering the mediation of this country to adjust the difficulties now existing between the English and French nations and the Chinese empire. He said:—

You are aware that in the year 1858 a treaty of amity and commerce was concluded between the Emperor of China and the United States, which has been ratified and duly exchanged. At about the same time treaties were made between the Emperor of China and England, France, and Russia. The ambassadors of England and France, while on their way to Peking, in armed ships, to consummate and exchange the treaties, were interrupted in their passage, which led to a collision between the ships of war and the Chinese forts. The result of this unfortunate event has caused a large naval and land force to be sent by France and England to China, and all the horrors of war may be anticipated. Can this be averted? Humanity, the best feelings of our nature, and our interest demand that an effort should be made. The treaty between the United States and China recognises such mediation. It is quite sure that the Chinese would be ready (with the presence in her seas of an overwhelming force of Europeans) to grant anything that the European allies would require, that they had the power to comply with. The Emperor of China might promise, and be able to carry into effect, under the mediation, that which he would be unable to do were the promise made under the presence of forces before Peking. Should this suggestion meet the views of the Board of Trade, and the President offer the mediation—it being successful—we should all rejoice in the feeling that our nation had acted the part of a peacemaker, to whom blessedness is promised. Mr. Beebe remarked that he cordially approved of the suggestions of Mr. Appleton, and begged to offer resolutions in accordance therewith, as follows, which were unanimously adopted:—

Whereas, the ambassadors of England and of France, while on their way recently to Peking to exchange the treaties between their respective governments and the Emperor of China, were interrupted in their progress and accidentally or treacherously fired upon by certain Chinese forts; and whereas large naval forces have been despatched to the Celestial Empire to obtain redress for the alleged wrong—

Resolved—That the Government of this Board prepare a memorial to the President of the United States, respectfully suggesting that the tender to the three Powers above mentioned the mediation of the United States for the amicable adjustment of all pending difficulties; and, further, that the said memorial be intrusted to the Hon. William Appleton, with the request that he present the same, and make such statements touching the subject matter thereof as he shall deem proper.

Resolved—That the Secretary of the Board transmit to the Chamber of Commerce of New York and the Boards of Trade of Philadelphia and Baltimore, copies of the proceedings of this meeting. On the motion of Mr. James C. Converse, it was voted that the President and Secretary of the Board prepare and sign the memorial to the President of the United States.—*Boston Traveller*.

The *New York Herald* comments on the above:—"When our Commissioner to China, Mr. Reed, followed out his instructions and abstained from interfering in the late trouble, the *London Times* abused the American Commissioner and American policy, because we would not interfere to aid England. Now it turns out that Mr. Buchanan's policy was exactly right; and to it we owe the fact that we are not alone the first Power in China today, but we are in a position to mediate between the three belligerent Powers, and possibly prevent a war disastrous alike to England, to France, and to China. We learned by late advices that the Chinese Government contemplated appealing to our Minister, Mr. Ward, to obtain the mediation of the United States; and we think that the President ought to tender it to the three Governments, in this emergency, although we would not urge an intervention of the general policy of non-interference so judiciously adopted by our Government."

PRESENTATIONS AT COURT.

HER MAJESTY THE QUEEN held her first levee this season on the 15th inst., at St. James's Palace. Amongst those presented the following were connected with China. Lieutenant-Colonel H. Hope Crenlock, on promotion and return from service in China, by Lieutenant-Colonel Sir George Wetherall; Colonel Clark Kennedy, on appointment as Colonel Commandant Military Train, by H.R.H. the Duke of Cambridge; Rear-Admiral Sir Henry Keppel, K.C.B., on appointment to the command of the Cape of Good Hope and West Coast of Africa Station, by the Duke of Somerset; D. J. Macgowan, M.D., by the American Minister; Commander Michael C. Seymour, R.N., on promotion and return from service in China, by his uncle, Rear-Admiral Sir Michael Seymour; Sir John F. Davis, K.C.B., and Mr. Edgar Bowring were also present.

ORGAN FOR HONG KONG CATHEDRAL.—This beautiful instrument, lately completed by Messrs. Bryceson and Son for the Cathedral at Victoria, has been shipped on board the *Robin Hood*, which sailed on the 9th Mr. C. F. Sangster, the organist, has taken his passage by the same vessel.

TENTS FOR INDIA AND CHINA.—Mr. George Turner, of Northfleet, has lately taken out a patent for new descriptions of tents for the army when in the field. From what we can judge through reading Mr. Turner's pamphlet, we should most decidedly consider his military tents a very great improvement upon the old ones in the Ordnance store at Hong Kong; and now that it appears the expeditionary force is to be put under canvas until operations are commenced, we do trust the military authorities will see to his improvements.

POSTAGE TO ALEXANDRIA, CAIRO, AND SUZ.—A Treasury warrant is published in the *Gazette*, extending the regulations previously in force respecting books, publications, or works of literature and art, to the transmission of packages between any part of the United Kingdom and the British post-offices at Alexandria, Cairo, and Suez. On all such packets, not exceeding 4 oz. in weight, there is to be one uniform rate of 3d., and a progressive rate where the weight shall exceed 4 oz. Communications which do not come within the definition above stated will be charged with postage as letters.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

The "LONDON AND CHINA TELEGRAPH" is published on the evening of the day of delivery of the Mails.

All applications for Advertisements, Subscriptions, and general business of the Paper to be addressed to the Manager, and not to the Editor. Post-office orders to be made payable at the Strand Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, SATURDAY, FEBRUARY 18, 1860.

THE NEW PORTS OF JAPAN.

WE are gradually becoming acquainted with all the ports of Japan. Nagasaki is an old acquaintance; Simoda has been tried and found wanting; Hakodadi promises to be of more use to American whalers than to anybody else. Intelligence comes by every mail from Kanagawa, the port of the great metropolis of Japan, Yedo. Two more claim our attention—Ne-e-gata and Fiogo; the former was to have been open for traffic on the 1st of January last, the latter is to be opened in 1863. We are unable as yet to lay before our readers much information respecting these two ports. Ne-e-gata was so little known that the third article of the Treaty of Yedo stipulated that if that harbour should be found unsuitable, another convenient port on the west coast of Japan should be substituted for it. It now appears to be "unsuitable," chiefly owing to a bar at its mouth. Consequently Mr. Alcock, our Consul-General, has issued a notification to the effect that further examination must be made of some adjacent harbour, and he has notified that no port will be opened on the west coast to British trade without due notice. We observe that the estuary of Ne-e-gata receives the waters of the Kasabagama and the Sinanogama, which empty into the Sea of Japan by three mouths. This is in the province of Netsingo, in which are situated the cities of Takata, Naga-oka, Simbota, Murakami, Itsu-mo-saki, and Moromats. The province produces lead, lacker, wax, white mustard, various cotton fabrics, white hares, sturgeon, and other fish, deal and larch timber. Silk, taffetas, oils, paper, gold, silver, lead and sulphur are among the productions of the adjacent provinces. We shall be glad to hear that our hydrographers have discovered some easily accessible port on that side of the coast opposite to Corea.

As regards Fiogo, we have more assurance. It is accessible, and though in itself of little moment, it is of vast importance as the port of the two most important cities in the empire, Osaka and Miaco, the latter being, as is well known, the capital of the spiritual emperor. Fiogo is the first point which the Dutch factors make on passing from Kiusin to Nippon. It sometimes takes eight days or more to reach Fiogo from Simonoseki, as voyagers seldom sail by night. It is about the size of Nagasaki. Osaka, the great mart of Japan, is situated about thirteen Japanese leagues further. This is one of the five imperial cities, and is situated in a fruitful plain, and on the banks of a navigable river. In some respects it rivals Yedo. One cannot predict which will prove the greatest port—Kanagawa or Fiogo. Osaka is noted as the chief seat of Japanese industry. Here they refine copper, coin money, cast bronze, print books, weave the richest stuffs with gold and silver flowers, prepare the best and scarcest dyes, produce the most artificial carving, and manufacture all sorts of musical instruments. The pictures of Osaka are noted, as are also the Japanese cabinets and lacquered ware. All things wrought in gold and other metals, particularly in steel; also the richest dresses; all sorts of toys, puppets moving their heads of themselves; in short, there is nothing from abroad that is not or cannot be imitated in that city. It is the seat of pleasure for wealthy natives; amusements in every form are here perfected. For luxury and sensual indulgence its inhabitants are particularly noted. Not far off is the literary and religious city of Miako. With two such cities, the port of Fiogo cannot fail to prove a place of great trade. We shall aim to make our readers acquainted with the various regions recently opened to the enterprise of our merchants in China and Japan—a task that shall take us from Hainan to Formosa and Quelpart, from Hankow to Manchurin, fields of great interest to all

classes. It is our design, in a word, to make our Journals depositories of information on those parts of the world which come within our province, they will thus be found worth filing away for reference. Not current events and mercantile affairs alone, but the geography, manners and customs. Our opportunities for collecting information are ample—having correspondents in this country, on the Continent, and in all parts East of India.

MR. BRUCE'S DESPATCHES.

In our last impression we gave a summary of correspondence with Mr. Bruce, laid before the House on the 27th ult. We now give that which was produced on the 7th inst., and the comments of the press on the same. The most extraordinary part is that portion of Lord John Russell's letter which instructs Mr. Bruce to procure an apology, or an indemnity, from the Chinese Government. This is the finishing stroke.

The first is a letter from Mr. Bruce to Lord Malmesbury, enclosing copies of letters which he had received from Sir Charles Van Straubenzee, and stating that in consequence he had addressed Lord Canning, requesting him to reinforce the garrison of Canton. The letters from Sir Charles Van Straubenzee ask Mr. Bruce whether war may be considered as having commenced with China, or whether matters are to continue as at present at Canton so long as the Chinese remain in a passive state; and also recommends that two troop steamships should be sent to India or Ceylon for reinforcements. Mr. Bruce, in his reply, on 31st July, says:—

"As far as I can judge from a communication that has been received by M. de Bourboulon from Ho, the Imperial Commissioner, the Chinese Government has no intention of disturbing us at the ports. The letter treats the collision at the mouth of the river as unintentional on both sides, and as proceeding from our ignorance of the fact that preparations had been made at another place to receive us; and he even goes so far as to suggest that we had better return to the north, as we shall be received with due courtesy. I have no doubt that Mr. Ward, the American Minister, will bring down some proposals for accommodation.

"I do not think, therefore, that orders will be sent from Peking to commence at Canton the hostile proceedings of last year, unless we were to assume the offensive, and in that case a large force would be required; for the blow, if struck at all, must be struck in the north, and we know that during the last year a large force has been accumulated, consisting in part of men who show considerable skill in the management of artillery, whatever may be their value as soldiers in the field. As my object is not to fetter the action of her Majesty's Government, my language to the Chinese authorities will continue to be, that I consider my mission to Peking at an end for the present, and that I have referred home for fresh instructions.

"But I shall avoid, as much as possible, doing or saying anything from which the Chinese may infer that I consider what has passed in the north as an act of war, or as necessarily leading to a rupture of friendly relations; and, moreover, if they were to make a proper apology, and consent to receive me on becoming terms at Peking, I should not decline the overture: though I do not anticipate, after what has taken place, that they will make any proposal which I could accept as satisfactory.

"I do not think, therefore, that it would be desirable to make preparations in the south with a view to a campaign in the north, before knowing what her Majesty's Government will determine on that point; but it is obvious that we ought to be prepared for any contingency that may happen in Canton or its neighbourhood; and as your Excellency seems to think that your garrison requires to be reinforced, I will address his Excellency the Governor-General of India on the subject, and forward copies of your letters to Admiral Hope, with whom it rests to dispose of the transports alluded to."

The next letter is from Mr. Bruce to Lord Canning, reporting the Peiho catastrophe, and asking for a European regiment to be sent at once. The other two despatches are from Lord John Russell to Mr. Bruce, and we may call attention to the fourth paragraph in the first one, as coinciding with the opinion expressed in our issue of 17th October, which was as follows:—"Every expedient should have been resorted to, to avoid a collision, and waiting a reply from Tientsin was about the least he should have done. Supposing he had gained Peking by force of arms, could it be reasonably expected that the Emperor would, in an amicable manner, ratify a treaty after such proceedings?" This is the point on which the whole question should turn, and that our legislators should base their inquiry and discussion on, in the first place, and secondly to Mr. Bruce's subsequent action; and on this latter point, the correspondence with General van Straubenzee bears out the condemnation we passed on his supineness—and apparent incompetency to act after the great and unexpected defeat at the Peiho—in our issue of the 27th Sept. We then pointed out the almost insanity of allowing the revenue derived from our trade to fall into the hands of the Chinese, and thus provide them with the means of maintaining a belligerent attitude;—far better to have nipped their resources then, and avoided the now imminent rupture. The *Times*, in its last leader on this subject, which we subjoin, agrees with us

on Mr. Bruce's extraordinary opinions subsequent to the Peiho affair. There is no doubt that the leading journal adopted the most popular view on the conduct of the Chinese, and certainly to all persons not versed in their general character—a knowledge of which can only be obtained by a residence in China, and even then only by making it a study—their view of the case is the one calculated to have the most supporters. The public of course cannot be expected to examine the question for themselves, in all its minutiae, and form their own opinion. We have before stated that we are no apologists for the Chinese, but in this last rupture with them we are decidedly in the wrong through the indiscreet and rash acts of our plenipotentiary; and now Parliament is assembled, we do trust that the discussion will lead to the conviction that Mr. Bruce should be recalled and replaced by a known diplomatist unbiassed by any previous intimate connection with the affair, and prepared to treat the subject on his arrival in China accordingly. It cannot be expected that Mr. Bruce will do otherwise than lead us into hostilities.

The following are the despatches of Lord John Russell alluded to above:—

“Foreign-office, Oct. 29, 1859.

“From the terms of your despatch of the 10th August, I infer that at the time when you wrote it you thought it not improbable that the Chinese Government might shortly address to you some communication, with the view of inviting you to proceed to Peking for the exchange of the ratifications of the treaty of Tientsin.

“If any such proposal has been made to you, and if it be still unanswered when you receive this despatch, you will state in reply that you are not authorised to entertain it until the Chinese Government shall have made a formal apology for the act of the troops who fired on her Britannic Majesty's ships of war from the Takoo forts in June last.

“You will add, that her Majesty's Government require that, when you go to Peking for the exchange of the ratifications of the treaty, you shall proceed up the Peiho river to Tientsin in a British vessel, and that provision be made by the Chinese authorities for the conveyance of yourself and your suite with due honour from Tientsin to Peking.

“Should the assurances given to you by the Chinese Government on these heads be satisfactory, you will make arrangements for proceeding to Peking at the earliest period at which it may be safe and convenient for you to undertake the voyage. It will be proper that a naval force should accompany you to the mouth of the Peiho, and directions to that effect will be forwarded to Admiral Hope.

“Should you experience any unbecoming treatment, either at Peking, or on your journey to or from the capital, you will return to the Gulf, and place the matter in the hands of the naval Commander-in-Chief.

“You will take an early opportunity of apprising the ministers of the Emperor of China that, in consequence of the attempt made to obstruct your passage to Peking in June last, when you were proceeding thither to exchange the ratifications of the treaty of Tientsin, her Majesty's Government consider that the understanding entered into between the Earl of Elgin and the Imperial Commissioners Kweiliang and Hwashana, with respect to the residence of the British Minister in China, is at an end, and that it rests henceforward exclusively with her Majesty, by the terms of Article II. of the treaty of Tientsin, to decide, whether or not she shall instruct her Minister to take up his abode permanently at Peking.

“If, however, no pacific overtures shall have been addressed to you by the Chinese Government before the time when this despatch reaches you, you will, immediately on its receipt, communicate to the Prime Minister of the Emperor the demands of her Majesty's Government, as stated above, and inform him that, unless, within a period of 30 days from the date of your communication, you receive from him a reply conveying to you the Emperor's unqualified assent to these demands, the British naval and military authorities will proceed to adopt such measures as they may deem advisable for the purpose of compelling the Emperor of China to observe the engagements contracted for him by his plenipotentiaries at Tientsin, and approved by his Imperial edict of July, 1858.

“On grounds of humanity, her Majesty's Government would be desirous, if possible, to avoid the necessity of having to undertake military operations on a grand scale against the capital of the Chinese empire. They will learn, therefore, with satisfaction, that the measures which I have indicated have had the desired effect, and induced the Chinese Emperor to accede to the moderate terms which by this despatch you are instructed to offer for his acceptance.

“It is necessary, however, to be prepared for a different result, and it is the intention of her Majesty's Government to make such arrangements as will enable a considerable military force to be despatched from the South with the change of the monsoon, if it should be then requisite to undertake operations on land.

“I have only to add that it is not the intention of her Majesty's Government that you should consider yourself to be bound by your instructions to insist on a personal interview with the Emperor. It is essential that you should correspond on terms of equality with the chief officers of the empire, and that you should refuse to submit to any degrading ceremonial, either on the occasion of an audience with the Emperor, or on any other; but you will be guided by your own discretion, and in some degree by the practice of the representatives of other great Western Powers, in determining whether or not you will press the demand that the Emperor of China shall receive you in the only manner in which you could consent to be received, namely, with the forms which on such occasions are customary in the West.

“Foreign Office, Nov. 10, 1859.

“Sir,—Since my despatch of the 29th ultimo was written, I have received and laid before the Queen your despatch of the 3rd September.

“It appears by this despatch and its enclosures, that the Emperor of China now fully sanctions the resistance made by the forts at Takoo to the passage of her Majesty's ships up the river Peiho.

“He states that Takoo was fortified by his command, and that the

envoys of the different nations were told by Kweiliang and Hwashana, at Shanghai, that Takoo was so fortified, and that they must go round by Peh-tang.

“Now, although the denial of a passage to the capital by the usual and most convenient route would have been evidence of an unfriendly disposition, yet it was a matter upon which you might have remonstrated and negotiated, without having recourse to force to clear the passage.

“You say, however, with regard to these alleged warnings:—“These assertions are directly contrary to the truth, though I think it not improbable the commissioners may have represented the matter in this light to the Emperor. Neither in the letters that passed between the commissioners and the envoys, nor during the interviews Mr. Ward had with them, was a word said of defences at Takoo, nor was any allusion made to Peh-tang.

“Thus it appears that neither you nor M. Bourboulon received any warning; nay, when the Admiral arrived at the mouth of the Peiho, so far from having an intimation, from authority, that the passage of the envoys up the Peiho was to be resisted, he was assured that the fortifications were made by the militia of the country as a defence against pirates, and that a passage should be opened to allow of vessels proceeding by the river.

“The soldiers at the forts had, no doubt, ascertained the correct range of the palisades and stakes where the French and British vessels were certain to be stopped, and thus they had all the benefit of a prepared ambushade.

“Whether the Emperor was cognisant of this act, or whether it was directed by his officers, it is an outrage, for which the Chinese Government must be accounted responsible.

“Unless, therefore, the most ample apology should be promptly made, and the other demands specified in my previous despatch shall be complied with, you are instructed to state that a large pecuniary indemnity will be demanded by her Majesty's Government from that of China.”

COMMENTS OF THE PRESS.

The Emperor of China had little doubt about our being at war Lord John Russell had still less; but as for the officers immediately concerned and present on the spot, they were completely embarrassed, and could not tell how to take the matter. The first who moves is Sir Charles Van Straubenzee, commander of the garrison of Canton. He learns, “through the public press,” what has occurred at the Peiho, and, without waiting for more official intelligence, discreetly puts himself into communication with Mr. Bruce. He can perfectly understand that even the battle of the Peiho may possibly, as affairs go in China, be considered as no substantial breach of the peace, and he is prepared, therefore, so long as the Chinese “remain in a passive state,” to proceed as usual. All he asks for is a battalion or two by way of provision against emergencies. Mr. Bruce replies to these inquiries in a most pacific and magnanimous strain. He is ready to overlook all that has occurred, and is particularly anxious, indeed, to repudiate the attitude of an offended party; and he intimates that if the Chinese Government would but offer a proper apology, and consent to receive him at Peking on suitable terms, he would proceed on his mission, all collisions and conflicts to the contrary notwithstanding. Our fleet was so encumbered with the wounded at this very moment, that steamers could not be spared for the transport of troops, and all the kingdoms of the East were ringing with the news of our disaster, but Mr. Bruce was still ready to assume that nothing particular had happened if the Chinese should be of the same way of thinking. He remembered, no doubt, the great controversy of 1857, when it cost us a general election to determine a question of this very kind, and he was anxious “not to fetter the action of her Majesty's Government,” which might or might not regard the destruction of half-a-dozen men-of-war and 500 lives as an act of hostility on the part of the Chinese. But this philosophic serenity was rudely disturbed by Lord John Russell's despatch. We now understand, therefore, what were the “moderate demands” to which allusion was made in the Royal Speech, and we confess that, as far as the conditions themselves are concerned, they deserve the character ascribed to them. Less could hardly be exacted in reparation of so deliberate an injury. There is evidence to prove that the Chinese expected our flotilla at the mouth of the Peiho; that, instead of warning us off, they desired to entrap us into the ambushade they had prepared; and that all the incidents of the conflict were the results of forethought and scheming. We are free to own that we admire the language of Lord John in 1859 considerably more than his language two years earlier. There is nothing to be gained in such matters by vacillation or connivance. The Chinese, with all their barbarism, are quite astute enough to comprehend their position, nor do we see any evidence of ignorance or incapacity on the part of their Government.—*Times*.

It is important to remark in what light Mr. Bruce regarded the political consequences of the attack on our gunboats a few days after the event. Writing to General Straubenzee, on the 31st of July, he states that if the Chinese were to offer him an apology, and consent to receive him on proper terms at Peking, he should not decline the overture. Mr. Bruce thinks the Chinese Commissioners deceived the Emperor. However this may be, the Chinese Government must be held responsible for the act of its officers, and Lord John Russell therefore adds to his former instructions the direction to state to the Imperial authorities that, unless the most ample apology shall be promptly made, and all the demands already described shall be complied with, a large pecuniary indemnity will be demanded of China. There is nothing immoderate in these requirements, nothing which indicates the least desire to push matters to extremities. Firmness and a due regard for the dignity of this country are combined with humane consideration for the Chinese people. If the Court of Peking were not the blindest and most infatuated in the world, we might safely reckon on its prompt acceptance of the terms proposed.—*Daily News*.

Apology: if not apology, indemnity; if not indemnity, war. Such is, at this hour, the exact position of the Chinese question. The further official correspondence with Mr. Bruce, which we published on Wednesday, reveals the policy our Cabinet Councilors have resolved to adopt; and while these instructions do not alter our opinion that the Government has no wish to promote hostilities with China, they are yet of such a nature as to intimate that war may become inevitable, and we suppose it is for that reason that additional papers are given to the House from time to time, although the negotiations to which they refer are incomplete. It is, we think, time to make an appeal in this matter to Lord John Russell and other members of the Cabinet; and that appeal should be serious, earnest, and emphatic. There are the three links in the new chain of complication—apology, in-

demnity, war. It is war if not indemnity; it is indemnity if apology be not tendered.—*Star*.

Though Mr. Bruce could not be unacquainted with these characteristics of Chinese diplomatists, he seems to have inferred from all the antecedents of the Peking massacre that the Manchou Emperor and his courtiers had been guilty for once of sincerity in their negotiations. For coming to this conclusion even Metternich or Talleyrand would have pronounced him excusable. The Court of Peking had persevered so long in a pacific attitude, and had so much to lose and so little to gain by a fresh rupture with England, that a wanton breach of the peace of nations could hardly be looked for. When it had occurred, however, no immediate advantage of the rash and imprudent act could be taken by our representatives on the spot. Contrary to the maxims of that policy which should always be pursued in dealing with Asiatics, we had omitted to keep ready at hand troops sufficient to force their way into the capital, and extort at the bayonet's point the reparation which the Manchous invariably deny to justice. So circumstanced there was only one prudent course in which Mr. Bruce could proceed, and that he adopted. He threw no impediments in the way of a pacific solution of the difficulty, supposing the Chinese Government should seem inclined to pursue that course: neither did he threaten it with hostilities, but merely made a dignified statement to the effect that, under the circumstances which had arisen, he must apply for instructions from home. Meanwhile Canton, the southern capital, held in check by a very small garrison, might at any moment rouse its whole population against the handful of foreign soldiers and exterminate them. This probability presented itself to the somewhat opaque mind of General Van Straubenzee, who, in the complications which had arisen, wisely applied for instructions to Mr. Bruce.—*Daily Telegraph*.

MR. TARRANT'S CASE.—It is expected that this gentleman's imprisonment will be brought forward in Parliament in a few days. Nothing further has been elicited from the Colonial Office.

SINGAPORE.—The movement for placing this settlement under the Home Government is, at present, in *statu quo*.

CHINA AND JAPAN.—On the 7th inst. Mr. Laurence Oliphant delivered a lecture to the Philosophic and Literary Society at Leeds on "The Present State of our Relations with China and Japan." With reference to the China question, the lecturer remarked,—"There are one or two points upon which erroneous impressions seem to exist, which it would be desirable to remove. The first of these is, that the Chinese are never to be depended upon, and consistently break all treaty engagements. If this be really the case, it is manifestly absurd to make treaties with them, much more absurd to go to war to enforce these treaties. But I do not think that this view of the faithlessness of the Chinese character is borne out by the facts of the history of their intercourse with us. I believe that an impartial investigation into the circumstances connected with the various disputes which have arisen between our authorities and those of the Chinese Government, from the earliest periods of our intercourse with them, will show us that they have, as a general rule, been as little to blame, as we have, and without charging the Chinese with gross breaches of faith on the one hand, or our own authorities with culpable mismanagement on the other, we can perfectly account for these unfortunate misunderstandings when we take into consideration the total dissimilarity of the civilization, institutions, traditions, and race of the two nations thus brought into close and intimate contact with each other. It is difficult to say which would in the long run be most disastrous to our interests in that empire—a system of incessant and violent retaliation, or of consistent and unresenting submission to insult. It would appear that the happy medium consists in the moral pressure which a skilful and judicious diplomacy might exert, resting, however, upon a sufficient material force in reserve in case of need. Regret may be felt that the delicate questions involved in the right of a British Minister at Peking were not settled by a visit by Lord Elgin to the capital immediately after the negotiation of the Treaty of Tien-tsin. Circumstances, however, over which he had no control occurred to render it impossible for him to carry out the intention which he originally entertained of doing so, and thus it was left to Mr. Bruce to make the attempt under much less favourable conditions. Unfortunately, in making that attempt our arms sustained a defeat, and the point upon which public opinion is at this juncture somewhat divided is as to the propriety of undertaking hostile measures against China with a view of retrieving the position in that country which we have lost, and of enforcing the rights acquired in the treaty. Now, with reference to this latter point, I do not believe that the Chinese Government ever intended to deny our right of visiting the capital. The fact that they permitted the American Minister, who had no treaty right, to go there, proves this. In other words, they fully intended to keep the treaty, but, unfortunately, their ideas of how it was to be kept, differed materially from ours. With a people so ignorant and prejudiced as the Chinese, it is very doubtful now whether they will accept the alternative which is to be presented to them of making an apology, and receiving our Minister in a manner befitting his rank and the country he represents. It is possible, however, that they will be wise in time, and one good effect of sending out a much larger force than the exigencies of the case require may be to frighten them into good behaviour, and thus render further hostilities unnecessary. But if their recent success encourages them in their pride and obstinacy, it will be necessary to teach them by force, not that treaties are to be respected—of that they are perfectly aware—but that as a nation we are upon a footing of perfect equality with them, and entitled to consideration as such." The large room of the Stock Exchange was engaged for the lecture, as the hall of the Philosophical Society was incapable of accommodating the large audience.

SAN FRANCISCO AND JAPAN.—It is a subject of no little gratification that the port of San Francisco is rapidly becoming, if not already established as, the principal trading city between the civilised world and the long hermetically sealed Japanese empire. Already a most lucrative business has sprung up between us, and we justly deem ourselves the most favoured medium of commercial intercourse with Japan. No other city in the world, for the space of over two hundred years, has done so much immediate business with the Japanese as San Francisco. The growing and monetary importance of the Pacific coast, the influx of Chinese, with whom the people of Japan have ever maintained intimate commercial relations, our geographical

position in relation to the Japanese empire, and other like arguments, served to open the eyes of the government to the importance of this subject. Already several cargoes of the goods manufactured by these almost unknown people have reached our shores, and been disposed of at handsome profits; and there is no reason to doubt that the trade thus auspiciously opened will be greatly increased. Japan possesses many articles of the first importance which we greatly need, and we boast a great deal that is acceptable to their markets. Our intercourse is still in the bud of promise; it remains with us to bring it to full fruition. The arrival last night of two vessels from Japan—one laden with valuable and elegant goods—will give a tolerable idea of the already rapidly increasing commerce between San Francisco and that empire. The exciting news brought by the bark *Onward* is not aggravated by the intelligence received by the schooner *Page*. It is nevertheless clear that another and still more formidable expedition than that of Commodore Perry should at once be fitted out by our government. The Japanese, like the Chinese, regard us as barbarians; and, from the impunity of their former conduct towards the Portuguese and Dutch, evidently rank all other Christian nations upon a like footing. This disposition to underrate our power must be checked at all hazards. We are accredited as the key to the Japanese empire, and it will never do to let it slip from our grasp, or show ourselves unable to open and keep open the long-locked gates of Japanese exclusiveness.—*San Francisco Herald*.

THE CHINESE IN AUSTRALIA.—It is to the Chinese that the greatest of all the recent gold discoveries is due. The immigration-tax drove them to a surreptitious mode of entering the colony; and landing in Guichen Bay, in South Australia, and taking a course thence over the frontier across the Grampian ranges, they came upon a deposit of marvellous richness in the neighbourhood of Mount Ararat. In one of their first encampments, while picking up the roots of grass and prying for gold, they found the celebrated "Chinaman's hole," which yielded 3,000 ounces in a few hours. This led to the greatest "rush" which had ever been known at the gold-fields, for 60,000 people congregated there in a few weeks, and before a month had elapsed an immense town was systematically laid out, and shops, hotels, and restaurants arose, like the mystic trees of Indian jugglers; these were quickly followed by theatres, billiard and bagatelle-rooms, a daily mail, and a daily newspaper. Thus, within the space of two months, a wild mountain gorge was converted into a teeming city, where frontages were nearly as valuable as in the heart of London. It is believed that the golden "lead" is traceable all the way from Ararat to Avoca, a distance of sixty miles, through a country flanked by auriferous ranges.—*Australian and New Zealand Gazette*.

NEW REGULATIONS OF TRADE WITH JAPAN.

The *London Gazette* of the 10th inst. contains an Order in Council on this subject revoking that of the 3d of March, 1859, and laying down new rules for the regulation of such trade, which order is not to come into force until the day of its reception by the consul-general in Japan. The new order declares what construction shall be given to the word consul, and other terms which it may be requisite to use; that consuls shall have power to enforce treaties and establish regulations; that such regulations shall receive proper publicity, and penalties inflicted for infringing them, also setting forth the mode of proceeding in cases of violation of the treaty concluded with Japan; that the consuls shall take cognisance of offences other than those relating to the observance of treaties, and directs what penalties shall be inflicted in such cases; that the decisions of subordinate consular officers may be revised, and directing the manner of doing this; that appeals may be made in such cases; that in case of the escape of offenders from one consular district to another, they may be proceeded against in such latter district; that consuls are empowered, subject to appeal, to hear civil suits between British subjects in Japan and Japanese, or subjects of foreign states, notice to appeal to the consul-general to be given to the consul within fifteen days after decision; that consuls may also hear civil cases between British subjects, subject to an appeal to the consul-general, or in cases of importance to the Supreme Court of Hong-Kong; that it shall be lawful for consuls to summon assessors to assist them in their proceedings, and in case of their dissenting appeal may be made to the consul-general; that proceedings may be taken by distress or imprisonment to enforce their decisions; that in case of appeals no fresh evidence shall be laid before the consul-general unless fresh facts essential to be heard be brought forward; that in the examination of witnesses on oath it shall be done in such manner as such witnesses declare to be binding on their consciences; that British subjects being convicted of perjury in such suits may be punished; that suits may be settled by agreement or arbitration; that for crimes committed British subjects may be tried, and the mode of procedure is explained; that assessors may be summoned by consuls in such cases; that consuls may award deportations on second convictions, or in certain cases in first convictions, and consuls may require British subjects to give security to keep the peace; that persons sentenced may be sent to Hong-Kong for imprisonment, with other regulations respecting offences; the minutes of proceedings before consuls be drawn up and preserved; that trade of British subjects with Japan contrary to treaty is unlawful and punishable, and rules laid down in such cases; that consuls may grant probate and administer to intestate estates; and other necessary powers are given to consuls.

COOLIE EMIGRATION TO THE WEST INDIES.

In a late number we gave the regulations laid down by Mr. J. G. Austin, the Government Emigration Agent for the guidance of the Chinese desiring to emigrate to the West Indies. We now subjoin the "Articles of Agreement" in full:—

Articles of Agreement, made this _____ day of _____, in the year of the Christian Era _____, being the _____ day of the _____ month of the _____ year of the reign of Hienfung, according to the Chinese Imperial Calendar, between [A], native of China, of the one part, and John Gardiner Austin, special agent of the British Government for the regulating and encouragement of emigration from China to the British West Indies, of the other part, as follows:—The said A, in consideration of the covenants

and stipulations hereinafter entered into by the said J. G. Austin, doth hereby promise and agree to and with the said J. G. Austin, his executors, administrators, and assigns, in manner and form following, that is to say:—

1. That he, the said A, shall and will, so soon as he shall be required by the said J. G. Austin, embark on board the British ship [B], now lying at anchor and bound for the colony of British Guiana, and remain on board the said ship henceforward until she proceeds to sea, and shall then proceed as a passenger on board the said ship to British Guiana aforesaid, for the purpose of carrying out the stipulations hereinafter contained on the part of the said A.

2. That the said A shall and will from time to time, and at all times during the term of five years, to be computed from the day of the date of the arrival of the said ship B in the said colony of British Guiana, well, faithfully, and diligently, and according to the best of his skill and ability, work and serve as an agricultural labourer in the said colony of British Guiana, according to the provisions hereinafter contained.

3. That the said A shall and will work as such labourer as aforesaid for the space of seven hours and a half of each day during the aforesaid term of five years, on such estate as may be pointed out by the Governor of the said colony of British Guiana, with a reservation of not less than five days to be set apart during each year as holidays at the China New Year by the said Governor, and of every Sabbath day. And in consideration of the agreement herein contained on the part of the said A the said J. G. Austin hereby promises and agrees to and with the said A in manner following that is to say:—

4. That the said J. G. Austin shall provide the said A with a free passage to the said colony of British Guiana, and shall supply him gratuitously with such food and clothing as may be necessary for the voyage.

5. That so long as the said A shall continue and be employed as such agricultural labourer as aforesaid, and perform the agreements on his part hereinbefore contained, he the said J. G. Austin shall well and truly pay or cause to be paid to the said A wages at the rate of four dollars per calendar month, and shall provide or cause to be provided for the said A during the same service, food, house, garden ground, and medical attendance, all free of expense to the said A. Provided always, and it is hereby agreed, that it shall be at the option of the said A, at any time within twelve months of his arrival in the said colony of British Guiana, to elect to be paid for his services by the task, in the same way as all labourers not under special contract for service for terms of years in the said colony; and that in the event of the said A electing to be paid as last hereinbefore mentioned, then and in such case the said A shall not be entitled to receive food, but house, garden ground, and medical attendance shall still be furnished to him free of charge.

6. That the said J. G. Austin shall, on demand of the said A, so soon as he shall embark on board the said ship B for the purpose of carrying out the terms of this agreement, make an advance on account of wages to the said A to the extent of dollars, shall pay or cause to be paid monthly to the assigns or nominees of the said A in China, one part of the wages to be earned by the said A in the said colony of British Guiana, the first payment to be made on the day of the date of the embarkation of the said A on board the said ship B. Provided always and it is hereby agreed that any sum so advanced to the said A as aforesaid shall be stopped or deducted out of the wages to be earned by the said A, at the rate of one dollar per month, and that any payments so made as aforesaid monthly to the assigns or nominees of the said A in China, shall be stopped or deducted in equal amounts monthly from the wages to be earned by the said A.

7. That the said A shall be at liberty to determine this agreement at the expiration of the first or any subsequent year of its subsistence, upon payment of a sum of money equal to the cost of his passage from China to the said colony of British Guiana, namely, seventy-five dollars, subject to a deduction of one-fifth of the said amount for and in respect of each year during which the said A shall have served as such agricultural labourer as aforesaid, under the terms of this agreement.

8. That the said J. G. Austin shall provide or cause to be provided for the said A, during such period as he continue to serve under the terms of this agreement, with the means of corresponding monthly, free of expense, with his relatives in China, and of remitting money to them.

This done in duplicate , each of the parties aforesaid retaining one copy , at , on the day of , in the year of our Lord 18 , in the presence of the undersigned, who declare that this contract has been signed willingly and with full knowledge of its contents by the said .

Emigration Officer.

Received an advance of twenty dollars on account of wages, and a gratuity of dollars for wife and children.

SIR JOHN BOWRING IN PARIS.

Sir John Bowring had an interview with the Emperor, and, at a meeting of the society of political economists at which he was present, was requested by the chairman (M. Passy) to give an account of the results of the free-trade policy of Great Britain as they have operated on the social, agricultural, manufacturing, and commercial interests of the State. Sir John brought forward some striking facts, exhibiting the enormous increase of the national wealth, the advance of wages in all the departments of industry, the diminution of crime, the lessening of the poor-rates, and the progress and prosperity of every class of citizens. He drew a picture of the alarms and menaces which preceded the introduction of free-trade, the manner in which the denunciations of the prophets of evil had been disproved by the extraordinary benefits which the emancipation of trade had conferred on the community; increased consumption, and increased profits; a general content, and a universal conviction that the truths of political economy are as beneficent in their influences as they are unanswerable in their logical conclusions. The state of the silk-trade (the trade which certainly has most to fear from French competition, as France has so undoubted a superiority in taste and fashion) was much dilated on. The increase in the exports of silk manufactures from Great Britain, which were only about 300,000*l.* sterling per annum under the protective system

had now reached 2,600,000*l.*, and had been accompanied by an incredible extension of well-being and enjoyment amongst the operatives, whose wages had doubled during the last thirty years. A long and animated debate followed the statement, and it seemed generally acknowledged that nothing but the clear vision and firm purpose of the Emperor would have subdued the resistance of the Protectionist party; but there was an almost unanimous expression of opinion that no country would in the end more greatly benefit by the adoption of free-trade legislation than France herself.

Literature.

Twelve Years in China. By John Searth, Esq. Thomas Constable and Co., Edinburgh.

This volume, which has been anonymously announced as authored by a "British resident," it appears by a prefatory notice is the production of Mr. Searth, a well-known British merchant in China. We are glad to observe the tribute he pays to the conduct of Admiral Seymour. His views in some respects run counter to Sir John Bowring's and Mr. Oliphant's. He condemns the constant wars we are involved in with China. Notwithstanding the large number of books which have lately appeared on China, we can see much valuable and interesting experience of China, the Chinese, their arts, manufactures, and social condition, and the illustrative sketches by the author are of great value to the reader. We must reserve further comment until our next, the book having only just reached us.

The Hsin Ching lu; or, Book of Experiments. By T. F. WADE, Esq., Chinese Secretary. Hong Kong. 1859.

Now that our connection with China is every day becoming closer, and the natural course of events is leading us northwards towards Peking, the appearance of a work like the *Hsin Ching lu*—practical studies in the Peking dialect—is of immense importance. Apart from the value of the materials which this book contains for the mere student of the language, there is much to interest the inquirer into the institutions of the Chinese, as well as those in search of philological and ethnographical notes. The title—which we suppose to have been invented for the book, and which does not, as some may suppose, imply the translation of a native work—is peculiarly appropriate: it signifies "The Record of seeking a ford," or a royal road—an easy method of learning this most difficult tongue. And, indeed, of all languages the Chinese is that one, we should say, which most needs the guiding hand of a master. A student may plunge into its depths and find himself well-nigh overwhelmed, but a prudent word of counsel may guide his steps ever onwards with a cheering sense of success. To be effective, however, this direction must come from one having authority—one who has himself trod the path and who knows the way. We cannot but rejoice, therefore, to see a work by so diligent a student and master as the author of the present work. Whether the book quite comes up to the anticipation to which the title gives rise—of proving a "ford" to those who enter upon this hard task—we may be permitted to doubt; while at the same time it cannot be denied that, as "contributions to the study of Chinese," the book is invaluable, containing, as it does, so large an amount of matter, with explanatory notes. The fact of its being the first work on the pure dialect of Peking that has appeared, invests it with great interest, and the excellent advice which Mr. Wade offers upon the cultivation of the language, and more especially the pronunciation. He impresses upon the student the importance of speaking well in the first place, in order that he may make the most advantage of "those ill-paid Chinese teachers, who, though often poor and mean-looking, are perfect mines of literary wealth." The fellow-labourers with Mr. Wade in the preparation of this work appear to have been scholars from the capital of China itself; and thus there is presented to the student a collection of about 400 passages in *bona fide* Pekinese. The attention which this book will call forth to the peculiar intonations required in speaking cannot be overlooked; and though, with respect to the system of representing Chinese sounds with Roman letters, we should differ from our author in some minor points, we feel much gratification in recommending the work to the earnest attention of those intending to acquire Chinese.

Narrative of Lord Elgin's Mission to China and Japan. By LAURENCE OLIPHANT, Esq. William Blackwood and Sons, London and Edinburgh.

Every event in modern days has its historian, no matter how far the scene of action may be, or the insalubrity of its climate.

So it is with the book now before us. Whether the late ambassador, Lord Elgin, had any idea of this nature floating in his mind when he appointed the author of this work his private secretary, we know not, but certain it is he made a very happy selection in Mr. Oliphant, for, besides having been a great traveller, and therefore the more likely to be unprejudiced, he was already known to literature, and from his position, first as private secretary, and, on the Hon. Mr. Bruce's return to England with the treaty of Tien-tsin, as secretary to the mission, he had the very best opportunity of gathering information. In perusing Mr. Oliphant's work, therefore, we were prepared to find a clear, faithful, and dispassionate "Narrative of Lord Elgin's Mission to China and Japan." Although the book throughout is pervaded by a slight spice of *badinage*, it is truthful and unexaggerated. Further, Mr. Oliphant himself is an able draughtsman, and to his pencil we are indebted for many of the engravings. We cannot, however, praise the manner in which they have been lithographed. In one particular only are we disposed to be at issue with Mr. Oliphant, and that is, that throughout the two volumes he appears to censure Sir Michael Seymour for delay, and even irresolution, particularly with reference to his not having sent the gunboats which Lord Elgin had demanded, or made his appearance himself in the north as soon as the members of the mission anticipated. Now, with all deference to the author, we do think that in this respect Mr. Oliphant judges hastily, for, when we take into consideration the very unsettled state of affairs at Canton, the frequent repairs required by the gunboats, the difficulty of procuring sufficient coal for them, and the adverse monsoon, and further, that the admiral's flagship, the *Calcutta*, was a heavy sailing vessel, and the numerous matters requiring the admiral's presence in the south, we are disposed most fully to acquit the gallant officer of any hesitation or wilful delay; and we are the more fortified in our opinion when we remember the admiral's acknowledged zeal and efficiency, and even *empressement* for the service. We may even go further, and say that, had the admiral started the vessels sooner than he did, he would in all probability have had them putting back to Hong Kong, or perhaps driven to leeward as far as Manila. In a word, he exercised the same prudence and foresight in this as in all his operations, and, as a correspondent lately attested, it was to that that the foreign residents in Canton and Hong Kong owed their very lives. We can almost pardon the expression of disappointment at the time that Lord Elgin was so thwarted and kept idle at Shanghai and the Gulf of Pechili, "waiting for the gunboats;" but to reproduce those occurrences after the lapse of nearly two years is a blemish on the author's able work. It is tolerably well known, too, that Lord Elgin has subsequently admitted his regret that he penned the condemnatory despatch on Sir Michael; and we affirm that, but for the able and successful manner in which Lord Elgin was seconded in the military part of his mission, he would not have procured a treaty worth having.

The China Question.

A very able pamphlet has just been published. It is written in a lucid style and temperate tone, and gives a *resumé* of the late events in China. It is evidently written by an American; we are disposed to think by an eminent diplomatist lately in the East—indeed by Mr. Reed himself.

On the Peiho disaster, the writer says:—

"Never before has such provocation been given to the evil impulses of our civilised and Christianised nature, as at the forts of the Peiho in June last. It is exasperated by a consciousness of mistake all round—in statesmanship at home, if the instructions were peremptory; in diplomacy abroad, if discretion was unwisely exercised; and in the executive skill and tact of the parties."

And again:—

"All these particulars combine to form a provocation by these Oriental heathens, such as has never been given before, and in comparison with which the petty indignities—the burning of opium chests and the tearing up of a plenipotentiary in the Canton factories—which lighted up a war twenty years ago, are as nothing."

Lord Palmerston's rumoured warlike tendency is apparently considered by the writer as one cause of our present difficulty.

"The controlling spirit directing England's foreign policy was the same in 1839, in 1850, in 1855, in 1857, and in 1859. Lord Palmerston was Foreign Secretary when the opium war broke out; when the Piræus was blockaded; when the Outram armament, with its train of military suicides, assailed Persia; when Oude was annexed; when the Arrow outrage was avenged; and is now Prime Minister, when a new war against China is initiated."

Births, Marriages, and Deaths.

BIRTHS.

- ADAMS—At Surbiton, on the 5th inst., the wife of F. Adams, Esq., of a daughter, still-born.
 STRACHAN—On the 6th inst., at 4, Vicarage-gardens, Kensington, the wife of George Strachan, Esq., of Hong Kong, of a son.
 TOWNSEND—On the 3rd inst., at 11, Burlington-street, Bath, the wife of Lieutenant John Townsend, R.N., of a son.
 SMITH—On the 28th ult., at Stodham House, near Petersfield, the wife of J. Mackrill Smith, Esq., of a son.
 SPENCER—On the 30th ult., at 16, Bridgewater-square, London, the wife of Robert Spencer, jun., Esq., of a daughter.
 LITTLE—At Masham, Yorkshire, on the 2nd inst., the wife of John Martin Little, Esq., of Singapore, of a son.
 CURLING—On the 31st Jan., at 14, Maidal Hill West, the wife of William Curling, Esq., Commander of the Peninsular and Oriental Company's steamship *Candia*, of a son.
 HILL—On the 12th inst., at 28, Hereford-road North, Payswater, the wife of Norman Hill, Esq., of a daughter.
 GRIBBLE—On the 13th inst., the wife of Thomas Gribble, Esq., of a daughter.
 CAINE—At Hong Kong, on the 19th December, the wife of G. W. Caine, Esq., H.M. Consular Service, of a son.

MARRIAGES.

- COPLAND-FORBES—On the 20th December, at St. Giles's, Camberwell, by the Rev. M. S. Eigell, B.A., Patrick, second son of Charles Copland, Esq., A.M., of South Villa, Kennington Oval, and grandson of the late Patrick Copland, LL.D., of Marischal College, Aberdeen, to Louisa Charlotte, second daughter of the late John Forbes, Esq., of Shacklewell and Great St. Helen's.
 HARLAND-WANN—On the 26th ult., at Malene Church, Belfast, by the Rev. Wm. McIlwaine, E. J. Harland, Esq., to Rosa Matilda, eldest daughter of Thomas Wann, Esq., Manager of the Belfast Bank.
 MONTEFIORE-SICHEL—On the 1st inst., J. M. Montefiore, Esq., of Great Stanhope-street, to Henriette Sichel, daughter of Monsieur Solomon Sichel, of the Hague.
 SAINTON-DOLBY—On the 4th inst., at the French Ambassador's Chapel, and afterwards at St. George's, Hanover-square, Prosper Sainton, Esq., of 6, Davies-street, Berkeley-square, to Charlotte Helen Dolby, of 2, Hind-street, Manchester-square.

DEATHS.

- MEESON—On the 30th May, 1859, drowned at sea, on the voyage to Singapore, aged 19, Gordon, the youngest son of the late Richard Meeson, Esq., of Rettendon, Essex, and of Mrs. Meeson, 26, Leighton-grove, Kentish Town.
 MOORSOM—On the 4th inst., at 6, Vernon-terrace, Brighton, Capt. William Moorsom, R.N., C.B., in his 44th year.
 NYE—In Brooklyn, on Saturday, Jan. 14, E. Emmie W., daughter of Gideon Nye, jun., of Canton, China.
 HART—At Manila, on the 13th December, William Hart (son of the late William Hart, Notary Public, San Francisco), for some years resident at Manila, and formerly of San Francisco.
 COLEMAN—At Spring-gardens, Hong Kong, on the 16th December, of fever, John S. F. Coleman, aged 29 years.
 SINGER—At Hong Kong, on the 17th December, at the residence of David Sassoon, Sons, and Co., Barnett Singer, late of Melbourne, aged 21 years.
 HEATON—At Hong Kong, on the 22nd December, Margaret, wife of Captain G. H. Heaton, Government Surveyor.
 MILNER—At Macao, on the 25th December, Major Joaquim Manoel Milner, Knight Commander of the Order of Christ, and former Director of the Portuguese Factory at Surat, aged 68 years.
 SOEST.—At Tanglin, Singapore, on the 30th December, Leendert Van Soest, Esq.

London Gazettes.

The Queen has been pleased to appoint William Henry Adams (Attorney-General), and William Hepburn Rennie (Auditor-General), Esqrs., to be Members of the Legislative Council of the Island of Hongkong. Also Frederick William Green, Esq., while executing the duties of Attorney-General for that island.

Monetary and Commercial.

The amount of specie by the last mail was 258,619*l.*, of which 25,086*l.* is gold and the rest silver. For Alexandria, gold, 7,950*l.*; Calcutta, silver, 105,020*l.*, and gold, 6,100*l.*; Madras, gold, 3,966*l.*; Ceylon, gold, 1,200*l.*; Hong Kong, silver, 73,598*l.*, and gold, 5,870*l.*; Foo-choo-foo, silver, 965*l.*; and Shanghai, silver, 53,950*l.*

The Red Sea Telegraph Company received, on the 9th inst., the following telegram:—

"Line from Kurrachee to Muscat laid with perfect success on the 17th of January. Newall started from Muscat (to lay the line to Aden) on the 21st."

The distance from Kurrachee to Muscat is about 458 nautical miles. The next section, from Muscat to Hallani, will be 490 miles; and the third, from Hallani to Aden, 730 miles. Should the submersion of the cable be unattended with mishap, it is hoped that the line from Aden to Kurrachee will be

thrown open for public use in about six weeks' time. There will then be uninterrupted telegraphic communication between Alexandria and all parts of India. The cable has one conducting wire.

The annual general meeting of the China Tea Company (limited) took place, when the report and accounts were received, a dividend of six per cent. having been agreed to.

A meeting of the Mediterranean Extension Telegraph Company has been held. The report stated that the line between Malta and Sicily has been successfully laid, and is now in perfect working order. The attempt to restore communication between Malta and Cagliari has been abandoned for the present, and part of the cable is used for a second Sicilian line to Marsala. The Corfu telegraph ceased working in August, the fault appearing to be about twenty-four miles from Corfu, and is still out of repair. The Government have consented that the guaranteed interest on the company's capital be divided into two portions, of which one shall be payable for telegraphic communication between Malta and the Continental system, and the other for communication between Malta and Corfu. The directors do not recommend, in the present financial position of the company, the declaration of a dividend, either on the original or preference shares.

Messrs. Ashton and Co., in a letter to the editor of the *Times*, complain of the irregularity of messages between this country, Marseilles, and Malta, one case being as follows:—"On the afternoon of the 10th of December last a message was sent to us by our agent at Malta, intended to anticipate the China mail which arrived on the 15th, whereas the message did not reach us till the 17th, two days after the delivery of the letters." This is certainly poor encouragement for using the telegraphic line.

According to the statement of the Chancellor of Exchequer, when bringing forward the budget on the 9th inst., it is intended to renew the duties imposed on tea and sugar for the purposes of the Russian war. The credit asked on account of the third Chinese war is £500,000.

ARTICLES OF IMPORT.

TEA.—Good common Congou has met with a steady demand, and the price has advanced to 1s 5½d. to 1s 5½d. per lb, which is the present quotation. Low grades have been readily taken at a proportionate advance. Old Flavoury Congou has been sold to a fair extent up to 1s 7d. per lb., but a few at the recent public sales sold about ½d. per lb. lower. The new imports of these descriptions have been taken very freely at a rise of 2d. per lb. Fair to good Ho Hwa and Ning Chows also show a similar rise, and the sales have been large. Minings and Wopaks have been more in demand than for some time past, and prices show a further improvement of 1d. per lb. Tayshans have sold freely at advanced rates. Oolons and Souchongs show no material alteration, with the exception of the commoner kinds, which have participated in the general advance. Flowery Pekes have met with rather more inquiry, and there is some improvement from the recent extreme depression. In scented teas there has been a large business. The commoner kinds of Caper have been bought speculatively at 1s 2d. to 1s 4d., the finer kinds being in request at full prices for consumption. Common fair Orange Pekoe shows an advance of ¼d. to 2d. per lb, whilst good and fine have been more saleable at rather better prices. Young Hysons have been in great demand, and on these we quote an advance of 1½d. per lb. for the plum kinds. Taiping Gunpowders have sold from 1s 6d. to 1s 10d., in half chests, and 1s 11d. to 2s 2d. in 10 catty boxes. Ping Sueys have sold to a considerable extent, both in half chests and boxes, at former prices. Hysons under 2s. per lb. have been wanted. Canton Young Hysons show an advance of 1d. to 1½d. per lb. Fair to good Canton make Gunpowders are also in request at full prices. There have been four public sales, comprising 62,000 packages tea, of which 24,500 were sold; 2,700 being Assam teas, and 11,200 packages offered without reserve. The stock of black on the 1st inst. was 61,484,000 lbs. against 66,573,000 last year, and 76,256,000 in 1858.

SILK.—We have to report a quiet market in silk, home consumers decidedly restricting their purchases in consequence of their inability to make progress in the sale of manufactured goods, and foreigners still holding off as determinedly as ever, notwithstanding the prospect of their being able to send in goods to this country free of duty. It may be that when the uncertainty is at an end, we may find both classes of buyers more disposed for business; in the meantime the high range of prices of the raw material, if not decidedly checking actual consumption, has a most repressing influence

upon the enterprise of all manufacturers, both here and on the Continent. In China silk the arrivals have been tolerably large, viz., 5,905 bales; but the idea that the total export will prove scarcely equal to European requirements makes importers very firm. Chinese thrown silk remains heavy and depressed, a forced sale or two at the end of the month having failed to produce any increased demand. Japan silks are getting into favour, and a large business is expected in a few months.

The sold stock on the 1st inst. was 6,336 bales of Shanghai, 1,005 Canton, and 902 Thrown, against 8,138, 1,115, and 454 at same period last year. Of unsold stock, 8,266 Shanghai, 1,241 Canton, and 2,194 Thrown, against 11,275, 1,136, and 393 at corresponding period last year.

COTTON.—A good demand has prevailed, and a fair amount of business has been transacted. In a few sales an eighth has been obtained. Surat, 4½ to 5½; Dhollerah, 4d. and 5d.; Oumraivatte, 3½ to 5; Compta, 3½ to 4½; Shawgna, 4½ to 5½; Northern and Western, 3½ to 4½; Tinney, 4½ to 5½.

TIN.—A few small parcels of Banca have been sold at 137s. Straits, 131s. 6d. to 132s.

RICE.—Oppositions have been much contracted, and lower prices have in some instances been submitted to. Low to good middling white Bengal 9s. 6d. to 11s. 6d., good and fine 12s. to 13s. 9d., Ballam (lately) 9s. 6d. to 10s., Madras 9s. 6d. to 9s. 9d.; ordinary old to good Rangoon 7s. 6d. to 9s. 7½d., good old Neezanze 9s. 3d. to 9s. 6d., common new 9s. 7½d., old Mo lmein 7s. 10½d., fair old Bassei 8s. 7½d., and Java low to good middling white 10s. 3d. to 12s., good 12s. 6d. to 13s. 3d.

SAGO.—Fine small has brought stiff prices. 2,000 boxes Borneo make 20s. to 21s., common to a small and medium 16s. to 17s., fair large 16s. to 16s. 6d. Sago flour has been neglected.

COFFEE.—The public sales, which have been numerous and extensive, consist principally of pale and Mocha. In the trifling transactions that have taken place, advanced rates have been obtained. Other East India kinds have gone off similarly to those of Plantation Ceylon: good and fine qualities with spirit at stiff rates, but inferior sorts heavily, and rather cheaper.

SPICE.—The market has recently assumed a languid tone, pending introduction of the Budget. There is little change in our quotation. Clayed Manila, only reduced offers have been obtainable, and this description being held firmly, scarce by anything has transpired; unclayed has been dealt in to a fair extent at our previous quotations. The Siam at public sale consisting of strong refining qualities, has been taken at enhanced prices. In Java, a good amount of business has been transacted both on the spot and afloat, mostly at full prices, excepting some parcels to arrive from Holland, which were sold cheap. Penang good to fine, fine brown, 35s. 6d. to 38s. Low and mid yellow, 38s. 6d. to 40s. 6d. Good mid to good, 41s. to 42s. 6d. One lot fine, 43s. Manila clayed, 39s. 6d. to 40s. 6d. Gurattah date, 40s. to 45s.; Java, at 45s. 6d.; a few strong grey, 41s. to 43s.

PEPPER.—The market for this article has had an upward tendency, and considerable purchases have been made. Quotations are ½d. to 1d. per lb. higher. Singapore, 8,000 bags, grey to very good black 4½d. to 4½d., and 1,200 bags, for arrival, at 4½d. to 4 5-16d.; also 500 bags Penang (dusty Trang kind), at 4½d. to 4½d., and common brown 4½d. to 4 3-16d.; 600 large fair to good Travincore at 5d. to 5½d.; and 1,500 bags Malabar, good heavy 5½d. to 5½d., light 4½d. to 4½d. In White Pepper there has been a material advance, Singapore, which previously sold at 6½d., advancing rapidly to 7d. to 7½d., and for arrival 7d., a so common to good bold Penang at from 6½d. to 7½d. This activity, however, was of short duration, and these rates are no longer obtainable, the business latterly being of trifling amount.

JAPAN WAX.—The market still remains at 64s. 6d. to 65s. There has been no sale since our last.

HEMP.—Manilla still continues to find a dull and drooping market, and of 2,000 bales at auction, 600 were afterwards disposed of at a further decline, viz., fair average roping at 22½.

RUM.—Bat India has been in some request, and about 800 casks have been realized, Penang, Mauritius, and Madras, at 1s 7d. to 1s 7½d.

TOBACCO.—Manilla tobacco is much looked after, and prices are very high. Average parcels of Cagayan would sell readily at 16s. to 17s. per lb. Ylolo, usual assortments, 10d. to 11d. Segars, No. 2, 5s. 3d. to 5s. 9d.; No. 3, 6s. 6d. to 7s. East India tobacco, about 5,000, sold at 2d. to 2½d. Santoway tobacco, 4½d. to 5½d.

ARTICLES OF EXPORT.

IRON.—Staffordshire cold blast, 4½ 10s.; best native hydrate pigs, 3½ 15s. to 4½ 2s. 6d.; first-class all mine grey forge pigs, 3½ 10s. to 3½ 15s.; good mine pigs, with a modicum of fine cinder, 3½ to 3½ 5s.; mine pigs, deteriorated by cinder, 2½ 15s. to 3½ 2s. 6d.; grey forge cinder pig iron, 2½ 15s. to 2½ 17s. 6d. White forge cinder pig, 2½ 10s. to 2½ 15s. Melters, Nos. 1, 2, and 3, 2½ 17s. 6d. to 3½ 2s. 6d.; superior makes of all mine melting, iron, 3½ 10s. to 4½, according to make and quality. The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7½ 10s., at the works; best bars, 8½ 10s.; sheets, 9½; doubles, 10½ 10s.; nail sheets, 8½ 10s.; Latin, 12½; boiler plates, 9½; best and best best in proportion; common rods, 7½ 10s.; hoops, 8½ 10s.; gas strip, 8½; Canada plates, 12½; and all other sorts in proportion.

COPPER.—Fixed rates continue to be maintained. One or two small lots have been disposed of at a shade easier. The late sales exhibit the standard less firm, and indeed declining. Several parcels of foreign copper have changed hands, say Burra Burra, 118½ to 118½ 10s. on the spot, and one parcel same brand arrive at 119½. Copper sheet and sheathing, 13d. per lb.; old, 11½d.; yellow metal sheathing, 11½d.; tough cake, 117½ per ton; tile, 117½; best selected, 120½; Burra Burra, 118½ to 119½.

TIN.—A reduction has taken place. Prices now are, English block per cwt., 136s. bar, 137s.; refined, 138s.

TIN PLATES.—Tin plates are dull, and prices rather weaker. The best charcoal I.C. 32s. to 33s.; second quality, 30s. to 31s. 6d.

LEAD.—There is a large business doing. The Russian Government and our own Ordnance are buying largely. The late advance is well maintained. English, 22l. 10s. to 23l.; Spanish, soft, 22l. 5s.; shot, patent, 26l.; sheet, 23l. 5s. to 23l. 10s.; white, 30s.

SPELTER.—Market is quiet at 21l. 5s. to 21l. 10s.; stock, 3,742 tons, which, being a decrease on the yearly average, would signify a probable advance in price.

SALT.—White, common, 7s. per ton; butter, 8s. 6d.; stoved, 10s.; handed, 11s.; bagged, 13s.; rock, Prussian, 3s.; large lumps, 3s. 3d. to 5s.; and Irish ditto, 3s. 6d. to 4s. 6d. To these prices 3s. per ton for lighterage must be added.

COMMERCIAL POSTSCRIPT.

SATURDAY AFTERNOON.

The important arrangements of the Government with regard to the commercial operations promulgated in Mr. Gladstone's budget, have much engaged the attention of the mercantile community.

SILK.—The quantity offered at the public sales was 1,054 bales Bengal, and 7,329 bales China, and 542 bales Japan. All passed without biddings, as usual, and we cannot even report "fair business by private contract." The market is still very quiet, and the feeling is aggravated in some degree by the proposed abolition of duty upon foreign manufactured goods. The Japan silk has attracted considerable attention, and the finest and better classes have been sold at 24s. 6d. to 26s. 6d. per lb.; some even at 28s.

TEA.—There is no change in the market, everything remaining very quiet at quotations. The budget affecting contracts, warrants, &c., has drawn forth strong demonstrations, and a committee has been formed to take action, in order to arrive at some modifications. The effect of the advices by the mails just delivered is not yet perceptible, nor is it anticipated there will be any important change.

ARRIVALS NOT INCLUDED IN TABLE.—Feb. 8, at Schelde, from Batavia, Philotaxe; Jan. 25, at Boston, from Manila, Asterion; 24, at New York, from Canton, Storm King; 29, from Shanghai, Pampero; 30, from Foo Chow Foo, Nightingale; 31, from Shanghai; Windward Feb. 8, at Helvoet, from Batavia, Vyf Vrienden; 10, at London, from Hong Kong, Ocean Bride; at Portsmouth, Susannah; 14, at Dartmouth, from Macao, Wilhelmine Bexdixen, leaky, and with both masts sprung—she has been surveyed and recommended to discharge; 11, at Dublin, from Canton, Valdivia; off Dungeness, from Batavia, Wilhelmine van Dale; 14, off Penzance, from Shanghai, Wynaud; 15, at Plymouth, from Batavia, Drie Vienden; off Scilly, from China, Kelso.

DEPARTURES.—February 9, from London for Hong Kong, Robin Hood; 10 for Shanghai, Neville; 11 for Hong Kong and Canton, Flying Cloud; 9 from off Dover for Batavia, Henrietta; 8 from Sunderland for Hong Kong, Catharina Geertruida; 14 from Liverpool for Batavia and Sourabaya, Brigitte Melchior; 10 from off Portsmouth for Batavia, Margaretha Simonetta; 12 from Liverpool for Woosung, British Empire; 10 from Shields for Batavia, Guinea; 11 for Shanghai, Glencoe; 10 from off Torbay for Singapore, Germanie; 17 from London, in ballast, for Sunderland and Hong Kong, Sarah Scott; 10 from Cardiff for Shanghai, Giovanni; from Grimsby, for Macassar, Ulysses; 13 from Liverpool for Hong Kong, Romeo; from Cardiff for Singapore, Haamstede; 12 for Hong Kong, Flying Scud, for Singapore, Johanna Maria Christine; 14 from Newport for Singapore, Darmstadter Bank; 15 from

London for Hong Kong, Euphrates; 13 from off Beachy Head, for Batavia, Gouverneur van Swieten; from off Dungeness, Prins Fredrik der Nederlanden; 14 from Cardiff for Singapore, Resident v. Son; 16 from Liverpool for Woosung, Bald Eagle; 15 from Falmouth for Singapore, Eliza Hands; from Algiras for Singapore, Michael Montaigne.

LAID ON.—At Liverpool, for Shanghai, Cambala, Japanese, Queen of May, for Woosung; Kit Carson, Carrington, for Hong Kong; Veronica, for Hong Kong and Whampoa; Jessie Beazley, for Batavia and Singapore; Sarah Huntley, for Batavia and Sourabaya; Albert Borsig, for Batavia; Caesar, for Singapore Anglia. At Glasgow for Singapore, Juliet; for Singapore and Penang, Three Bells; for Batavia and Sourabaya, Leven.

The Earl of Malmesbury has withdrawn the notice mentioned in our Parliamentary intelligence.

FOREIGN COMMERCIAL REPORT.

LONDON, Feb. 18, 1869.

The mails to hand this morning bring but little commercial intelligence; but from Japan we are advised of a stoppage of trade at Kanagawa on the everlasting question of currency. It appears that foreigners in their demands for the native currency, the *Itibou* came to high words with the authorities, and an appeal being made to the British Consul, General Alcock, residing at Yedo, he issued a circular on the subject, which we give elsewhere. This subject was fully discussed in our last issue, showing the large profits made on Japanese gold when exported to Shanghai, which is the real cause of all the trouble, and up to the present we see no plan marked out for a remedy. The consequences are very injurious to our friendly relations, and we trust the next mail will bring accounts of a plan to obviate the difficulties.

The port of Swatow was to be formally opened on the 1st of January, under the American treaty, the British also joining under the favoured nation-clause in this movement. It is announced that the duties will be collected under inspectorship, as at Canton.

The inspectors at Canton, it is alleged, have been the means of driving away a large portion of the trade. Business is, however, invariably slack when rice is, as at present, scarce, and at, of course, enhanced rates. The scarcity, however, is more prospective than real.

The America claims have been settled by a part-payment in cash, and the issue of scrip bearing interest and the guarantee of the United States Government. The manner in which the part-payment has been made arises from stoppages of duty at the various ports. This forms a striking contrast to the neglect which has attended the British claims. Of all the large losses incurred not a single dollar has been reimbursed, nor is there any prospect of their liquidation. The consequences have of course in some cases been ruinous, and the supineness of our Government in this affair should form the subject of a petition to the House, seeing that the same mode was open to us as the Americans, and to a much larger extent. At this present time our position in China is reversed from its usual standard, being now decidedly No. 2, and America's No. 1. In consequence of the large remittances of bullion, exchange at Hong Kong has declined from 4s. 11d. to 4s. 9d.; and this fall will no doubt produce a corresponding fall at Shanghai.

IN EXPORTS.

TEA.—Nothing is authentic as to the intentions of the tea-men in regard to the new season's tea, the balance of the old is said to be held firmly for advanced rates. The export for present season is 49 millions, against 28 last year. At Shanghai the settlements reported amount to 3,000 chests and 2,500 half-chests (at 27 to 29 Tls. for Ningchows, and 18 to 23 Tls. for Lesan), and 1,000 pkgs. Flowery Pekoe for England at 28 to 50 Tls. The unsold stock is stated at 22,000 pkgs. Ningchow and Oopack—6,000 pkgs. Shanghai packed Congou—600 chests Souchong, and 4,000 packages Flowery Pekoe. In Greens 35,000 half-chests and 5,500 boxes (all for the United States except 8,000 half-chests and 5,000 boxes which are for England). The total settlements of the season reach 330,000 packages, against 320,000 do. same time last season. The unsold stock is estimated at 20,000 packages Moyune, 42,000 packages Fychow, 5,000 packages Taiping, 5,000 packages Pingsuey, and 5,000 packages Shanghai packed. Total, 77,000 packages. At Foo-Chow and Canton the transactions have been very limited, the stocks being inferior.

RAW SILK.—The settlements are reported at Shanghai at 4,000 bales; stock, 6,000, of which it is reported that 2,000 have been withdrawn for native purposes, thus indicating a short supply. Rates have advanced, and the quotations are, for Tsatlees No. 1, 440 to 450 taels; Taysaams No. 1, 370 to 385 taels. Canton rates are too high for purchases to be effected.

DRUGS, &c.—Cassia Lignea has declined, and can be purchased at 17 dols. 75 cents to 18 dols.: no sales reported. Stock at market, 3,000 piculs. Cassia Buds, 40 piculs settled at 34 dols. to 36 dols. Cassia Oil, no sales; 290 dols. to 300 dols. the quotation. Star Aniseed, no sales; quotations, 18 dols. to 18 dols. 50 cents. Aniseed Oil, no stock, no sales, 180 dols. to 190 dols. the quotation. Galangal is quoted at 4 dols. 50 cents to 4 dols. 75 cents; and Galls, 18 dols. to 20 dols. Rhubarb, none good at market. Wool is worth 9½ taels; sales, 550 piculs. Rhubarb, nothing doing, and little fine offering: 35 taels is the quotation for the best. Camphor: sales have been made in Hongkong to the extent of 400 piculs at 25 dols., leaving a small stock unsold.

IN IMPORTS.

The markets for cotton and woollen goods are in a satisfactory state, with increased rates. In yarns the market is flat. In metals generally the demand is active, and stocks moderate. Coals are still quoted at 16 dols. for best steam.

At SINGAPORE the market is also in a very buoyant state.

At MANILLA.—Sales have been made of English goods to arrive; the vessels making long passages had caused a stagnation.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN. SEASON 1859-60.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong.	Total lbs.	SILK. Total Bales.

From Manila to New York: 11, J. S. Ha'e; 15, Eastern Star. To Boston: 15, Belvidere. To Cadiz: 17, Sales. To Havana: 21, Rosita. To Melbourne: 17, Industry.

VESSELS AT ST. HELENA.—Dec. 20, Tagal Gobel, from Batavia, and sailed 22nd for Middelburg; Wilhelmina, Benedictsen, from Macao, and sailed 23rd for Falmouth; 22, Earl of Southeck, Tell, from Shanghai, and sailed for London; 27, Henrietta Maria, de Boer, from Batavia, and sailed 29th for Amsterdam; Ravensworth, Appelly, from Foo-Chow-Foo, and sailed 28th for Cowes; 23, Nankin, Mosley, from Foo-Chow-Foo, and sailed 29th for Queenstown; Charles Martel, s.s., David, from Macao and Reunion; Britannia, Krause, from Singapore, and sailed 29th for London; W. J. Morris, Jackson, from Manila, and sailed 29th for Liverpool; 29, William Sprague, Powers, from Manila; Zealand, Hazewinkel, from Batavia; Valparaiso, Smit, from Batavia; Vereiniging, de Jongh, from Batavia; 30, Helena Anna, Lupcke, from Batavia; 20, Anna Lange, from China for England.

At ALGOA BAY.—Dec. 13, Wynaud, Reid, from Shanghai for London—to replace main-topgallant yard, having had two carried away at sea.

At SIMON'S BAY.—Dec. 4, Forest Eagle, from Cardiff for Shanghai, making 14 inches water per hour; Nov. 23, sailed for China H. M. steamer Pioneer; Dec. 9, H. M. steamer Pearl; 17, Forest Eagle.

VESSELS AT TABLE BAY.—Nov. 26, from Singapore, Christian, Loven; from Hong Kong, Susannah, both for Falmouth; from Rangoon, Boomerang, for Queenstown; 27, from Penang, Time, for New York; from Singapore, Volant, for Boston; Dec. 1, from Maulmain, Helios; 8, from Batavia, Palas, Daban; 10, from Maulmain, Prince Arthur, Wyness; from Singapore, Calphurnia, Westlake, and sailed 13th for Liverpool; 13, from Maulmain, Salama, Hedman.

SHIPPING CASUALTIES.

The Charles Brownell, Bedford, from Singapore to Liverpool, which got ashore on Bernard's wharf, in the river Mersey, became lodged, and on the 23rd Jan. had nine feet of water in her. Her cargo was discharged into lighters. The vessel has since been got off, and taken into Fleetwood harbour.

The Erasmus, Van Heiningen, from Rotterdam for Hong Kong, put into Portsmouth, Jan. 27, leaky, having experienced very heavy weather in the Channel. She has been surveyed, and will be lightened.

The Hester Adriana, Van Hees, from Cardiff to Singapore, put into Lisbon, Jan. 29, leaky, and, it is said, will discharge there.

The Malacca (ship), Bedell, of and from London to Penang, which arrived at St. Helena Dec. 11, has been again surveyed, and, it is said, has to discharge the whole of her cargo.

The Gallego (American barque) and the Jane (English barque) have been chartered to take on the cargo of the Neptunus, Schuurman, from Batavia to Rotterdam, condemned at St. Helena.

The Anne Lee, Ramsay, for Hong Kong, put back to Falmouth, Jan. 29. The Wassenaar, Hofstee, for Batavia, put back to Texel, Jan. 27, leaky, and master sick.

The Agincourt, Pashley, which arrived at Plymouth, Jan. 30, from Rangoon, had sustained slight damage from heavy weather.

The hull and materials of the William Wilmett, from Maulmain to Falmouth, which put into Simon's Bay, Sept. 27, leaky, have been sold there, as well as a quantity of her cargo.

The Maria Augusta, Bystrom, from Batavia, reports that on Jan. 26, in lat. 35 N., lon. 35 W., she experienced a heavy shock from a submarine convulsion, which lasted about 30 sec.; twenty-four hours afterwards a heavy gale commenced, which continued until her arrival at Queenstown.

St. Agnes, Jan. 30.—The heels of three large masts, two of them, the fore and main, being built, and two or three large beams with iron knees, evidently belonging to a large foreign ship, wrecked somewhere to the westward, have come ashore on this coast. Some papers supposed to belong to the same vessel, dated Pasarang, May 26, and bearing the name Maria Elizabeth Margaretha, and signed by H. L. M. Latour, mate, have been picked up on the Holywell Sands, Memo. The Maria Elizabeth Margaretha, Banditz, sailed from Cardiff for Singapore, Jan. 16, with coals. According to advices from Brest, dated Jan. 31, came ashore the previous night in Camaret Bay, and was totally lost. Master and nine men drowned.

The taffrail of a ship, with stern-board marked "Dinapore, London," has been washed ashore on the coast of France, near Plouguerneau.

The Loodianah, which arrived at Liverpool, Feb. 7, from Singapore, had encountered a severe gale from S.W., Nov. 26 and 27, when off the Cape, during which she lost bulwarks, and had a man washed from the wheel. After passing the Western Islands she experienced a succession of gales, and on Jan. 30, while lying to in a hurricane, was struck by a heavy sea, which carried away nearly all her bulwarks, rails, and several stanchions from the port side, stove long-boat, &c.

The Glencoe (ship), of Glasgow, bound from Shields to Hong Kong, laden with coal, broke from her moorings at Shields on the morning of Feb. 8, during a gale from the westward, and drove on the island, but was expected to float next tide.

The Koophandel, De Vries, late De Boer, which arrived at Texel, Jan. 30, from Batavia, had encountered heavy weather during the passage; became leaky, had bulwarks and a portion of her deck gear washed away; and it is supposed has sprung her mainmast.

The Eliza Hands, Lamb, from Liverpool, for Singapore, put into Falmouth, 2nd Feb. with loss of bulwarks, boat, galley, &c.

The Beurs Van Rotterdam (Dutch barque), De Vos, from Batavia to Rotterdam, put into Mauritius, 19 Dec., leaky, and is discharging cargo.

The Pieter (Dutch barque), Lammerts, from Batavia to Amsterdam, put into Mauritius, 24th Dec., having sprung a leak, and carried away fore and main masts in a hurricane, in lat. 29 S., lon. 50 E., which lasted for 24 hours; her cargo was discharged.

The Earl of Eglinton, Wardrop, from London to Calcutta, got on shore near St. Margaret's Bay (Downs), on the morning of the 29th Jan., at 2.30, and has become a wreck. The cargo has been partly discharged into luggers mostly in a damaged state, and the ship is being dismantled. She has since sustained further damage to a serious extent. The heavy sea and high tides have burst up the deck, but much of the remaining cargo may yet be saved as the tide falls.

The Sir Colin Campbell, Ralph, Cardiff to Hong-Kong, with coals, has foundered at sea; crew were saved, and arrived at Lisbon previous to 6th Feb.

WRECK OF THE DINAPORE.—TWENTY-TWO LIVES LOST.—The loss of this ship, belonging to Mr. W. S. Lindsay, M.P., on the coast of France, has created a painful interest. She was chartered to take a cargo of coal from Cardiff to Aden. Captain Lilwall was accompanied by his wife, who, it is stated, being near her confinement, had a surgeon and female servant (nurse) on board. Captain Lilwall, his wife, servant, surgeon, and 18 of the crew, took to the long-boat (the life-boat having previously been washed away), and the chief officer, Mr. Thompson, and nine seamen to the dingy, which was at the stern of the ship. The latter were picked up by a French pilot-lugger and landed at Conquet, but of the long-boat not the slightest tidings have yet been heard, and the belief is that they must have perished.

FOREIGN.

HONG-KONG.—The Joseph Fletcher, Captain Pook, from Auckland to Shanghai, has been totally lost on the Loochoo Island. Five of the crew drowned.

SINGAPORE.—The Royal Lily, which left this port on the 31st December, for London, struck on a reef near Bintang Point, and was totally lost. The crew have arrived here.

The British barque Royal Sovereign, from Batavia to Cork, was lost off Mauna, by springing a leak, on the 20th November. Captain and four of the crew reached Bencoolen; the rest of the crew were at Mauna, laid up by sickness.

The Dutch mail steamer, Batavia, damaged her machinery, and the overland passengers for Batavia were detained at Singapore.

FREIGHTS AND CHARTERS.

To India, berth freights are much depressed, 60s per register ton being the full rate offered for Calcutta, Bombay, Kurrachee, Ceylon, Madras, or Singapore. Coal freights continue dull for Aden, but for Bombay, Galle, or Singapore, the inquiry is good, and the tendency is towards an advance. In out and home freights 100s is offered for Ceylon, 130s Moulmein (teak), 100s Calcutta, &c.; or home only 52s 6d Calcutta, 35s Bombay, 40s Manila, 70s Moulmein (teak), &c. To China, 65s is offered for coals to Shanghai.

A Government contract was advertised for 8,000 tons of coal for Singapore, and tenders were made at 46s per ton.

Rates of freight current to Shanghai 70s per ton dead weight; 55s per ton of 40-feet measurement. To Hong Kong, 60s, weight, 50s measurement. To Singapore, 40s, weight or measurement. To Manila, 35s and 40s. To Japan, £5 weight, 90s measurement. To Batavia, 50s weight, 40s measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

FOREIGN.

AT SHANGHAI.—For England, 17. 10s. For New York, 5 dols. The quantity of shipping is very much reduced, and the trade in the coast or Japan is very dull. The Kate Kearney is settled to Swatow 25 days for 850 dols.

AT HONG KONG, MACAO, AND CANTON.—For London, 17. 10s. to 27. For New York, 5 dols. To Australia and California, 22 dols. net for passengers, and 17. 10s. for cargo. Coasting employment seems active, and a number of vessels have been fixed to load rice for Siam at 32½ to 40 cents per picul. Tonnage, however, is still great in excess of demand, and the coolie freights are almost confined to American ships.

AT SINGAPORE.—The current rates are 17. 5s. for tin, 17. 10s. for sago, Gambia, and sugar, 27. for pepper, coffee, and measurement goods.

AT BATAVIA.—The Edward and Julie has been fixed for Europe at 37. to load at two ports. The Cail and August for the same voyage at 27. 15s.

AT MANILA.—The Spanish brig Torre del Oro has been chartered at 27. 7s. 6d. per ton of sugar to Falmouth and a port in the United Kingdom; 5s. extra to the Continent. To the United States nothing has been done. There is very little offering, and only one or two seeking ships in port. The Talbot refused 35s. per ton of sugar to England.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s to 50s. Shanghai 50s to 60s. Singapore, 30s to 45s, Batavia, 30s to 40s, Manila, 50s to 60s. Nominal quotation for Jeddo, 70s to 80s.

At Hamburg, for Batavia and Singapore, 40s to 45s. China and Manila 50s to 60s.

LAUNCHES.—STEAMERS FOR INDIA.—On Thursday Mr. John Laird floated a steamer which has been built in the Birkenhead Docks, and which is the fourth of a series of vessels intended for the navigation of the Indian rivers. These vessels are long, broad, and shallow, and when laden they float at an immersion of 2 ft. or less. They are built of the homogeneous metal, which is light, strong, and durable; and their framing, which is a kind of tubular girders, is ingeniously disposed in arches, angles, and other forms of strength, above the deck. The engines are placed very high, to drive large wheels, which are to skim the water and no more; and the vessels are steered by double rudders at each end, which are like fans, and are hung on bridle chains, so that as one fan dips into the water the other must leave it. In the vessels every effort has been made to furnish accommodation on deck, the hull of the steamers being used merely for flotation.

STEAMER LYX-E-MOON.—This vessel will be ready for her trial trip in about two weeks.

PASSENGERS INWARDS.—Per Wilhelmina Lucia, Capt. Poolman, at Amsterdam from Batavia: Mr. J. C. van Gebaur. Per Noord Brabant, Capt. Bok, at Rotterdam from Batavia: Capt. J. Teensma, Capt. J. B. Bok, Capt. and Mrs. Belling, Mrs. Widow Karthau and two children, and Mr. Arnold and family.

LAUNCH AT ABERDEEN.—From the building yard of Messrs. Alexander Hall and Co., on the 7th inst., the fine clipper ship Ocean Mail, built expressly for the China trade, of the following dimensions:—164 feet cut keel, 12 feet fore rake, 31 feet beam, 20 feet depth of hold, a flush ship; she is fitted with Cunningham's patent reefing topsails, Emerson and Walker's windlass, wire rigging, and all the recent improvements. She belongs to Henry Adamson, Esq., of Aberdeen.

STEAMER FAN QUI.—This screw steamer made her trial trip on the 14th instant on the Clyde, when her engines worked at 70 revolutions per minute, with an average speed of 11½ knots (about 13 miles) an hour, with the greatest smoothness, the engines working perfectly. She is loading at the Broomielaw, and will sail for Singapore and Hong Kong at the latter end of the month. The ladies and gentlemen who accompanied her on this occasion, on their return sat down to an excellent dinner, and among the toasts were, "Prosperity to the Owners (Messrs. Lane, Crawford, and Co., and Mr. D. Lapraik, of Hong Kong), and to the Fan Qui." "The health of J. A. Lane, Esq.," "The health of Captain Baker," &c. &c. In our next we shall notice her fittings, &c.

DIVING APPARATUS.

C. E. HEINKE,
Submarine Engineer
103, Great Portland-st.,
London.

Begs to call the attention of Shipowners, Merchants, Captains, &c. &c., to the important improvements made by him in the

SUBMARINE HELMET
DRESS AND APPARATUS,

which enables a diver to remain any length of time

under water. For the Recovery of Property from Wrecks, Making and Repairing Foundations of Harbours and Bridges, and also

FOR PEARL AND SPONGE DIVING.

BURROWS AND CO., WHOLESALE
WINE MERCHANTS,
LIVERPOOL.

Stores, Lime-street.—Offices, 54, Duke-street.

The proprietors beg most respectfully to call the attention of the Trade, Noblemen, Clergy, and the public in general, to their extensive stock of CHOICE WINES of rare vintages.

B and C. are not disposed to comment upon the purity of their wines, which is daily most laudably acknowledged by the public and eminent medical men of all countries, as the increasing patronage of the highest families of the land is a sufficient guarantee.

They beg to call particular attention to their pure Tonic Wines, as being so valuable to invalids and persons of weak stomachs.

A sample case, containing 3 full-sized wine-bottles, will be forwarded to any address on receipt of Post-office Order for 6s. 6d., or a dozen for 24s.

It is a well-known fact that impure and adulterated wines are the greatest foes to health, producing acidity in the stomach and debilitating the digestive organs; while pure wines will accelerate the digestive powers—involving, strengthening, and bracing the nervous system.

Their Tonic Wine is admitted to be most essential to invalids, both old and young, and should never be absent from the homes of the weak and sickly. Its properties are duly acknowledged and appreciated by the leading men of the faculty both at home and abroad. To prevent imposition, each bottle is sealed with the name of the Firm. All orders to be made payable to Henry Burrow.

MEDICINES FOR EXPORTATION.

F. NEWBERRY and SONS, 45, ST. PAUL'S CHURCHYARD, London, Proprietors of the Original and Genuine Dr. James' Fever Powder, (Gell's) Dalby's Carminative, Dr. Steers' Opodeldoc and Camomile Drops, &c. Agents for Perry Davis' Painkiller, Behnen's Herb Tea, O'Connell's Siphonia Feeding Bottles, Marsden's Respirators, Bisho's effervescing Citrate of Magnesia, and sundry other articles; for which, see our New Catalogue. Established A.D. 1746.

HOLLOWAY'S PILLS.—IMPURITY OF THE BLOOD.—To ensure health it is absolutely necessary that the fluids and solids of the human body should be kept free from those impurities which are continually getting into the system by erroneous living, unwholesome atmosphere, or disordered stomach. The only safe and certain way to expel all impurities is to take Holloway's Pills, which have the power of cleansing the blood from all noxious matters, and at the same time removing any irregularities which their presence may have already produced on any organ. Holloway's Pills expel all humours which taint or impoverish the blood, which they purify and invigorate; and give general tone to the nerves, stomach, liver, lungs, heart, and kidneys.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s 1d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via EGYPT.—THE PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

A Regular Trader, with quick Despatch. For SHANGHAI Direct, the celebrated Thames-built Clipper, WYNAUT, A 1 13 Years, 946 tons Register, DAVID REID, Commander; loading in the West India Docks.

This beautiful vessel offers a first-rate opportunity to Shippers, being well known alike for her rapid sailing qualities, and the good order in which she invariably delivers her cargoes.

W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

HOLLAND, SINGAPORE, and CHINA.—Loading at AMSTERDAM, for SINGAPORE and HONG KONG, the fast-sailing Prussian frigate DER WEST, Captain PUST, 3-3 veritas, 613 tons Dutch register, to sail March 15.

For freight apply to DORCHLAG and GERBAULET, 1 St. Michael's-alley, Cornhill, London, and at Rotterdam.

REGULAR LINE of PACKETS.—For BATAVIA, the fine, fast-sailing barque WILLIAM SIMPSON, A 1 13 Years, 393 tons per register, coppered and copper-fastened throughout, JOHN SPLATT, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. THORNTON and WESPS, Old Swan Wharf; or to RANGEL, WOOLLETT, and Co., 1, Lime-street-square.

FOR HONGKONG and WHAMPOA.—Just arrived from China in 95 days, and will sail again immediately, the well-known and very fast sailing clipper-ship, LAMMERMUIR, A 1 13 Years, 952 tons register, A. SHEWAN, Commander, loading in the East India Docks. This beautiful clipper, belonging to Messrs. John Willis and Son, is the fastest ship in the China trade, having beaten every vessel this season. Shippers requiring despatch will therefore find her a most desirable opportunity. She has first-class accommodation for passengers.

For freight or passage apply to T. Hayside and Co., 69, Cornhill, E.C.

A REGULAR CHINA TRADER, with despatch.—For HONG KONG and WHAMPOA, the splendid British-built clipper ship VERBENA, A 1 for 10 years, 467 tons Register, coppered and copper-fastened, JOHN WOOD-GATE, Commander; loading in the St. Katharine's Docks.

This magnificent Clipper, having just delivered her Cargo of Tea from China in first-rate order is now on the berth, and, being admirably adapted for the China trade, offers an excellent opportunity for the shipment of fine goods. Has superior passenger accommodation.

For terms of freight or passage apply to ADAMSON and RONALDSON, 1, Leadenhall-street, E.C.

STEAM to CHINA.—At Glasgow, for HONG KONG, touching at Singapore for coals, to sail the 20th of February, the A 1 new screw steamer FAN QUI, 400 tons, 200-horse power, R. E. BAKER, Esq., Commander, who has had long experience in the China and Eastern Seas. This vessel has been fitted expressly for the coast of China and Japan trade. Her accommodations are spacious and particularly well ventilated with bath-rooms, &c., attached. From her superior model she is expected to make a rapid passage, and is a most desirable opportunity for a few first-class passengers. For passage only, apply in London, to Messrs. James Morrison and Co., Philpot-lane; or, in Glasgow, to Messrs. Hutchinson and Brown, No. 135, Buchanan-street.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Tons.	Master.	To Sail.

Per P. and O. str., 20th April.—From Southampton to Shanghai: Mr. E. Harrison.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The statements are contradictory as to whether trade had been resumed. One correspondent says the Americans had resumed business. It is confidently hoped that the firm attitude assumed by Mr. Consul-General Alcock will have the effect both of reassuring the Japanese Government and of checking the improprieties of the British residents who have behaved in such a manner as to cause the partial stoppage of trade. It is due to the commercial community of China to mention that it has very generally condemned their conduct. It is difficult to obtain information as to what is going on in the Japanese ports, but there appear to be very good grounds for the warnings held out by Mr. Oliphant and others against the expectation of any great and sudden extension of British trade from the opening of these ports.

The Minister of the United States has officially communicated that he has obtained a pledge from the Japanese Government that the treaty of Yedo will be carried out in all its integrity, and that, more particularly, Japanese produce may be freely purchased, and all Japanese articles may be exported without limit, except rice, wheat, copper coin, and uncoined Japanese gold and silver. The quarter to be occupied by foreigners will also be settled immediately.

The postal authorities at Hong Kong have appointed Abel Gower, Esq., chief Consular assistant, to be packet agent for Yedo and Kanagawa.

NAGASAKI.

Lieut. Malcolm, of the Royal Engineers, has left Shanghai, for this port, to examine the coal mines, and report on their quality, &c.

CHINA.

PEKIN.

The Pekin gazettes are down to the 11th Dec. Both the Emperor and his ministers seem fairly tired of writing about what we have been used to regard as the Great Rebellion. The new acting Governor-General of Sz' Ch'ung, Tsang Wang-yen, does mention that he has been informed of disturbances in certain districts on the south bank of the Yang tsze Kiang in his jurisdiction, for which he started on the 18th Nov. A memorial from Tsau Chu-chung, the new Governor of Kwang

Si, shows that the famous Tai-ping leader, Shih Tak'ai, was moving southward last spring, when he was reported here to be scouring Ngan Awui. On the 4th May, having crossed the Hu Nan border, he attacked the city of Tsiuen in the north of Kwang Si with some 10,000 men. The spirit of a Buddhist temple, as old as the Tang dynasty, situated outside the west gate, manifested itself in flame, to the utter discomfiture of the insurgent force. The shrine has been honoured at various times under the past and the present dynasties, and the Emperor is prayed to confer on it a new title of honour. His Majesty consults the Board of Ceremonies. Another rumour prevalent in the last few days is that Hwashana has been put to death; for what crime it is not stated. The gazettes do not corroborate this; on the contrary, he was at Court on the 27th Nov., and was placed as one of the routine committees that superintended the examination. The Pekin Customs denounce an officer detected dealing in "foreign drug." Hangfih, Governor General of China Li, moves the Emperor to confer some marked favour on Tsunghau, the Salt Commissioner who took the American mission in charge, Pau Kweisang, and Intendant of River Works, and Sun Chi, Intendant of Tien-tsing, for their great zeal in carrying out his instructions to stir up the gentry and drill the people. "He has been sending them to and fro on different occasions between Tien-tsing and Ta-ku, as well as along the whole line of sea-coast, with orders to exert themselves in organising the military, and they have been ordering their deputies about regardless of the weather, cold or hot, for nearly a year, earnestly exhorting and commanding the gentry and people in such wise that they joyfully did their bidding, so that the trainbands at every important place from the city to the sea, and the volunteer police, were in perfect order," &c., &c. At the time Hangfih was writing, it was just a year since Sangkolinsin received a surcoat of honour for completing the work on the Tien-tsing river. The Emperor's health is announced to be very indifferent.

SHANGHAI.

We noticed in our last the loss of the ship *Joseph Fletcher*. We are happy to state that the captain and a part of the officers and crew arrived safely at this port in the ship *Kate Cleather*. Her Majesty's ship *Inflexible* was on her way to the Loo-choo Islands, where the vessel was wrecked, when she met the *Kate Cleather* in the river. It appears the vessel left Auckland on the 20th Sept. last. On the 2nd Nov., the weather being exceedingly dirty, the ship struck among the breakers off the island of Wai-kido. The ship soon became a wreck, the captain and crew hanging on to various parts of the vessel all night. Dr. Griffiths, Mr. Nelson, the second officer; E. Pratt, the cook; J. Hickman, apprentice; and B. Thompson, seaman, were drowned, all the others reaching the shore safely, the natives supplying them with food and other comforts. They remained in this state until the 12th, when they took to their boats, and reached the capital of the great Loo-choo, Napaking, on the 20th Nov. There they were also treated well, and provided with a house. On the 10th Dec. they started in a small junk for China, and the next day fell in with the *Kate Cleather*, where they were very kindly received.

The following is a copy of the American Consul's circular, aluded to elsewhere, and published in the *North China Herald*:—

"An official communication has been received at this consulate, from the American Minister resident at Yedo that he has obtained a pledge from the Japanese Government that the treaty of Yedo shall be carried out in all its integrity, and that the following points were specially agreed upon:—1st. That the free purchase of all kinds of Japanese produce shall no longer be obstructed. 2nd. That all Japanese articles may be exported without limit as to quantity, except rice, wheat, copper coin, and Japanese gold and silver uncoined. 3rd. That Japanese officers should not act as the sellers of any article, nor interfere in any business transactions. 4th. That the exchange of money should be carried into immediate effect; only 10,000 (ten thousand) itzibous will be exchanged at this port per day. This will continue until arrangements are made for making the supply equal to the demand. 5th. The quarter to be occupied by foreigners to be immediately settled.

"In addition to the foregoing, the Minister informs me that for the purpose of giving currency to our dollars among the people they should be stamped with Chinese characters, showing their value. This has been agreed upon, and a stamp will be sent to Kanagawa as soon as it can be prepared. It is op-

tional with Americans to have their dollars stamped or not, and it is expressly understood that all dollars, stamped or unstamped, will be exchanged for Japanese coin, weight for weight—Your obedient servant,

(Signed) "E. M. DORR, U.S. Consul."

H.M. gun-boat *Haughty* left here for Ningpo, to relieve the *Algerine*, which vessel, after refitting here, will return to Ningpo, and the *Haughty* will then proceed to Hong Kong to undergo thorough repair.

H.M.S. *Furious* from Hong Kong, *Acteon* and *Dove* (tender) from the Gulf of Tartary, arrived in port on the 23rd December. The gunboat *Haughty*, also, has returned from Woosung, having on board Rear-Admiral Jones and staff, who arrived by the mail steamer *Formosa* at Woosung. The *Acteon* saluted the flag, which the *Furious* returned.

An action was tried in the Consular Court against Mr. A. Bird, for promissory notes granted Messrs. Lane, Crawford, and Co., of Hong Kong, for 436 dols., for goods sold and delivered, but which Mr. Bird objected were overcharged, and quoted Mr. Morton's advertised list in support. The verdict was given against him, and he has entered an appeal.

The regular monthly meeting of the North China Branch of the Royal Asiatic Society was held on December 27th, Rev. J. Hobson, vice-president in the chair. A tabular view of the temperature of Hakodadi, observed there during 1858-59, by a Russian physician, was presented to the Society. Communicated by Dr. Courteny. A paper by Dr. Pompe van Meerdevoort, on the dissection of the corpse of an executed criminal at Nagasaki, was then read to the meeting by the corresponding secretary. The dissection was conducted by Dr. Meerdevoort in the presence of twenty-one of his pupils and twenty-four medical men from Nagasaki and its neighbourhood. The request to be allowed a body for the purpose was granted after a long time, and not without reluctance. It was supposed that the feeling of the population would be adverse. To prepare the minds of the people, it was stated publicly that the Dutch physician wished to examine the Japanese body in order to know how to treat it in case of a return of cholera to the country, which is much dreaded. During the examination, which occupied two days, the pupils made excellent use of their opportunity for acquiring a knowledge of anatomy by immediate observation. The body was afterwards buried with the Buddhist funeral rites, usually denied to criminals, but granted in this case, in consideration of the service to science unconsciously afforded by the deceased criminal. Thanks were voted to Dr. Meerdevoort, and the paper was referred for publication to the Editorial Committee.

A correspondence complaining of young foreigners causing annoyance and threatening to raise mobs among the Chinese, by breaking their lanterns, and otherwise indulging in "larks," is said to have been made public.

FOO-CHOW-FOO.

H.M.S. *Camilla*, and gunboat *Bustard*, destroyed five or six junks in the vicinity, the crews escaping to the shore with the exception of two who were handed over to the authorities.

A correspondent of the *China Mail* gives the following:—"Two foreigners, one English, the other American, took it into their heads to take a trip some 120 miles into the interior of this province. They walked the greater part of the way, and, after an absence of nearly a fortnight, returned to Foo-Chow safe and sound. In no place were they annoyed or disturbed, as 'foreign devils,' &c. And in one place only were they interrupted by the overpressing curiosity of the natives. This was at the city of Kien-ning-foo. There was reason for that, however, inasmuch as they were the first 'barbarians' that had ever been in the place, and this city was not long ago the seat of the rebels who scoured the country around most fearfully. At the first sight of their strange-looking visitors, the people probably thought of course they must belong to 'the long-haired robbers,'—prowling about under disguise of short instead of long hairs, and of stunted, stiff 'shoebrush' beards, instead of fine flowing ones, &c. But they soon found they were mistaken, and treated them with some urbanity."

The new Consular offices have been opened. This residence and bureau of H.B.M.'s Consul, when the other two houses for the assistants, &c., are finished, will present a fine and attractive appearance amongst the buildings of foreigners here.

The P. and O. steamer *Manila* and the mails came in on January the 4th, the *Peiho* and her mails on January the 1st.

AMOI.

Mr. Gingell has taken charge of this Consulate of this port, relieving Mr. M. C. Morrison, who will shortly take charge of the Consulate at Foo-Chow-Foo.

SWATOW.

The United States Consul hoisted his flag at this port on the 1st January, and it is understood that the British Consul will shortly do the same.

HONG KONG.

We noticed in our last the exorbitant law charges which Mr. Tarrant had been subjected to in the action for libel on Colonel Caine, for which he continues to suffer imprisonment in the felons' jail. We have now to notice that the prohibition imposed on him in regard to writing for his paper has been removed. The fine of £50, together with the enormous law charges, and the stoppage of his paper, will inflict total ruin upon him. The summer is now advancing, and we do hope that Mr. James's motion in the House of Commons will be attended with the success of a remission of the portion of his sentence unexpired.

Mr. Austin the Government Emigration Agent, has despatched the ship *Dora*, for Demerara, with 200 men, 150 women, 42 boys, and 26 girls. The *Red Riding Hood* and *Minerva* have also been chartered, and are under despatch. Some check has been put upon the Spanish shipments of coolies to Cuba. It appears that when the American ship *Messenger* was on the point of despatch with 700 coolies, a Mandarin and an interpreter from the commissioners repaired on board to examine them. Forty-five refused to go and were released—two were detected as escaped felons, and were given up. Capt. Manton thought that this was final, and went to Canton for his papers. After communicating with the authorities, Mr. Consul Perry told him the ship must pay port charges—these were paid, but the Consul declined to give up the papers until the authorities should issue a grand chop. The following day, the steamer *Cumfa* went to Whampoa, and demanded from Mr. Vargas all the coolies he had in his slave depot, in order that they might be examined at Canton. These after some demur were surrendered, but Mr. Vargas had so little hope of getting any back that he abandoned them. The Chinese authorities then demanded that the *Messenger* should proceed to Canton and have the coolies examined. Capt. Manton was agreeable, but Mr. Vargas knew better than to risk his property in that manner, so he actually chartered a steamer and a lorch, and sent all the coolies to his slave barracks at Macao! Capt. Manton applied to clear in ballast so that he might go to Macao and pick the coolies up again. That is refused, and he now seeks the mediation of his Excellency Mr. Ward. It is doubtful how this matter will end. It appears that although French ships are prohibited from taking coolies from Chinese ports, no impediment existed at the Portuguese settlement at Macao.

The *Marchioness of Londonderry* had arrived from London, with the following officers and troops:—Capt. M. I. O'Connell, T. O. Plunkett; George Pain, Staff-Surgeon; Ensigns R. Cosens and 'Aglen, and 103 rank and file of the Royals, ten females, and nine children. Great complaints have been repeated in reference to the slowness of the P. and O. Co.'s steamers, and rumours were current that Admiral Hope had pronounced the *Malabar* to be an unfit vessel to carry the mails. We noticed in our last that Messrs. Jardine, Matheson, and Co.'s steamer *Chey Chase* had beaten this vessel on the passage from Singapore to Hong Kong four days. A portion of the mails by the *Malabar* were landed in a damaged state. The mail agent, it appears, called a survey, and made some effort to have the steamer pronounced unfit for service.

There still continue to be manifested unmistakable signs of progress and permanent prosperity regarding the affairs of this colony. A large sale of Crown lands at a small village called Sawkewon on the Lyeemoon passage, took place on the 3rd of January. The advantage of the site consists in its being sheltered from all quarters against the force of a typhoon, and it is consequently valuable to fishermen, boat-builders, &c. The competition was so great that the sale had to be postponed, the premium already realising 15,000 dollars.

The summit of the Peak, on which a sanatorium is being erected, has been almost continually enveloped in a thick mist. Such weather is unseasonable, and usually occurs about one month later. The prevalence of mist on the summit of the hill has given rise to grave doubts as to its being a desirable site for a sanatorium, and it is probable that a practical test will be required ere much money is expended. A flag staff now

graces the highest point of the Peak, but the signal station has not yet been organised.

The *Hong Kong Register* has been disposed of by Mr. Robert Strachan, the late proprietor, and is now called the *China Chronicle, Hong Kong Register, and Eastern Advertiser*. We are not informed who the purchasers are. The *China Mail*, in alluding to some differences with that journal, has the following:—"We are unwilling to provoke further controversy between the newspapers here. There have been some symptoms of an approaching change in the relations between the editors, and we trust the new-comer will be cautious about raising new grounds of offence. In the short period of our residence here (less than two years) we have seen one editor die, two imprisoned, two give up from sickness, and two burst up financially. Our contemporary may rest assured that the battle is not to the swift, however it may fare with the strong."

The excessive rate levied for police and lighting rates, being no less than 10 per cent. on the rental, has been again the subject of comment. It appears in one case a house has been rated at 4,680 dols. per annum, which only lets for 2,946 dols., thus increasing the rate to nearly 20 per cent.

The *Lady Macdonald* sailed for England, on the 24th Dec., with naval and military invalids under the charge of Mr. Ramsay, surgeon. Capt. Crocker, R.M., and Mr. Burniston, R.N., are among the invalids.

The brigade of marines have been distributed among the ships of war. Colonel Holloway, R.M., proceeds to England by this mail. The Commissariat intend to have three divisions in the coming campaign. It is rumoured that the best of feeling does not exist between the officers of the English and French at Canton. Further, the wisdom of sending home efficient officers from a station where they are wanted, and supplying their place by others from England, is very questionable. Another objection to the proceeding is rather a personal one. Colonel Holloway came out from England with his corps, has been with them up to the present time, has obtained their confidence and respect, and as a matter of course would wish to command them till this unfortunate Chinese affair is finished. Some officers do not hesitate to express their opinion very strongly about the arrangement which sends Colonel Holloway from his post as Brigadier-General of the Marine Brigade. In the first place, Colonel Holloway is, in every respect, up to his work, and has that respect for himself and his corps which will not let him play the sycophant even to the general.

The tenders for the premium offered of 1,000 dols., or say £235, for the best plans for furnishing the town with water, close on the 1st February. The land sale on Victoria peak, announced in our last, was to be held on the 30th January. It is said the Governor would invest for a private house.

The well-known river steamer *Hong Kong* is advertised for sale by Messrs. Lyall, Still, and Co.

BORNEO.

LABUAN.

The *Straits Times* publishes the following letter, dated Dec. 15, and trusts that the resources of the colony will not long be neglected:—"H.M.S. *Esk*, Captain Sir Robert McClure, arrived here on the 9th inst. from Singapore, and left again for Bruni yesterday, with his Excellency the Governor, where she will make a stay of two days, and proceed to Siam en route to Singapore. It is to be hoped that some inquiry will be made of the Sultan relative to the massacre of the eleven Chinese on the River Pappar, forty miles from Labuan, about four months ago, by the *Dusun*. It is to be regretted that H.M. ships cannot visit Borneo more frequently and call in at the different rivers; their stay here is very limited. The once dreaded name of 'Kapal Api' was sufficient to ensure the safety of traders. This is not the first instance that murders have been committed on British subjects, not to say of the numerous acts of robbery on traders by the chiefs of the various rivers, and receiving advances under the most faithful promises to give produce in return. Complaints have been repeatedly made here, but the Government have no power, and the only way to make a demand must be under the guns of a man-of-war. The British flag has lost its prestige here, and the Spaniards are a terror to the coast. Don Senor manages things better; they take the bull by the horns which is the only manner of dealing with the natives. A convict transported for life made his escape about three weeks ago to the mainland of Borneo; information has been received of his having been killed by the Bisayas.

JAVA. BATAVIA.

A telegram, dated the 11th January, reports a new rising of the natives at Banjermassing. The steamer *Onroust* had been cut off, and thirty-eight Europeans killed. New rules and regulations have been published by the Dutch Government. The following are some of the items, most of which, however, we have previously published through our correspondent at Amsterdam:—1. The Javasche Bank has been placed under improved, and, in the general opinion, most satisfactory, management for the next ten years. 2. The Gymnasium, a college for students founded by William III., has just been rebuilt, and will be opened between June and September next. 3. The pay of the army and Government employés has been raised. This applies to both Europeans and natives. 4. Every person (native excepted) receiving a monthly salary of 150 florins or more, is obliged, according to the new rules and regulations of Staatsblad No. 47, to subscribe to a Government paper on his own account! 5. In order to promote the health of the inhabitants of Java, a proclamation has been issued, to the effect that every kind of iron and copper utensil must not, in future, be coated with lead, but only with pure tin. Any offence against this regulation to entail a fine of 100 florins.

MALACCA STRAITS.

SINGAPORE.

The P. and O. steamer *Pottinger*, with the ship *Tubal Cain* in tow, has arrived with the 40th Regt. M.N.I. on board, to relieve the 14th Regt. M.N.I., which has been stationed here for the last three years. The 14th will leave by the same vessels for Madras.

H.M.S. *Pioneer*, *Imperieuse*, and *Pearl* have arrived from England, and H.M.S. *Forbin* from France, en route to China.

Intelligence has been received from Mintok of the stoppage of telegraphic communication between that place and Batavia on the 17th January. The rupture of the cable is supposed to have occurred in or near the Lucipara passage, and has probably been caused by a ship's anchor. Communication has not yet been resumed, and some time may elapse ere the injury can be repaired.

It is intended to convert the present Government offices into a court-house.

A company is about to be formed for lighting Singapore with gas.

His Excellency the Governor-General of the Philippines (Manila) arrived here in a Spanish war steamer, and proceeds to Europe by the mail.

A lighthouse is to be erected on Cape Rachado, the native rajah having ceded a piece of ground for that purpose.

PENANG.

His Excellency the Governor of the Straits Settlements is expected to reside in the vicinity of the hills for a period of two months.

It is contemplated to double the strength of the European artillery stationed in the Straits, which at present consists of sixty gunners, two bombardiers, two corporals, and two sergeants. The whole force is to be divided into three detachments, the strongest to be stationed at Singapore, and the next in strength in Penang, while that for Malacca is to consist of sixteen men.

The head-quarters of the Ordnance department have been transferred from this station to Singapore.

The price of rice has considerably advanced. White quality, which was worth last year 10 cents. per gantang, is now worth 25 cents. The local rice crops are backward, and the only relief we can look for at present is in the arrival of cargoes from Pegu and Arracan, which may be expected within the next ten days. All the necessaries of life, such as cocoa-nuts, oil, ghee, butter, milk, fowls, fish, pork, beef, vegetables, and condiments, have, for a considerable time past, been rising in value, and the wages of domestic servants, the rent of houses, shops, and godowns, cool hire, tailors' and shoemakers' bills, &c., have risen even within the last few months. Though the lower classes are the first to suffer by any augmentation in the price of articles, they soon compensate themselves by the enhanced value of the articles they deal in, or by higher rates of wages and hire. The greatest permanent sufferers are those who are in the receipt of fixed salaries, clerks in Government and other offices, &c.

THE CRUISE OF THE "ACTÆON" AND "DOVE" IN THE GULF OF TARTARY.

The *Actæon* left Woosung on the 2nd of May, and in five days arrived at Port Hamilton, a group of islands forming a

part of the Korean Archipelago. Surveying operations were carried on until the 18th of that month. On the 8th of June she left en route to Chusan harbour on the mainland of the Korea, at which place she anchored on the next day—this part of the coast is very thickly inhabited, and the dirty Koreans did not form an agreeable contrast with the clean Japanese of Tsus Sima. The latter people have a military settlement in Chusan harbour which they have retained from the Koreans for several hundred years, although only 300 in number, in the midst of a dense population. Leaving this port, the proper name of which is Ichon-liau, on the 25th of June, the *Actæon* proceeded north, visiting on the passage the remarkable little island of Dagalet. On the 4th of July, the coast of Tartary was sighted close to, through the dense fogs in which for some days the ship had been enveloped; an anchorage was found, and intelligence obtained from some Chinese who were collecting seaweed on the coast, that some European vessels were in a bay some 80 miles north, and houses were found being built by their crew. This was afterwards found to be Olga Bay, where the Russians were building barracks, and where the Russian fleet winters (the name of it on the English charts is Port Michael Seymour). Twenty miles to the northward of this harbour is St. Vladimir Bay. On the 9th of July the *Actæon* arrived at St. Vladimir Bay, and there found the *Dove*—tender. On the 13th leaving the *Dove*, she sailed for Hakodadi, arriving there on the 15th, and after a few days' stay returned to St. Vladimir on the 30th. A rendezvous having been appointed at this port on the 30th August to meet a vessel bringing up stores and provision, the month was employed visiting and surveying parts of the coast to the southward. On the 1st of September the *Highflyer* reached St. Vladimir, and brought the afflicting intelligence of the disaster at the Peiho; she left again on the 5th, en route for Nagasaki and Yedo. From the 6th to the 10th a tremendous gale was experienced by the *Actæon* and her tender, who rode it out in St. Vladimir Bay with three anchors down; since that date no less than 20 heavy gales have been encountered by the two vessels, greatly hindering and almost entirely preventing any surveying work being carried on, as the remainder of her cruise was on an exposed coast without any shelter. On leaving St. Vladimir on the 13th September, the island of Risiri and Refunsiri, to the southward of the Straits of La Perouse, were first visited, then Sagalien, when information was obtained relative to the acquisition of that large island by the Russians. Being driven away from this neighbourhood by the continued bad weather, the two ships went down to Hakodadi, which port was reached on the 9th of October. The *Highflyer* was lying there with Consul-General Alcock and the Consul for Hakodadi on board. On the 9th of October the two vessels left Hakodadi, intending to communicate with the town of Neegata on the West Coast of Japan, which was to be opened for trade on the 1st January, 1860; but continual gales prevented this object being attained for three weeks, and upon only one occasion was it visited by the *Dove*, but that one was sufficient to prove that the harbour of this pretty town was useless as a commercial port, there being but nine feet of water on the bar across the entrance. The bad weather still continuing, the *Actæon* and the little *Dove*—both the worse for wear—left this exposed coast for the harbour of Ichon-liau, in the Korea, which the former had quitted on the 25th of June; from thence they called at Washington Sound for a few days, and then sailed for Port Hamilton on the 10th of December, but foul winds and strong currents delayed them so much that they bore up for Shanghai on the 12th; but again foul winds and currents took them down among the Chusan Islands, and in consequence they did not arrive at this port until the 20th of December.

CUSTOMS DUES AT CANTON.

Her Majesty's Consul at Canton has issued the following notification:—

"The undersigned having brought to the notice of the Hon. F. W. A. Bruce, C.B., her Majesty's Envoy Extraordinary and Superintendent of British Trade in China, the circumstances connected with a claim recently made for duties on certain produce alleged to be Chinese, and shipped in Hong Kong and Macao for London, in a British vessel, which arrived at Whampoa with the intention of completing her lading, but, in consequence of such claim having been made, departed without doing so, has received the following instructions, dated Shanghai, 21st Dec., 1859:—

"With respect to ships taking in part of their cargo at Hong Kong, and coming to Whampoa to fill up, I am equally convinced that your position is a sound one, and that the pretensions of the Hoppo to impose duties on the cargo, whether consisting of teas or other produce of China, cannot be maintained. These goods, being shipped from a British colony, are to be treated

as having a British origin, and do not become dutiable again by the mere act of coming within the waters of China.

"The undersigned has therefore formally intimated to the Hoppo that the claim to levy duties here on any cargo shipped either in Hong Kong or Macao, and brought to Whampoa or Canton, with the intention of being re-exported in the same vessel, is contrary to international law, and will be resisted.

"In order to enable the undersigned to support the right of individual goods to this exemption, it will be necessary in each case for the consignee or shipper, or other authorised agent, to produce good and sufficient evidence of such goods having been *bona fide* shipped in a recognised foreign port not under the sovereignty of the Emperor of China, and it will be equally competent to the Hoppo and his authorised officers to examine such goods and see that they correspond to the certified descriptions. It is also right that the undersigned should state that the rule of international law will not cover Chinese produce shipped illegally in foreign vessels in ports of China, and merely touching at either of these ports; as before observed, tangible evidence of the shipment in a foreign port, as substantially proving that the goods have been *bona fide* within the range of commercial operations conducted under foreign jurisdiction, will be required. Any attempt to introduce under this rule goods not shipped in a foreign port, or at subsequent fraudulent substitution, will as a matter of course bring them under the operation of treaty rules or regulations, penal or otherwise, as the circumstances of each case shall determine.

"Among the most obvious sufficient legal evidence of shipment in a foreign port may be particularised—

"1st. A regular port clearance from such port to Canton or Whampoa.

"2nd. A manifest distinctly specifying the place of shipment, and describing the numbers, marks, and contents of the packages, legally declared and attested under the seal of the proper officer of the foreign port; and, if the shipment shall have taken place in a port not British, such manifest in respect of British ships might also be further attested and declared before the resident British Consular authority.

"3rd. The captain's copies of the bill of lading, with all of which documents, or others of a similar conclusive nature, British shipmasters will do well to provide themselves, as the Customs' officers will have the right to call for and examine the evidence, and compare it with the goods as found in the vessel.

"It is also desirable that the undersigned should state that the rule of international law in question will not authorise the undersigned to urge on the Chinese authorities the regarding such cargo with favour; it only protects the cargo shipped in a foreign harbour, while it remains on board the same British vessel which brought it into the Chinese port. If it is sought to land it, the Hoppo will be strictly in his right to treat it as foreign import cargo, and charge on it the duty leviable by tariff; and any attempt to tranship it without permission, will at once expose it to confiscation.

"CHARLES A. WICKHAMSTER."

Our Own Correspondents.

FRANCE.

PARIS, Feb. 24, 1860.

It is rumoured that a convention is to be signed with England as to the prizes which may accrue in the coming Chinese war.

It was stated some days ago, that orders had been received at Brest, Toulon, and Cherbourg, simultaneously, by the naval authorities, to prepare several vessels for sea, it being the intention of the Emperor, it was said, to send reinforcements to General Montauban, the commandant-in-chief in China, as soon as possible. In my last letter I mentioned the iron gunboats which were to be taken from Toulon for China. The *European* and *Weser* mixed transports, from Cherbourg and Brest, were in the roadstead of Toulon a few days ago to ship them. At Toulon there are from fifteen to twenty of these vessels. They will number in all twenty, and not twenty-five as was at first stated. These transports would carry out the commanders of the gunboats, as I mentioned in a previous letter. The bustle at Toulon in shipbuilding would appear to be considerable. The works on the *Gloire*, iron-cased frigate, are being pushed on with the greatest activity. The experiments to be made with this vessel are looked forward to with great interest. On the 16th was launched the steam dispatch-boat, *Latouche-Tréville*. As soon as this vessel is fitted, she will be put in commission, under the command of Lieut. Caberel de Saint Sernin. She is destined, it is said, for China. Lieut.-Colonel Livet, of the Engineers, has been raised to the command of the Engineer Corps in China, replacing Lieut.-Col. Deroulède-Dupré, who was killed at his post. Colonel Livet has left Paris, and will proceed by the overland route to Hong Kong.

The Count Escayrac de Latouche has also left Paris for China, on a scientific mission. The count has had much experience in Africa, and his work upon the Soudan has a high reputation. One of his duties will be the commenting on and explaining of Chinese works, with the view of completing and developing our knowledge of Chinese literature, by studies made on the spot.

A pamphlet has been published by Captain Simonet de Maisonneuve, entitled "Aperçu concernant les Lignes Transatlantiques Françaises," showing the necessity of France being the first to connect San Francisco with Japan and China.

RUSSIA.

ST. PETERSBURG, February 15th, 1860.

It will be welcome intelligence to all friends of geographical research, to learn that the Imperial Russian Geographical Society has resolved to publish a French translation of the more interesting parts of their "Transactions," which have hitherto appeared in the Russian language, which is a sealed book for the greater part of the public out of Russia. The first volume has already appeared, and contains, in 351 pages octavo, a digest of the contents of 12 thick quarto volumes. The disadvantage of the work's being only an extract is counterbalanced by the proportionate advantage that whilst many of the less interesting parts are omitted entirely, and others disposed of in a few lines, the more valuable portions are reproduced *in extenso*, and in a language understood in all countries.

From Eastern Siberia Capt. Gamoff, of the Topographical Corps, writes to say that in the course of last summer he succeeded in fixing the geographical position of 23 different places, of which 3 are on the Amoor, 13 on the Oussuri, 6 on the tributaries, Oulaku-Biria and Singachi-Biria, and one where the Oussuri debouches from Lake Khan-Kai.

Whilst the officers of H.B.M. ships *Dore* and *Acton* are actively engaged in surveying the coast of Manchuria, and were by the last accounts about to proceed for the same purpose to the island of Sagalien, I am enabled to state that the Russian Surveying Corps has been equally busy, and has finished its map of the southern part of Manchuria. This scientific expedition is divided into three separate departments, each under an officer of the Topographical Corps, with nine intelligent assistants, the whole being placed under the command of a colonel of the above-mentioned corps, assisted by twelve scientific young men of good family, holding the rank of non-commissioned officers, but who, on the successful termination of the labours of this expedition, will, as an understood thing, be promoted to the rank and pay of officers, in accordance with the usual system pursued in the Russian service.

Whilst great complaints from the South of Europe are heard

of the severity of the present winter, extending even to Naples, the accounts received from Siberia state the mildness of the season to be quite unprecedented, even in the recollection of the "oldest inhabitant." At Encissesk they were revelling in spring weather, and the vegetation was at least two months in advance of its normal state.

From Kiachta we learn that a courier from Peking, despatched by General Ignatiev, had passed through that place, who communicated the intelligence that the Emperor of the celestials had published a decree, commanding his subjects to give up all the copper they possessed for the use of the State, and prohibiting the Chinese to have more than 1lb. of that metal in their houses.

The fulsome ovations paid to Field-Marshal Prince Bariatinsky—the lucky conqueror of Circassia—continue in this city unabated. The "English Club," which is the most aristocratic association of the sort here, has given him a splendid banquet, at which more than 250 members took their seats. This is about the greatest compliment the Prince could have received, for the club is unusually chary of paying honours to anything under the rank of an Imperial Grand Duke. Prince Wiazemsky has published an ode in which he chaunts the praise of the Field-Marshal.

The Emperor has presented a valuable diamond ring to the American engineer, Mr. T. Norton, citizen of the United States, in acknowledgment of his promptitude and efficient services in putting together the two steamers *Amoor* and *Lena*, as well as for his services as chief engineer of the Russian Imperial steamer *America*, belonging to the squadron in the Pacific under the command of Admiral Count Putiatin.

Mr. Silas E. Burrows, an American, has been appointed Russian Consul at Hong-Kong.

HOLLAND.

AMSTERDAM, February 22nd, 1860.

What I predicted in my last letter has been literally fulfilled. The First Chamber of the States-General having thrown out the Government bill for the new railroads in this country, the whole of the Cabinet resigned their portefeuilles, with the exception of Mynheer Rochussen, the Colonial Minister, who has been intrusted by the King to form a new Cabinet.

The *Amsterdam Handelsblad* states that there is no truth in the report, lately circulated very generally, of an approaching matrimonial alliance between the Prince of Orange and the Princess Alice of England.

The Netherlands Trading Company have chartered the undermentioned 25 Dutch vessels for the East Indies, to sail this spring, as follows:—From Amsterdam, *Princess Amelia*, *Strait Baly*, *Schoon Verbond*, *Julie Claire*, *Martha and Jacoba*, *Hercules*, *Medea*, *Baron van Pallandt van Roendaal*, *Willem de Erste*, *Soolo*; from Rotterdam, *Wilhelmina*, *Abel Tasman*, *Jacob*, *President Plate*, *Johanna Christina*, *Kinderdijk*, *Zes Gezusters*, *D. T. Visser*, *Graafstroom*, *Hebe*, *Whampoa*, *Sint Jan*, *Bautam*, *Mer-cator*, *Patriarch Samhiri*.

The naval department has advertised for tenders from ship-owners for the conveyance of six officers and 100 petty officers and seamen of the Dutch Royal navy to Batavia, in order to reinforce the crews of the ships of war in the Eastern Archipelago, and fill up the vacancies caused by disease and warfare.

At Harderwyk, a detachment of 150 men under the command of Lieutenant G. C. Munters, of the 3rd Regiment of Infantry, have received orders to hold themselves in readiness to embark on the 29th inst., at Nieuwe Deep, for Batavia, on board the *Hercules*, Captain Schout, one of the vessels chartered by the Netherlands Trading Company. Another detachment, consisting of 125 men, under the command of Capt. H. van Zwiet, of the East India Infantry, returning to duty from leave of absence, and accompanied by Lieut. Scherer, of the Artillery, and Dr. Dumont, third-class officer of health, are under orders to embark next week at Rotterdam, on board the *Elizabeth*, Capt. Veenstra, for Batavia.

Capt. E. Vonck, commanding the Dutch ship *Susanna*, chartered last year as a transport for the conveyance of troops and stores during the expedition to Boni, has received from the officers engaged in that expedition a handsome silver goblet, with an appropriate inscription, in testimony of their appreciation of his services at Badjoa.

On the 1st January of the present year the Dutch mercantile navy was composed of 4 clippers, 156 ships, 409 barques, 149 brigs, 345 schooners, 296 galliots; making, with the other small craft, and including 42 steamers, altogether 2,406 sea-

going vessels, with an aggregate of 611,340 tons. During the year just elapsed, 147 Dutch vessels were lost, which were replaced by 106 new ones of larger tonnage.

The arrivals in all the Dutch ports from all parts of the world, in 1859, were 7,646 vessels, of, collectively, 1,456,480 tons, with cargo, besides 498 vessels of 58,292 tons in ballast. During the same period 4,570 vessels, of 940,106 tons, cleared outwards with cargo, and 3,543 vessels, of 571,501 tons, in ballast.

On the joint representation of the Ministers for the Colonies and the Finances, the King has, by Royal resolution, raised the pay of the naval officers serving in ships of war stationed in the Eastern Archipelago. Captains and lieutenants will receive an increase of 600 florins per annum, mates and midshipmen 300 florins additional yearly.

Dr. J. A. Naber, rector of the Gymnasium or High School at Haarlem, is appointed to be rector of the Gymnasium Willem III., at Batavia.

Several journals having circulated the report that the Prince of Orange intended to proceed to the East Indies, the *Haague News* contradicts it officially, and adds, that His Royal Highness will go to Sweden in May, to attend the coronation of the King, as representative of Holland.

BELGIUM.

In the sitting of the Belgian Senate of the 17th inst., the Duke de Brabant (the heir to the throne) spoke at considerable length upon the commercial prospects of Belgium. After alluding to the commerce of Belgium twenty-five years ago, and its present prosperous condition, his Royal Highness said, in reference to China, as soon as the treaty of Tientsin was signed, the Government sent M. d'Egremont to China, to obtain for Belgium the same advantages which had just been granted to the English and French, the hardy pioneers of our civilisation. After being tossed about between Shanghai and Canton, and Canton and Shanghai, our Chargé d'Affaires finally received, on the 19th of October last, a despatch from the High Commissary of Foreign Affairs, the Governor of the Two Kwangs, &c. The First Mandarin postponed any sort of negotiat on with us until the treaties with Baron Gros and Lord Elgin had been ratified. That official document proves once more a fact of which daily experience had convinced all European traders, and which emanates from the treaty of Nanking of 1842, and which the recent correspondence of Lord Elgin has rendered still more manifest—namely, that in China and Japan all European nations are on the same footing (*sont solidaires*). It establishes no less clearly the interest we have to see removed, amicably or by force, the obstacles which still delay the final triumph of French and English diplomacy. If, always remaining faithful to our particular task and engagements, the occasion should, nevertheless, present itself to co operate with France, England, and the other Powers in a work the results of which may be providential for our commerce and industry, and which will most certainly be considered as one of the most vast and productive enterprises ever attempted,—I say, such an opportunity would be a godsend for us, and we ought not to neglect it. The copy of a despatch from the Chinese Commissioner to M. d'Egremont is given, of which the above is the text.

Parliamentary Intelligence.

HOUSE OF LORDS.

FROM FRIDAY, FEB. 10, TO FRIDAY, FEB. 24.

CHINESE AFFAIRS.—(Feb. 21.) The Earl of SELKIRK moved for copies or extracts of letters from the Earl of Elgin to the Earl of Malmesbury, dated 9th of May, the 11th of May, the 15th of May, and the 20th of May, 1858, with enclosures, respecting affairs in China; and from the Earl of Elgin to the Earl of Clarendon, dated the 28th of April, with enclosures.—The Earl of ELGIN: I do not rise, my lords, to oppose the production of those papers for which my noble friend has moved, but as they relate to matters affecting myself personally—not in the position which I now hold as a member of her Majesty's Government, but in the position which I previously occupied—I trust your lordships will permit me to address to you a very few remarks of personal explanation. I am not in the habit of intruding myself often on your lordships' presence; and when I assure your lordships that I offer myself most reluctantly to your notice now, under the sense that it is essential to the vindication of my character I should do so, I am certain you will extend to me a kind indulgence. I am aware of the great inconvenience—as a general rule—of making allusions to what passes in another place; but I cannot help thinking that in my position as ex-minister to China—especially considering the critical state of our relations with that country, and what I may call my own relations with that country—that you will allow me the liberty which is often exercised on slighter occasions. It does so happen, my lords, that both the Administration which appointed me to China and from whom I received my instructions, and also the Administration under whom I performed the more important portion of my instructions in China, have passed away from political existence. There is no person fully or sufficiently cognisant of the affairs that took place at this most critical period of my mission, or who, in consequence, is fully capable of explaining, without the despatches themselves, any erroneous or injurious impressions. A few days ago, it was observed elsewhere, with something like a taunt and a jeer, that the noble earl who negotiated the treaty of Tientsin did not himself proceed to Peking to exchange the ratifications. Had there been any one in the other House qualified to give an answer or to explain the occurrence, it would have been seen that I was never charged with the ratifications of the treaty at Peking, that they were never placed in my possession, and that I never had the option of going to Peking. No doubt it was the obvious, proper, and natural course to charge the Minister remaining permanently in China with such duties,

but if it was intended to imply a doubt of my readiness and willingness to discharge the most difficult and disagreeable portion of the mission intrusted to me, I think the sting of such an insinuation would have been removed by such an answer as I have suggested, and by explaining the real facts of the case. On another occasion some very severe reflections were passed on me by an honourable gentleman, whose speech I first read in an American review, and in which it was alleged that I exhibited undue harshness because I pressed that on the Chinese which my colleagues did not. That honourable gentleman might have been reminded that I did not go out to China without instructions; that it was not a matter of choice with me whether I should put forward these demands on the Chinese Government; and, above all, that I should have assumed a most serious responsibility had I abstained from pressing the demand for a resident minister at Peking, in the face of positive instructions; that I was obliged to have recourse to coercive measures in China; that I was not to make permanent arrangements, or to use a euphuism, amicable commercial relations with China, until the object of the mission was accomplished. I do not treat the demand for a resident minister at Peking on the ground that it was made by this country, but I am ready to justify that demand upon its merits, for I am confident that if we intend to maintain permanent and pacific relations with a country containing 400,000,000 of the human race, scattered over an area of 1,500 miles in length by 800 in breadth, and if we are to enable the merchants of that country to conduct the trade and commerce of that vast population in prosperity and peace,—I feel confident that, under some modification or other, we must establish direct diplomatic relations with the Imperial Government of Peking. That answer, I think, would at least have relieved me from the imputation of having been unduly harsh and severe in my conduct towards the Chinese, and from the still greater imputation that the spirit indicated by the tone of my despatches was totally different from that exhibited in my acts. This inconvenience was very little felt by me last year, because at that time a certain halo of success surrounded all the results of my mission, which indisposed persons to make comments, though of course the transactions were open to them. The circumstances, however of the present time are different. A very great calamity has occurred, and it is perfectly natural and right that the acts of diplomatic agents employed in China for some time past should all of them, in so far as they appertain to the state of that country, be amenable to comment and inquiry. I do not complain of this, but all I ask is, that when I am attacked where I cannot defend myself, I may, appealing to your lordships' forbearance, take the liberty of doing so here. With reference to some of the matters connected with the subject of these despatches, I can only say that they have given me more pain and distress than any circumstances that have occurred in connection with the whole mission. I have gathered from the usual sources of information that a gallant admiral (Admiral Seymour) with whom I was associated in very important duties in that part of the world, took advantage of a debate on China in the House of Commons to give a review of all the transactions in which he had been engaged there, from the commencement of the unfortunate *Arrow* affair down to a very recent period. In the course of that discussion the gallant admiral gave the House his own explanation as to the circumstances that prevented him from supplying me in the north of China in April, 1858, with a peculiar description of naval force, namely, gunboats drawing very little water, and for which I had applied, and which I certainly understood him to have promised, and which I considered to be essential to enable me to carry out my policy at that period, and in that particular quarter. I cannot, of course, be expected to acquiesce in the view the gallant admiral took on this point, but I must say his views were so temperately expressed, and it was so natural he should desire to place his own version of the transaction before the public, that I should, had his speech stood alone, not have thought it my duty to take notice of the subject; but I must say I did read with some feeling of surprise the observations that fell from a right hon. baronet late First Lord of the Admiralty, because he referred to a verdict pronounced upon certain unfortunate differences that had arisen between the gallant admiral and myself, which I have not seen the grounds of, and it seemed to me to be a most unusual proceeding, that when these differences occurred between two persons in such position in life, that a verdict should be given for one party without the other being apprised of the grounds and the result. I shall therefore, I presume, with the rest of your lordships, know what that verdict is when these papers are placed in your lordships' hands. When your lordships shall peruse them you will see that I was placed in a position of very great difficulty at the commencement of 1858, after the capture of Canton, with a force at my disposal reduced by the demand of troops for India to put down the mutiny there. Intrusted as I was with instructions directing me to obtain from the Chinese Government concessions that amounted almost to an entire subversion of the traditional policy of that great empire, with orders directing me to prosecute these great objects, in combination not only with the representative of the Emperor of the French, my gallant and esteemed friend with whom I was associated, but further with the representatives of two other great powers, Russia and America, who were still in a neutral but pacific attitude, and from whom, had we been forced to acts of hostility, it must have been necessary to have broken off, you will gather from these papers, I believe, that it was only by a prompt, direct, and energetic action in the shape of a demonstration in the neighbourhood of the Court of Peking—that it was only by such an expedient that we could open any hope or expectancy of our being able to bring to an early close, and without bloodshed, the costly war in which we were then engaged with China, under conditions that were consistent both with my instructions, and what I believed to be required by the honour and commercial interests of this country. I can assure your lordships that when I proceeded to the north of China, I not only believed that the gallant admiral was entirely cognisant of the policy I had to prosecute in that quarter, but that he thoroughly sympathized in it, and that I might count on his energetic support in carrying it into effect. I will not refer to any private communications that passed between us with reference to which there is no record kept, but I had in my possession at the time a despatch, in answer to my application for these gunboats, not stating that he did not know the object I wanted them for, or that other difficulties prevented it, but, on the contrary, stating most distinctly that this subject had been under his consideration for a long time previously, dating about the 2nd of March; that one of the gunboats had already started; and that preparations were being made for others to follow. I can only say, that the best proof I could give of the entire confidence I

reposed in the gallant admiral was the fact of my proceeding to the North, because it would have been an act of absolute inanity if I had not the support when I arrived. When the admiral arrived and informed me on the 24th of April that so far from these gunboats being at hand, very few of them had been ordered to leave Hong Kong, and that the great majority of them so ordered would not leave Hong Kong until a long time after the period it was understood I should arrive in the North, I confess I did feel the greatest possible disappointment, and it is very probable that the despatches I wrote at the time bear the impress of that disappointment. My disappointment, my lords, arose from this, that I was afraid that not only would the policy I was engaged in carrying out be compromised by the non-arrival of these gunboats, but that the commercial interests and even the lives of our fellow Europeans in the different home ports of China would be jeopardised or compromised, because I apprehended that if we made an abortive attempt of this kind in the North, the Emperor of China would send down the viceroys of the different provinces, and call on them to attack the Europeans in the home ports. My apprehensions, moreover, on this point, were borne out by the result. The Emperor did so, but it only took effect as far as Canton; and the ultimate consequence was that I was obliged to give up the intention I always entertained of proceeding to Peking itself to present letters of credence. I believe that it is to this unfortunate omission that the whole of our disasters may be attributed, because I believe that had I been enabled to deliver those letters of credence I should have made arrangements at the Imperial court to settle the unfortunate question of a resident British minister at Peking, and that we should have had none of the difficulties that have subsequently transpired. There is only one other point to which I wish to refer, because misconceptions have prevailed upon it. It has been observed that the despatches I wrote home were not shown to Admiral Seymour, nor any authority—that is true. I have now been engaged in diplomatic matters of this kind for seventeen years, and I never showed the despatches I wrote. I always looked upon despatches in the light of confidential communications to the Secretary of State; but this I most solemnly state, that when Admiral Seymour made to me the communication to which I have referred, I stated to him that it was absolutely necessary, not only for his own vindication, but mine, that the Government should be in possession of all the facts of the case, and that I should report in the fullest manner to her Majesty's Government the extent to which, in my opinion, our prospects in the north of China were compromised by the failure on his part to furnish the gunboats. I also added that if he had any counter statement to make, or thought there was any omission or commission in my conduct that was the cause of the failure, I begged him to make a corresponding representation to the Admiralty, that the whole transaction might be looked into. I will not say another word. I state this on my honour as a peer, and I am quite ready to state it in any more solemn form in which the facts can be put forward. The subject has been exceedingly painful to me, but perhaps I may be permitted to add that I have every satisfaction in saying that, apart from these unfortunate misunderstandings, which, I have no doubt, may be explained by the forgetfulness—in short, the looseness that attended verbal communications—apart from this I have only to say that nothing could be more laudable, more creditable, more generous, or more gallant, than the support I received from her Majesty's navy during the whole period of my service in China. (Hear, hear.) I think there were some performances of the British navy during that time of the most praiseworthy and remarkable character. I think the manner in which we visited many parts of the coast of Japan, that expedition extending for 600 miles up an unknown river, without pilot or chart, in complete order and safety, and the conduct in which all the vessels and crews were brought back, was at once an enterprise that reflected the highest credit on the gallant officers engaged in the service; and in alluding more particularly to these services, I will say, at the same time, that the same degree of gallantry and skill was exhibited by the entire fleet in all their operations, whether of a belligerent or of an amicable character. I believe the noble lord, the First Lord of the Admiralty, can confirm these facts; and it is, I think, to the skill and, if I may so speak, the happy audacity of Captain Osborne, on board the ship on which I was for sixteen months, that I am mainly indebted for the success that attended my mission; and I am happy to make this declaration in a quarter where it will go forth publicly. —Lord COLCHESTER was understood to say, that although the noble earl had cast grave imputations on the conduct of a naval officer of note engaged in the China expedition, he hoped that their lordships would suspend their opinions and their judgments on the matter until the papers were produced. —Leave was then given to present the papers.

HOUSE OF COMMONS.

AFFAIRS OF CHINA (Feb. 13).—Mr. B. COCHRANE called the attention of the House to our relations with China. The demands originally made by Lord Elgin on the Chinese government were only two:—the first, adherence to treaty arrangement; and the second, for losses previously incurred. He, however, afterwards thought proper to add a third, that there should be a British minister resident at Peking; and that, the hon. member contended, had been the cause of all that had since occurred—viz., what amounted in Lord Elgin's opinion to a revolution; yet he had left Mr. Bruce to carry out the treaty. That gentleman appeared from the first to be panic-struck, and to see danger and Russian intrigue on every side. The day before the attack on the Peiho, an accredited functionary belonging to the Chinese Government had arrived to conduct Mr. Bruce in all dignity to Peking, yet he did nothing to prevent hostilities. Lord Elgin had said the Chinese were perfectly justified in fortifying the Peiho; and as it was well known they were doing so, they were not open to the charge of treachery. He (Mr. B. Cochrane) considered Mr. Bruce did not act like a British minister proceeding to ratify a treaty of peace. Lord John Russell's despatches to Mr. Bruce contained a very qualified approval of that gentleman's conduct, and an opinion that acts of violence might have been avoided, and also that our relations with the Celestial Empire might be established without more effusion of blood. He believed it would be necessary for some demonstration to be made in China to restore the prestige of England in that country. He urged that the demand for a resident minister at Peking should not be enforced. —Sir M. SEYMOUR asked the indulgence of the House, as his name had been frequently mentioned in connection with the subject of China, while

he ventured to state the part he took while in that country. He was compelled to express his regret at the absence of certain papers which would enable him to enter more clearly and fully upon the subject under discussion. He should state to the House that the question was a large one. It had occupied a vast period of time, and embraced many singular and extraordinary events. He was not unmindful that, in 1857, when the question had been brought under the notice of that House, many hon. members had been good enough to take a favourable view of the course he had felt it his duty to adopt. (Hear, hear.) He had felt the kindness of the House, and it had encouraged and supported him in the performance of his duty. And if there had been hon. members who had disapproved of the course he had taken, he could assure them he had forgotten who those members were, and believed they had only given expression to an honest conviction. At the end of the Russian war he returned south, and on arriving at Hong Kong, in October, he found the stipulations which had placed Canton in a similar position to four or five other mercantile cities had been departed from; the right of communication had been denied, and this was the chief difficulty; for he was sure, if ten minutes' conversation could be had with the officials, there would be an end to the dispute. It was necessary and unavoidable to take some steps for extracting from the government of China some acknowledgment of their error, and, acting under the advice of those experienced in China, he thought it right to seize a vessel, and, if that did not do, to take possession of some of the forts. The matter grew to such an extent that he was obliged to have recourse to hostile operations, but he assured the House it had been a distasteful duty to him. (Hear, hear.) He had gone up to Canton, and had been surrounded by the people. He had asked himself upon what principle of humanity could he best deal with those people. (Hear, hear.) He had considered that it was not for him to palter with his duty, but still to act with as little cruelty as he could. He directed forcible operations to be carried on, and he could at the time have placed the city of Canton in his power. Some said he might have gone the length of firing the city, but his reply was that it was not the part of a Christian officer to do so. (Hear, hear.) The holding of Canton was attended with considerable difficulty, and several operations had to be carried on until the arrival of the noble lord. For weary months he was obliged to restrain the ardour of his officers, and patiently wait for the proper time. He need not now refer to these operations, for they were already known, and had proved satisfactory to this country. After the arrival of the English ambassador in China, the unfortunate mutiny broke out in India, and it was necessary to detach all the forces they could in China and Ceylon, in order to maintain her Majesty's authority in India. During the absence of Her Majesty's ambassador in India, the operations had been almost suspended; but during his absence he felt it his duty to establish a blockade, for the simple reason that the high commissioners in China had been encouraging trade with other countries to the exclusion of British products. The blockade was raised after the final taking of Canton, which took place on the last day of December. It was thought that what had been done at Canton would have induced the Emperor of China to see the advisability of coming to amicable terms; but this expectation not having been fulfilled, it was thought necessary, after the arrival of the ambassadors of the several foreign Powers, to make a demonstration. The arrangement was, that it should be made at Shanghai. On the 26th of April, he proceeded to reconnoitre the Peiho; but on the 30th he was directed by her Majesty's ambassador to postpone hostile operations, and that he would be informed when it was necessary to pursue a different course. After the capture of the forts they received no further molestation, but proceeded up the river quietly, and reached Tientsin on the 30th May. The House would perhaps excuse him if he made some reference to the question of the performance of his duties in these operations. He could safely say that he had never deviated from the strict performance of those duties, or failed to maintain the interests of his country and the orders of the Government which he served. (Hear, hear.) His conduct as a naval officer had been in some measure assailed in the public journals, but he had refrained from noticing them because he held that, as a naval officer, he owed some allegiance to the Admiralty which he served, and should exercise forbearance in asking for official documents. If they objected to the production of such documents, the officer, in his opinion, had a right to obey their decision; but in his own case, having received the approbation both of the Government and the Admiralty, he had not felt it necessary to refer to those attacks. Circumstances, however, had since changed. An hon. gentleman who held an official position by the side of their ambassador to China, had published a book on the subject, and had characterised his (Sir M. Seymour's) conduct as slow and wanting in energy. Now, what were his instructions? That he was not to employ force until it was announced to him, by the noble lord who represented her Majesty, that negotiations had failed, and that arms should be had recourse to. (Hear, hear.) Well, he did act when called on—(hear, hear)—and had merely delayed to give the Chinese an opportunity of collecting in force. To attack them otherwise would be useless—nay, worse than useless; for after flying out of gunshot they would claim the victory. The wisest course, therefore, was always to induce them to resist in force, because, when defeated, they for the time actually acknowledged the result and acted accordingly. (Hear, hear.) The hon. gentleman who had assailed his conduct had also forgotten that he (Sir M. Seymour) had not acted alone. He had acted in conjunction with the French admiral, an officer of the highest honour and ability, and why he had been singled out for attack he could not understand. (Hear, hear.) He repeated that he had done wisely in acting as he did at the time at the mouth of the Peiho, and if he had done otherwise the result would have been that they would have been slaughtering Chinese all the way up to Tientsin. That consequence they happily avoided by the defeat of the Chinese at the Peiho, and then, so far from receiving further molestation as they proceeded up the river, the Chinese, on the contrary, frequently assisted them to warp their ships off the banks, and brought them oranges and provisions in abundance. (Hear, hear.) So much for the "fighting" gentlemen who talk that nonsense. (Laughter.) He owed, no doubt, deference to public opinion, but he believed there were times when it was the duty of an officer to suffer misrepresentation and injustice, however unpleasant. In regard to the question now before the House, it should be remembered that if this country had any interest in China, it was purely a commercial interest—(hear, hear)—and if they attempted to enter that empire with any other object in view, they would do

that which would be unjust towards the Chinese and unfortunate for themselves. (Hear, hear.) England was a powerful country, China a weak one, and it was impossible they could carry their arms there without enailing serious consequences on the empire. He believed that if the expedition now proceeding to those waters were to go beyond what actual necessity required, they would have great reason to deplore the result. (Hear, hear.) He read in the papers, it was true, that there was a large force of Chinese and Tarars being collected to oppose them, but no force which the empire could by any possibility muster could oppose the powerful arms of the two nations about to attack it. It was very difficult to teach the Chinese, and next to impossible to advise them. He was certain that the expedition would be successful, but what then? They could not carry war into the empire with any hope of a satisfactory result to themselves, though with consequences ruinous to the empire itself. It was of so flimsy a character, as made up of forms and ceremonies, that a rude shock would break it; and if that result were brought about by any effort of this country, he did not know what would be the reflections in after-time of those who had participated in it. (Hear, hear.) In conclusion, the hon. and gallant admiral warned the House that, when they got to Peking, the Chinese officials might retire as they did at Canton, leaving the victors in the midst of a people whose language they did not understand, and whom it would be impossible to manage. (Hear, hear.) Lord J. Russell said he supposed there was no one in the House who questioned the professional opinion of the gallant admiral who had just sat down—(hear, hear)—and as his conduct had been approved both by the Government and the Admiralty, it was quite unnecessary for him (Lord John Russell) to go into the questions to which he had referred. He doubted whether this was an opportunity when they could conveniently and usefully discuss the whole matter in regard to China—(hear, hear)—but, at the same time, the hon. gentleman who had brought forward the motion had made so many charges, that he (Lord John Russell) could not avoid altogether questioning some part of the narrative which he had given them. The House would recollect that Mr. Bruce was sent to China entirely for the purpose of obtaining the ratification of the treaty of Tientsin, and of getting to Peking as her Majesty's envoy extraordinary. Before he went he laid a paper before Lord Malmesbury, asking instructions; and though he pointed out that there were points in the treaty which were very unpalatable to the Chinese, he did not mention that at any opposition was to be expected at the mouth of the Peiho. Lord Malmesbury accordingly forwarded him instructions which enumerated the points on which he was to insist, and suggested that it would be desirable to reach Tientsin in a British ship of war. Admiral Hope was directed to proceed to the mouth of the Peiho with a suitable naval force; it was taken for granted that it was to be an imposing force, and sufficient to inspire so much respect that there would be no difficulty in proceeding up the Peiho to the Court of Peking. It had been stated in many addresses directed to him to the effect that Mr. Bruce, immediately upon his arrival in China, attempted to reach Peking by force. Mr. Bruce acted exactly according to his instructions—(hear, hear)—and, so far as his instructions carried him, he conformed to them in every particular. He wrote immediately upon his arrival at Shanghai, on the 16th of May, to ask that suitable preparations might be made for his reception. He said he should proceed immediately to Tientsin by a ship, and that when he arrived there he hoped that preparations would be made suitable to his character as a plenipotentiary for his conveyance to Peking in a manner worthy of the honour and character of the nation he represented. The noble lord, after reading the despatch in which the above request was made, proceeded to say it was obvious that there was no contemplation of the use of force in that request, but, on the contrary, an expectation was expressed that the ministers of the Emperor of China would make due preparations for his journey and reception. Well, the hon. gentleman said that there were persons waiting at Shanghai to meet Mr. Bruce and negotiate with him, and that they had been told by Lord Elgin to stay there for that purpose; but it was rather remarkable that the hon. gentleman, who says that he wishes to show every indulgence to Mr. Bruce, did not, in this respect, show him bare justice—(hear, hear)—because, in the beginning of March, Lord Elgin wrote to the minister of the Emperor of China, saying that he should not return to Shanghai, but he was about to proceed to England, and that another person would come from England for the purpose of exchanging the ratifications at Peking, and residing there as her Majesty's plenipotentiary. The Chinese ministers remained at Shanghai from the 30th of March to the middle of June; but no one could say they were justified in expecting that either Lord Elgin or Mr. Bruce would stay and negotiate at Shanghai, when, since the 30th of March, they had an intimation that another and more natural course would be pursued. Mr. Bruce accordingly, in further compliance with his instructions, asked Admiral Hope to furnish him with a sufficient force. That force was given to him, and he proceeded to the mouth of the Peiho. Now up to this time he had had no intimation whatsoever from the Chinese that his entrance to the Peiho, and his proceeding up the river to Tientsin, would be opposed, or even objected to. These ministers of the Emperor proposed to negotiate, or, in fact, to re-open certain points of the treaty of Tientsin, and to alter some parts of it. Mr. Bruce naturally declared that that was no part of his duty; that he was sent there to obtain a ratification of the treaty, and not to re-open questions which were settled by it; and he declared his intention to proceed to Peking. If anyone would look at the correspondence with those ministers he would find that although they attempted to re-open those questions, yet, after a time, they apparently coincided with Mr. Bruce, or at all events declared themselves ready to do what he desired. They made some objections to the length of the journey, and the time it would take, but they never suggested, nor did he believe they had it in their minds to suggest, to Mr. Bruce that the Emperor of China objected to that mode of proceeding to the capital, or that there would be any resistance to his taking that course. And for his (Lord John Russell's) part, he could not conceive why that objection should have arisen, supposing the Emperor of China intended to comply with the stipulations of the treaty, and to admit Mr. Bruce to ratify that treaty. If such had been his intention he could not have objected to Mr. Bruce taking the shortest route, nor to giving him those advantages in so short a journey—some forty miles, he thought—as that from Tientsin to the capital, which would have enabled him to reach that capital in the manner he had been led to expect, as the representative of a friendly Power. But it appeared that

there was another party that seemed to have a predominating influence with the Emperor of China, for it appears as if in that country they do not pursue the course commonly taken in this country, which is, that when one party is in power, the other is out—(a laugh)—the one pursues its own policy, and the other criticises it. But in China there are two parties in power at the same time, the one for peace and the other for war; accordingly, the treatment shown to the expedition was of a character totally different from that which was to be expected. Mr. Bruce desired Admiral Hope to proceed to the mouth of the Peiho, and there endeavour to ascertain what arrangements had been made for his reception. He had always supposed that he would be allowed to proceed up the Peiho with one or two ships. He did not propose to take the squadron. The admiral could not find out what was the case, or the orders given to the forts. It did not appear whether there was to be a resistance or not. A number of country people appeared on the shore. Mr. Bruce describes them as a rabble. They said they had no person of authority among them, that they were merely country people, that they had put stakes into the river to defend themselves from pirates, and that they knew nothing of what the Government would do. So matters remained until the last moment. It was not that Mr. Bruce had determined to resist the proposition of the Emperor of China that he should go by some other route, but he was induced, up to nine o'clock of the day on which the attack was made, to think that the Chinese Government was not disposed to oppose his proceeding. And let him here remark, that if Admiral Hope had been as successful as the gallant admiral who had just spoken in passing the forts and destroying them, they would have heard that Mr. Bruce had arrived at Peking; and, as the gallant admiral said, if his boats had not grounded in the mud before he got there, hundreds would have been ready to assist him to disembark, and the Emperor of China would have said that the resistance was against his orders, that it was a mistake, and would have proved himself ready to disavow any authority for the resistance that had been shown, and would have received him as became the representative of a friendly Power. But events turned out very differently. He did not attempt to say what course precisely might have saved Mr. Bruce from difficulties. It appeared to him that the evils Mr. Bruce had to consider were very great on every side. He was placed without instructions in a position he did not expect. He had a large British force, with a British admiral in command. He desired the admiral to clear the way. When the morning came upon which that was to be done, he received an intimation that if he would go to another place ten miles off he would there be received by a high officer, and means would be provided by which he might proceed to Peking. Now, let any gentleman consider the difficult position in which he stood. He was ordered by the Government of his country to go to Peking and obtain the ratification, and not to ratify that treaty anywhere else. He was told at the mouth that there was a militia and a rabble who had put down stakes to defend themselves from pirates. Some one at Shanghai told him that the Emperor of China meant to resist his advance; others told him that preparations were made for his reception at Peking, and that everything would pass with tranquillity. He was in that position to decide, under these circumstances, the question whether he should attempt the passage by force, or whether, without instructions, he should relinquish force altogether, should desire a British admiral with a large force to retire from forts which had been taken with ease a year before by another British force, and should thus appear to China and the whole of Europe to be shrinking before a force that had been easily overcome a short time before. Suppose that he had taken the other course, what opinion would have been passed in this country? Suppose that two or three days before he had said "We will not attempt to pass the forts—we will submit to any conditions or any proposals the Chinese Government may make." For his own part he was inclined to think that after the resistance, had it been successful, made by the British and French force in their advance, the Chinese Government would have been more disposed to be conciliatory to the Americans than they were under other circumstances. It was their obvious policy. But suppose Mr. Bruce had accepted the treatment the Americans received. He would have been conveyed to the capital; he said nothing as to the mode in which he would have been conveyed, or of the observations it might have excited; but that mode of conveyance was the least honourable that could be shown. But he would suppose that he had arrived at Peking, and had been treated in the same way as Mr. Ward—that he had been told that if he expected an audience with the Emperor, there were certain forms through which he would have to go; that he must strike his head on the ground, and by that means appear as tributary or vassal of the Emperor of China. He would suppose that he would have shown the spirit that Mr. Ward exhibited, and have said that he would observe no ceremony which was not usual at the courts of the Western Powers, and that he could not by any means submit to the performance of any ceremony which would be considered degrading, and place his sovereign in a rank inferior to that of the Emperor of China. They would have told him, as they told Mr. Ward, "Then what is the use of your coming here? You cannot ratify your treaty here. We will conduct you back, and then your treaty shall be ratified." Supposing he had done that, what would have been said in this country? "You had instructions to go to Peking to get your treaty ratified there. You have not obtained that ratification at Peking. You have already submitted to humiliation. You have not obeyed the instructions you received from her Majesty's Government, and what is your excuse?—That you might have met with a resistance which you would have been unable to overcome, although you had a strong British force at the mouth of the Peiho." It would have been said, "Were you not aware—and, indeed, had you not yourself been present when that resistance was overcome with the greatest ease? Do you not suppose that this militia would have been easily overcome? Do you not know the character given of the Chinese, that they are not a warlike people, and that that opposition from which you ran away, which you did not venture to face, would have been dispelled in half an hour if you had gone boldly forward?" (Cheers.) Could any one doubt that that would have been said in this country? On the other hand, there was the danger of the Chinese having perhaps made greater preparations than Mr. Bruce could be aware of—having ascertained exactly where they could place their stakes, so that their guns would fire with fatal effect, and therefore that the passage of the river might be stopped, and her Majesty's forces suffer a reverse, however great their gallantry and bravery

might be. He said that was the alternative Mr. Bruce had before him, and that never was a civil officer placed in a situation of more difficulty. Without attempting to decide, for he would not attempt to decide himself, whether the one course or the other was the best, he said there were infinite difficulties on both sides, and that her Majesty's Government were justfied, and not only justified, but must have felt it their duty, to tell Mr. Bruce that their confidence in him was not diminished by the course he had taken. When this information reached this country, her Majesty's Government came unanimously to the opinion that, whatever might be the terms proposed to China, whatever might be the course hereafter, it was necessary to show their strength in China; that whatever terms were proposed, they would be supported in such a manner that their moderation was the result of willingness and not of servility. He believed that that was the only course they could pursue. With regard to the particular terms they had offered, the gallant admiral had said most truly and justly, that they could not ask less than the treaty of Tientsin. That treaty had not only been signed, but had received the express approval of the Emperor of China. Nothing but its ratification remained to be given; and it would have been impossible for them to have said, "Because her Majesty's forces have suffered a reverse, and 400 or 500 men have been wounded, therefore we will give up the treaty and conditions, and trust to our faith in the Government of China." When, then, he had shown that whatever might be the case with respect to the right of the Emperor of China to forbid the passage of rivers, or defend their entrance, at least it was not justifiable to give no notice of that intention, to entrap the British Minister into an ambush, and fire upon him by order of the Emperor, that was conduct with respect to which he thought the dignity of her Majesty's crown and of the nation demanded ample satisfaction and reparation. (Hear, hear.) With regard to the general question, he agreed with the gallant admiral, and also with the sentiments expressed by the hon. gentleman opposite, that they should meet the Chinese with justice. It was not because this country and France were far stronger in war than the Chinese that they ought to treat them with harshness. He knew very well that by pressing too severely on the Government of China they might entirely dislocate the already feeble and impaired state of society which there existed, and that which was their business in China—their trade—must be more seriously injured by a conflict than by insufficient terms of peace. It was evident that it might become necessary to make preparations for any contingency that might arise, and they immediately communicated with the Emperor of the French in contemplation of such a course. There was, however, a chance that the Emperor of China might make overtures; that Mr. Bruce's readiness to receive those terms might become known, and that the whole matter might have been settled in a manner to satisfy their honour and at the same time to obtain the terms of the treaty. That hope has been to some extent disappointed, and it might be that it would be easier for a person of more authority than Mr. Bruce to obtain terms of peace. Whether there should or should not be a resident Minister at the Court of Peking, that was a matter which required consideration; but, from the first to last, their object had been to obtain the fulfilment of the treaty. He thought that every honour should be rendered to these gallant officers and the men under them, who, although unsuccessful, had displayed the greatest courage and the highest qualities which had ever distinguished the soldiers and sailors of this country.—Sir J. PAKINGTON concurred with the noble lord opposite (Lord J. Russell) in thinking that the House had not at present sufficient information to justify their coming to a decision upon this question, but he could not assent to all the observations of the noble lord. He hoped that what had fallen from the noble lord indicated that the course of the Government would be one of moderation. He regretted that the gallant admiral felt obliged to make that appeal. So far as his conduct in China was known, no one, he (Sir J. Pakington) believed, was disposed to attach blame to the gallant admiral. (Hear, hear.) The late Board of Admiralty unanimously approved of his conduct in China (Hear, hear.)—Sir D. L. EVANS hoped that the policy suggested by the gallant admiral (Sir M. Seymour) would be duly considered by her Majesty's Government. (Hear, hear.)—Lord PALMERSTON said that if Mr. Bruce had been told beforehand by the Chinese Government that they would not allow him to go up the Peiho he might have remonstrated and have asked for an explanation with regard to the mode in which he might go; but, inasmuch as no such intimation had been given to him by the Chinese, and they had stopped him at the mouth of the Peiho, it would have been inconsistent with the honour of England if he had advised the admiral who accompanied him to retire without any attempt to force a passage. It ought to be remembered that Lord Malmesbury had instructed Mr. Bruce to go to the mouth of the Peiho with a sufficient force; and it was not unnatural for Mr. Bruce to infer that Lord Malmesbury, by that expression, meant that, if the Chinese refused to let him pass up the river, the "sufficient force" that was to accompany him should compel the Chinese to let him pass.—Sir CHARLES NAPIER, having read a letter which he had received from Admiral Hope, giving details of the affair at the mouth of the Peiho, proceeded to speak in high terms of the gallantry of the admiral, who, he thought, had that night been rather depreciated, in order that Mr. Bruce might be the more extolled. He hoped that the Government would reward Admiral Hope's gallantry with the Victoria Cross.—Lord C. PAGET said he had, in reply to the two admirals who had spoken on this question, to inform the House that the Admiralty had not been unmindful of the heroic conduct of Admiral Hope and of the officers who had served under him. The admiral had several promotions for his officers given to him, amounting to six in all. As to the question of decoration, the Government had to consider it very carefully, for there should be some discrimination observed between that which was a victory and that which was not. (Hear, hear.) The Government would be glad to give the admiral any proofs of his gallantry, but if rewards were to be bestowed upon officers, however well they conducted their operations, but which did not end in success, it might lead to inconvenience. Imprudent officers might be led to undertake expeditions at a great loss of life in the hope of receiving this reward. (Hear.) It was the duty of the Government to exercise the utmost discretion in this respect; but Admiral Hope and his officers had their approval.—(Feb. 16.) In reply to a question from Mr. B. OSBORNE, Lord J. RUSSELL said that no decision had been come to by the Government in reference to Lord Kigin again proceeding to China, as had been reported.—Sir M. SEYMOUR moved for copies of letter from the Secretary to the Ad-

miralty, No. 336, dated the 9th day of August, 1853, respecting affairs in China, enclosing letter from the Foreign-office, dated the 16th day of July, 1853, enclosing letter from the Earl of Elgin and Kincardine to the Earl of Clarendon, No. 91, dated her Majesty's ship *Furious*, Gulf of Pecheli, the 23rd day of April, 1853; of letter from the Earl of Elgin and Kincardine, No. 101, dated her Majesty's ship *Furious*, Gulf of Pecheli, the 29th day of April, 1853, to the Earl of Clarendon; of letter from Sir Michael Seymour acknowledging receipt of same, No. 326, dated her Majesty's ship *Calcutta*, Hong Kong, the 27th day of September, 1853, with its enclosures—viz., letter from the Earl of Elgin and Kincardine to Sir Michael Seymour, dated her Majesty's ship *Furious*, the 21st day of May, 1853, and letter from the Earl of Elgin and Kincardine, dated Tientsin, the 6th day of July, 1853; and of letters from the Secretary to the Admiralty to Sir M. Seymour, No. 542, dated the 23rd day of November, 1853, and from the Secretary to the Admiralty to G. Hammond, Esq., dated Foreign-office, the 23rd day of November, 1853. —Mr. C. BRUCE also obtained a return of copies of letters from the Earl of Elgin to the Earl of Malmesbury, No. 103, dated the 9th day of May, 1853, with enclosures; No. 104, dated the 9th day of May, 1853, with enclosures; No. 107, dated the 11th day of May, 1853, with enclosures; No. 110, dated the 15th day of May, 1853, with enclosures; and No. 112, dated the 20th day of May, 1853, with enclosures; and from the Earl of Elgin to the Earl of Clarendon, No. 99, dated the 25th day of April, with enclosures; and No. 100, with enclosures.—(Feb. 24.) Sir M. SEYMOUR wished that the House would grant him their indulgence whilst he mentioned a matter personal to himself and reflecting to some extent upon his character as a naval officer and a member of that House. (Cry of "order.") He should not occupy their time many moments. He wished to refer to a paragraph that appeared in a public journal of last Tuesday, by which it appeared that a noble and distinguished earl in another place had made a statement that closely concerned his character. The gallant admiral read the paragraph in question, in which it was stated that the noble earl had made a certain communication to him on the 24th April, 1853, to the effect that upon the occasion of his (Sir M. Seymour's) joining him in the north of China, the noble earl stated to him that it would be necessary, not only for him in his own vindication, but in vindication of her Majesty's Government, to place the latter in full possession of all the facts, and that he should report those facts in respect to which our prospects in the north of China were compromised by the failure on his (Sir M. Seymour's) part to furnish armaments, and that if he (Sir M. Seymour) had anything to say in explanation, he, of course, might make a corresponding statement to her Majesty's Board of Admiralty, so that the whole case might be brought before the Government. Now, what he desired to say, in answer to what the noble earl was represented to have stated, was this—that, upon his honour as an officer in her Majesty's service, and as a member of that House, that statement was not accurate. (Hear, hear.) He should use no other words. Nothing of the sort, or of anything approaching to such a statement, had been made to him. Had such a statement been made to him it would have been his duty to request the noble earl to make it in an official form, and thus to have given him the power of making a representation to the Board of Admiralty. (Hear.) —Mr. BRUCE wished to say a word or two with respect to what had fallen from the hon. and gallant admiral lately in command of the Chinese squadron, and which related to the character of a noble lord with whom he (Mr. Bruce) was nearly connected. He would have risen immediately after the hon. and gallant admiral's observations had he not expected that some one of the noble earl's (Elgin's) colleagues would think it expedient, would think it, in fact, his duty to offer some remarks on those observations. He regretted as much as any one that these personal questions should be brought into discussion in that House. (Hear, hear.) But in justification of his noble friend he must observe that the bringing of the matter under the notice of parliament had not originated with him. The discussion of this personal topic had arisen partly from a statement made by his right hon. friend the late First Lord of the Admiralty (Sir J. Pakington), and from a statement of the hon. and gallant admiral that the Earl of Elgin had made certain charges or imputations against him which were not justifiable, and were incapable of being supported by facts. In consequence of those remarks, the noble earl thought it necessary to make a statement in another place. In that statement he said that he understood an impression had been created against him on the imputation that he had forwarded charges stating his feeling that the hon. and gallant admiral had not in China given him all the support he had expected; and the noble earl further said it had been imputed to him that he had not communicated the despatches containing those charges to the hon. and gallant admiral himself. The noble earl then explained that it had never been his custom to communicate to officers serving with him, or under him, despatches relating to their conduct, as he considered that these despatches were secret, inasmuch as they were only intended for the information of the Secretary of State, to whom they were forwarded. It was for the Secretary of State to break the seal of secrecy if he thought fit so to do. However, the noble earl stated on his honour as a peer the fact, which he was further willing to substantiate by the sanction of an oath, that not only had he stated to the gallant admiral the substance of his complaint, and that he was about to forward to the Secretary of State in writing all those complaints which he was making to the admiral verbally, but had also told the gallant admiral that if he had anything to complain of in reference to his (Lord Elgin's) statements, he hoped he would make his own statement and whatever explanation he might think fit. (Hear.) The hon. and gallant admiral to-night stated that the statement of his noble friend in another place was inaccurate. The question then became one between the veracity of the noble lord the late plenipotentiary, and—he would not say the veracity, but the memory of the honourable and gallant admiral. (Hear, hear.) Every one who knew the noble lord and his conduct during a long official career must be aware that he was utterly incapable of making not only an assertion on oath, not only an assertion in his place in Parliament, but any assertion of any kind, or under any circumstance, which was not consistent with accuracy and the most strict fact. (Hear, hear.) He hoped that the House or her Majesty's Government would order a commission to take evidence on oath, and inquire into the whole question between the noble earl and the hon. and gallant admiral. (Hear, hear.)—Sir J. PAKINGTON said that as he had been referred to by his hon. friend who had just addressed the House he hoped he might be allowed to express a strong wish that this matter, for the present,

might go no further. (Hear, hear.) A noble lord of great distinction and ability had made a statement in another place on his honour as a peer. The noble and gallant admiral (Seymour) had risen in that House and made a directly contrary statement on his honour as an officer. He (Sir John Pakington) did not believe that any gentleman in that House would deny any statement made by the noble earl, or any statement made by the honourable and gallant admiral. (Hear, hear.) He thought, therefore, that the only conclusion they could arrive at was that there had been unfortunately, but no doubt unavoidably, some misunderstanding between them. (Hear, hear.) So far as the public question was concerned, the papers were moved for which would show the merits of that question; and, so far as he was concerned, he was well content to leave it to those papers to show the part which the late Board of Admiralty had taken in the matter. (Hear, hear.) He confessed he did regard it as a matter of regret that, lying as they had been side by side in the Gulf of Pechi, the noble earl should have sent him despatches seriously criminating the gallant admiral without telling him what the contents were—what the nature of the charge made against him was; so that it was only through the circuitous mode of receiving a despatch from the Admiralty, calling on him for an explanation, that the hon. and gallant admiral was informed of the nature of that charge. (Hear.) Under these circumstances he did hope that this painful question, in which he believed there must have been some misapprehension between the parties, would at present go no further; and when the despatches were laid on the table of the House they would be able to judge of the merits of the question. —Lord J. RUSSELL said he could not but think that the statement of the right hon. gentleman the late First Lord of the Admiralty could be satisfactory to the noble earl who had been the subject of it. There were two questions, upon one of which he had not a word to say—namely, the question whether Lord Elgin had or had not any reason to complain of the gallant admiral, or of the delay of the forces coming up to his assistance. This was a question on which he was not prepared to say anything. The late Board of Admiralty had decided according to their own view of the case, and if any person wished to know anything more about the subject, no doubt the papers would be produced. But with regard to the personal question, what he gathered was somewhat different from the statement of the right hon. gentleman. A complaint had been made unfortunately in a work which had been published; and he thought it was almost always unfortunate when persons employed in the public service, or who had been so employed, chose very soon afterwards to give their account of the differences existing between officers serving the Crown—(hear, hear)—and making complaints that they had not been supported in their operations. But, that work having appeared, it was quite competent for the gallant admiral to make the statement which he had made. On the other hand, it was impossible, he thought, for the noble earl not to take notice of the rumours with respect to his conduct. The noble earl stated that the impression on his mind was fully and clearly that at the time when he wrote the despatch to the Foreign-office he stated to the gallant admiral what was the nature of the complaint that he thought that, in his public capacity, he had a right to make, and that although he did not show the gallant admiral the despatch to the Secretary of State, he did convey to him the nature of the complaint. The noble earl having made this statement on his honour as a peer, he (Lord John Russell) could not doubt for a moment that that was the impression on his mind. The gallant admiral had said, on the other hand, that the noble earl's statement was inaccurate—in other words, that the impression on his mind was that Lord Elgin had made no such communication to him. He had great respect for the gallant admiral, and he had no doubt that such was the impression on his mind. With regard, then, to a transaction which occurred on the other side of the globe, and as long as a year and a half ago, the only result he could arrive at was that these recollections and impressions differed materially; but he did not think that the difference affected the honour of either the noble earl or the gallant admiral. (Hear, hear.) He felt perfect confidence in the noble earl; and he had very lately recommended to her Majesty that the Earl of Elgin should be employed in a situation of the greatest confidence; and one in which much would depend on his discretion and judgment. After what had passed he felt, as the head of the Foreign-office, that he should not do right, Lord Elgin being his colleague, and having served the Crown in various capacities with great benefit to the public service and to the country, both in Jamaica and Canada, and also in China, if he did not say that he considered Lord Elgin entitled to the confidence of the Crown as an honourable, faithful, and distinguished public servant. (Hear.)

FORCES FOR CHINA.—General PEEL said, he had seen it stated in a public newspaper that there were fourteen regiments of the line, comprising 20,600 men, to be sent from India to China. He thought the public ought to be informed of the names of those regiments. The only provision made to meet the expenditure of the China war was a sum of 500,000*l.*, which he thought would hardly cover the cost of the transport of stores. He wished to know what was the number of British troops in India the Government were prepared to pay for in the next financial year. The total number of her Majesty's troops was 235,852*l.* Of these, 143,362 were on the British establishment voted by Parliament. The remaining 92,490 were on the Indian establishment. Now, these were in excess of the number of men voted by Parliament. It was necessary there should be a clear understanding upon this point. (Hear, hear.) He believed that the estimate would not cover the charge, and that the Government would be compelled to take an additional vote for China. In that case he should say that the estimates of the Chancellor of the Exchequer were incorrect. The gallant general concluded by asking the Secretary of State for India what was the amount and description of force that had proceeded, or was about to proceed, from India to China; specifying, if possible, the regiments of which the European portion of the force was composed, and what number of troops (including the depots) he was prepared to pay for out of the revenue of India during the next financial year.—Sir C. WOOD said, in answer to his right hon. and gallant friend, he would state what he believed to be the facts of the case. There had gone from India to China one company of Engineers, the 3rd Buffs, and the 67th Regiment. There were under orders to go to China two squadrons of Dragoon Guards, the 31st, 4th, and 99th Regiments, three batteries of Royal Artillery of horse, and one without horse. These were all that were actually reported as going. But orders were sent out to the Governor-General to send two more regiments, each of which it was said numbered little more than 800. He found, however, that the regiments going to China would be filled

up to 1,000. It was intended to send five, and orders had been given for two more, so that the number sent altogether would amount to 5,500. He was informed at the Horse Guards that the two next battalions going out were the 3rd battalion of the 60th Madras, and the 1st battalion of the 13th Calcutta; but that was not certain. In a letter received from India, he was told that it was the 56th Madras and the 66th Bombay: he was unwilling, however, to state that as a fact, as the matter was still uncertain.

With regard to the native force, he believed that there were four regiments going to China to replace those that were already there: that was a mere relief. With respect to the regiments going, they would be paid exactly as the regiments were now paid. There would be no difference. There would be five native infantry regiments of irregular troops to the extent of 4,000 men. There would be four troops of irregular cavalry of 400 men each, two companies of the Madras Sappers to the extent of 250 men, so that the total force would be 5,500 European troops gone or going from India to China, and 4,000 natives in round numbers. Some of the regiments in China were ordered back to India.—General PERL: Are any ordered home?—Sir C. Wood said there were no Queen's regiments ordered home from China. One dragoon regiment had sailed from India on its way home.

EDITOR OF THE "FRIEND OF CHINA" NEWSPAPER.—Mr. E. JAMES gave notice that, on the motion for the adjournment of the House on Friday, March 2nd, he would call the attention of the Under-Secretary for the Colonies to the case of the editor of the "Friend of China," who has been imprisoned for twelve months, in the felon's jail, under sentence for libel.

THE CHINA WAR.—Sir DE LACY EVANS has given notice of his intention, on an early day, to move the following resolutions:—"That, in the opinion of this House, no sufficient proof has been adduced of the late attack upon the Peiho forts having been authorised by the original instructions of Her Majesty's Government. That the recourse to force of arms, in order to use a particular route by Plenipotentiaries proceeding to exchange ratifications of peace, was unprecedented, and inconsistent with the object of a professed amicable mission. That, although under the untoward consequences of this ill-advised, hostile measure, some strong military demonstration on the part of the Allies may unfortunately be necessary, in order to restore our relations with the Chinese Government to a more satisfactory footing; yet were the failure of an unauthorised collision made a pretext for operations of an extreme hostility, involving for instance an attack on the city of Peking, or a conquest of territory by either of the Allied Powers, such a proceeding would be contrary to every principle of international law, nor would it be less impolitic, as being more likely to interrupt than promote the extension of commerce and diffusion of civilization amongst the population of that country. That this House humbly participates in the wish expressed by Her Majesty in her most gracious speech on the opening of this Session of Parliament, viz., 'It will be gratifying to me if the prompt acquiescence of the Emperor of China in the moderate demands which will be made by the Plenipotentiaries shall obviate the necessity for the employment of force.' That conciliatory expressions are also stated, through various credible sources, to have been made by the Emperor of China in relation to the conflict at the entrance of the Peiho, which almost permit of the anticipation expressed by Lord John Russell, that peaceful relations with the Chinese Government 'may be placed upon a permanent footing without further effusion of blood.' That, in the opinion of this House, nothing could more contribute to this most desirable result than the choice of a Plenipotentiary of reliable experience, and of conciliatory temper and judgment, for the conduct of this important negotiation, and for directing or counselling the disposition of Her Majesty's naval and military forces destined for this service."

Naval and Military.

THE CHINA EXPEDITION.

Nothing has transpired since our last issue in connection with the reinforcements for China. The increase to the 8th, 31st, and 73rd Regiments, already announced, has not taken any active form as yet; no reports have been published as to the progress of recruiting. No other announcements have been made as to troops or ships of war, and it is believed that nothing more will be done from this country, excepting in the supply of stores, &c. We refer to our Paris letter for movements in connection with the French contingent and convention said to be made by the Government with England. The *Himalaya*, with the marines and artillerymen detailed in our issue of 26th Jan., arrived at Alexandria on the 29th Jan., and were detained on board several days, waiting the arrival of the *Berenice* at Suez. Complaints were loud at the selection of so slow a boat. The 14th Dragoons from India, who are to come home by the *Himalaya*, had not arrived in Egypt. The Viceroy had visited the vessel, and one of the Armstrong guns was worked in his presence.

The vote for expenses of the China war, up to 31st March, is £850,000. Some Opposition members estimate the total at £4,000,000.

H.M.S. *Vulcan*, for China, encountered heavy weather on the passage to St. Vincent, and near Madeira was nearly wrecked.

The composition of the staff for China shows that Lord Clyde has not been forgetful of his old officers and friends; at the same time it is a most efficient body.

Lord Burghley put a question in the House as to when the field allowance claimed by the officers of the Artillery and of the Line, who were sent in the year 1857 to the attack of Canton, in lieu of the consolidated allowance which they were

ordered in April, 1859, to refund, was to be paid. Mr. S. Herbert said that part of the allowance which was due to officers who remained in China had been paid to them there, while those who came to England had, for the most part, applied at the War-office and received payment, and any officers who had not yet received the allowance who would make application at the War-office, would find the money forthcoming.

It will be seen that General Peel gave in the House on the 24th an account of regiments, &c., proceeding from India to China.

Rumour has it that H.M. Indian Navy is not to exist much longer,—in fact, that it is to be abolished; option being given to the officers to join the Royal Navy, taking their places according to the dates of their commissions, or to accept the pension which will be offered to them.

The increase to the Royal Artillery will be made in the shape of two brigades, to be numbered the 15th and 16th respectively. The 15th Brigade will consist of 56 officers, non-commissioned officers, trumpeters, drummers, and 1,608 rank and file. The 16th Brigade will number 53 officers, 80 non-commissioned officers, &c., and 864 rank and file. The promotions consequent on this augmentation will, in all probability, promote the lieutenant-colonels, down to Colonel Kennedy, to be colonels; the captains, down to Brevet-Major Longden, to be lieutenant-colonels; the second captains, down to Brevet-Major Penn, to be first captains; and the lieutenants, down to Lieut. Philip H. Sandilands, to be second captains.

The following regiments are to be increased by 100 men each, and fixed at a strength per regiment of 46 officers, 81 non-commissioned officers, and 1,050 rank and file, making a total of all ranks of 1,177—viz., 9th, 1st batt.; 10th, 1st batt.; 11th, 1st batt.; 11th, 2nd batt.; 12th, 2nd batt.; 14th, 2nd batt.; 15th, 1st batt.; 16th, 1st batt.; 16th, 2nd batt.; 17th, 2nd batt.; 18th, 2nd batt.; 19th, 2nd batt.; 20th, 2nd batt.; 21st, 2nd batt.; 22nd, 1st batt.; 24th, 2nd batt.; 25th, 2nd batt.; 26th, 29th, 30th, 32nd Light Infantry, 36th, 45th, 47th, 55th, 58th, 60th Rifles, 4th batt.; 76th, 78th, 84th, 86th, 96th, and Rifle Brigade, 1st batt. The other battalions not serving in India remain at 950 rank and file, with the same number of officers, with the exception of the 65th regiment, which numbers 1,400 rank and file.

Although the bounty paid to recruits in the Royal Marine Light Infantry has been reduced from £5 to £4 each, recruiting for that branch of the service is proceeding as briskly as before.

The utmost activity prevails in Chatham Dockyard among the contractors and others employed on the several works in progress for enlarging and improving that establishment, in order that the whole may be completed within the time required by the Admiralty.

The stern and quarters of the *Princess Royal*, 91, screw, have, as was expected, proved to be in a very rotten and defective state. This is especially the case with her transom and shelf-pieces. The whole of our men-of-war which have been built and converted lately in such a hurried manner, must, in the course of a few years, prove to be as defective, from the unseasoned state of the timber which has been used on those parts of the vessels.

The *Camelion*, 17, screw, has been launched from Deptford. She has only been six months in building.

On second lieutenant-colonels proceeding to China, the following remarks are made by the *Army and Navy Gazette*:—"We have heard it stated that the second lieutenant-colonels of the regiments proceeding to China are about being reduced to half-pay on their quitting the Indian establishment; and that it is in contemplation to allow regiments in India in future only one lieutenant-colonel. As regards the latter portion of the rumour, we have only to say that we doubt very much if four field officers be more than sufficient for a regiment serving in a climate where so many officers are obliged to be on leave for sanitary reasons, and where in many cases regiments are split up into wings and detachments. We do trust the question will be reconsidered before a step is taken which appears to be suggested by no consideration save one of indiscriminating economy. It so happens that some of the second lieutenant-colonels of regiments going to China are among the best officers of their rank in the army, and we hope they will not be taken from their respective corps just at the moment their presence with them is most to be desired."

APPOINTMENTS.—The following appointments have been subsequently made at the Admiralty:—Commanders: Walter J. Pollard, to be additional to the Hawke, for service in the coast-guard; William A. J. Heath, to be acting captain of the Highflyer, vice Shadwell, invalided. Lieutenants: Walter Strickland, from the Hero to the Royal Albert; James H. Coxon, to the Hero; John C. Wilson, to be acting commander of the Fury, vice Heath; Alexander Henderson, to command the Harpy, tender to Hogue; Henry G. Hale to the Greyhound.

The family of Mr. Ward, the United States Minister in China, is at Florence, and expects him there in March.

The *Athenæum* recommends Government to send a naturalist with the expedition to China. We know very little of the Fauna and Flora of Northern China.

The service of plate intended to be presented to Admiral Seymour by the mercantile community in Hong Kong, is nearly completed by Messrs. Hunt and Roake's.

NOTICES TO CORRESPONDENTS.

LONDON, TUESDAY, FEBRUARY 28, 1860.

THE TEA TRADE IN RUSSIA.

OUR correspondent at St. Petersburg, in his letter of the 2nd inst. which we printed in the last number of this journal, has prepared us for expecting very shortly to hear of a most important alteration in the Russian tariff, not merely by a reduction of the present rate of duty on tea, but also by a general permission to import that article into any part of the dominions of Russia, either by land or by sea. Remarkable as this intelligence certainly is, we have no reason to doubt for a moment the correctness of our correspondent's information; and in the meanwhile, whilst the Russian plans are being brought to a state of official maturity in the *bureaux* of the Minister for Finances at St. Petersburg, we take the opportunity of adding a few remarks of our own on the subject of the Russian tea trade, which we hope will not be altogether uninteresting to our readers.

The overland tea trade dates back to the year 1723, just before the death of Peter the Great (which event took place February 8, 1725), and its organisation was one of the closing acts of that celebrated potentate's brilliant and successful career. Kiachta was then, as at present, the great emporium of commerce with the Chinese, though latterly a good deal of the trade has found its way to Semipalatinsk, which lies further to the south, and is more conveniently situated, as well as nearer to the Chinese frontier. The experiment was found to succeed, and the trade gained more extensive dimensions every year, notwithstanding the serious drawbacks of requiring many months—and often more than a whole year—before any single transaction could be wound up and finally settled, to say nothing of the risks of various sorts to which the tea was exposed in being forwarded such a great distance, and having to pass through so many different hands, till it finally reached the tea-pot of the consumer. In the year 1791 the Empress Catherine II. relaxed the prohibitory system, and the importation of tea was permitted, not only by sea direct from China, but also from European ports, and thus a considerable trade in this article was carried on with Russia from England and Holland. This state of things lasted till 1822, when, in an evil hour, the Emperor Alexander I. published his famous protectionist tariff, by which the importation of tea, not only from European ports, but even from China direct by sea, was prohibited, and the tea trade restricted to the land frontier at Kiachta. This narrow-minded system, with but very few exceptional cases that have been made from time to time, remains in force at the present day. Odessa, a flourishing port of Russia on the Black Sea, which, though only founded so lately as 1792, by the Empress Catherine, after the peace of Jassy, contains now more than 60,000 inhabitants, for some years enjoyed the privilege of exemption from the restrictive commercial policy of Russia, and was permitted to import tea from Europe, by virtue of the imperial ukase of the 7th February, 1817, which declared it a free port, and exempted the inhabitants from taxation for a period of 30 years. To this special mark of Imperial favour must be mainly attributed the wonderful increase of the population, and extraordinary development of its commerce, in so short a time; but the present Emperor seems to think that Odessa is now able to stand on its own legs, as he abolished last year its privileges as a free port, placing it for the future in the same category as the other ports of the Russian empire. Ever since the year 1840, when the official statistics state the quantity of tea imported to be 247,000 poods (of 40lb. each), the trade has been gradually declining, not perhaps from a decrease in the

consumption of the article, but rather from the enormous quantity smuggled over the frontier of late years. From 1845 to 1847 the quantity that paid duty had fallen to 222,975 poods; from 1848 to 1850, the annual average was 210,698 poods; and from 1851 to 1853 it had decreased to 199,188 poods, or 7,967,620lbs. Consequently less than eight millions of pounds for a population of sixty millions of inhabitants notoriously the greatest consumers of tea in Europe, with the exception of Great Britain, and perhaps Holland!

In comparing the prices of tea in Russia with those of other markets, one is almost tempted to doubt the accuracy of the figures, so great is the difference in the quotations. "Common tea," says our Russian correspondent, "which rules at Canton at about 15 to 25 copecks, or 6d. to 10d. per lb., costs at St. Petersburg 24 to 3 roubles, or from 8s. 4d. to 10s. per lb." In the London market similar teas are worth 15 to 35 copecks, at Hamburg and New York about 20 to 40 copecks. The causes that lead to this discrepancy in the value of the same article in different markets, are not so much to be attributed to the increased expense of overland carriage, as to the peculiar organisation of the trade. It must be borne in mind that the Russians do not purchase their tea for cash, nor pay for it with coined money, but they receive it in exchange for their woollen cloth, cotton velvets, silk manufactures, leather, furs, and other produce of their industry. In this bartering trade, each article differing in quality from the rest forms the subject of special negotiations, and the exact price has to be agreed on. It is no wonder, then, that this barbarous mode of transacting business, so little in accordance with the spirit of the age we live in, should give rise to interminable discussions and painful haggling, accompanied by great delay; and after all one party must make a bad bargain, and be overreached by the other. It is true that in 1855 the Russian Government, in order to facilitate the transactions at Kiachta, introduced some important improvements and salutary changes in their regulations for carrying on the barter trade with the Chinese, but it is clear that no fiscal measures can ever totally eradicate the evils and inconveniences that this primitive mode of doing business must of necessity give rise to. In addition to the exportation of Russian produce and manufactures to China, the Imperial Government allows conditionally the payment for tea in gold and silver coin; but this permission is restricted to one-third of the value of the manufactured goods exported by each merchant, and one-half on furs and skins. With the exception of tea the imports of Chinese produce into Russia are quite insignificant. Whilst the whole value of the trade is officially estimated at six millions and a half of silver roubles, tea alone figures for six millions, whilst the odd half-million is frittered away in sugar, a little raw silk, a few drugs, and some sugar-candy.

With regard to the distance between Kiachta and the tea districts of China, it must be observed that the provinces that produce the article, and the places where it is prepared for exportation, are quite in the south, and consequently at a very great distance from the Russian frontiers. Nearly all the tea that goes to Russia is grown in the province of Kiang-se which the chief town is Foo-chow. When we talk of the tea being brought from China to St. Petersburg by land, the expression must not be taken in its literal sense, as for a great part of the distance it is conveyed by water. On quitting the province of Kiang-se, the tea is transported by the navigable canals to Kan-chang, whence it is sent in light carts for a distance of a hundred miles across the mountains. It is then reshipped on the Yang-tse-Kiang, passing Nankin, ascends the Hoang-ho or Yellow River, and at length arrives at Tien-tsin by the Grand (or Imperial) Canal, after being more than a month on its water-carriage. At Tien-tsin the chests of tea are loaded on the backs of camels and buffaloes, and arrive at Kiachta after the lapse of three or four months more. On the Russian territory they are again subjected to an alternating land and water carriage. After winding through the mountain passes down to the eastern shores of Lake Baikal, they are shipped upon rudely constructed boats, little better than rafts, in which they cross the lake, and ascend the broad but very shallow Angora to Irkutsk. Here they are transferred to the small and cumbersome wagons of the country—except in winter, when they are mounted on sledges, which is a far more expeditious mode of conveyance—and slowly dragged along at the northern base of the Altai chain of mountains to Semipalatinsk, where they again embark, floating down the river Irtysh to Omsk, whence they again proceed by land carriage, passing through Petropaulofsk and Troitsk, where the dreary work of

crossing the Ural mountains commences. Having accomplished this hazardous feat, they are now in Europe, for at the watershed on the top of the mountain stands a granite column bearing on its east and west faces the magnificently grand conception, but simple inscription, "Asia" on one side, and "Europe" on the other. Having safely arrived at Oufa on the Belaija, they again take water, floating down that river to its junction with the Kama, and the confluence of the latter with the Wolga at Spask. Thence, still by water, up that noble stream to Nishny-Novgorod, celebrated for its great autumnal annual fair. From Nishny-Novgorod to Moscow the distance is about 500 miles, and the tea is conveyed thither by land-carriage, and finally from thence to St. Petersburg by the railway. It is one of the deep-rooted popular superstitions—more especially in Russia, where it is sedulously propagated and religiously believed—that the quality and flavour of tea deteriorates by a sea-voyage, and hence arises in a great measure the general belief that the tea consumed in Russia is of better quality, and contains more aroma, because it is conveyed by land, than the article sent by sea to other parts of Europe. But this superstition, like all others based upon prejudice and ignorance, has been destined to receive its death-blow from the dawn of civilisation and scientific knowledge in Russia. The question had been often discussed, and at length a commission, composed of members of the Imperial Academy of Arts and Sciences, was appointed to investigate the subject, and report their unbiassed opinion on it. From the tenour of their report, based on chemical analysis and practical experiments on the same tea, prepared and packed in the same identical manner, but sent by the two different routes, the fallacy of the superstition is proved beyond a doubt, and it was shown that there was no appreciable difference whatever, either in the weight, taste, appearance, or smell, between the two. From the above description of the manner in which the tea is conveyed by the overland route, it will be moreover apparent to our readers that that expression must be taken *cum grano salis*; for nearly one-half of the distance is performed on lakes, rivers, and navigable canals. It is true that, mathematically speaking, the distance may be less by land from Canton to St. Petersburg, than by sea round the Cape of Good Hope and up the Baltic; but the difference in distance is more than compensated by the time—and consequently interest of money—saved, whilst it cannot be doubted that the cost price must be greatly and needlessly enhanced by having to be sent 8,000 miles by land rather than 14,000 miles by sea. The freight by a sailing vessel does not increase the price of tea so much as a halfpenny per lb., which is not above 3 or 4 per cent., whilst the expensive and tedious land-carriage comes to 9s. per lb., which is equal to 1,000 per cent., or ten times its original cost price in China.

Finally, there is another reason for rejoicing in the forthcoming modification of the fiscal regulations with regard to tea in Russia. If, as our correspondent at St. Petersburg believes himself warranted in stating, the alteration should really be of such an extensive nature as to be thus summed up in his own expressive words—"A moderate duty on tea, and permission to import it by sea and by land into any part of the empire"—then there can be no doubt that a new branch of business will spring up between this country and Russia to the profit of our merchants and the benefit of British shipowners, who already participate in the carrying trade with Russia to the extent of more than one half; and this is certainly some cause for self-congratulation. But there is another higher, less sordid, and far more noble reason for welcoming this expected change, which is, that it will strike a sudden and irreparable death-blow to the degrading and demoralising system of smuggling carried on so notoriously and unblushingly in the Russian dominions, that their own statistic writers, Tengoborsky and Nebolsine, state on authority that fully as much tea is smuggled into that country as is imported in a legitimate manner.

THE TRADE OF JAVA IN 1858, AS COMPARED WITH THAT OF 1857.

It is only a few months since we gave our readers an account of the trade of Java and Madura for 1857, and we are now enabled to lay before them the results of the year 1858, taken from official documents received from Holland, through the courtesy of a high civil functionary in that country; and in so doing we shall compare the figures with those of the previous year, from which the difference will be more clear and apparent.

The total value of the imports for the two years was as follows:—

	Private.	For Account of Government.	Total Amount.
1858 ..	36,371,384fl.	26,155,380fl.	62,526,764fl.
1857 ..	38,638,028fl.	24,986,541fl.	63,624,569fl.

From the above it appears that the imports by private merchants had fallen off in 1858 by 2,266,644fl., and though there was an increase of 1,168,839fl. in the importations by Government, the total shows a deficiency of 1,097,805fl. This is explained by the great falling off in the value of the specie and precious metals, which amounted to nearly four millions of florins, as shown by the following figures:—

	Private Trade.	For Account of Government.	Total.
1858 ..	1,186,423fl.	11,916,102fl.	13,102,525fl.
1857 ..	4,424,536fl.	12,420,000fl.	16,844,536fl.
Less in 1858 ..	3,238,113fl.	503,898fl.	3,742,011fl.

On the other hand, the goods imported by private merchants show an increase of nearly three millions, and this improvement is more or less extended to the produce of all parts of the world, with the single exception of Japan, as the following table will show:—

Imports from	1857. Florins.	1858. Florins.
Europe, America, and South Africa....	26,656,824	29,348,274
Western parts of India and Bengal	1,360,517	1,484,189
China, Manila, and Siam	2,834,879	3,061,429
Japan	1,951,461	625,855
Eastern Archipelago	13,976,352	14,904,492
Total.....	46,780,033	49,424,239

In the imports from Holland there is an increase of about a million and a-half of florins, and it is satisfactory to observe an improvement of nearly a million in the goods imported from England, whilst from all other countries in Europe and America there is a falling off:—

Imports from	1857. Florins.	1858. Florins.
Holland	11,629,669	13,160,814
Great Britain.....	8,121,808	9,112,756
France	465,746	417,725
Other European States	587,404	522,953
United States of America.....	293,126	160,463
Total.....	21,097,753	23,374,684

The above-mentioned produce, imported by the private trade from Europe and America, are specified as follows:—

	1857. Florins.	1858. Florins.
Manufactured goods.....	12,961,946	14,647,804
Provisions	1,192,100	1,215,643
Wine, spirits, and beer	1,653,309	1,998,362
Iron and machinery.....	1,117,785	1,674,265

It is also highly satisfactory to observe that British manufactures, though notoriously subject to a high protective duty, are not only able to compete successfully with the fabrics of other countries, but in this case even with those of the Dutch themselves. For the 14,647,804fl. worth of manufactured goods imported into Java in 1858, we find specified as follows:—

	Florins.
From Great Britain	7,094,110
From Holland, with certificates of Dutch origin	5,546,351
From Holland, manufactures of other countries	1,619,733
From other countries in Europe	39,072
From America	34,095
From elsewhere	314,443

To enable our readers to judge for themselves of the relative value of the different kinds of manufactures mostly consumed, as well as the increase or decrease of 1858 as compared with 1857, and the value of the foreign manufactures in comparison with those of Holland, we subjoin the following table:—

Description of goods.	With certificates of Dutch origin.		Foreign manufactures.	
	1857. Florins.	1858. Florins.	1857. Florins.	1858. Florins.
White cotton goods	1,774,475	1,684,857	2,165,694	3,167,837
Unbleached ditto	859,408	904,961	245,753	515,063
Coloured ditto	61,469	136,603	135,223	84,933
Printed ditto.....	215,403	260,951	1,996,531	1,269,579
Printed and coloured } Adrianople	475,330	450,721	500,054	506,694
Kain-pandjans, Sarongs, } and Slendangs	660,888	709,582	1,061,343	1,079,979

From the Eastern Archipelago there is an increase in the imports of native produce over those of 1857, amounting to a million of florins, and we find the value specified as follows:—
From Borneo, 1,563,667fl.; from the west coast of Sumatra, 1,293,478fl.; from Palembang and Banca, 643,266fl.; and from Riouw and Lingga, 933,245fl. Among the articles specified we find gambier figures for 745,822fl.; pepper, 934,620fl.;

wax, for 879,415fl.; oil, 590,833fl.; and coffee, 441,593fl. From Sumatra alone the quantity of coffee received was 10,062 peculs, of the value of 313,671fl.

From Bengal and Ceylon the imports of goods amounted to 220,116fl.; from the Persian Gulf, 33,157fl.; from China, 548,442fl.; from Singapore, 284,650fl.; from Manila, 351,953fl.; from Siam, 230,042fl.

Although the imports of 1858 show a falling off, as compared with those of 1857, there is a very marked increase in both, as compared with previous years, as the following table will show at a glance:—

	Florins.
Average of 1848-1852	35,835,950
1853-1855	53,335,909
Imports of 1856	57,305,826
1857	63,624,569
1858	62,526,764

Thus showing an increase of 70 per cent. over the imports of 1848 to 1852.

Whilst the British and American articles of produce and manufacture have been increasing during the last three years, those of the Netherlands exhibit a corresponding retrograde movement, as the following figures will show:—

	Great Britain.	America.	Holland.	
1856	40	1	54	per cent.
1857	46	2	51	of
1858	47	6	47	imports.

Favourable as the results of the import trade may unquestionably be called, we shall find that the exports are in a still more satisfactory condition. During the two years, 1857 and 1858, the total value of exports was as follows:—

	Private Trade.	For Account of Government.	Total.
1858 ..	52,240,403fl.	62,201,811fl.	114,442,214fl.
1857 ..	48,529,311fl.	57,394,573fl.	105,923,884fl.

exhibiting a surplus of 3,711,092fl. in the exports of private merchants, 4,807,238fl. more in those for account of the Netherlands Government, and on both together a total increase of 8,518,330fl. It is worthy of remark, that the exports of the precious metals and specie were very considerable in 1858, as the following figures will show:—

	Private Trade.	Government Account.	Total.
1858 ..	5,973,338fl.	9,187,778fl.	15,161,116fl.
1857 ..	4,451,131fl.	1,570,555fl.	6,021,686fl.

Increase in 1858 } .. 1,522,207fl. .. 7,617,223fl. .. 9,139,430fl.

After deducting the value of the specie from the total amount of exports, we find the remainder to be—for 1858, 104,914,197fl.; and for 1857, 103,984,209fl., which sums represent the value of produce shipped in those two years respectively. With regard to the countries which originally produced these goods, we find them specified as follows:—

	1857. Florins.	1858. Florins.
Eastern Archipelago	95,360,222	94,239,964
India and Bengal	130,128	105,586
China, Manila, and Siam	143,793	167,638
Japan	478,917	858,570
Europe and America	3,789,138	3,910,240
Other countries	4,082,011	5,632,199
Total	103,984,209	104,914,197

whilst the principal countries to which the produce was shipped were:—

	1857. Florins.	1858. Florins.
Holland	75,629,447	77,628,738
Other parts of Europe	7,000,000	4,791,294
America	780,874	846,381
Australia	512,985	498,945
Eastern Archipelago	6,285,729	6,139,926
Other countries	5,144,787	4,333,780

The following table shows the relative proportions of the principal articles exported to Holland by Government and private merchants in 1853:—

	Government Account. Florins.	Private Trade. Florins.
Coffee	27,160,813	1,711,327
Sugar	15,184,343	16,886,514
Rice	—	1,519,992
Indigo	2,214,409	1,602,764
Tobacco	48,646	1,025,077
Spices	942,306	37,822
Tin	6,376,302	94,075

The subjoined table shows the comparative quantities of the

principal articles exported to all parts of the world in 1857 and 1858, both by the private trade and for Government account:—

	1857.	1858.
Coffee	976,839..	1,096,428
Sugar	1,696,335..	2,111,649
Rice	2,057,581..	1,527,885
Mace	1,391..	2,171
Cloves	4,569..	131
Nutmegs	5,888..	7,877
Tin	103,674..	74,666
Indigo	1,064,240..	1,062,863
Cinnamon	1,619..	2,239
Cochineal	100,836..	62,437
Pepper	8,904..	9,183
Tea	13,849..	15,060
Tolacco	57,334..	86,745

The general result of the export trade from Java during the last eleven years will be seen by a glance at the following figures:—

	Average of the years 1848-1852	Exports of the year	1853.	1854.	1855.	1856.	1857.	1858.
	61,200,798	71,692,956	71,385,420	84,112,397	105,726,122	105,923,884	114,442,214	

thus establishing a steady annual increase till the exports of 1858 have risen to nearly double what they were in 1848-1852.

With regard to the navigation, we find the number of vessels, together with their tonnage (given in Dutch lasts, each of which is equal to two British tons), arrived at Java as follows:—

From	1857.		1858.	
	Ships.	Lasts.	Ships.	Lasts.
Holland	172	58,428½	200	65,641
Other parts of Europe	101	29,043½	55	13,323
Altogether from Europe	273	87,471½	255	78,964
America	41	12,631½	21	60,179½
Cape of Good Hope	15	3,742	26	6,619½
Cape Verde Islands	1	337	1	331
India	17	4,332½	18	4,306½
China, Manilla, and Siam	90	19,390½	87	17,518½
Mauritius	3	996	7	1,636
Kooria Moorla Islands	—	—	1	223
Japan	5	1,869	2	407
Australia	82	23,670	83	21,149½
Eastern Archipelago	2,116	73,509½	2,381	85,665½
Total arrivals	2,643	227,949½	2,882	222,900

As might be expected, the Dutch flag took the lion's share in the carrying trade, both in the arrivals and departures, as may be seen by the following tables:—

Arrivals under the Dutch Flag.		Ships.	1857. Lasts.	Ships.	1858. Lasts.
From Holland	172		58,428½	200	65,641
„ Great Britain	26		8,530½	19	5,667
„ France	3		866	5	1,681½
„ Belgium	—		—	—	—
„ Hamburg	3		800	—	—
„ other European ports	15		3,268½	2	368
„ Cape Verde Islands	6		2,098	16	4,541
„ Cape of Good Hope	1		337	1	331
„ America	16		3,874½	7	1,521
„ India	4		1,394	8	2,442
„ China, Manila, and Siam	46		22,460½	53	13,906

THE ELGIN-SEYMOUR CONTROVERSY.

The *Times* of this morning has the following *resumé* of the correspondence and quarrel of Lord Elgin and Sir M. Seymour. The correspondence must be deferred to our next issue.

“From the despatches it appears that Lord Elgin, lying in the Gulf of Pecheli, on the 29th of April, 1858, despatched to Lord Clarendon, then Foreign Minister, a letter, wherein he complained of the conduct of the Admiral, who had been commissioned to give material force to Lord Elgin's diplomacy. The Ambassador stated that on the 2nd of March, when leaving Hong Kong, he had, by a written communication, directed Sir M. Seymour to collect at Shanghai, towards the end of March, or soon after as might be convenient, as large a fleet, more especially of gunboats drawing little water, as the Admiral could spare from service elsewhere. To this communication Lord Elgin states the Admiral replied that his attention had already been directed to that object, that a gunboat and gun-vessel had already sailed for Shanghai, that arrangements were in progress for others to follow, and that it was his intention to sail for Shanghai in the *Calcutta*, ‘should nothing prevent,’ on or about the 16th of March. Lord Elgin proceeds to complain that, notwithstanding this assurance, he had been waiting at Shanghai till the 3rd of April, without news of the Admiral, and that on the 16th of April he was off the mouth of the Peiho without any sufficient force. On the 29th of April we find another despatch, wherein Lord Elgin reports that the Admiral had arrived on the 24th in her Majesty's ship *Calcutta*—a vessel which, as he remarks, draws 25 feet of water, and could not approach within several miles of the bar of the Peiho river. He adds that the gunboats were still not come up, and he remarks bitterly upon the consequences of the delay. Contrasting the slackness of the British Admiral with the promptitude of the French, Lord Elgin next states that the French Admiral arrived on the 25th of April with his whole fleet, and that at the moment of writing his despatch the French flag is represented by two gunboats within the bar of the Peiho, and the English by two despatch boats aground on the top of it. Sir Michael Seymour, being referred to, answers last despatch in a detailed report to the Admiralty. As to the Ambassador's last point, which we have quoted, Sir Michael says:—‘I might smile at this statement, were it not on account of the motives which appear to dictate it, and the impression it must have made on their Lordships. The *Nimrod* and *Cormorant* had grounded in the previous night in trying to cross the bar in company with three French gunboats, as did one of the latter. In two hours after his Lordship's despatch was sent away both vessels had crossed the bar, and the English flag was represented by three English vessels (including the *Slaney*) of superior force to the French; the English boats close to the batteries, the French somewhat to the left.’ As to the other matters complained of, the

Admiral shows that on the 15th of March five vessels left Hongkong, and that three others sailed a few days later, that he left orders for the smaller gunboats to follow him on the 10th of April, that he himself would have left on the 18th of March if he had not been delayed by gales, and that the French Admiral left Hongkong one day later than Sir Michael. He moreover shows that the Admiralty were so satisfied with his explanation that the Board assured him of their entire approval, and transmitted a very unequivocal censure upon Lord Elgin for the despatch he had written to his own chief.

“Sir Michael says:—
“I have had two years' experience in Chinese warfare, and anyone who has been long in China will bear me out in the assertion, that nothing but the conclusive evidence of irresistible force will ever fully satisfy the Imperial Government. I consider, therefore, as stated in my despatch reporting the operations at the Peiho, that the Chinese having been allowed time to fortify their position, and being confident of their strength, the capture of the forts under such circumstances would have a greater moral effect on the Imperial Government than if we had attacked them when less prepared. Subsequent events fully bore out my opinion. It was ascertained that guns from Tientsin, and even from Peking, had been conveyed to the forts at Taku, and that all the available military force was also assembled there. At one blow, therefore, the whole of their guns were captured, and their army driven like a scattered rabble into the surrounding country, to spread everywhere the reports of our invincibility, and the destructive and terrific missiles we made use of. To this brilliant and complete success I attribute our total exemption from annoyance while at Tientsin, and the conclusion of a treaty within a month after which may be said to open the whole of China to the world, and which may in a few years develop a field for commercial enterprise of which we have at present no conception.”

“These two dissatisfied heroes have now both been heard. Seymour, King of Men, and the swift-witted Elgin have made their orations. Lord John Russell, the Ulysses of this great schism, vainly proposed to offer up a sacrifice in the shape of poor Mr. Oliphant. This convenient and magnanimous course of sacrificing the secretary and hushing up the quarrel will only, as such policy deserves, make matters worse; for Lord Elgin will probably feel himself compelled to avow that Mr. Oliphant acted under his instructions as to what unpublished matter he should insert, and what he should omit, in the official history of the Elgin mission. Thus it stands, a very pretty quarrel, in which everybody seems to be in the wrong.”

Literature.

Yes and No; or, Glimpses of the Great Conflict. Macmillan and Co., Cambridge; and Covent-garden, London.

Having perused this work, we must acknowledge that the author is a really clever man, but we confess that, with the exception of High-Churchism, we are puzzled in ascribing to him his peculiar “forte,” for on every possible subject does he dilate. We find in this work theology, politics, metaphysics, transcendentalism, gastronomy, mesmerism, “fast” life, atheism, Puseyism, even death itself; and, therefore, from its very discursiveness, it possesses some peculiar interest for each description of reader. The talent exhibited throughout the work is undeniable; the plot is most cleverly worked out, and the character sketches are spirited and dashing. We should fancy, from the style pervading the book, that it is the author's first essay in literature, but there is good promise in this work, and a freshness that will repay the reader for a perusal of its chapters.

The China Question.

Continued from our last.

With reference to Lord Elgin's forced inactivity on his first arrival, owing to the troops destined for China having been ordered to Calcutta, the writer thinks—

“There can be no doubt that, had Lord Elgin, in the summer of 1857 gone to the north alone, or unaccompanied by a strong and imposing force, or indeed gone at all, before something striking had been done at Canton, the disappointment would have been greater. The fact is, that at the very time when Lord Elgin was lamenting his inability to move to the Peiho, and thence to seek access to Peking, the experiment was making by the Russians, and utterly failed.”

With reference to the blockade of the Canton river, the writer, as we might expect, strongly protests against it.

“The decision of the question was embarrassed, too, by the conflicting interests of the British traders themselves, who, having bought teas at high prices in the north, were solicitous that the blockade should be maintained. They, in the true mercantile spirit, did not care a farthing whether it was a lawful blockade or not. Regarded at a distance, and from the platform of something like old-fashioned principle, it seems to us that there never was a greater violation of public law, or a worse precedent, than the regular blockade of the Canton river, from its inception to February, 1858, without a declaration of war. Every authority, ancient and modern, is against such action. From Blackstone to Blackwood every writer in England pronounced against it, for it so happens that one of the strongest condemnations of what was actually doing appeared in the columns of the *Scotch periodical* for June, 1857.”

Judging from the character of the writer, we are somewhat surprised at the following:—

“Lord Malmesbury, instigated doubtless by the complain's of parties at Hong Kong, all of whom, with a perverse unanimity characteristic of that wretched community, were adverse to anything done or suggested by Lord Elgin, wrote”—

On the capture of the Taku forts in May, 1858, we read—

"It was altogether a sad and sickening sight. Among the voluntary spectators of this easy conquest, as we have heard, was Mr. Bruce, then Lord Elgin's chief secretary, and now his successor, destined within little more than a year to witness a ghastly contrast—not dying and dead Chinamen uncared for by their Christian conquerors, but nearly five hundred of the bravest and most gallant of his own countrymen slaughtered and mutilated, and but a remnant recoiling in disgrace before the worthless battlements of Taku, and owing their escape to the very neutrals who, a year before, were the objects of so much and so unjust suspicion. The official despatches lately published, descriptive of the disaster of 1859, are deplorable revelations of the worst sort of incapacity, and are in painful contrast to those in which Lord Elgin announced a bloodless victory."

Whilst on Admiral Hope's conduct the writer says:—

"Who can say that Admiral Hope would have made the attack of last June if left to his own unprompted judgment? Or who can doubt what would have been his doom, had he, like Admiral Seymour, refused to be goaded into action before he was ready, when, as Mr. Bruce now says, in his apologetic despatch of the 13th of July, 1859, 'if Admiral Hope had expressed doubts on the subject, they would not have been shared by his squadron, who have had most experience of warfare in China.'"

Pictures of the Chinese. By the Rev. R. H. COBBOLD, late of Ningpo. John Murray, Albemarle-street, London.

The author, after many years' residence in Ningpo, has produced this work from daily notice of the manners and customs of the Chinese; and certainly it contains revelations which are novel and unknown not only to ourselves, but to many others who have been long resident in China. This, considering the very exclusive manner in which all foreigners live, is not to be wondered at. Our author, like other missionaries, differs in that particular, and has not been averse to mixing with the Chinese in their social and every-day life. These experiences have been carefully noted, and the book under notice is the result. Among the anecdotes we may notice that China, like all other countries, has its malady of tooth-ache and quacks, and among the many itinerant professionals that of dentist is performed by a woman, of whom there are some two thousand in the province of Che-keang. Diseases of the teeth are said by them to proceed from the existence of a worm in the gums, and although the author does not agree with the nostrum, still he assures us the belief is universal among the Chinese, who pay at the rate of three-pence for each worm extracted, which by some piece of legerdemain are produced from the mouth of the operator. There are many other similar habits and prejudices recorded and neatly illustrated by numerous sketchings in an instructive and amusing manner, and we think it will be found interesting even to old residents in China, but doubly so to the general English public.

We have always thought it, however, a great disadvantage to the cause of Protestant missions that after a missionary should have resided in China some few years, and fairly mastered the language, he should then return to this country, and settle comfortably down and write narrative books. This is to be regretted more especially just now, when the numerous works written upon China nearly all of them contain some allusions to the unwearied zeal of the Catholic missionaries and the evident "insouciance" of the Protestants. The style of the writing is pervaded with a tone of sentimentality which we cannot admire, and, indeed, we may add that we expected a more profound emanation from one calling himself an Archdeacon.

A Life Struggle. By Miss Pardoe. L. Booth, Regent Street. Another work from the prolific pen of Miss Pardoe is always anticipated with much interest in the literary world. This novel, however, in our opinion, does not come up to Miss Pardoe's previous works. The characters are all *strongly* drawn, Mr. Greville's particularly so; but the moral inculcated throughout the two volumes we think pernicious, as it extols the absurd and *actually* selfish theory of self-sacrifice, of which many, indeed, of our modern female novelists have made themselves the champions. The book, however, is pleasantly and vigorously written, and will amply repay a perusal, if only for comparison and criticism. No reader of Miss Pardoe's works should omit this production.

NOTES.

✓ A French rival to Mr. Oliphant's narrative has just appeared, in the form of "*Souvenirs d'une Ambassade en Chine et au Japon en 1857 et 1858*," by the Marquis de Moyes.

Upwards of 6,000 copies have already been issued of Mr. Russell's "*Indian Diary*."

In spite of the success of the *Cornhill*, the sale of *Macmillan's Magazine* has steadily increased. Of the current number a second edition was called for immediately; the circulation is 12,000.

✓ Mr. Wingrove Cooke is bringing out a work on the colonisation and conquest of North Africa.

Births, Marriages, and Deaths.

BIRTHS.

- VACHER—On the 20th inst., at 7, Upper Phillimore-place, Kensington, the wife of W. H. Vacher, Esq., of a son.
WADMAN—On the 1st inst., on board the P. and O. steamship *China*, the wife of Captain Arthur J. P. Wadman, King's Dragoon Guards, of a daughter.
BALDWIN—At Fuhchau, on the 22nd Dec., the wife of the Rev. Stephen L. Baldwin, of a daughter.
McKELLAR—At Shanghai, on the 22nd Dec., the wife of Mr. John McKellar, of a daughter.
LAEN—At Hong Kong, on the 1st Jan., the wife of Capt. P. H. Laen, of the steamer *Remi*, of a daughter.
STILL—At Canton, on the 4th Jan., the wife of E. A. Still, Esq., of a daughter.
PAIN—On board the British ship *Marchioness of Londonderry*, at sea, the wife of Dr. Pain, H.M. 1st Royals, of a son.

MARRIAGES.

- FLETCHER—VINCENT—On the 20th inst., at St. Saviour's, Jersey, by the Very Rev. the Dean of Jersey, Edward Philip Fletcher, Esq., only son of the late Charles Philip Fletcher, of Messrs. Fletcher, Alexander, and Co.'s, of London, Esq., to Julia Mary, daughter of the late Captain George Vincent.
PHILLIPS—LANE—At St. Andrew's, Plymouth, by the Ven. the Archdeacon of Cornwall, Octavius Phillpotts, Esq., youngest son of the Right Rev. the Lord Bishop of Exeter, to Georgiana Harriet, second daughter of T. V. Lane, Esq., and granddaughter of Powinoll Bastard, second Viscount Exmouth, of Canonteign.
JONES—WILLIAMS—On the 21st inst., at Llanfihangle, Gwynedd, by the Rev. John Jones, vicar, John James Brook Jones, Esq., late commander of H.M.'s gunboat *Insolent*, only son of the late Rev. Thomas Jones, vicar of Llanrhydian, Gower, Glamorganshire, to Adah, eldest daughter of the late Richard Williams, Esq., M.D., Aberystwyth, Cardiganshire.

DEATHS.

- REID—On the 17th inst., Alex. Reid, Esq., of 4, Palace-gardens-villas, Kensington, and late of Ceylon.
CARLISLE—On the 30th Dec., Mr. Robert Wolf Carlisle, of Canton.
STILL—At Canton, on the 4th Jan., the infant daughter of E. A. Still, Esq.

Monetary and Commercial.

The Budget, and the discussions which it has given rise to, affecting, as it does, so extensively the import and export trade, has of course tended to restrict business. The friends and opponents to the scheme are about equally matched. The signal victory obtained by Ministers in the House of Commons has been regarded in the City, however, as a guarantee for their continuance in office, and for the ratification of the French treaty. Several meetings of the tea and colonial produce trade have been held, and committees appointed for the purpose of representing to the Chancellor of the Exchequer that the proposed charges on the rebonding and warehousing of tea are considered exorbitant. The question of the heavy charges proposed to be placed upon warrants has also been discussed. Other meetings have been held in all parts of the country, the details of which are quite out of the limits of any one report, and as opinion hourly gains ground that the proposed measures will all be carried, their utility is dispensed with. The Chancellor of the Exchequer, in reply to Mr. Glyn as chairman of a committee, says:—"With regard to the registration duty of 1d. on imports and exports, it is never to exceed a maximum of $\frac{1}{4}$ per cent. upon the value of the articles. If the tax of 3d. on dock warrants should appear to be too heavy, it can be reduced."

The Board of Trade returns for 1859 show the exports to be £130,440,427, being 12 per cent. more than in 1858, and $7\frac{1}{2}$ per cent. more than in 1857—the most active year ever known. This expansion of the export trade helps to account for the rise in the value of money.

The question regarding a bank-note circulation in India has been decided. There is to be a Government issue of £5,000,000 from Calcutta and the local treasuries.

It is stated that the India Council have agreed to occupy a large portion of the building in Victoria-street, Westminster, now in course of construction for the Westminster Palace Hotel Company, for three years from the 1st of July next, at a rent of £6,000 per annum—a temporary arrangement until permanent public offices can be erected in that locality. The library and museum are to be transferred to the British Museum, and the principal documents to the State Paper Office.

A meeting of the Chartered Bank of India, Australia, and China has been adjourned to the 29th of March, by which time complete accounts for the past half-year will have been received from the several agencies, and the directors will be enabled to decide upon a dividend.

The total quantity of tea imported in 1859 from China

was 76,362,008lbs.; and of silk, 3,192,632lbs. raw, and 117,454lbs. thrown. Of exports of cotton goods, &c., £4,457,631.

The amount of specie by the last mail is £224,892, of which £1,050 is gold for Alexandria, £14,855 gold and £90,845 silver for India; for Shanghai, £32,880; Foo-Chow-Foo, £5,669; Hong Kong, £5,000 in gold, £72,953 in silver; Singapore, £1,500; Penang, £140.

In Joint Stock Banks the quotations are as follows:—Agra and United Service not quoted; Chartered Mercantile of India and China, 31 to 33; Chartered Bank of India, Australia, and China, 20½ to 21; London Joint Stock, 31½ to 31; London and Westminster, 55½ to ½; Oriental Bank Corporation, 40½ to 41; Union of London, 28½. Miscellaneous shares—Atlantic Telegraph, 120 to 160; Great Ship, ½ to ½ pm. ex div; Mediterranean Extension Telegraph Company, 3 to 4; P. and O. Steam, 78 to 80; ditto, new, 13 to 15 pm.; Red Sea and India Telegraph Company, ½ to ½ prem., ex in.

The following message was received yesterday at the office of the Red Sea telegraph:—

"We arrived off Maculla this day, and are about making the splice, which will complete telegraphic communication between Alexandria and India. All well on board the *Imperatrice*. The submarine cable has been successfully laid, and Alexandria is in telegraphic communication with the capital of her Majesty's Indian possessions."

EXPORTS OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from London during the present year:—

	Gold.	Silver.
Shanghai	—	£222,023
Foo-Chow-Foo	—	8,219
Hong Kong	£20,870	349,551
Manila	—	—
Singapore	—	8,900
Penang	—	14,940

ARTICLES OF IMPORT.

TEA.—For the two days subsequent to our last impression the demand, owing to telegraphic accounts of short supplies and short stocks in China, was very active, and a further advance of ½d. per lb. was established on good and fine Congous; but when it became known that there was not only to be no alteration in the duty on tea, but that certain restrictions upon the bonding system were to be imposed, the market became very quiet, and has since continued without animation, whilst prices, in the absence of buyers, have receded ½d. to 1d. per lb. from the highest point. The attention of the trade having been almost entirely occupied with the attempt to obtain the withdrawal of the high charges proposed to be levied upon the transit of goods in bond has greatly limited transactions, and we have no points of detail to remark upon. The public sales of yesterday and to-day have been the chief feature of interest. At these 34,024 packages were offered, and 13,000 were sold, 9,340 of which were offered without reserve. There was a fall at the opening of the sales of ½d. per lb. in medium congous, which has been fully recovered, the sale closing with fair animation. Common scented Cypers went 1d. per lb. lower; other sorts without alteration.

SILK.—The public sales concluded on the 16th, and exhibited an increase over the October sales of 1,444 bales, 520 of which were Japan, at prices varying from 17s. 6d. to 30s. The attendance was good, and the result of the operations may be considered as making little or no alteration in best China silks, and leaving the commoner sorts somewhat easier, with only a moderate business, and the stock is much reduced.

	s. d.	s. d.	Superior. s. d.	s. d.
Tantlee, No. 1 and 2	23	6 to 26	0	
" No. 3 and 4	21	0	23	6
" No. 5	21	0	22	6
Tnyasam	18	0	19	6
Ditto, long reel	16	6	17	6
Canton	14	0	15	0
Chinese thrown	17	6	30	0
Japan	17	6	30	0
Yucufa	18	0	20	0

SUGAR.—The public sales of East India passed off without spirit, as follows:—5,304 bags Mauritius, nearly all sold at and since, refining sorts at full prices, but common brown rather cheaper; 162 baskets brown Date Penang at 30s. 6d., and 1,500 bags clayed Manila have been sold on the spot, at 33s. 6d.

TIN.—The markets have been very dull, and the transactions do not justify any quotations; they are nominally 130s. for Straits, and 136s. to 139s. for Banca.

COTTON.—A quieter tone has been apparent in the market, and only 700 bales have been sold, but prices remain steady, and those of the better

qualities of Tinnive li Madras are about ½d. per lb. higher than a fortnight since, middling fair to fully good fair bringing 5½d. to 5½d., a few fine Bourbon seed 6½d., and middling to fair Surat 4½d. to 5d.

RICE.—There has been some inquiry for the common kinds of soft grain, as well as for fine white Bengal, and about 30,000 bags, consisting mostly of the former, have changed hands at steady prices, viz. old Necranzie Arracan 8s. 3d. to 8s. 6d.; Rangoon, 8s.; new, 9s. 3d.; old Larong, 8s.; Maulmain, 7s. 9d. to 8s. 3d.; Java, 11s. 9d. to 12s.; low middling and middling white Bengal, 10s. to 11s.; fine, 13s. 9d. to 14s. 3d.; Ballam, 10s.

TOBACCO.—Most of the Arracan has been sold, supposed to be for speculation, but prices have not improved. Manila—all classes cleared out at advanced prices, and there is great demand.

RUM.—The heaviness observable in our last quotations has continued to prevail, and only small sales have taken place at easier prices.

PEPPER.—The demand continues rather inactive, but the following parcels, at auction, went off steadily: 928 bags good black Singapore at 4½d., and 489 bags dusty Penang, mostly at 4½d.; 215 bags common Penang White were also realised a 7½d. Privately, little has transpired.

SAGO.—Increased inquiry has prevailed for this article, and steady prices have been obtained, with moderate business doing.

COPPER.—The public sales have been of trifling amount, viz., 24 packages Plantation Ceylon, which were disposed of, fine fetching 82s. 6d.; and 200 bags Native, which were also realised, superior. 60s. 6d. to 61s.; bold picked, 63s. 6d.; small, 58s. Privately, about 200 casks Plantation have been purchased at fully last week's rates; and 1,000 bags, 50 casks, Native, good quality, 60s. to 61s.

JAPAN WAX.—Quotations can hardly be made, as no sale has been effected for a lengthened period. Some very fine parcels were sold by Deffell and Bowling at 65s., which must be taken as the current rate.

HEMP.—Jute, bright, clean, strong, staple. An extremely active demand has sprung up for this article, many thousand bales have changed hands, as well for arrival as on the spot, and prices have risen altogether 20s. per ton. 5,056 bales sold at auction at £12 15s. to £19 7s. 6d. per ton, for low middling to good. Manila current quality has improved £1 to £2 per ton. Of 1,289 bales at auction, a small portion sold, good white at £3½ per ton; middling to good rope, £22 10s. to £25.

DRUGS AND SPICES.—Camphor, China, and Japan, 170s. to 180s.; Cassia lignea, in bond, 95s. to 103s.; do. in budo, 185 to 190s.; do. oil, 15s. to 15s. 6d.; cinnamon, Ceylon, 9d. to 2s. 3d.; cloves, Amboyna and Penang, 4½d. to 1s. 5d.; Galangal root, 30s. to 35s.; ginger, Calicut and Cochin, £3 10s. to £6 10s.; gum benjamin, first quality, £13 to £15; 2nd quality, £10 to £13; 3rd quality, £4 to £9; do. drossy, £1 to £3; damer, 27s. to 48s.; gamboge, picked, £6 to £7; do. in sorts, £4 10s. to £6; mace, first quality, 2s. 6d. to 3s. 4d.; do. 2nd quality, 1s. 4d. to 1s. 9d.; nutmegs, 1st quality, garbled, fine, bold, even, and heavy, 2s. 6d. to 3s. 9d.; do. ungarbled, 1s. 4d. to 2s. 4d.; oil, aniseed, 8s. to 8s. 9d. per lb.; Cajuput, 1d. to 1½d. per oz.; cinnamon, 2s. to 4s. 3d. per oz.; mace and nutmegs, 2½d. to 3d. per oz.; rhubarb, Dutch, trimmed, sound heavy breaking, bright and fresh, 5s. to 6s.; common flat, and dark coated, spongy, or wormy, 1s. 4d. to 3s.; common sound, 1s. 2d. to 2s. 9d.; star aniseed, fresh, bright, bold, unbroken, not grey, 95s. to 100s.; sticklac, Siam, fine black, 50s. to 80s.; Terra Japonica, Cutch pegue, 27s. 6d. to 28s. 6d.; gambier, in squares, 16s. to 17s.; turmeric, sound, bright, and bold, 12s. to 17s.; vermilion, bright deep colour, and pure, 3s. 6d. to 3s. 9d.

MISCELLANEOUS.—Gutta-percha, not adulterated or falsely packed, 1s. 3d. to 2s.; India-rubber, pure, not drossy, 2s. 0d. to 2s. 1d.; rattans, 2s. 2d. to 5s. 6d. per 100; sapan-wood, Bemah, £6 10s. to £8 10s.; Siam, £8 to £9 15s. Singapore mother-of-pearl shell, 125s. to 140s.; Manila, 105s. to 125s.; soy, thick and clear, dark red, good flavour, 4s. 3d. to 5s. per lb.

ARTICLES OF EXPORT.

IRON.—The following is the official list of prices of Staffordshire finished iron:—Common Staffordshire bars, £7 10s., at the works; best bars, £8 10s.; sheets, £9; doubles, £10 10s.; nail sheets, £8 10s.; Latin, £12; boiler plates, £9; best and best best in proportion; common rods, £7 10s.; hoops, £8 10s.; gas strip, £8; Canada plates, £12; and all other sorts in proportion. We are pleased to be able to say that the chainmakers' strike, which has lasted for six months, inflicting great misery amongst the men and their families, is now at an end, the men returning to work at the prices offered by the masters in August last.

COPPER.—Small parcels of English offer under fixed rates; Burra Burra offered at £118.

SPELTER has been drooping. The sales during the week amount to about 300 tons on the spot at £20 15s. to £21, and 400 tons spring shipments at £21 landed, and £20 17s. 6d. ex ship.

TIN PLATES very slack.—Coke can be bought at 24s., and in London at 24s. 6d.

LEAD.—Less doing this week in English; Spanish in better request; smelters maintain late prices.

SALT.—White, common, 6s. 6d. per ton; butter, 8s. 6d.; stoved, 10s.; handed, 11s.; bagged, 13s. to 17s.; rock, Prussian, 3s.; large lumps, 3s. 3d. to 5s.; and Irish ditto, 3s. to 4s. 6d. To these prices 3s. per ton for lighterage must be added.

MISCELLANEOUS.—Cochineal, Honduras, silver, 3s. 6d. to 3s. 11d. per bag; opium, in bond, Turkey, 21s. 6d. to 22s.; Egyptian, 10s. to 15s. 6d.; quicksilver, £7 per bottle; saffron, new, bright, 53s. to 60s.

STEAM COALS.—Beaside West Hartley, screened, 8s. 6d.; unscreened, 7s. 6d.; small, 8s.; Lambert's West Hartley, screened, 8s.; unscreened, 7s.; small, 8s.; Ward's West Hartley, screened, 7s.; unscreened, 6s.; small, 7s.; Purvis' Hartley, screened, 6s. 3d.; unscreened, 5s. 6d.; small, 7s. (the three West Hartleys are 3d. less at Blyth); Welsh Nixon's Duffryn, 9s. 6d. at Cardiff.

MANCHESTER MARKETS.

India shirtings of 39-inch widths, 6lb., are quoted at 7s. 4d.; and 7lb. have been sold at 8s. 6d. (quoted at 8s. 7½d.); while 8lb. 4oz., 64's, have been sold at 10s. 1½d. and 10s. 3d. Wider shirtings, 45-inch, are comparatively neglected, and narrower, such as 36-inch, are rather easier, some contracts having been renewed at rather lower rates. For longcloths, printers, T cloths in general there is a quiet but steady demand at full

prices. In yarns the India advices have led to more business in 40's mul-, and there is also more activity in twist for the Mediterranean markets. Prices are consequently rather firmer in these descriptions. In the latter are included 10's to 28's warps. Twofold yarns continue firm. In other descriptions no change, but spinners are mostly well engaged, and prices steady.

COMMERCIAL POSTSCRIPT.

TUESDAY AFTERNOON.

TEA.—The letters delivered this morning have not affected the market, nor is it probable they will, although the statements as to reduced exports are authenticated. Prices are still firm at previous quotations, but the sales advertised for Thursday may make some slight difference.

SILK.—The market, after a calm of several weeks, at last shows some symptoms of life. Nothing of moment has thus far been done, but all idea of reduction of price, which at one moment seemed scarcely to be escaped, seems now to be given up, and it is expected that within some few days business will be resumed at about the prices of January. The deliveries of the month are very small, marking the hesitation of consumers, both home and foreign, but we may reasonably hope that foreigners at least will soon come forward.

ARRIVALS NOT INCLUDED IN TABLE.—Feb. 23, off Dungeness, from Java, *Minister van Hall*. Feb. 26, at Liverpool, from Manila, *Sir John Moore*. **DEPARTURES.**—Feb. 23, from Cardiff for Hong Kong, *Albert*. From Sunderland, *Rosina*. **SPOKEN.**—*Ardville*, McLachlan, Shanghai to London, 29th Dec., 25 S. 5 E. *Willem and Cuert*, Amsterdam to Batavia, 6th Jan., 1 N. 22 W.; *Helene*, Batavia to Rotterdam, 31st Jan., 33 N. 31 W. The *Caduceus* is not yet reported.—Feb. 26, at London, from Rangoon, *Solid*; 25 at Cowes, from Foo-Chow-Foo, Ravensworth; 24 off Torbay, from Batavia, Tagal, Europa; at Aberdeen, from Maulmain, *Lizzie Aisbett*; at Brouwershaven, from Batavi, Kaap Hoorn, 25 Eersteling. **DEPARTURES.**—Feb. 27, from London, f.r Penang, *Julia*; 26 from Dartmouth for Batavia, *Jan Van Solen*.

FOREIGN COMMERCIAL POSTSCRIPT.

LONDON AND CHINA TELEGRAPH OFFICE, Feb. 28, 1860.

The advices received this morning from China report rather a quiet market for both imports and exports, owing to the approach of the Chinese new year, and money had become somewhat scarce.

The currency dispute at Japan we have no further reliable accounts of, and it is presumed that trade remains suspended; but a communication had been received from the American Consul at Yedo, of a satisfactory nature, as it contains assurances that the Japanese will observe the treaty in all respects.

The Chinese Government have accorded the same reduction of tonnage dues to British ships, as granted to the Americans by their last treaty, namely, from 5 to 4 mace per ton. A remission of the extra one mace paid on vessels since the 24th Nov. is also to be made; this certainly looks amicable. Mr. Ryrie and Mr. Bryans have been admitted partners in the firm of Turner and Co., of Hong Kong; the business of James Purdon and Co., at Canton and Hong Kong, and of Isaac M. Bull and Co. at Shanghai and Foo-chow, will on and after Jan. 1 be conducted under the name and firm of Bull, Purdon, and Co., and Mr. G. R. Lawrence and Mr. R. Francis are authorised to sign the same by procuration. Mr. R. B. Ullett has retired from the firm of Ullett and Co., and Mr. J. Love is admitted a partner. Mr. J. Bland has retired from the firm of Messrs. Shaw, Bland, and Co.; and Mr. G. Hollingworth is authorised to sign by procuration. Mr. G. G. Gray retires from the firm of Russell and Co., and Mr. G. Tyson and Mr. H. S. Grew are admitted. Mr. R. Heinsen and Mr. G. W. Schewmann have been admitted in the firm of Siemssen and Co.

IN EXPORTS.

TEA.—The export is in excess over last season by 19 millions, to the United States 5 millions, to Australia 4 millions. It appears that the tea men in the first part of the season were anxious to push off their supplies to put them out of men's exactions; our merchants, backed by good markets, have met this freely. They are now equally anxious to hold the remaining stock, believing the next year's supply will be interrupted. At Shanghai the settlements have been 3,500 chests Ningchow, 100 packages Congous, 25 to 30 Tls.; 1 chop of Souchong at 35 Tls.; 2,500 chests of Lesan at 17 to 25 Tls. At these rates, however, purchasers hold back. The stock is about 35,000 packages. In Greens settlements have been 16,000 half-chests and 3,000 boxes at 18 Tls. to 21 Tls. for Imperial, and 24 Tls. to 34 Tls. for Gunpowder Taiping sorts. At Foo-Chow-Foo

the settlements have been 1,700 chests and 1,500 half-chests of Congou at 12 to 15 Tls. for common, and 16 to 18 Tls. for middling. Oolong—1,750 half-chests at 15 Tls. for Foo-chow packed, 18 to 20 Tls. for fair cargo, and 23 Tls. for fine. Flowery Pekoe—250 chests at 35 to 65 Tls. Scented Teas—500 boxes Orange Pekoe, and 100 boxes Caper at 20 to 24 Tls. For common Congous the price is a little easier, and Oolongs are 1 to 2 Tls. lower. The following is given as the stock unsold on the market, and as supplies do not come in, the quantity is not expected to be augmented. Congou 45,000 packages, Souchong 200 chests, Oolong 9,000 half-chests, Flowery Pekoe 200 chests, Scented Teas 3,500 boxes.

At Amoy the *Maury* is loading for New York, and the following settlements have been made:—Congou—250 half-chests common, at 17 dols. to 18 dols. 50 cents. Orange Pekoe—100 half-chests middling, at 16 dols. 50 cents. Oolong and Ningyong—2,500 half-chests very common to fair, at 15 dols. to 24 dols. Ankoï—900 half-chests common to middling, at 11 dols. 50 cents. to 14 dols., leaving the market nearly bare. At Canton the settlements are only 2 chops of Oopack Congous at 25 taels, leaving 50 chops on the market. In other sorts, 1,500 half-chests Taysaan Congou, at 21½ to 23 taels. 4,000 boxes Scented Orange Pekoe, at 19½ to 25 taels. 7,000 boxes Canton Gunpowder, at 15½ to 23 taels. Leaving in stock, 1 chop Souchong; 700 half-chests Plain Orange Pekoe; 2,000 half-chests Oolong; 150 chests Flowery Pekoe; and 4,000 half-chests Canton Greens.

RAW SILK.—The advance in last mail's rates has been supported; settlements about 3,500 bales. The total shipments for the season are nearly 10,000 bales less than last, and the stock is also smaller. Our table of exports includes 2,000 bales of Japan. Tsatlees No. 1 are quoted 440 to 450 taels; Taysaans No. 1, 370 to 385. At Canton the business has been trifling for the United States and India. The stock is also small. Re-reeled Kumchook has fetched 440 dols.

DRUGS, &c.—Canton.—Cassia Lignea is quoted 17 dols. 75 cents. to 18 dols. No settlements are reported. Stock, 3,000 piculs. Cassia Buds—No sales reported, 100 piculs are on the market at 34 dols. to 36 dols. Cassia Oil—30 piculs are offered at 290 dols., at which 100 piculs have been taken for the Continent.

IN IMPORTS.

At Shanghai the tone of the import market had changed, quotations for manufactured goods being almost nominal, and sales for cash impracticable, the near approach of the China new year holidays causing some interruption to trade. Immediately after the departure of last mail six vessels arrived from England bringing large supplies of manufactured goods, the greater portion of which had been sold to arrive some time since, but now difficulty is experienced in getting the dealers to clear their purchases. Grey shirtings are quoted at a decline of one mace per piece, with no demand at present. White shirtings and tealcloths are also rather lower, but American drills, sheetings, &c., remain in moderate request. Fancy goods have fairly maintained their value, but there is not much inquiry for them. Woollens, long ells, &c., have shown in the general depression, the late arrivals having brought considerable supplies, and prices have now a downward tendency. Metals continue in active request at a further advance on former rates. The stocks in godowns and on board vessels in harbour on the 31st of December, were as follows:—

Grey shirtings, 266,704 pieces; white shirtings, 34,603 pieces; T. cloths 77,818 pieces; American drills, 45,899 pieces; American sheetings, 3,200 pieces; American jeans, 8,190 pieces; spotted shirtings, white 8,000 pieces; spotted shirtings, dyed, 9,632 pieces; dyed cottons, 760 pieces; Turkey red cloths, 2,208 pieces; printed cottons, 19,422 pieces; chintzes, 27,019 pieces; white broads, 18,870 pieces; dyed broads, 19,260 pieces; damasks, 13,372 pieces; dimities, 4,050 pieces; muslins, 793 pieces; white cambrics, 200 pieces; lawns, 500 pieces; velveteens, 474 pieces; velvets, 6,102 pieces; woollen and cotton mixtures, 6,593 pieces; long ells, 3,800 pieces; Spanish stripes, 6,898 pieces; habit cloths, 720 pieces; medium cloths, 222 pieces; broad cloths, 2,576 pieces; camlets, 2,576 pieces; Dutch camlets, 440 pieces; lastings, 200 pieces; handkerchiefs, 14,748 dozens; twills, 4,890 pieces; blankets, 2,398 pairs; swan-downs, 200 pieces; lambskins, 144 pieces; iron, nail, rod, and bar, 8,023 piculs, and 13,123 bundles; wire, 92 piculs; hoop iron, 958 bundles; spelter, 1,337 piculs; lead, 5,281 piculs; tin, 246 alabs; tin plates, 1,074 boxes; quicksilver, 27 piculs; rattans, 984 piculs; sugar, 36,825 piculs; sapan-wood, 450 piculs; window glass, 7,869 boxes; steel, 675 tubs.

At Canton and Hong Kong the sales had also been trifling, but the stocks were comparatively light.

COALS.—In Hong Kong—English and Welsh still scarce, and are selling from the store at 18 dols. American Anthracite in ample stock, and not worth over 10 dols. Sydney can be bought at 12 dols. to 15 dols., according to quality. Japanese are also on the market at 7 dols. to 9 dols.

Shanghai—English are quoted 9 tla. to 10½ tla. American Anthracite, 9½ tla. to 10 tla. Japanese, 5 tla. to 6 tla.

At MANILA.—The market was still bare of cotton goods, waiting the arrival of the *Carmen* and *Armatid* from Liverpool, sales to arrive having been made. In sugar, contracts had been made of current clayed at 5.05 dols. to 5.12½ dols., and of unclayed at 2.95 dols. 3.12 dols. The old crop was nearly run out. The new one was expected to be large, and rates, in consequence, to rule lower. Hemp, current quality, 4.75 dols. to 5.10 dols.

At SINGAPORE.—During the past fortnight the market has been but sparingly supplied with our staple articles of export, and prices are well supported, although the demand is by no means general for active. Buyers for England require some concession in prices to compensate for the advanced freights, and little business is being done for that quarter. Recent purchases have been chiefly for France and America. Comparative exports for the past three years indicate a moderate increase in the export trade to Europe and America in 1859. The import market has been dull, and the sales during the fortnight have been unusually small. This is to be accounted for, partly by the near approach of the Chinese New Year holidays, when the traders close their books; partly by the fact that importers are in most instances holding for prices, which dealers are not yet prepared to give. There has been rather more activity in dyed goods. Metals continue extremely dull.

HONG KONG.—The return of the revenue and expenditure for the year 1859 has been published, showing a revenue of £65,528 against expenditure of £66,109. The former shows an increase of £3,051 on 1858, and on the latter £3,129. The return of notes in circulation by the Oriental Bank Corporation shows the amount to be 614,299 dols., and of the Chartered Mercantile Bank, 295,060 dols., exclusive of old notes out.

HAMBURG MARKETS.

During the past fortnight the demand for most articles has been extremely animated, and our market is in a very healthy condition, confidence and credit being restored, and money abundant.

COFFEE.—Sales amounted to more than 70,000 bags at successively higher quotations, and the article still in great favour, as the stocks in the Brazils remain small, with an enormous demand for North America, and the amount to be sold at the Dutch March auction of East India being much less than usual.

SUGAR commands an easy sale at full prices. The transactions have been considerable, amongst which may be noticed several parcels of Java, Manila, China, and other Eastern descriptions. Both refiners and exporters have purchased freely.

RICE.—In this article the sales have also been considerable, and former stiff prices fully maintained. A parcel of 4,000 bags fine Java table rice, ex *Magdalena*, from Batavia, and 2,700 bags of good current quality by the same vessel, were sold privately.

SPICES.—Pepper is in great favour, the demand is lively, and prices are well supported. Cassia lignea continues in request, whilst stocks are getting low, and the expected supplies are but limited. Cardamums and cloves are much inquired for at higher prices; ginger also higher.

DRUGS.—All descriptions firm, and the market well supplied with a large assortment of most articles. Several parcels of raw camphor have been taken for refining at 17 sch. banco per lb. The refined article fully maintains the late advance.

In METALS no alteration in prices, and the market rather quiet.

An intense excitement has been produced here by Mr. Gladstone's financial statement; and butter, cheese, hops, and all other articles affected by the abolition and reduction of the duties in the British tariff, have undergone considerable rise in the expectation of a large increase in the business.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

From Singapore to England and Continent: 25, Land O' Cakes, 31, Chieftain. From Manila: 23, Trafalgar; Jan. 3, Malta. To New York: Jan. 5, Nabob. To Sydney: 7, Salon. From Batavia to New York: Dec. 23, Golden State.

SHIPPING CASUALTIES.

The Wilhelmine, Bendixen, from Macao, put into Dartmouth Feb. 14, leaky, and with both masts sprung; she has been surveyed and recommended to discharge.

The Volant, Burgess, from Singapore to Boston, put into St. Thomas, W.I., Jan. 19, leaky, and was discharging there on Jan. 30.

The Bolina, Gales, which left St. Helena Jan. 3, reports that the Imogen, of London, was there loading part of the cargo (principally the rum) of the Malacca, Bedel, from Penang to London, which arrived there Dec. 16 with damage. The sugar, &c., forming the remainder of her cargo was being landed.

The Time, Homer, which arrived Feb. 5 at New York from Penang, had had cutwater and cathead carried away, and received other damage from having been in contact in the harbour.

The Bald Eagle, from Liverpool to Shanghai, touched the bank, but apparently without injury.

The Queen Mab, Glendinning, which arrived at Liverpool Feb. 7, from Singapore, was struck by a sea Jan. 30, during a heavy gale from N.W., and carried away long-boat, galley, three anchors, spare spars, port bulwarks, and forced fore hatches off.

The Prussian barque Van der Heydt, Newmann, from Liverpool to Batavia, has put into Lisbon, leaky, and with rudder damaged.

The Panther, Black, from Shields for Hong Kong, put into Falmouth Feb. 12, to stop a leak which had been effected.

FOREIGN.

HONG KONG.—The Runnymede, from London, encountered heavy gales off the Cape, in which she lost deck stock, bulwarks, boats, passengers, luggage, and sundry articles on deck. On the 21st Nov., in the Java Sea, picked up the crew of a brig (name unknown), and conveyed them to Samarang.

We regret to say that no further news has been heard of the missing Juliet, Capt. Fittock, bound from Hong Kong to Amoy, and it is to be feared she has foundered with all hands.

SINGAPORE.—The Amitie (French) put back here on the 13th January, having struck on a reef near the Straits of Balbak, on her voyage hence to China. The American s. St. Louis, put back to this place on the 1st January, having had severe weather in the China Sea, and received some injury to the machinery; she sailed again on the 5th for Saigon.

FREIGHTS AND CHARTERS.

A better feeling prevails throughout the shipping interest, and hopes are

more generally entertained of a speedy recovery to more remunerative rates of freight. The advices of a rise in freights at Calcutta have been mainly instrumental in this feeling. The employment of troop-ships in the China waters is also expected to cause an advance in that market.

The French Government continue chartering for coals to China, 82f. to 83f. per ton for Woosung being the last rates paid. For English account 67s. 6d. Shanghai is the extreme rate current. A vessel was chartered at £6 10s. teak from Maulmain, taking coals out free to Aden; and the same terms are still offered, or 70s. home only. Bombay to London or Liverpool 35s. to 37s. 6d., Manila 50s., Java 50s., Calcutta 52s. 6d., Antwerp to Bombay and back from thence or neighbouring port 100s., on the round from a coal port to China and back 110s.

Rates of freight current to Shanghai 70s. per ton dead weight; 55s. per ton of 40-feet measurement. To Hong Kong, 60s. weight, 50s. measurement. To Singapore, 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

FOREIGN.

AT SHANGHAI.—For London, £1 10s. For New York, 5 dols. There is an improvement in the rates for coast work, but very little doing.

AT HONG KONG, MACAO, AND CANTON.—For London, £1 10s. to £2. To New York, 7 dols. to 8 dols. There has been a great reduction in the stock of unemployed tonnage, and although rates generally have improved, they still remain miserably low. Mr. Austin, the emigration agent, takes up vessels from one house at 55 dols. net per adult to Demerara, whilst ships which would go there in preference to Sydney, are glad to get 15 dols. for the latter-named port. For Sydney the rates are so low, and so little freight offering, that it is hardly worth while taking.

AT MANILA.—For London, £2. The S. H. Talbot is filling for Sydney at £2 2s. 6d. for dry sugar, and £2 10s. for measurement goods, having refused 5 dols. for 20 cwt. sugar and 4 bales hemp to New York.

AT SINGAPORE.—The demand for tonnage is considerably improved, chiefly for the rice ports. The current rates are £2 for gambia, sago, flour, and sugar, £2 10s. for pearl sago and measurement goods. For New York, 8 dols. to 10 dols. £2 15s. to £3 5s. has been paid for vessels to load at Rangoon and Akyab for Great Britain and the Continent.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai 50s. to 60s. Singapore, 30s. to 45s., Batavia, 30s. to 40s., Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila 50s. to 60s.

PASSENGERS OUTWARDS.—Per *Margaretta Simonetta*, Captain Hofman from Amsterdam to Batavia; Mr. van Hout. Per *President Plate*, Captain Harten, from Amsterdam to Batavia; Captain van Floten, of the B.I. infantry; Lieutenant Jarman, of the B.I. engineers; Messrs Jolly and Selen, surgeons; 150 men supplementary troops. Per *Willem III.*, Captain Zeylstra, from Amsterdam to Batavia; Mr. de Bley. Per *Henriette*, Captain Portengen, from Amsterdam to Batavia, Mr. and Mrs. Dupré, Mr. J. M. Strykers. Per *Prince Frederick*, Captain de Witt, from Amsterdam to Batavia; Captain and Mrs. Movius and two children, First Lieutenant Kamerling, Mr. Michaelson, apothecary, 3rd class; 150 men, reinforcements. Per *Willem Daniel*, Captain de Meester, from Amsterdam to Batavia; Major-General de Brauw and suite, Mr. and Mrs. G. F. Scharren, Messrs. M. Vermeulen, C. H. Croes, J. van der Keus, Mr. and Mrs. Lee-manns, Mr. and Mrs. J. van Zwieten and family.

PASSENGERS INWARDS.—Per *Landbouw*, Captain Kleynenberg, at Amsterdam from Batavia; Captain-Lieutenant van Manrik, R.N.; P. L. Oudenhoven, 1st-class surgeon; Baron von Heekeren, Lieutenant, R.N.; Mr. and Mrs. J. van der Wyk, and Mr. Weber (the latter accidentally fell overboard off the coast of Spain, and was drowned). Per *Marianne*, Captain Groenbeck, at Amsterdam from Batavia; Mr. Bamber.

P. AND O. STEAMERS "BERTINCK" AND "HINDOSTAN."—It is stated that these two vessels have been purchased by Government for the conveyance of the troops from Suez to China, which were despatched from this country by the *Himalaya*.

LAUNCHES.—SUNDERLAND, Feb. 21.—From the building-yard of Messrs. Austin and Mills, Southwick, a splendid barge named the *Allandale*, classed 11 years A 1 at Lloyd's, destined for the China trade; she is the property of Joshua Wilson and Brothers, of this port.

THE JOHN PENN (S.)—The Dover mail John Penn left Blackwall for Dover, and accomplished the run, a distance of 89 miles, in 5 hours 17 minutes, or at the rate of nearly 19 miles an hour. The same evening she left Dover for Calais, and made the run (21 miles) in 1 hour and 23 minutes.

FRENCH STEAMER "LOUISE."—This vessel foundered near Marseilles, and it is said thirty persons were drowned.

MR. MICKIE ON THE GULF OF PECHILEE.—At the meeting of the Geographical Society on the 13th inst, a paper on China, communicated by Mr. Mickie, was read, which gave rise to a long and animated discussion, bearing on the expedition that is about to be sent there, in which Mr. Hamilton Lindsay, Mr. Oliphant, Mr. Lockhart, Captain Osborn, Mr. Crauford, and other gentlemen, took part. Mr. Mickie's paper referred more particularly to the north and south promontories of the Gulf of Pechelee, where he was sent as a supercargo of a ship, and remained during the summer months of 1859. He described the produce of the country to be abundant, consisting chiefly of beans, peas, and oilseeds. The rainy season commences at the end of June, and continues through July, the climate being represented to resemble that of the southern part of the Crimea. It appeared from this statement, and from the observations of those gentlemen who addressed the meeting, that a plentiful supply of food could be found in the two promontories for the proposed expedition up the Peiho to Peking. The inhabitants were said to be unusually tall and intelligent, the generality of them being six feet high and upwards. Mr. Lockhart, in describing the general physical features of that part of China,

said that the promontories that form the Gulf of Pechelee are branches of the chain of mountains that stretch across China from Tartary, and that they tend to render the climate temperate. Captain Sherard Osborne, when speaking of the large rivers that empty themselves into the sea on the eastern coast of China, said they seemed as if they had been made on purpose for the English and Americans to establish trade with the interior.

SUPPLEMENTARY.

BIRTH.—At Bonnington House, Singapore, on the 14th Jan., Mrs. Matthew Little, of a son

RUPTURES.

HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS

DISPENSES ENTIRELY WITH THE LEVER SPRING.

A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia.

Measure required—circumference two inches below the hips.

Price—single, 12s.; double, 18s.

The absence of metallic springs renders this Truss especially adapted to warm climates.

Illustrated Circulars, and the Truss can be obtained, on application to Mr. E. HUXLEY, 12, Old Cavendish-street, Oxford-street, London.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

OVERLAND ROUTE.

COMMUNICATION by STEAM TO INDIA, AUSTRALIA, &c., via EGYPT.—THE PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 14th and 20th of every month. Summary of News from the Far East.

JAPAN.

KANAGAWA.

A fire is said to have taken place at Yokuhama, but no details have reached us.

The following notification has been published:—"Her Majesty's Consul-General in Japan is pleased to direct the publication for general information of the subjoined rules of practice to be observed in judicial proceedings, had before her Majesty's Consuls, and of the accompanying scale of fees, both which have been established in conformity with the Provisional Article XXXIII. of her Majesty's Order in Council of the 3rd day of March, 1859. — R. EUSDEN, Acting Vice-Consul, at Yeddo. British Consulate General, Yeddo, 6th December, 1859."

NAGASAKI.

There is no important change to note in business of late. The treasury are now exchanging money to the amount of three dollars Mexican each man per day. There is still considerable business done in exports of Japanese produce, and the departures of late have been the *Nora*, *Wm. Gillies*, *Princess Charlotte*, *Emma*, and *Esther May*, for Shanghai, all with full cargoes.

The most important item we have to note is regarding the destructive fire which occurred at this port on the night of the 25th December last. The premises comprised those of Messrs. Walsh and Co., David Sassoon, Sons, and Co., and Ta-fong, a large Chinese merchant; these were totally destroyed in a very short time, including godowns, private residences, outhouses, &c. The fire commenced near the premises of Messrs. Sassoon and Co., and soon extended to their place (the buildings were all of wood, and very combustible). Messrs. Walsh and Co.'s premises, being across the street, were soon enveloped in the flames, together with Ta-fong's. In less than two hours the whole were burnt to the ground. The fire broke out about two o'clock A.M. of the 26th Dec., in an unoccupied Japanese house, and was undoubtedly the work of an incendiary (the punishment for which is, in this country, to be burnt alive). Various

rumours are circulated, and very conflicting, as regards the value of property destroyed, but, as near as we can find out, Messrs. Walsh and Co. lose about 40,000 dols., and Messrs. Sassoon nearly 100,000 dols., as they had several lots of foreign goods on their premises. Ta-foong reports his loss at not less than 25,000 dols. The Governor and suite were present, and also several Japanese with wooden engines, with a single action, throwing water by jerks, about thirty feet. Large numbers of the Japanese were on the roofs of the adjoining houses, and fanning the fire to keep it away from their own houses. The fine dresses of the officials (of which there were some thousands on the ground) were of the finest description, and the whole scene of the flames, and the brilliant and splendid clothing of the Japanese, formed a picture that must be witnessed to be appreciated. The American Consul's safe, one of Herring's, New York, came out of the flames in fine order, although put to a severe test. All foreigners are now about forming themselves into a fire brigade, and to be prepared with axes, buckets, ladders, &c., in readiness, in case of further intrusions of the devouring element. Business is becoming rather inactive on account of the Japanese new year holidays. Weather delightful, with frosty nights. H.M.S. *Roebuck*, Commander F. Marten, is lying in port.

CHINA.

PEKIN.

Except a casual mention in the *Pekin Gazette* of the continuance of a necessity for attention to the coast defences along the shore of the Gulf of Peché-lee, there is nothing that has any relation to foreign affairs. The *Gazettes* do not allude to the rebellion, which is apparently reviving with increase of vigour in the country between the Yang-tze-Kiang valley and the Yellow River, say, generally between Nankin and Kai-fung, capital of Ho Nan. The Court is stated to be very seriously alarmed, and to be making appointments and arrangements to meet the difficulty, but no public notice appears of this.

SHANGHAI.

Nothing has transpired to indicate that a correspondence is going on between the Chinese Government and the Hon. Mr. Bruce, nor has that gentleman made any communication to the community as to the probable course that events will take.

An appeal has been made in the case of the late firm of Messrs. Crampton, Hanbury, and Co., v. Chang, a Chinese tea merchant, for the sum of 2,344 taels, being losses on shipments of tea to the United States and England. The Hon. Mr. Bruce confirmed the decision of the Consular Court, which was that no sufficient evidence had been produced before the Court to justify an order for the payment of money, and that the plaintiffs pay the costs of the suit.

A system of foreign pilotage has been inaugurated by the Consuls of England, France, and America. The rates are to be from Gutzlaff to Shanghai, 5 taels per foot.

It appears that the foreign population in December, 1859, was 569, of which 294 were British, 125 American, 19 French, 40 German, &c., and the remainder natives of India.

The third number of the "Journal of the Royal Asiatic Society" has been issued. In the preface it is announced by the committee as follows:—"The number now presented to the public completes the first volume of the society's journal. The papers it contains are calculated to throw light upon many subjects of interest and importance, and quite justify the anticipations formed at the establishment of the society, of its inherent power to support a publication of this nature."

The *North China Herald* contains a very interesting résumé of events for the year 1859. The incidents connected with this have, of course, been detailed in our columns from time to time. The comments we must reserve a notice of until our next.

The rebellion is apparently reviving with increase of vigour in the country between Nankin and the capital of Ho-nan. The court is stated to be seriously alarmed and to be making appointments and arrangements to meet the difficulty, but no public notice of this appears.

The following case is reported in connection with the notice in our last on the "larks of young gentlemen," as follows:—"An act of brutality has come before the Consular Court, committed by four members of the sporting fraternity, named W. Mackenzie, Richardson, Owen, and Harrison. They had ill-used one of Mackenzie's coolies to such an extent that the man was taken to the hospital in a sad state, with one rib

broken, and other severe injuries. Three of the perpetrators were fined 150 taels each—the other 200 taels. The Consul intimated that deportation would be the punishment for the next offence."

NINGPO.

There is no change to notice at this port, all remains quiet, and as far as the Chinese are concerned there is no interest exhibited as to the intentions of the British and French Governments. Amongst foreigners the general opinion is that the provisions of the treaty should be fully enforced. To effect this a large force will be required; to combat 100,000 Tartar troops, partly supplied with foreign arms, and instructed by Russian military officers, will be found very different from fighting undisciplined, timid Chinese infantry, with their clumsy matchlocks. Besides, if the war is carried into the capital, forces may be required to be distributed among the five forts to protect the foreign residents from the treachery of the Chinese. If the Home Government think that a mere demonstration will be sufficient to awe the Chinese Government into a compliance with the terms of the treaty, they will find that they have made a serious blunder. That the United States' treaty is a miserable failure is quite generally agreed on all hands here, the policy of the United States' Government being evidently far better had it kept entirely aloof until the English and French had settled their difficulties with China.

FOO-CHOW-FOO.

An assault was made upon a worthy American missionary the Rev. O. Gibson, as he was returning from chapel, not for his preaching the truth, but as a compulsory step to squeeze some dollars out of him, claimed by some vagabond builders whom a few days before he had very properly refused to pay till they had completed their part of the contract. They assailed him in the open street, and at midday; twenty of them dragged him out of his chair, flourishing small swords and bludgeons before him, and boldly carried him off under the threat that they would butcher him. After hauling him along for half a mile, they lost courage, let him go, and scampered off. The same day, later in the afternoon, a rough attack was made upon a party of four English gentlemen by a crowd of fifty villagers, at a spot about three miles off. They were strolling along with their dogs. Some of these canine animals are rather savage upon native curs; and on this occasion the former pounced upon the latter with terrible ferocity. The gentlemen hurried up to part the brutes. This act was misconstrued by the villagers, who, supposing that they were setting the dogs on, rushed forward with hooks and hoes. The gentlemen very wisely refrained from violent measures. All they did was to retreat, defending themselves from the violence of their pursuers, who only gave up the pursuit when they had succeeded in giving the strangers some severe blows, and stripping them of one or two coats and a costly gold watch. We understand the American and English consuls have taken up these two cases, as occasion for strong and earnest remonstrance to the native officials against the movements of natives, who think to take the law into their own hands, and, by the listlessness of the local police and higher authorities, are encouraged to commit what audacities they please in any case where they think they are aggrieved.

AMOY.

This island has lately been the theatre of a species of civil warfare which lasted over ten weeks (having commenced in September), and in which it is said more than fifty villages, extending over more than half the island, were involved. In the course of the contest nearly 200 lives were lost, and 11 villages were destroyed. Throughout the rural districts on the south-west coast of China it is usual for villages to band together for mutual protection or other objects, and thus the villages on Amoy form two confederacies, one composed of several small and weak clans, and the other of two powerful and numerous clans. The latter confederacy is in league with the piratical villages of the vicinity, and they have always treated their neighbours in a tyrannical and oppressive manner. The late feud arose out of frequent piracies on Formosa junks belonging to Amoy villages, which provoked an act of retaliation (a piratical junk having been taken by the trading villages, and the crew put to death), this again being followed by the massacre in cold blood of a number of unoffending villagers by a party of pirates concealed in an ambush in a village of their confederates. The mediation of the prin

cipal inhabitants of Amoy and of the local magistrates having proved ineffectual to stop the contest, about the 6th October the Chinese admiral and the taoutai went into the country, accompanied by nearly 1,000 troops, and it was more than a week before they succeeded in putting a stop to the fighting, they having used force against both parties, when such was likely to be effective, and having secured the persons of some of the chief inhabitants, whom they threatened to make responsible for any further consequences of the feud. The mandarins are satisfied with this termination of the affair, and an arbitration is now being held in Amoy to adjust the shares in which the respective parties have to bear the losses by destruction of property which have been mutually inflicted during the feud.

SWATOW.

Mr. Lay, the chief Foreign Inspector of Chinese Customs, arrived at this port on the 22nd January, for the purpose of establishing the same system for the collection, &c., of revenue as exists at Shanghai and Canton, and no doubt he will proceed to the ports of Amoy and Foo-chow for the same purpose. The British Consul has not yet hoisted his flag here.

FORMOSA.

It appears that instructions had not been received at Taiwanfoo to open trade in accordance with the terms of the United States' treaty. Several attempts had been made by vessels to visit the port, but the Mandarins had prohibited all communication with the natives. Sugar very scarce and dear. Capt. Rooney has sold his establishment at Takow to Messrs. Dent and Co., it is said for 8,000 dols. Capt. Oliver, late of the *Eamont*, has taken charge. Capt. Sullivan of Swatow was there in the *J. H. Becker*, a vessel chartered as a receiving ship for Messrs. Jardine.

HONG KONG.

The London mails of the 10th Dec. were announced at noon, as the steamer left at 2 p.m., on the 30th Jan. An improvement has been effected by the Post-office people in allowing letters for England and America to be posted up to one hour previous to the departure of the steamer, without fees.

It is announced that the Bishop of Victoria has obtained eighteen months' leave of absence to recruit his health. His lordship purposes visiting Japan, and will probably journey to England, *via* the Cape.

No further arrivals of troops have taken place; the men-of-war reported in our last as having reached Singapore had not arrived. The forces at Hong Kong and Canton are all in excellent health. Admiral Hope has bought the old Bombay steamer *Sir Charles Forbes* (60 horse-power) for the purpose of condensing water for the troops when they shall proceed north. The price paid was 45,000 dols. The admiral has ordered a number of flat-bottomed boats, and some water boats. These are the only preparations which are being made for the coming conflict that the public are made aware of. It is rumoured that large numbers of horses and mules have been ordered from various parts of the world.

It is reported that the steamer *Chey Chase* has been beaten on her passage up and down the coast, her compasses being very difficult to regulate.

A correspondence relative to the imprisonment of Mr. Tarrant has been published, which we must reserve for our next issue. He is still confined in the criminal gaol, in spite of the solicitations of the judge, jury, and justices of the peace. It appears that sufficient of the old influences of officials exist to operate against him, and to prejudice the governor, whose course in this case has been singularly contradictory to his other acts. There is no truth in the report that Mr. Tarrant is allowed to publish his paper.

Building in this colony still proceeds apace. Any one who has been absent for some years would hardly know the place again. Instead of the town being formed by one or two streets running along the bay, as is generally supposed, it runs far back up the hill, in the centre the buildings being densely packed. Rents continue, if anything, on the rise, and, to all appearance, permanence is the leading feature of its progress. It is announced that a new police magistrate's court is to be

The Sanatorium on the Peak continues to progress apace, the road leading to it being in a very passable state.

It appears that an old and wealthy Chinese resident named Tam Achoy chartered the British steamer *Jamsetjee Jejeebhoy* to proceed against some people inimical to his clan on the west coast. He, with the captain and crew, have been bound over to take their trial at the Supreme Court. The *China Mail*, in noticing this affair, remarks:—

"We have frequently called the attention of our readers to the system of clan fights which exists on the mainland. Something of this kind had been going on for long in some villages to the west of Macao, between the Hakkas and Punis Tam Achoy; one of the latter is a noted resident of Hong Kong, and he lately took it into his head to charter a steamer flying the British flag, and to engage a number of European sailors, Manilamen and Portuguese, in order to attack the Hakkas, under the allegation that they were pirates. His party were repulsed, and three of the Europeans, with a number of the others, were killed. He intended to organise a larger expedition, but fortunately the Hong Kong Government got intelligence of it, and Tam Achoy, with the captain of the steamer and the men who had engaged in fighting, were arrested and brought to trial for violation of the foreign enlistment act. They all appear to have acted in ignorance and are not to be harshly judged; but it is evident that this buccaneering interference with the affairs of China cannot be allowed, even though the example has been set by some of her Majesty's gunboats under the direction of the so called protector of Chinese."

One of the blocks built in 1857 on the ground to the eastward of Messrs. Lindsay and Co., is to be sold by auction; reference is made to Messrs. Wardley and Co. Other lots in Caine Road are advertised.

The celebration of the new year festivities has been the absorbing topic of the fortnight which has since elapsed. The *edat* which has characterised these at all the open ports, indicates a prosperous state of trade, proving that the Chinese have, during the past year, done a profitable business, and leading to the inference that markets will be good upon the resumption of trade. The number of failures has been unprecedentedly insignificant, nor did political affairs in the least interfere with the general jubilee.

CANTON.

There have been various rumours of late in regard to approaching disturbances at Canton, and a missionary assures us that unofficial proclamations were abroad offering 40 dols. for the heads of foreigners, which could only be regarded as a sort of Chinese pun, for the sum offered is so small that it could not secure the head of a sepoy. If the proclamations really are in existence they must have been issued by some Chinese wag, who meant to reflect on the value of the brains of foreigners. It is also rumoured that directions have come down to Kwangtung for the levying of large numbers of braves for some unknown purpose.

In reference to the new foreign building ground it is stated that the Sha-meen site is more than half finished. Twenty-four acres of ground have been filled in, and the river wall commenced. It is believed that the whole will be completed in the course of a few months.

The emigration to Demerara continues to be most successful. The *Red Riding Hood* was on the point of despatch, with a full complement (400) of men, women, and children; the number of applicants exceeding their accommodation. The coolie trade to the Havana has very much slackened, and doubtless will soon cease altogether, when the news arrives out of the edict of the Governor of Cuba prohibiting their further importation. The American ship *Messenger*, noticed in our last, in connection with this trade, is still detained, the consul having refused to assist her release. The coolies who were examined from this vessel have been set at liberty. At Macao the barracoons for this trade are still under hire, and are considered a perfect pest. The Portuguese Government, it is believed, will soon put them down.

MACAO.

The amount subscribed in 1858-59 for the support of the Protestant cemetery at this place was 3,975 dols.

The circus left a few days ago for Canton in the *Melee* after having had a good time here; impossible to get any tickets on Saturday night, all outsold before the evening. It has been a little change and come in good time just after the holidays, and has stirred up the Portuguese in Macao a little, and now we will soon have the Chinese holidays with all chin-chinning, &c. &c.

PHILIPPINES.

MANILA.

It appears that the P. & O. Company will continue to deliver the English mails at this port up to the arrival of the mail of the 26th January last, while the orders of the Spanish Government are to stop on the 1st of Jan. So the Spanish Government and Company are running opposition for a time, the Spanish mails from Manila being forwarded by Spanish vessels to Hong Kong. H.M.S. *Pioneer*, for Hong Kong, put in here short of coals. His excellency, Senor de Norzagaray, has resigned the government of these islands, and taken his departure universally regretted. One correspondent says:—"He has left a

name behind him which will never cease to be remembered and respected as that of a wise and able governor, devoted to the interests of the community and the country at large, a good and upright general and judge, and a kind, able, and virtuous man. His excellency Senor Solano has assumed the reins of government during the Queen's pleasure. The Civil Governor, Senor Pampilon, has arrived, but not yet taken possession of his post. Great enthusiasm was and is felt by all the European Spaniards here in relation to the crusade against their ancient enemies the Moors. Some groundless reports excited last month a little uneasiness among some classes of the inhabitants, in respect to the menaced rupture of international relations, but things have now returned to their old and monotonous, but happy and comfortable *status quo*. It appears that the captain of the *Margaret Mitchell*, in honour of New Year's day, fired two guns at night, and the residents construed it into British men-of-war. The captain was fined 40 dols.

COCHIN CHINA.

Some evidence is shown of opening the port of Saigon to trade, by the fact of Chinese merchants in Hong Kong chartering vessels to load rice there.

BORNEO.

SARAWAK.

The following letter has been addressed to the *Straits Times* by the secretary of the Borneo Company, in reference to an article in that journal in which it was stated—

"We are very sorry to find that nearly half the residents of the small settlement of Sarawak have already abandoned it for ever, and to learn that a few more will abandon it shortly. The Borneo Company 'Limited,' who were the principal developers of the resources of the country, have now only two or three assistants left there, and they, probably, contemplate to abandon it likewise. Those only connected with the Government will then be left; and their number is not legion. The root of nearly all the disturbances Sir James Brooke has met with is the innate ferocity and love for the *kris* and *parang* which Bornean Malays have. Their ferocity and trickery are visible on their very countenances."

"Allow me to allay the apprehension likely to be aroused among all who have friends in Sarawak, by the doleful character of the article in your paper to-day, touching the present state of that country. Your correspondent first bewails the fact of half the European residents having 'abandoned the place for ever.' Now the European population of Sarawak was never very large, but it conveys an inadequate impression of its extent, to speak of the country as depopulated, because the vessel that arrived yesterday happened to bring over two passengers. Your correspondent's other forebodings and lamentations are equally well founded. The country was never more prosperous, as its expanding trade will show. It has not the rank growth of weeds, but the steady sure development of some sapling oak that will one day be a stately, wide-spreading tree.—I am, &c., S. Giffillan."

JAVA.

BATAVIA.

Great complaints are current in consequence of the Dutch Government suddenly ceasing to draw on Holland, causing a fall in exchange from 103½ to 100. It is further stated that some merchants who were acquainted with the fact, bought bills previously to the extent of a million florins.

The following translations are the particulars of the latest operations of the Dutch in Borneo:—"The enemy suffered some loss at the taking of the benteng of Moen Tayoe. A prisoner taken at that engagement stated that the enemy intended to make an attack on Martapocra in the course of ten days. The benteng taken by our troops consists of a palisade of ten feet high, with faces of 30 steps and a bastion. After the taking of the benteng, one of our parols succeeded in forcing his way over Tambrangan to Benoea-padang. At both places bands of the enemy were met. Those of the first-named place were dispersed by our fire, after leaving some dead behind. At Benoea-padang the enemy had encamped in a close grown thicket, whence they fired the first shot on ours, continuing for a length of time, but took to their heels as soon as we discharged our heavy shots on them."

The account of the loss of the *Onrust*, and the massacre of every soul on board, has been confirmed.

We omitted to notice the following in our last. Mr. Lion, the editor of the *Batavijsch Handelsblad*, has been sentenced to eighteen months' imprisonment for insulting the Governor-General of Netherlands of India in his paper. The case is on appeal at the High Court.

MALACCA STRAITS.

SINGAPORE.

The break in the Singapore and Batavia cable, reported in our last, has not been repaired, and no further detailed intelli-

gence has reached us, except that the injury is supposed to be about twenty miles from Batavia. The screw steamer *Scout* arrived from England on the 23rd January, en route to China, and the steamer *Adventure*, from Calcutta, with 478 non-commissioned officers and privates, and ten officers for Hong Kong, detachments for different regiments.

The Singapore Directory for 1860 has been issued, and contains a list of all mercantile establishments, government offices, societies, institutions, list of residents, publications, &c.

A distressing accident occurred on the 21st January, on board the P. & O. Company's steamer *Pottinger*, from Madras, with troops. It appears that 19 men and women were sleeping in the starboard life boat, when one of the davits gave way. Three were saved by clinging to the lifeboat, one got on board the *Tubal Cain*, which vessel was in tow, and five more were picked up by the boats lowered for that purpose; the remainder were drowned.

The steamer *Shandon*, lately arrived from Australia, via Batavia, is likely to be purchased for local trade.

PENANG.

It is said that Government intends laying down a submarine cable, connecting this island on the north with Rangoon, and on the south with Singapore, Batavia, China, and the Australian colonies. The *Zenobia*, which came down from Bombay, with forty-two convicts transported to this island, and fifteen time-expired men, was employed in taking soundings for the Red Sea cable, and in some places the depth was found to be 2,000 fathoms, taking five to six hours to make one dip of the line. She will, we hear, proceed from hence to Junk Ceylon and Mergui for a similar purpose after the arrival of the Calcutta steamer, by which she expects charts and further orders.

Captain Hawkins's detachment of the 40th M.N.I. is waiting the means of transport to relieve the men of the 22nd M.N.I., now at Labuan.

COMMERCIAL REPORT.

LONDON, 17th March.

The mails delivered this morning bring intelligence of a slack business, owing to the celebration of the Chinese holidays, which commenced on the 23rd January. From Japan we have news of a resumption of business, and of large fires destroying some foreign warehouses; three vessels also have been lost on that coast. Particulars of these affairs will be found elsewhere. The claims allowed by the American Commissioners for losses in the last Canton war, amount to 500,000 dollars, one half of which is in course of payment, and the other half will be liquidated in two years, interest being allowed at 12 per cent. What a contrast to the British claims, of which there is no prospect of any settlement until all our differences are settled; and in the mean time the duties at the various ports have not been put under contribution for this purpose, by which means the Americans have raised the first moiety of their claims. The United States commissioner has signified his sanction to the customs regulations promulgated at Canton by the foreign inspectors. As anticipated in a previous issue, the rates of exchange at Shanghai, owing to the large bullion shipments, have fallen fully 3d.; but by the mails now received there has been a recovery of 2d.

The French authorities are supplying themselves with funds by drawing on France.

EXPORTS.

TEA.—The accounts from all parts represent the tea men as holding the remaining stock of the present season for higher rates, which foreigners are not disposed to meet. The arrangements for bringing forward next season's crop are progressing but slowly, owing to the uncertainty as to the settlement of the present difficulties with the British and French Governments; this delay on the part of the tea men will, no doubt, cause the new season's teas to be late in arriving at the shipping port, and most probably a short supply will result. The exports for the present season are—to Great Britain 56,000,000 lbs., against 36,000,000 lbs. last season; to the United States 25,000,000 lbs. against 23,000,000 lbs. At Shanghai the settlements have been 1,400 chests, Ningchow Congous at 26 to 28 taels, 2,000 chests of common country packed at 15 to 20 taels, 1,000 chests flowery Pekoe at 32 to 45 taels, leaving a stock of about 30,000 chests. In green teas, settlements are stated at 9,500 chests, partly for England and United States, leaving a stock of about 60,000 packages of all descriptions. Imperial Taiping is quoted at 18 to 22 taels; Gunpowder, 26 to 34;

young Hyson, 25 to 30. At Foo-chow-Foo the settlements have been 3,000 chests and 1,500 half-chests Congou, at 17 to 21 taels for middling quality; 7,000 ½-chests of Oolongs, at 14 to 20 taels, and 3,000 boxes of scented teas at 24 to 26 taels, leaving a stock of about 50,000 chests of Congou, and 7,000 packages of other descriptions. At Amoy there are no transactions to report, and no stock worth purchasing. At Canton the settlements have been very trifling—too trifling to report. The unsold stock is estimated at 50 chops Oonams and Oopacks, 2,500 half-chests Taysaan, 30,000 boxes scented teas, and 2,000 or 3,000 packages green. About 15 more chops of Congou are expected, which will complete the season's supply.

RAW SILK.—At Shanghai the supply from the interior has been very slight. Settlements for the season are about 46,000 bales, being 12,000 less than last season. The settlements of the fortnight are given at 2,700 bales, and the unsold stock at 3,500 to 4,000 bales. The following are the current quotations:—Tsatie Nos. 1 and 2, none; No. 3, 410 to 415 taels per pl.; Nos. 4 and 5, 360 to 400 taels per pl.; Taysaans No. 1, 370 to 385 taels per pl.; No. 2, 350 to 355 taels per pl.; No. 3, 330 to 340 taels per pl.; Nos. 4 and 5, 295 to 325 taels per pl. Long reel, 295 to 330 taels per pl.; Throws, 340 to 415 taels per pl.; Hong Tsatie, 360 to 375 taels per pl.; Shuhing, 290 to 325 taels per pl.; Laeyungs, 285 to 295 taels per pl. At Canton no transactions reported, the holidays having caused a cessation of business.

DRUGS, &c.—Camphor: 200 piculs Japan, sold at 21½ dols. for shipment to Calcutta; 300 piculs Formosa have also been taken for shipment to the same quarter at 24 dols., leaving about 600 piculs in stock.

IMPORTS.

All descriptions of European goods were stagnant, owing to the Chinese new year, whilst imports had been heavy. At Shanghai the purchases of cottons, woollens, metals, and other goods have been very limited; the quotations are without change. An active demand for woollen goods is expected at advanced rates. The deliveries of goods previously sold have been large. At Canton and Hong Kong shirtings and T. cloths had been in fair demand at previous quotations. Cotton yarn the demand was suspended, with large stocks. American sheetings, drills, jeans, have also been neglected in consequence of large sales of damaged goods. In woollens the sales have been comparatively small considering it was the height of the season. Metals fair business has been done at previous rates. Lead is rather higher, tin plates lower. Coals, Welsh, have realised 18 dols. landed; American anthracite, 9 dols.; Sydney, 11 dols.

MANILA.—The *Carmen* and *Anistad*, long overdue, have arrived from Liverpool, and a good business has been done in English cotton goods with very moderate stocks on hand. In exports the season's supply of sugar is over, and none of the new available. Contracts could be made at 5 dols. and 12 cents. for current, and 4 dols. 87 cents. for Pampanga. Hemp: 25,000 piculs have been settled at 4 dols. 75 cents. to 4 dols. 80 cents. for current. Cigars at the last auction fetched 8 dols. 8 cents. for cheroot, and 8 dols. 12 cents. for cigar shape.

SINGAPORE.—The stagnation caused by the Chinese new year has passed over, and a fair business is doing in European manufactures. In exports the transactions have been to limited extent, and prices generally have undergone little alteration. The Chinese holidays have on the one hand limited the supply of the staple articles, while on the other the high rates of freight, and rising exchange, prevent exporters from operating unless at lower rates.

EXPORTS FROM SINGAPORE, FOR THE YEAR 1859.

TO GREAT BRITAIN.—Sugar, 23,894 piculs; gambier, 183,508 piculs; rice, 156,510 piculs; sago flour, 93,827 piculs; pearl sago, 48,462 piculs; black pepper, 47,170 piculs; sapan wood, 36,041 piculs; A. ore, 26,679 piculs; tin, 21,870 piculs; gutta percha, 19,278 piculs; rattans, 17,418 piculs; coffee, 17,398 piculs; white pepper, 13,497 piculs; hides, 11,511 piculs; horns, 2,836 piculs; teel seed, 2,420 piculs; India-rubber, 1,178 piculs; cassia, 801 piculs; nutmegs and mace, 488 piculs; T. shell 110 piculs.

TO THE CONTINENT.—Black pepper, 25,519 piculs; gambier, 23,015 piculs; pearl sago, 7,239 piculs; coffee, 5,772 piculs; rattans, 4,779 piculs; sugar, 2,378 piculs; tin, 2,006 piculs; cutch, 1,771 piculs; sapan wood, 1,323 piculs; rice, 1,113 piculs; horns, 941 piculs; cassia, 342 piculs; white pepper, 276 piculs; hides, 218 piculs; sago flour, 202 piculs; gum dammar, 180 piculs; teel seed, 22 piculs; canes, 220 mila.

TO THE UNITED STATES.—Gambier, 85,597 piculs; black pepper, 24,006 piculs; rattans, 11,432 piculs; tin, 7,187 piculs; coffee, 6,105 piculs; pearl sago, 3,580 piculs; hides, 3,544 piculs; sugar, 3,091 piculs; sapan

wood, 2,168 piculs; cassia, 1,598 piculs; sago flour, 1,372 piculs; India-rubber, 1,274 piculs; gum dammar, 389 piculs; nutmegs and mace, 323 piculs; M.-o-P. shells, 20 piculs; tea, 35,504 boxes.

EXPORTS FROM SINGAPORE FOR THE YEAR 1860.

PER BRITISH SHIP MYSTERY, TO LONDON.—2,422 bales gambier, 5,609 piculs; 541 slabs tin, 351 piculs; 2,041 bags sugar, 1,986 piculs; 287 bags teel seed, 262 piculs; 5,104 bags black pepper, 4,190 piculs; 130 bags white pepper, 131 piculs; 1,012 bags coffee, 924 piculs; 1,344 boxes pearl sago, 1,509 piculs; 5 boxes nutmegs and mace, 4 piculs; 39 hhds. tallow, 142 piculs; 37 baskets India-rubber, 50 piculs; 1,055 buffalo hides, 288 piculs; 5,630 buffalo horns, 119 piculs; 11,600 blocks gutta percha, 1,113 piculs; 6,319 pieces sapanwood, 387 piculs; 400 bundles canes, 21,714 in number; 4,508 bundles rattans, 305 piculs. **PER U. S. ship R. B. Forbes, to Boston.**—2,500 bales gambier, 4,438 piculs; 2,040 bundles rattans, 105 piculs; 4,200 bags coffee, 1,543 piculs; in bulk black pepper, 890 piculs. **PER U. S. barque Philomela, to Boston.**—1,000 bales gambier, 2,151 piculs; 7,527 bags coffee, 1,684 piculs; 701 slabs tin, 500 piculs; 262 bundles rattans, 10 piculs; 1,919 bags black pepper, 1,367 piculs; 15 cases gum dammar, 13 piculs; 5 baskets India rubber, 7 piculs; 190 boxes tea.

EXPORTS FROM PENANG FOR THE YEAR 1859.

TO GREAT BRITAIN.—Sugar, 62,385 piculs; rice, 29,644 piculs; tin, 28,763 piculs; black pepper, 11,773 piculs; rattans, 9,753 piculs; tapioca and arrowroot, 6,071 piculs; cutch, 5,806 piculs; buffalo hides, 3,199 piculs; white pepper, 3,132 piculs; nutmegs, 2,694 piculs; India-rubber, 1,510 piculs; mace, 823 piculs; buffalo horns, 408 piculs; gutta percha, 171 piculs; rum, 210,013 gals.

TO THE CONTINENT.—Cutch, 360 piculs; tin, 315 piculs; sugar, 263 piculs; buffalo horns, 45 piculs; rum, 920 gals.

TO THE UNITED STATES.—Black pepper, 38,510 piculs; tin, 17,370 piculs; cutch, 4,066 piculs; buffalo hides, 3,909 piculs; sugar, 3,447 piculs; rattans, 2,580 piculs; nutmegs, 2,556 piculs; India rubber, 1,521 piculs; tapioca and arrowroot, 1,480 piculs; mace, 244 piculs; white pepper, 18 piculs; buffalo horns, 11 piculs; rum, 60 gals.

EXPORTS FROM BANKOK FOR THE YEAR 1859.

TO EUROPE.—Sugar, 49,234 piculs; rice, 11,503 piculs; sapan wood, 8,580 piculs; hides, 2,891 piculs; pepper, 1,657 piculs; horns, 1,410 piculs; paddy, 600 piculs; T. seed, 548 piculs; sticklac, 79 piculs; gum benjamin, 9 piculs.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

At Shanghai 6 months sight.	Bank. 6s 6½d.	Private. 6s. 6½d. to 6s 7d.
Ditto 3 ditto	..	4 11 to 4 11½
At Foo-Chow-Foo (per dol.) . 6 ditto	..	4 9½ to 4 10
At Canton 6 ditto	4s 9½d to 4 9½	4 9½ to 4 10
At Hong Kong 6 ditto	..	4 9½ to 4 10
At Macao 3 ditto	..	4 2 to 4 2½
Ditto 6 ditto	..	..
At Singapore 3 ditto	4 9½ to 4 9½	4 9½ to 4 10
Ditto 3 ditto	..	..
At Manila 6 ditto	..	..
Ditto 3 ditto	..	..
At Batavia 6 ditto	..	..
(guilders.)	..	..

Exchange quotations from China have been received to-day, dated the 15th of February. The rate at Hong Kong was 4s. 9½d., showing no alteration, but at Shanghai it had receded from 6s. 6½d. to 6s. 4½d., and was therefore between 2 and 3 per cent. more favourable for this country.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN. SEASON 1859-60.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong.	Total lbs.	SILK. Total Bales.

SHIPPING INTELLIGENCE.

VESSELS ARRIVED.

At SHANGHAI.—From London: Jan. 8, Vanguard; 12, Versailles; 19, Celestial. From Liverpool: 15, Biobio. From New York: 7, Beaver; 20, Judge Shaw.

At Foo-chow-Foo and Amoy.—None.

At HONG KONG, MACAO, and CANTON.—From London: Jan. 19, Banian. From Liverpool: 22, Corea; 24, Sir R. Abercrombie. From Newcastle: 24, Agnes. From Sunderland: 26, Corn Taul. From Glasgow: 26, Lawson. From New York: 22, Raven. From Boston: 23, Alfred Hill.

At MANILA.—From Liverpool: Jan. 13, Carmen, Amistad. From Boston: 10, Winged Arrow.

At SINGAPORE.—From England: Jan. 28, H.M.S. Scout.

VESSELS SAILED.

From SHANGHAI.—For London: Jan. 8, Chryseis; 16, Patna.

From Foo-chow-Foo.—For London: 13, Scawfell.

From AMOY.—For New York: Jan. 20, Maury.

From HONG KONG, MACAO, and CANTON.—For London: Jan. 15, Robert Henderson; 19, Juanpore.

From MANILA.—For Liverpool: Jan. 14, Spirit of Trade. For Falmouth: 9, Bahia.

From SINGAPORE.—For London: Jan. 31, West. For Liverpool: 25, Lady Raglan.

VESSELS LOADING.

At SHANGHAI.—For London: Cornubia, John Robinson, Melanethon. For New York: Edwin Forrest, Golden Rule.

At Foo-chow-Foo.—For London: Aalborg, L. Brown, Spirit of the North, Spartan, Yaratilda. For New York: Flying Childers, Sarah H. Snow. For Sydney: Aaa Packer. For Melbourne: Wild Wave.

At AMOY.—For Havana: Ann.

At HONG KONG, MACAO, and CANTON.—For London: Saxonville, Abeona, Dominion, Sophie. For New York: Rajah of the Sea. For Havana: Live Yankee, Maria Elizabeth, Governor Morton, Guadeloupe, Pioneer, Santa Lucia, Sigisbert Casard. For Sydney: Agnes, Alfred the Great, Francis, P. Sage, Helios, Justyn. For Sydney and Melbourne: Continent, Eagle. For San Francisco: Eliza and Ella, Flying Mist, James Browne.

At MANILA.—For Falmouth: Torre de Oro. For New York: Aurora, Darde. For Boston: Southern Cross, Winged Arrow. For Sydney: Margarita, S. H. Talbot. For San Francisco: Northern Light.

At SINGAPORE.—For London: Laughing Water, Timandra. For Liverpool: Athelstan, Calder, Potosi. For Europe: Jenina Brons. For New York: Azzan.

VESSELS PASSED STRAITS OF SUNDA.—From England and Continent to China: Jan. 14, H. B. M. S. Pearl. From China to England and Continent: Jan. 5, Spray of the Ocean; 8, Albion; 15, Herculean. To New York: 14, Sancho Panza; 16, Surprise. To Boston: 18, Philomela. To Sydney: 14, Benjamin Howard. From England and Continent to Singapore: 18, H. B. M. S. Scout. From Singapore to England and Continent: 11, Queen Margaret; 13, Lady Macdonald; 15, Mystery. To Melbourne: 8, Swiftsure. From Manila to New York: 15, Tzar. From Batavia to Hamburg: 12, Amazone.

CASUALTIES.

JAPAN.—The Nymph, Cornelia, L. Bevan, and Lady Inglis, have been reported as lost in the locality of Simoda. The captain of the Nymph arrived at Kanagawa on the 31st December with his crew. With the exception of three men, the chief mate, and one passenger named Carl. The treasure had been saved. The captain and crew of the Lady Inglis are also saved, but nothing had been heard of the crew of the Cornelia, L. Bevan.

SHANGHAI.—The American ship Bever, and British barque William Gillies, went ashore on the south bank; their cargoes were discharged into boats, and they both floated off.

HONG KONG.—The British barque Albert Edward, with a cargo shipped at Amoy for Foo-chow, put into Swatow on her passage thither in consequence of having sprung a leak forward, but after leaving the last port the leak broke out afresh, and she has put into this harbour in consequence. She will go to Whampoa to discharge and dock.

The British barque Juverna, from Shanghai, put into this port on Jan. 20, in consequence of Captain Burn having become sick; but it appears she had got to leeward of Foo-chow (her destination) sometime before the above occurred.

The Humboldt, from Cardiff, via Singapore, experienced heavy weather in the China sea, in which she shipped large quantities of water, and stove, in bulwarks, &c.

The American ship Golden Horn has lost a main topgallant yard, sprung fore and mizen topsail and fore and mizen royal yards; lost three topallant sails, and split two or three jibs on her passage from Bankok. On 3rd January the hull of a large ship was observed on the Scarborough Shoal.

The British ship Corea, from Liverpool, saw an iron barque in lat. 00.28 N. and long. 130.4 E., which had been out from Sunderland about six months bound to Hong Kong, but they refused on board the iron barque to give the name. The barque was the Corn Taul.

The Sir Ralph Abercrombie lost her main-top-gallant yard, and split fore and many top-sails, in a heavy squall off the Pelew islands.

From Foochow we learn that the British ship Scawfell, in going down the Min, got on shore, and remained there from 10 A.M. until 4 P.M., Jan. 13th, when she got off apparently without damage.

SINGAPORE.—The mail steamer Malabar, Captain Grainger, from China, on nearing her anchorage, came into collision with the barque City of London (belonging to this port, which vessel was lying at anchor, having arrived here the previous day from Penang), and considerable injury was done to the ship—the amount of which is not yet ascertained—and the vessel will have to undergo repairs here.

FREIGHTS AND CHARTERS.

At SHANGHAI.—The rates to London and New York are as quoted in our last. It is confidently expected that business will improve, owing to the reduced tonnage in port.

At HONG KONG, MACAO, and CANTON.—The rates may be quoted as in our last. There is no employment for steamers. The *Viscount Canning* and *Scotland* are leaving for India. The *Hebe* has been fixed to take passengers and cargo to Fraser River, and it is believed more vessels will follow. For New York, freight is offered, but no ship is on the berth. For Sydney there are still likely to be several ships wanted for passengers. The *Continent* has been settled at 9 000 dollars.

At MANILA.—Tonnage very scarce. For England: £2 for sugar, and £3 for hemp. For New York: 6 dollars per 4 bales hemp is probable. The *City of Boston* is the only ship in port, and will likely load for England.

At SINGAPORE.—For England: £2 to £2 10s. For New York: 8 dollars to 10 dollars. Nearly all the available tonnage has been taken up at advanced rates, and ships are still wanted.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY, FOO CHOW, AND SHANGHAI.—British: P. & O.'s steamers, Clusan, Formosa, and Rajah; Messrs. Jardine, Matheson, & Co., Hellespont; Messrs. Dent and Co., Yangtze; Mr. Lapraik's Undine; Messrs. Burd and Co.'s Toeywan; Messrs. Remi, Schmidt, and Co.'s Remi; Messrs. Russell and Co.'s Peiho (American).

Continental Intelligence.

FRANCE.

PARIS, March 14, 1860.

The speech is regarded by politicians of all shades as having a very important bearing upon the questions of the day. The more advanced anti-Bonapartists condemn it as the portentous commencement of a long vista of treacherous incidents yet to come, terminating in a vast and fearful tableau in which Europe in conflagration is to bring down the curtain upon the "grand blaze of triumph" of the Emperor's ambition, desperation, and hypocrisy. He is charged with having gone to the war of last summer not merely for an idea, but for a falsehood, and with having, by his undisguised abandonment of the treaty of Villafranca, and his equally open desire to obtain Savoy and Nice, shown the really encroaching nature of his policy. It is charged also that this was his secret course from the beginning, and that the notion of freeing Italy from the Alps to the Adriatic was but a piece of alliterative trash to tickle the ears and invite the sympathies of the Italian people, while it deluded the rest of Europe. The further charge is that he determined to carry his point at all hazards, and that the much-talked-of commercial treaty was only to enable him to procure enough duty-free coals out of poor Mr. Bull to carry his schemes of glory into effect—poor old John letting the coals go as usual without the ready money of "reciprocity" being paid down, and getting only in exchange for his nubby Wall's-ends a promissory note for certain duties at eighteen months' date, by which time the firm may be smashed up, and the assets made over to whichever of the bankrupt's friends may be lucky enough to gain the fraudulent preference. The more liberal party see, on the other hand, and perhaps with greater justice, a wide field of improvement and prosperity opening both for France and Italy, and which will be greatly increased by the new treaty with England. These more sober people say that the land and its products in Savoy will be vastly enhanced in price the moment they become a portion of so powerful an empire as France. Labour, too, will be more sought after as the manufacturers of Lyons and the neighbourhood extend their mills and their enterprise into the newly opened country. Their working expenses will be reduced, and their capital well secured, while the fresh trade opened will bring an elysium of prosperity to all. There is no preventive to war (or anything else) so strong as self-interest, and there is no doubt that a liberal exhibition of charter-parties and bills of lading will operate as a healthy tonic, which, while soothing and cooling down the chronic and feverish tendency of the French towards *la gloire*, will in like manner dissipate the croaking suspicions of certain parties of the Malaprop school in England, who can never contentedly let well alone, and are never happy but when fanning a quarrel into flame. It is certain, however, that the Emperor has incurred the censure of many of the liberal party by this manifest desire to add to his territory by annexing Savoy; but then if it be true that the Savoyards are in ecstasies about it, and nobody will be seriously damaged, while they are greatly benefited, there does not seem any very great reason why strangers should interfere. It must be a very bad day indeed for Central Italy if her political condition can be made worse than it has been up to the present generation. The Rentes had a slight rise after the speech, but it was neutralised the following day, and a corresponding movement in the London and other European markets, though slight, shows that there is a symptom of uncertainty, if not of uneasiness, about the future in the minds of those keen observers whose operations regulate the commercial exchanges.

I am informed that the writer of the paper on the naval forces of England and France is Vice-Admiral Charner appointed to the command of the French squadron on the China station.

According to the latest accounts Rear-Admiral Page was at Cambogia with a part of the naval squadron, and was busy in raising works for the protection of the mouth of the river. The forts were to be mounted with guns taken from the Annamites. Accounts from Saigon mention also that it is the intention of the French to raise a native corps in Cochin China. The officers are to be French; but Annamites may become officers, yet never more than one-fourth of the whole. A young Christian, son of the Mandarin Sim-Sia, who was martyred about a year ago at Tonquin, has been named as a lieutenant. This young Annamite is only twenty-three years old. He is said to show profound devotion to France. He has been charged with difficult missions and has always conducted him-

self satisfactorily. His influence with his countrymen is said to be great.

The opening of the port of Saigon to ships of all nations, would have taken place on the 1st of Jan. last. Natives, aware of the advantages to be gained by European traffic, crowd into this port with goods, and to every appearance Saigon is destined to become a maritime port of some importance.

Admiral Charner and his staff embarked in the Peninsular Steam Company's ship *Panther* on the 2nd, en route for China.

The French Government, finding there is an insufficiency of Chinese interpreters in China, has raised the student class of the Chinese language from two to six. There are now four in China, Vincent Sales, Ernest Blancheton, Alfred Hubner, and Gabriel Deverier. The others went out with the *Japon* to Shanghai.

The steamer *Japon*, with a portion of the gunboats, has left Toulon, and the steamers *Weser* and *European*, and transports *Pomona*, *Louise*, and *Leonie*, take the balance. There are 15 in all.

The Chamber of Commerce of Lyons has presented a petition to the Government, praying that it will favour by all means the establishment of a direct steamboat service between France, India, and China, and further the establishment of an Indian and Chinese French Imperial Bank. Indian and Chinese raw silk now forms a great part of the material used by the Lyons manufacturers, and the demand for it is increasing every day. They consequently require a regular supply of the article, which can only be obtained by the establishment of a steamboat service between France, India, and China. The Lyons manufacturers estimate their transactions with those countries at 400,000,000*fr.*, and they urge that an Indian and Chinese Bank, established at Lyons, with branches in the East, is required to supply them with the credit necessary to compete with the English manufacturers. Raw silk is scarce in all the markets of France, and there is not much to be obtained in the Italian markets.

HOLLAND.

AMSTERDAM, March 10.

After a protracted ministerial crisis, the new Cabinet is at length formed, as follows:—Van Hall, Minister of Finance; Godefrui, the Department of Justice; Van Heemstra, Secretary of State for the Home Department; Mutsaers, Minister for the Affairs of the Catholic Religion, and Boscha for those of the Protestant Church. Colonel Casembroot retains his post as Minister for War, Lotsy for the Navy, and Rochussen for the Colonies. The new Minister for Foreign Affairs is Count de Zuylen van Nijvelt, hitherto the Netherlands Ambassador at Constantinople, who has telegraphed his acceptance of the post, and is now travelling home. Till his arrival, the Premier and Minister of Finance undertakes the duties of the Foreign-office. Of these nine ministers, eight of them have been at one time or other members of either the First or Second Chamber of the States-General, and are consequently acquainted with parliamentary debating.

The commission for the correction of sea-charts at Batavia has fixed the geographical position of the time-ball in that city at 6° 7' 40" 2" south latitude, and 106° 18' 7" 5" longitude East of Greenwich. The falling of the ball takes place every day at noon, commencing on the 15th of January last. The commission further give notice that they have completed the hydrographical surveys and published the following charts:—Brouer's Straits (between the Island of Pandjour in the Straits of Malacca and the east coast of Sumatra), the roadstead of Natal (on the west coast of Sumatra), the Bay of Yedo, Ne-e-gata roads.

In my last letter I mentioned the appointment of Dr. Naber, of Haarlem, to be Rector of the Gymnasium or High School of Willem III. at Batavia. The Government are resolved to make this latter establishment second to none out of Europe, but the difficulty is to find professors coming up to the mark required. In this dilemma the commission has advertised, publicly inviting competition. They must hold the university diploma of doctor of one of the learned faculties. The appointments are each worth 400 florins per month, with a rise of 100 florins per month at the end of five years, and another increase of equal amount after ten years' service, besides which they get a free passage for themselves and families as first-class passengers, a present or gratification of 1,000 florins for their outfit, and the enjoyment of one-half their pay from the day they embark till they are duly installed in office at Batavia.

The King has promoted Lieut.-Gen. J. van Swieten, his aide-de-camp extraordinary, to be Knight Commander of the Royal Military Order of Willem III., in consideration of his

distinguished services as commander-in-chief of the late successful (second) expedition to Boni. The following gentlemen have received the Royal exequatur as Consuls for the Grand Duke of Baden:—W. J. van der Broek at Batavia, M. Hymans at Samarang, and G. Schimmelpenninck at Sourabaya.

THE JAVANESE LANGUAGE.—After seventeen years, the Commissioners appointed to compile a Dutch and Javanese dictionary, have finished the five first letters of the Javanese Alphabet, *lo, no, tjo, ro* and *ko*. The expense at this rate will amount to 816,000 florins (nearly £7,000.)

Parliamentary Intelligence.

HOUSE OF LORDS.

EMIGRATION AGENTS IN INDIA AND LABOURERS FOR THE FRENCH COLONIES.—Lord HARRIS then rose to address their lordships on this question. The noble lord, whether by choice or accident, contrived to select for the delivery of his observations one of the most peculiarly ineligible positions that could be found in the House for being heard—an inconvenience that was in no very slight degree aggravated by a feeble flow of enunciation that rendered him, throughout an address of some twenty minutes, "totally inaudible" in the gallery, to which the noble lord's back, speaking from the cross benches, was totally turned, so that all that could be gathered were disjointed sentences at intervals, such as "treaty with France"—"blacks to the colonies"—"so well known to your lordships and the Emperor of the French"—"noble lords and emigration agents"—(hear)—"the remarks I have made," and perpetual waving of a sheet of paper, from which the noble lord ultimately read the following question for the reply of the Foreign Secretary:—"Whether in a treaty, which it is reported is about to be ratified with France, and by which the Government of that country will be authorised to appoint emigration agents at the Presidency or other seaport towns of India for the purpose of obtaining agricultural labourers for the French colonies, care had been taken to insure that the laws, rules, and regulations respecting emigrants for India to the British colonies, at present existing, or as they may hereafter be modified, shall be fully enforced; and, if so, by what means?" The occurrence would not require to be noticed were it not for the fact that the habit, on the part of some noble lords, of becoming less and less audible is every day increasing.—Lord WODEHOUSE was glad the noble lord had taken the opportunity of alluding to this subject, because many persons connected with India were under a misapprehension as to what had been done, and the nature of the experiment proposed to be made. The treaty was not yet signed, and consequently nothing had been ratified. The subject had been under the careful consideration of the Foreign, Colonial, and India-offices, and the noble lord was right in supposing that anxious consideration had been given to see that proper regulations were adopted for care being taken of the emigrants, so that they might not be oppressed, and might enjoy the advantages that were to be secured to them. Before answering the noble lord's question, he would state how the convention originated, because it would be necessary to understand why the Government engaged in these negotiations in order to understand the position of affairs. These negotiations had commenced long ago. Before the late Government came into office they were in progress, they continued under the noble earl the late Secretary of State, and had been continued up to the present time under the Secretary of State for Foreign Affairs. The treaty, though not signed, was likely to come to a conclusion. The negotiations originated in the principle of a scheme so well known to their lordships for the emigration of blacks from Africa. There was only one opinion on that scheme, because in whatever way the French Government did transport these blacks to the colonies, and whatever advantages they derived from it, the system as hitherto carried on was atrocious and objectionable. As the French colonies were in urgent want of labourers, the Government thought that if that labour was supplied from India it might tend to put down the emigration from Africa. He assured the noble lord that the same regulations would be observed for the protection of Indians who were to be carried to French colonies, as to those who were to be conveyed to British colonies. As regarded the French colonies in India it was provided that there should be consular agents appointed, if they did not already exist, who should have the powers of seeing the emigrants placed on board, and seeing that the strict rules to be established should be carried into effect. Before this time a very considerable number of Indians have found their way to the French colonies, so that in the island of Reunion at present, out of 65,000 inhabitants 49,000 are Indians, a very large proportion of them being subjects of her Majesty; many of them are expected soon to return to India, their contracts having expired, and this fact had caused considerable apprehension in that French possession as to the probable dearth of labour. As to the regulations to be observed in the conveyance of emigrants by French vessels, he admitted it was necessary that strict rules should be made as to the number to be carried, the provision of medical attendance, and other important matters. The French regulations were not so satisfactory as our own, but the French authorities had agreed that their rules should be assimilated to ours, and would become eventually the same for the emigrants as if they were conveyed on board English vessels. As to the condition of the emigrants on reaching a French colony, he might say that the provisions established in Martinique were of a satisfactory character—(hear, hear)—and if they were carried out in other French colonies would afford a guarantee of proper treatment, and it was one of the provisions of the arrangement that the Martinique regulations should be put in force. The emigrants were to have a free passage afforded them at the expiration of their contracts. A proper proportion of women were to accompany the emigrants, and the regulations generally were to be such as had been completely successful for our own colonies. It was further provided that the number of deaths among the emigrants, and their change of masters, should be reported to the British consul, to whom, as far as possible, it would be provided that they should have a right of access. As to whether her Majesty's Government had provided that the Indian Government might put a stop at any time to the

emigration, he thought that if such a power had been given the treaty would have defeated the ends of the French Government, who desired to secure a steady supply of labour. He thought the arrangement would be advantageous to the Indian population, as the treaty regulations provided for their proper protection. It was, however, an experiment, and ought to be vigilantly guarded, but if it were found that by this means we were able to put an end to the so-called emigration from Africa to the French colonies, he thought the interests of humanity would be furthered. (Hear, hear.) The Government had provided that the coolies should have access to our consuls, and that the French authorities themselves should be obliged to give the most ample returns to our consuls of the number of coolies introduced, the mortality, and other details, which would tend to give the security sought. His noble friend said he assented to the treaty on the sole condition that the deportation of the blacks from Africa by the French authorities should entirely cease. That provision had not been absolutely introduced into the treaty, although its introduction, with some other alterations, had been attempted. Her Majesty's Government had received a distinct pledge that the slave traffic would be at once discontinued on the eastern coast of Africa, and that it should cease early in 1861 on the west coast. (Hear, hear.) The noble earl asked if securities had been taken for the unfettered return of the coolies. He was glad to say that there was an express provision for that purpose in the treaty. He also asked whether the five years' contract was identical with the contract we had in our colonies, or whether there was any reference to a three years' limitation of service. That was a question which he could not answer; but the French Government, in the course of the negotiation, had made great concessions, and his impression was that it was a five years' engagement absolute. With respect to the amount of space allotted to the emigrants, it had not been found necessary to insist upon stringent regulations. We allowed at present twelve superficial feet of space for each adult, and a space between decks of ten feet. The French did not allow much more than half that. It had been under the consideration of our emigration commissioners to reduce somewhat the allowance of space in the case of emigrants to our own colonies; some negotiation had taken place on the subject, and the decision came to was, that for Calcutta the space allowed to each emigrant should be seventy-two cubic feet, and for Madras sixty-two cubic feet. He believed that the duration of the treaty was for two years certain, terminable after that by a notice of eighteen months, at a particular month in the year—February, he believed—so that, practically, it was a treaty for three years and a half, continuable, unless notice were given of its termination. The Earl of ELLENBOROUGH hoped the noble duke would take into consideration the state of the unfortunate coolies in the French colonies after notice had been given of the termination of the treaty, and who would then be deprived of all protection under the treaty. (Hear.)—After a few words from Lord HARRIS in reply, the subject dropped.

HOUSE OF COMMONS.

THE "FRIEND OF CHINA."—Mr. F. JAMES called the attention of the Under-Secretary of State for the Colonies to the case of Mr. Tarrant, the editor of the *Friend of China*, who, after conviction for a libel, had been sentenced to be imprisoned in the felons' gaol in Hong Kong for the period of twelve calendar months. Mr. Tarrant was convicted in September last of a libel on Colonel King, who held an official position in China. Mr. Tarrant was a gentleman and a scholar. He had held a position in the colony and had afterwards become the editor of the newspaper called the *Friend of China*, and he wrote some able articles exposing the system of corruption which beyond all question was practised in Hong Kong, for Sir John Bowring had stated before a committee that he was bound to confess that there was a system of corruption among the officials there which he had in vain endeavoured to suppress. Mr. Tarrant was tried on the 29th of September, and was sentenced to twelve months' imprisonment on the criminal side of the gaol. He was tried, in the absence of the chief justice, by Mr. Adams, who had been member for Boston; and it was due to Mr. Adams, so far as his humanity was concerned, to state that he had recently arrived at Hong Kong, and was not aware of the severity of the punishment, the character of criminals Mr. Tarrant would have to associate with, or the wretched accommodation of the prison. Mr. Adams went himself and saw the gaol, and joined in a remonstrance to the government, with the whole of the jury who had tried the case, for a remission of the sentence, and Mr. Tarrant's removal from the criminal side of the gaol to the place allotted to misdemeanants. This was refused; and Mr. Tarrant endured the greatest possible privation and misery. He suffered so much in his health from the association with criminals, and from the heat of the wretched place—for the gaol was constructed for Chinese prisoners—that he was, after a time, removed to an hospital, whence, however, he was subsequently again sent back to the gaol. The punishment was altogether most severe, and not warranted by the circumstances of the case.—Mr. C. FORBESCUX replied that, according to a private letter from the then acting attorney-general, Mr. Tarrant was treated with as much leniency as the gaol permitted; and in November last the visiting justices revised and altered the rules of the gaol so as to permit Mr. Tarrant to be placed apart from the other criminals, and with as much accommodation as the gaol allowed. At the same time it was to be admitted that gaols in China were different from gaols here, and the gaol at Hong Kong was one which urgently required enlargement and improvement. This operation was in the course of being carried out, and a large sum of money expended for the purpose. (Laughter.) But, with respect to Mr. Tarrant himself, the case was only a question as to the discretion of the Government in carrying out the sentence of a court of justice; and he must say that the exercise of that discretion was not quite so easy a matter as some gentlemen thought, the fact being that these libels, personal libels in the newspapers of Hong Kong, had gone on for many years past to such an extent as to render it necessary that no excessive lenity should be shown to a person who had so conducted himself. Perhaps, however, he could best answer the hon. gentleman's question by reading an extract from a despatch dated in December last. The direction given to the governor in that despatch was, that if, on its receipt, Mr. Tarrant's health had suffered, or was in danger of suffering, he was to be at once removed from the criminal side of the prison to the debtors' side; that, whether his health suffered or not, at the end of six months from the date of his

imprisonment he was at all events to be removed to the debtors' side of the gaol. And the despatch ended, "It has been urged,"—it was written by the Duke of Newcastle,—"it has been urged upon me by some who disavow the slightest sympathy with Mr. Tarrant's writings that the latter half of the sentence should be altogether remitted, and that he should be discharged from prison. I must leave to your judgment how far such an act of leniency should be resorted to." No answer had yet been received to this despatch. When it did arrive he would be happy to give his hon. and learned friend the information which it contained; but he must say that he had every confidence in the good sense and judgment of Sir Hercules Robinson, who had just gone over to the colony, and who was perfectly free from all the local and personal quarrels that agitated society there, and he hoped that before this time the gentleman had the subject of his complaints removed.

OUR RELATIONS WITH CHINA.—(March 5th.) Sir DE LAOR EVANS was understood to ask a question of the noble lord the Secretary for Foreign Affairs when he proposed to allow the House to express its opinion as to the policy of the Government in reference to our relations with China, and whether the noble lord would have any objection to lay on the table a statement of the present expenses and the salaries of those gentlemen who formed the diplomatic mission in China, and an estimate of the probable expenses, both of the mission and the nature of the charges that would be required for maintaining our relations with that nation?—Lord JOHN RUSSELL replied that when the hon. and gallant member brought forward the motion of which he had given notice, he would make a statement of the expenses of the mission.

SINGAPORE.—Mr. GREGSON asked if the Government had arranged with the Viceroy of India to transfer the control of the Government of Singapore and the Straits from Bengal to the Colonial office; and, if so, when it was proposed to complete the transfer? Sir C. WOOD had always been of opinion that it was desirable to transfer the government of Singapore to the Colonial office. The noble lord who preceded him wrote a despatch to the Governor-General of India, asking what were the views of the Indian Government as to this transfer, and whether it had any objection to it. In the month of December last, an answer to that despatch was received. It stated the concurrence of the Government of India with the proposal. He had communicated this decision to the Colonial office; but no answer had been received, and it was impossible to say when the transfer would take place.

On the motion for going into committee on supply, General Sir DE LAOR EVANS rose to move a series of resolutions to the effect that, in the opinion of the House, no sufficient proof had been adduced that the Government had authorised the late attack on the Peiho forts; that the recourse to arms to force a particular route for plenipotentiaries proceeding to exchange ratifications of peace was unprecedented and inconsistent with the objects of an amicable mission; that although a military demonstration might now be necessary to restore satisfactory relations with the Chinese Government, yet were the failure of an unauthorised collision made the pretext for an attack on the city of Peking or the conquest of territory, such a step would be contrary to every principle of international law; that the House participates in the peaceful expressions used in her Majesty's speech on the opening of Parliament with regard to the Emperor of China; that, similar peaceful expressions having been stated to have been employed by the Emperor of China, it was most important to choose a plenipotentiary of reliable experience and of conciliatory temper and judgment to conduct the negotiations and direct her Majesty's forces. The hon. and gallant member, however, confined himself to that portion respecting her Majesty's speech, having heard that Lord Elgin was to be despatched, of whom he had a very high opinion. He should, however, like to know what instructions had been given to his lordship, whether they were strictly defined, and whether the naval and military commanders would be kept under his control.—Lord JOHN RUSSELL said it would be very unwise to give very restricted instructions to a minister going on such an important and far-distant expedition. At 16,000 miles away, circumstances might arise which would prevent their being obeyed, but even if that were not so, it would be very inexpedient—in fact it would be a breach of duty—to make public instructions given to our naval and military commanders. Lord Elgin had gone over to Paris for the purpose of consulting with Baron Gros, with whom he had formerly acted, as to the two ambassadors having the supreme command over the commanders of the forces, and the power of stopping military operations when they thought fit. That would have been very desirable, but it was hardly possible, because the naval and military commanders would represent that they could not then be responsible for the safety of their ships and men. He did not wish to revive the question about Mr. Bruce's proceedings, but unless they demanded some reparation for the injury we had received, it was evident the lives and property of Englishmen would no longer be safe. Whether they went up rightly or wrongly, it was clear that Mr. Bruce and Admiral Hope had no notice that their passage would be obstructed, and after what had happened, he (Lord John Russell) must say that some reparation was necessary. Our demands had been extremely moderate, and he hoped there would be no necessity to go beyond the first portion of the instructions given by her Majesty's Government. Nobody could regret the whole affair more than he did, but it was quite wrong for anybody to say that we were going to China for the purpose of obtaining territory. There were no boundary questions to settle there or anything of the sort. All we required was security for the persons and property of our countrymen. The trade of Shanghai and Peking was very considerable, and as there were large numbers of persons engaged in it it was very necessary that we should have a resident minister either at one place or the other. He might reside at Peking or at Shanghai, and make occasional visits to Peking. Lord Elgin would proceed almost immediately on his mission, and the Government had great hopes from the knowledge that he was animated by the most pacific feelings and the greatest anxiety to do the best he could for the interests of his country.

TRADE BETWEEN THE NORTH-WEST PROVINCES OF INDIA AND THIBET.—In answer to a question from Mr. W. Ewart, Sir C. WOOD said the matter was under the consideration of the Government, and Lord Elgin had been instructed to use his influence to restore the trade. He was happy to say that since 1853 the trade had increased from £180,000 to £393,000. There had been English commissioners appointed just before the war broke out, to meet the Chinese commissioners from Thibet, but unfortunately they had been murdered on the road, and nothing had been done.

Spirit of the Press.

THE NEW MISSION TO CHINA.

The question of our commercial relations with the Asiatic empires of China and Japan is at once simple and complicated. Under the idea of a peaceful treaty of commerce between the West and the East, the former exchanging its manufactures for the abundant natural productions of the latter, the thing is simple enough. It means merely that Europe and Asia, instead of fighting like a couple of barbarians for intangible "glory"—he most glorious who sheds most blood—should become a couple of civilised merchants, bartering the productions of their respective countries for tangible gold—he most likely to pronounce for durable peace who most successfully shows its value to the material interests of mankind. There is certainly not much romance about this view of the case, no stirring incidents of field and flood, and nothing to form the elements of a grand epic, which shall wreath its author's name with immortality a generation or two hence. It is a very unpoetical and worldly, a very matter-of-fact and pounds, shillings, and pence conclusion we reach. Granted; and that this is just the reason why we think a treaty unstained by human blood ought, if possible, to be effected. The ring of gold and silver is far more musical than the roar of cannon and the clashing of swords, and international peace always tends to the increase of wealth, while war as naturally scatters it. All this has been said repeatedly, and we recur to it now with some degree of pleasure, because, notwithstanding the calamity at the mouth of the Yellow River, Lord Elgin still cherishes the hope of a peaceful and prosperous trade with China. He said the other day, on receiving the freedom of the City, "It was hoped and believed that the treaty which had been entered into with the authorities of the Chinese Empire would be the forerunner of a peaceful and prosperous trade with that empire of 400,000,000 people. Gentlemen, I do not yet abandon that hope. On the contrary, I have a firm conviction that it will be fulfilled at no distant period." This expression of confidence was loudly cheered, and Lord Elgin's judgment and experience warrant the conclusion that he would not have expressed himself in this manner without strong reasons. We learn from another source that the Emperor of China is disposed to make every reasonable concession for the purpose of averting further hostilities, and that if these pacific dispositions are met in an honourable spirit by England, all further contest may be avoided. For the peaceful solution of the Chinese difficulty we have contended once and again. On the cost, the immorality, and the necessary inequality of a war with China, we have frequently spoken, and nothing in relation to this matter could give us greater satisfaction than the knowledge that the Elgin Treaty will yet be ratified in an honourable and amicable manner. It is extremely desirable that these things should be fully and clearly put before the Imperial Government. If this were done, we should entertain the most sanguine hope of a peaceful solution of the difficulty, for the Chinese mind, though narrow and prejudiced, is acute and selfish, and would readily perceive that if we come as unarmed merchants, trading for gain, we must of necessity increase their wealth by our abundant silver, and their personal comfort by the introduction of our science and art. But two things we must do. We must repent of and abandon our opium iniquity, and we must give up the wickedness of bombarding a town crowded with innocent people, whenever a greasy mandarin trifles with our liberties. It is in their nature to deceive, but we can correct that tendency without the use of red-hot cannon-balls. In a word, if we would approach them as our intelligence and sense of justice, and professed allegiance to the loftiest standard of morality, teach us that we should, the complications that have surrounded a very simple question would speedily be unravelled, and better days for the East, with its enormous masses of human beings, would speedily dawn. This is a consummation that all classes of our countrymen cannot but desire, whatever variety of motive may prompt that desire; and it is very gratifying to find the noble earl, to whose opinion we have alluded, cherishing the hope that its realisation is not very distant. We believe it would greatly facilitate the issue desired if Lord Elgin himself were sent back to China to take up the Treaty just where he left it, and to bring it to maturity as speedily as convenient. He is clearly the man for this delicate, but highly important service.—*Morning Advertiser.*

TRADE OF JAPAN.

The despatches connected with the stoppage of trade at Japan have been made public. The only new features are a copy of Mr. Alcock's despatch to Lord John Russell, and a communication from the East India and China Association, calling on our Government to put a stop to such disgraceful occurrences as are exhibited in the applications of Messrs. Telge, Eskrigge, and others, to the Japanese Treasury. The *Times* and other journals have duly condemned, in leading articles, the conduct of these gentlemen, and it has been assumed that they are all *British* merchants; this is not, however, the case, and, considering the unbusiness-like style of their correspondence, they would be more correctly designated as Messrs. Tag, Rag, and Bobtail. To Lord John Russell Mr. Alcock says:—

"Insecurity of life, and the almost total stoppage of a trade not without promise at this port, are the first of the untoward conditions to which I have alluded. And if, on the other hand, there has been throughout much to complain of in the Japanese authorities and officials, a bad system, or no system, of administration, and little desire to facilitate a trade which they believe must impoverish them, not the less that they see it begins with a run upon their gold currency, there has, on the other, been much cause for dissatisfaction given by foreigners. The purchase and shipment of their gold coins they look upon as neither more nor less than an act of lawless spoliation, and an abuse of treaty provisions, intended only to secure a fair exchange of produce. Set at defiance by foreign dealers, and overreached by their own subjects at the instigation of the former, it can hardly be wondered at that they should have watched the conduct of both with indignation, and been further embittered by their consciousness of their helpless-

ness to put a stop to it by the adoption of their usual summary and strong-handed measures. The burning of the Tycoon's palace has given them a temporary relief from their perplexities, and been made to furnish a plea for so many extravagant things—all tending to the suspension of treaties, and total stoppage of trade here—that I cannot help thinking the fire, if not invented for the purpose, has been at last regarded as a very fortunate incident. They have certainly succeeded for the moment; although they cannot hope to maintain, as a permanence, a state of things in direct violation of treaty provisions. Under plea of labour and expenses to be incurred consequent on the destruction by fire of the Tycoon's castle, they have stopped the further issue of silver itzibou, interdicted the sale of copper, and further laid restrictions upon the sale of all Japanese produce in request by foreigners; thus striking, in both directions, at the root of all commerce. They have even hinted that until the place is rebuilt there is no remedy. With more or less pressure, and delays inevitable, they will be brought, no doubt, to abandon the specific restrictions on which the finger of the foreign diplomatic agents can be laid; but to prevent action in some other direction, leading to the same end, is indeed a hopeless enterprise. The foreigners, subjects of the various treaty powers, at Kanagawa, have done their best to justify the policy and confirm the fears of the Japanese authorities, as to the course foreign trade would take, and its results. Nothing could well have been worse than the conduct of the body generally; and the acts of many individuals are altogether disgraceful, as I think will be evident to your lordship on perusal of the enclosed dispatch and documents attached. There is, unfortunately, a great deal of misconduct which no law can touch, and many acts of the most mischievous tendency not easily brought under the clauses of a legal enactment. Even when specifically denounced with pains and penalties attached, it is often in these countries very difficult to obtain such evidence as will bring the offence home to the parties implicated, in a way to insure legal conviction. Japanese, both authorities and people, will complain, but not appear in fitting time and place to give evidence; and yet their complaints of injury, which must thus go unredressed, may have been perfectly well founded. Hence much of the impunity and licence which has hitherto marked the conduct of such persons. Of course, no action of the British authorities could impose any check on the misdoings of Americans, Dutch, and others; and these alone would suffice, if all else were amended, to fatally damage the foreign position. All the consular agents, except our own, are themselves traders, unsalaried, and mixed up with the practices objected to in others—an evil long and deplorably fruitful of mischief in China. Public opinion, with its salutary restraining power, is wholly wanting, unfortunately, also, in a small community of some twenty commercial men of all classes and divers nations, who believe that in this distant corner of the world they are safe from exposure. It may still, however, be brought to bear upon them with effect, I hope, even here, by invoking the public opinion of the larger communities in China."

TREATY BETWEEN DENMARK AND SIAM.

The official *Gazette* for the Duchies of Holstein and Lauenburg publishes the text of the "Treaty of Amity, Commerce, and Navigation," concluded between Denmark and the kingdom of Siam, dated Bangkok, May 21, 1858, and ratifications exchanged Sept. 15, 1859. The following contains a digest of the principal stipulations:—

Art. I. guarantees mutually the liberty and safety of their respective subjects in the dominions of the other, and grants them the privileges accorded to the most favoured nations.

Art. II. provides the right of appointing consuls and agents.

Art. III. Danish subjects in Siam to enjoy full and perfect religious toleration, with permission to erect churches and perform divine service.

Art. IV. Danish subjects having complaints to make against the Siamese authorities, must do so through their consul.

Art. V. stipulates that Danes can for the present only establish themselves permanently at Bangkok and its immediate neighbourhood, but they are at liberty to travel and trade in any part of the Siamese dominions.

Art. VI. Natives of Siam are permitted to enter the service of Danish subjects there, but remain subject to the laws of their own country.

Art. VII. Danish subjects cannot be obliged to remain in Siam against their will. All Danes travelling in the interior must be furnished with a passport from the local authorities, which will be granted on application through the Danish consul.

Art. VIII. Within the prescribed limits Danish subjects may purchase and rent houses, land, and property, to a distance of four British miles from Bangkok, provided they have been resident in the country for ten years.

Art. IX. has reference to the manner of settling disputes between Danes and Siamese.

Art. X. stipulates that Danish subjects are only amenable to their own laws in Siam, but that the consul is responsible for the due administration of justice.

Art. XI. In cases of piracy and robbery committed on Danish subjects and their property in Siam, full restitution shall be made; or, if it be not possible to recover the articles stolen, adequate compensation shall be made.

Art. XII. Deserters from Danish ships of war and merchant vessels in Siam must be delivered up to the consul.

Art. XIII. Should a Danish subject become insolvent in Siam, the consul is empowered to take possession of the assets and account-books, declare dividends, and wind up the estate, in which he shall be supported by the Siamese authorities.

Art. XIV. If a Siamese subject refuse to pay a Dane the just and lawful debts due to him, he must complain to the local authorities through the consul, and prompt justice will be rendered him.

Art. XV. The property of subjects of one state dying intestate in the dominions of the other, shall be administered by the respective consul.

Art. XVI. Danish ships of war may enter freely the river and anchor at Paknam; but if they wish to proceed up to Bangkok, they must first obtain permission from the Siamese Government.

Art. XVII. Ships of either state entering the ports of the other from stress of weather, or for repairs, shall receive all possible assistance from the local authorities, and be furnished with fresh provisions, the needful labourers, and everything else required to enable them to proceed on their voyage. In cases of shipwreck on the coast, everything saved must be delivered up to the captain or the supercargo, or in their absence to the consul.

Art. XVIII. On payment of the stipulated import and export duties, Danish vessels and their cargoes shall be free to navigate the waters of Siam without being subject to any charges for pilotage, anchorage, or tonnage dues.

Art. XIX. The duty on goods imported into Siam by Danish vessels shall in no case exceed three per cent. *ad valorem*, which may be paid in kind or in money. All disputes between Danish merchants and the Siamese customs-house as to the value of goods, to be referred for arbitration to the Danish consul and a Siamese official, who in case of need may jointly appoint an umpire for final settlement. Duties can never be imposed again on the same goods, and duties paid on landing to be returned if the goods are re-exported.

Art. XX. Export duty on Siamese produce exported in Danish vessels cannot be higher than that fixed in the general tariff of the country; but the Government of Siam reserves to itself the right of adding from time to time other articles not mentioned in the tariff now in force. The duties on such additional articles shall, however, bear a just proportion to those now chargeable with duty.

Art. XXI. On payment of the above-mentioned duties in Siam, which cannot be increased without the consent of Denmark, Danish subjects are permitted to import from any country all goods, merchandise, manufactures, and produce not actually prohibited or subject to a monopoly on the day that the treaty be signed. But the Siamese Government reserve the right of prohibiting the export of salt, rice, or fish, if there is just cause to fear a scarcity in the country; such prohibition, however, shall not affect contracts for delivery made before the publication of the said order. Coined money, provisions, and personal effects are exempt from the payment of duty. Should the Siamese Government reduce their duties in future, such reductions are to be fully participated in by Danish merchants and vessels.

Art. XXII. The Danish Consul is bound to see that his fellow-countrymen respect the laws and regulations in force in Siam.

Art. XXIII. All privileges, rights, and immunities, now or in future granted to the subjects and citizens of any foreign state, shall be in like manner extended to the subjects of his Majesty the King of Denmark.

Art. XXIV. After the expiration of twelve years from the day of the ratifications being exchanged, the present treaty shall be subject to a revision on either of the high contracting parties giving the other due notice in writing of his wish to do so, and commissioners shall be appointed on both sides to negotiate on the alterations and additions that may be deemed necessary by experience.

Art. XXV. This present treaty shall be in force from the day of its being signed, and the ratifications shall be exchanged at Bangkok within the space of eighteen months from this day, or sooner if possible.

Signed and sealed by the respective plenipotentiaries at Bangkok in the kingdom of Siam on the ninth increasing day of the seventh month of the year 1220 according to the Siamese era, and the 21st day of May A.D. 1858.

Naval and Military.

THE CHINA EXPEDITION.

The only items to notice in connection with this expedition are, that two squadrons of the 1st (King's) Dragoon Guards are to proceed from Malta to Hong Kong. The officers proceeding are:—Colonel Sayer, Major Slade, Captains Bradbury, Mitchell, Alexander, and Wingfield, Lieutenants Sidney, Grews, Hudback, Crewe, and Marsland, Cornet Sedley, and Dr. McSheehy.

Rear-Admiral Hope has been gazetted as Vice-Admiral of the Blue, until further orders, and Colonel Wilmot has been appointed Judge-Advocate-General of the army in China.

According to advices from Alexandria, it appears that one battery of the Royal Artillery which left this country in the *Himalaya*, embarked at Suez on board the Indian navy steamer *Berenice* for China on the 15th February. The remaining portion are still on board the *Himalaya*, in the harbour of Alexandria, awaiting the arrival of the *Bentinck* or *Hindustan* at Suez. A portion of the officers proceeded by the mail steamer. Notice was made in our last issue of the inferior speed of the *Berenice* which was built at Glasgow in 1835. The 14th Dragoons did not arrive from Bombay by this vessel as expected, in consequence of her insufficient accommodation, and it is since reported that they go on to China.

Lieut.-General Sir J. Hope Grant was to leave India for China in H.M.S. *Feroze* during the present month, and will be succeeded in the command of the troops in Oude by Brigadier-General Sir Robert Walpole, K.C.B. It is rumoured that Sir W. Mansfield will not proceed as second in command.

Lieut.-Colonel Elkington, 6th Royal Regiment, goes as Assistant-Adjutant-General, and Captain Green, 77th, as Deputy-Assistant-Adjutant-General, to Sir John Michel's division for the China expedition.

Some alterations have been made in the troops to be despatched from India, and, according to last advices, the Queen's regiments proceeding were as follows:—3rd, 6th, 8th, 37th, and the first battalions of the 60th, 67th, 73rd, and 99th.

The *Caduceus* chartered freight ship, Captain Cass, arrived at Spithead on the 4th inst. from Hong Kong, with military and naval invalids, in military charge of Captain M. Legge, second batt. 1st Royals, and in medical charge of Surgeon Becker. The wife of Captain Legge is the only other passenger by the ship. The invalids comprise, military—Royal Engineers, 6 men; Royal Artillery, 13 men; 2nd battalion 1st Royals, 47 men, 8 women, and 17 children; Medical Staff Corps, 3 men; 78rd Regiment, 1 woman from the Cape. Three men of the 2nd battalion 1st Royals were landed at the Cape and sent to the hospital there. Three births have occurred on the homeward voyage, and 26 deaths (military)—viz., 21 men, 1 woman, and 4 children. Fifty-six naval invalids embarked at Hong Kong, and others at the Cape and Ascension, making a total of about 82. Of these, 10 have died on the voyage. Fifteen of those embarked at Hong Kong are from Admiral Hope's squadron. The *Canaan*, also from Hong Kong, bound to Spithead with invalids, was spoken by the *Caduceus* on the 3rd of February, in lat. 0°32' N., long. 19°16' W. The *Caduceus* experienced strong south winds in the China Sea, although late in October, and in the Straits of Banca was much detained, which prolonged the passage to Table Bay. Between Singapore and Table Bay the weather was generally fine, with the exception of a violent rotatory gale for a few hours off the south end of Madagascar. From the Cape to England had very fine weather; the north-east trades blew from a direction unusually northerly, making the ship's track far to the westward. After leaving the trades had fine weather and fresh winds between south-west and west-north-west, with high barometer, until arriving in the Channel. She proceeded on to Gravesend, and landed the troops, who were mostly forwarded to Chatham.

The hired transport *Canaan*, Capt. Wilson, arrived at Spithead with 150 naval invalids on the 13th inst., from Hong Kong, in charge of Lieut. Woodman, R.N., Admiralty agent, and Dr. A. Watson, R.N., surgeon in charge. The greater portion of the invalids are from Admiral Hope's squadron. Dr. Watson states that all the wounded have progressed most favourably, and that only four deaths have occurred during the voyage home. The following officers and passengers have arrived by the *Canaan*:—Mr. H. Ley, master, R.N.; Dr. Charles A. Lees, assist.-surg., R.N., invalided; Mr. W. Bicknell, second master, R.N., ditto; Mr. Powlett, midshipman, R.N., ditto; Mr. Moysey, assist.-engineer, R.N., ditto; Mr. Bertram, assist.-engineer, R.N., ditto; Mr. Mitchell, gunner, R.N., ditto; Mrs. Bampffield, wife of Capt. Bampffield, 1st Royals, two children and servant; Mrs. Bangall, family and servant. The ship sailed from Hong Kong on the 13th of October, 1859, calling at Singapore, Cape of Good Hope, and St. Helena.

Two of Captain Grant's military cooking-wagons have been delivered over to the commandant of Woolwich garrison, Major-General Sir R. Dacres, K.C.B., at the recommendation of the select committee of the Arsenal, with directions from the Minister of War to travel them a distance of 500 miles. One of these wagons is fitted with an ambulating boiler for cooking while troops are on the march, and the other is fitted with a set of the pontoon kettles for cooking in the field. Each wagon is said to be capable of cooking for 800 men, and, as they have been specially constructed and fitted for the purpose of being deposited as patterns in the Royal carriage department in Woolwich Arsenal, they are considered to be good specimens of the excellent work of that establishment. Independently of the facilities afforded for cooking, the consumption of fuel for the ambulating boiler is not one-eighth part of the present Government allowance. Sufficient apparatus upon this principle has been shipped for the service of 5,000 men in China.

The following despatch has been published:—

"Head-quarters, Hong Kong, Jan. 14.

"Sir,—The brigade of Royal Marine Light Infantry having from its reduced numbers been formed, in accordance with instructions, into one battalion, I think it my duty to request you will be pleased to convey to the Lords Commissioners of the Admiralty my sense of the good order, efficiency, and discipline of the two battalions composing the brigade, which reflect credit not only upon Colonel Holloway, C.B., commanding the brigade, and officers commanding, but also upon the officers belonging to the two battalions. The forbearance of the non-commissioned officers and men on and since the capture, and their general extremely good conduct during the two years the allies have occupied the city of Canton, have been most creditable to them as soldiers and to the corps to which they belong, and are deserving of the approbation I have now the honour to express, and which will, I am satisfied, be gratifying to their Lordships. I have the honour to be, Sir, your most obedient servant, C. T. VAN STRAUBENZER, M.G., commanding her Majesty's troops in China."

In consideration of the eminent services of Major-General Sir Hugh Rose, G.C.B., during the late operations in India, Her Majesty has been graciously pleased to promote this distinguished officer to the rank of Lieutenant-General in the army.

The Queen has also been pleased to confer the honour of knighthood upon Francis Leopold McClintock, Captain in the Royal Navy, LL.D.

The present chief of the Mediterranean Fleet, Vice-Admiral Fanshawe, C.B., will, according to a report at Plymouth, succeed to the naval command there on the retirement of Vice-Admiral Sir Barrington Reynolds, K.C.B., whose term of service expires on the 4th of May.

The batch of new gunboats ordered by the Admiralty from private con-

tractors in the autumn of last year, are rapidly approaching completion. The *Torch* is complete in her hull and engines, and has been turned over to the Government to be fitted for sea at Chatham. The *Cormorant* and *Race-horse* have been launched, and are being fitted with engines in the West India Dock, and many of the others are in a state of great forwardness. It is almost certain that by midsummer the whole of the fleet will be ready for service.

Euryalus, 51, screw-frigate, Captain J. W. Tarleton, C.B., having on board His Royal Highness Prince Alfred, arrived at Spithead on the 28th ultimo, from the Mediterranean.

On Monday morning Vice-Admiral of the White Henry William Bruce paid a visit to Admiral Bowles, at the official residence in the Dockyard, Portsmouth. The Rear-Admiral Superintendent and officers belonging to her Majesty's naval service, doing duty at that port, were present, and Admiral Bowles, C.B., introduced them to his successor, Vice-Admiral Bruce, and in the most feeling and courteous manner expressed the gratification he had experienced in presiding over so efficient and gentlemanly a body of officers. The admiral then bade all an affectionate farewell. At noon Vice-Admiral Bruce hoisted his flag, white at the fore, on board the *Excellent*, Captain Hewlett, and saluted the flag of Admiral Bowles with 17 guns, and the compliment was duly returned from the *Victory*.

The launch of the *Hove* was most successfully effected from No. 2 shed at Pembroke dockyard on Wednesday last. From an early hour in the morning the sightseers poured in from the surrounding country. At a few minutes before 9 o'clock Miss Ramsay, daughter of General Ramsay, and niece to Capt. George Ramsay, C.B., Captain-Superintendent of Pembroke dockyard christened the vessel, the dog shores being knocked away, she slid off in a few minutes. Her armament will be as under:—Lower deck, 32 8-inch guns, 65 cwt., 9ft. long; middle deck, 30 8-inch guns, 65 cwt., 9ft. long; main deck, 32 32-pounders, 68 cwt., 9ft. 6in. long; upper deck, 26 32-pounders, 42 cwt., 9ft. long; upper deck, 1 68-pounder pivot, 95 cwt., 10ft. long; total, 121. Her complement of officers and men will be 1,130. Her engines are of 1,000 horse-power, and are made by Messrs. Penn and Son, of Greenwich.

The Channel Fleet, which was ordered to proceed to Lisbon on the 23rd ult., but, in fact, to watch the proceedings of the Spanish fleet off Morocco, consisted of the following vessels, under the command of Rear-Admiral Sir Charles H. Fremantle:—Royal Albert, 121, screw, flag of the commander-in-chief; Queen, 86, screw, Captain C. F. Hillyar; Trafalgar, 90, screw, Captain Fanshawe; Donegal, 101, screw, Captain Broadhead; Algiers, 91, screw, Captain W. D. O'Callaghan; Aboukir, 90, screw, Captain D. Curry; Edgar, 91, screw, flag of Rear-Admiral Erskine; Mersey, 40, screw, Captain Caldwell; and Melpomene, 51, screw, Captain C. J. F. Ewart. The *Diamant*, 32, screw, Captain J. H. Cockburn, which formed part of the fleet as far as Plymouth, put into that port to repair damages sustained by a collision with the Queen, when getting under way at Portsmouth, by which her bowsprit and figure-head were carried away, with other damages, which the dockyard authorities report will take twenty men three weeks to repair.

The Government has presented a number of beautifully executed maps and plates of the Crimean campaign to the non-commissioned officers' library at the Royal Engineer establishment, Brompton-barracks, the whole of the sieges and other operations in which the British forces were engaged being faithfully represented.

The ceremony of laying the foundation-stone of the large memorial which is to be erected at the eastern entrance to Brompton-barracks, to the memory of those officers and men of the Royal Engineers who fell in the Crimea, was performed on Thursday afternoon by his Royal Highness the Duke of Cambridge, in the presence of Sir John Burgoyne, Inspector-General of Fortifications, and nearly the whole of the generals and other officers of the Royal Engineers, and a large concourse of spectators.

Major-General Boomfield has assumed the command of the second Infantry Brigade of the division at Dublin, vice General Cunyngham, C.B., who proceeds to India. Col. Wood, C.B., of the 97th Regiment, will succeed to the command of Colchester garrison.

The experiments with Mr. Whitworth's guns were resumed upon the sands to the right of Southport, when a large number of gentlemen from Manchester, Liverpool, and other places were present. The 3-pounder and 12-pounder were fired at different elevations, which was announced by the recorder of the firing as very satisfactory, especially the 12-pounder. It is stated by the friends of Mr. Whitworth that the Whitworth 80-pound gun has beaten the Armstrong 70-pounder. The shots ricocheted admirably, the average distance at which they rested being fully 6,500 yards, or more than 3,000 yards beyond the first grazes.

Major-General Russell, of the Royal Artillery, and Sir Robert Hill, who commanded the Blues at Waterloo, are among the list of deaths.

Dr. Arnott has been appointed to the *Chesapeake*.

Preparations are being made for the intended distribution of an award for salvage services rendered to the treasure on board the *Ava*, between the 12th March and 26th July, 1858, by the *Chesapeake*.

The Prussian frigate *Thetis*, Captain Jackmann, accompanied by the schooner *Frauenlob*, sailed from Spithead early yesterday morning for China. The *Elbe* transport still remains at Spithead, and is not expected to leave prior to the arrival of the *Arcona* screw frigate from Southampton.

The *Overland Friend of India*, of 8th Feb., just to hand, announces that the orders given for regiments to embark for China are contradicted so often that it is impossible to give any correct account at present. Regiments have been asked to volunteer *en masse*, and there is too good reason to believe that there has been not a little individual coercion and dissatisfaction in consequence. As the term of foreign service of the 47th, 65th, and 70th Native Regiments, now in China, has expired, the men will be allowed to return to Bengal as soon as the Bombay native troops sent to relieve them arrive in Canton.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith. Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

G.—Your informant is quite correct.

J. T.—We will write to our correspondent and ascertain.

T. R.—The required information will be found in this issue.

The service of plate presented to Rear-Admiral Sir Michael Seymour will be on view for two weeks at Messrs. Hunt and Roskell's, New Bond-street.

The "LONDON AND CHINA TELEGRAPH" is published at 3 P.M. on the day of the delivery of the Mails.

We have altered the form of our Commercial and Shipping Intelligence, by placing the portion relating to China and other parts of the Far East, immediately after the "Summary of News."

All applications for Advertisements, Subscriptions, and general business of the Paper to be addressed to the Manager, and not to the Editor. Post-office orders to be made payable at the Strand Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, SATURDAY, MARCH 17, 1860.

THE ELGIN-SEYMOUR CONTROVERSY.

The correspondence on this subject, which has been published, extends over forty-five folios, and is consequently quite out of the limits of our journal. A large portion of the same is between Lord Elgin, Count Poutiatine, and Mr. Reed, and does not in any way affect the questions at issue. We are at a loss to discover why they are introduced, for they simply give a guarded and feeble acquiescence to the proposals of Lord Elgin, who decided that if Admiral Seymour had furnished him with gun-boats at the end of March, the Four Powers could have steamed quietly past the Taku forts to Tien-tsin, but that the delay to May had lessened those chances; in fact, as his secretary lately described it, "the golden opportunity was lost." Admiral Seymour hesitated—in fact, he declined to enter on such a risk—and in this he was fully supported by the French Admiral de Genouilly, with whom he appears to have acted most cordially throughout; indeed, they may be said to have most religiously stuck to their cloth, and resented the encroachments of the Plenipotentiaries on their powers, or rather their serious responsibilities to their respective Governments. After various consultations and correspondence between the 26th of April and 18th of May, it was finally decided at a conference held on board the French frigate *Audacieuse*, that the allied admirals should take the Taku forts as a preliminary step. This they considered to be a *sine qua non*, and with what facility they afterwards conveyed the ambassadors to Tien-tsin is well known. We are not alone when we say that the decision of the admirals was the correct one. Lord Elgin may be a very good diplomatist, but we trust the experience he now possesses will preserve him from attempting a similar interference with the military part of any expedition he may be intrusted with. What would have been the position of Admiral Seymour had he acted on the suggestions of Lord Elgin and failed?—could he have met his superiors at the Admiralty? Unquestionably he would have been a ruined man, and we think the public must agree with his course of action, which was, to take and destroy the forts before attempting to convey the Ambassador and his suite past them. It seems that throughout this transaction Admiral Seymour acted with the same prudence which had secured him success on all his operations in the South, and we cannot too strongly condemn the course pursued by Lord Elgin in permitting his secretary, Mr. Oliphant, to publish this part of the expedition, and we trust some steps will be taken by Government, to prevent the recurrence of such scenes as have been witnessed in our Houses of Parliament in consequence of such publicity. Notwithstanding that Admiral Seymour was the aggrieved party, we have the highest authority for stating that he would not have in any way made public the disagreement. Like a proper servant of the Crown, and studying his interests and not his own, he was content with the investigation and decision made by the Admiralty on the subject. We may conclude by stating that any attempt to revive the matter in Parliament will be put down. The following letter has been published from Lord Elgin to Mr. Oliphant:—

"My dear Oliphant,—As I see that you are blamed for some statements in your narrative of my mission to China and Japan, I think it due to you to state that I was cognisant of your intention to write that book, and that my advice to you was, that

you should give to the public the fullest information on all topics of general interest, and that when you were compelled to touch on political points, you should confine yourself strictly to what had been made public in the despatches already submitted to Parliament, abstaining from reference to matters with which you were acquainted only through the confidential relations in which you stood to me. Having seen your work, both in proof and in a published form, I am bound to say that I think you have adhered very faithfully to this rule.

"The best evidence of the care with which you conformed to my advice will be furnished by a comparison of your work with the papers which have lately been submitted to Parliament.

"Yours very truly,

(Signed)

"ELGIN AND KINCARDINE."

The following is an extract from Lord Elgin's despatch, showing his views in reference to proceeding up the river Peiho, We may observe that in extracting this, and the Admiral's reply, we give the essence of the 45 folios. The Admiral, in another despatch, gives it as his opinion also, that he could not sooner despatch the fleet against the monsoon; even as it was the gales were hard enough to carry away the mainyard of the *Calcutta*, and the powerful steamer *Yang-tze*, we remember, at the same time had to put back to Foo-chow, when near Gutzlaff.

"My mode of proceeding would, therefore, have been this: I should have moved into the river with the English gunboats, and having passed the forts, I should have waited until the French, Russian, and American Plenipotentiaries joined me, with such vessels as they could collect. We should have proceeded then in a body towards Tien-tsin. If the Chinese had attempted to obstruct our progress, they must have compromised themselves with the United States and Russia, as well as with England and France; for the four powers would have been, as regarded the matter in hand, physically and morally inseparable—physically in their conjoint movement up the river, and morally in respect of any cause of offence which might have been thereby given to the Chinese Government. The probability is, however, that no such attempt would have been made, and that before the end of last month a powerful fleet, carrying the flags of the four great maritime nations, would have been collected in the vicinity of Tien-tsin, in a position to arrest, if it were deemed advisable to do so, the passage of the junks carrying grain to the capital, and to enable the Plenipotentiaries to command the respectful attention of the advisers of the Emperor of China for the demands which they had to prefer on behalf of their respective Governments. I have considered it necessary to make this statement, in order that your Lordship may be able to appreciate correctly the situation in which I have since that time found myself, and to pass, with full knowledge of the facts, judgment on the course which I have followed. I have only to add, in conclusion, that the above-mentioned combination failed, because Admiral Seymour neglected to furnish the force, 'especially of gunboats drawing little water,' for which I had applied before I left Hong Kong for Shanghai, and which I understood him to have promised."

Sir Michael Seymour says in regard to this:—

"I have had two years' experience in Chinese warfare, and anyone who has been long in China will bear me out in the assertion, that nothing but the conclusive evidence of irresistible force will ever fully satisfy the Imperial Government. I consider, therefore, as stated in my despatch reporting the operations at the Peiho, that the Chinese having been allowed time to fortify their position, and being confident of their strength, the capture of the forts under such circumstances would have a greater moral effect on the Imperial Government than if we had attacked them when less prepared. Subsequent events fully bore out my opinion. It was ascertained that guns from Tien-tsin, and even from Peking, had been conveyed to the forts at Taku, and that all the available military force was also assembled there. At one blow, therefore, the whole of their guns were captured, and their army driven like a scattered rabble into the surrounding country, to spread everywhere the reports of our invincibility, and the destructive and terrific missiles we made use of. To this brilliant and complete success I attribute our total exemption from annoyance while at Tien-tsin, and the conclusion of a treaty within a month after which may be said to open the whole of China to the world, and which may in a few years develop a field for commercial enterprise of which we have at present no conception."

RUSSIA ON THE PACIFIC.

So little is known by the general public of the commercial resources and capabilities of the dominions of Russia in Asia and America, and it is so seldom that anything respecting the extent and nature of their trade in the far East is permitted to transpire, notwithstanding the recent relaxation of the hitherto rigidly enforced censorship, and [the present comparative freedom of the press in that empire, that we sincerely rejoice to find ourselves in a position to lay before our readers some interesting facts connected with the subject, and to give them some account of the trade of those distant and generally supposed inhospitable regions, derived from the latest and most authentic sources. When we consider for a moment the gigantic extent of the Russian dominions, stretching away to the eastward through one-half the continent of Europe, the whole of Asia, and a good part of America, till stopped by the British frontiers of the newly created colony of British Columbia; when we consider that this immense tract is not separated,

like our own foreign possessions, from us, and from each other, by many large intervening countries and seas, but extends in one unbroken stretch for more than 200 degrees of longitude,* with only one single break in the continuity of land, scarcely worth mentioning in connection with the thousands of miles in question—for the Behring Straits are not wider than the Straits of Dover—in the absence of railways, and even of roads of any description, across the rugged mountains of the Ural, and over the boundless uncultivated steppes of Siberia, with only here and there a little town or large village, “like angels’ visits few and far between,” where the electric wire is unknown, and indeed unheard of, by the nomadic tribes, rusticating in their primitive innocence; where the waters of the North Pacific Ocean have scarcely ever been ploughed up by the noisy steamer, nor the purity of its atmosphere destroyed by dense columns of black smoke, issuing from begrimed funnels and settling into a dark bank of cloud on the horizon; when we consider these drawbacks we shall not be surprised to find the following account refers to the events of 1858, though only just received in this country.

“We have been favoured with a copy of the report of the Russian American Trading Company, showing the result of their transactions in the above-mentioned year (1858), and circulated amongst the shareholders for their information, on the state of the company’s affairs. The report commences with a financial statement, and gives a balance-sheet of their income and expenditure, congratulating the shareholders on the steady increase and favourable prospects of their commercial operations.

The receipts of the year are stated as follows:—

	Silver Roubles	Cop.
Sale of furs and tea, ...	743,543	89
„ other articles	333,664	99
Total.....	1,077,208	88

The expenditure of the company during the year is thus classified:—

	Silver Roubles	Cop.
Salaries of officers administering the affairs of the company	157,974	37
Transit dues on furs and tea, customs duties, insurance on goods, and other expenses	444,062	93
For the defence of the colonies	309,775	18
Dividend of 20 roubles per share	149,680	00
Added to the reserve capital	14,968	00
„ „ pension and widows’ fund	748	40
Total	1,077,208	88

The furs and other articles of the chase obtained during the hunting season of 1858 were exported from the colony to Ayan by the company’s own steamer *Grand-duke Constantine*, and forwarded in the usual way through Siberia. A part of the furs suited for the China market was left at Irkutsk, to be sent up to Kiachta, in order to barter it for tea, whilst the rest was forwarded on sledges to St. Petersburg for sale; besides which, a valuable cargo of walrus’ teeth, sea-cats’ skins, and castoreum was shipped at New Archangel for St. Petersburg, by the ocean route, on board the company’s clipper *Kamtschatka*. The quantity of sea-beavers exported in 1858 was not so large as in previous years, when the large stocks that had accumulated during the late war were shipped off, but the skins of foxes of all sorts and of the lynx were double the number of those exported in 1857. The take of stone-foxes and river-beavers amounted to a fair average, and were sent as usual to New York for sale, where they are in great request; but a trial parcel of sea-cats, white foxes, and sea-beavers, sent in the same vessel, proved an unfortunate adventure, and will not be repeated, as they always command a ready sale at remunerative prices in the Russian home market, as well as at Kiachta, for consumption in China. This fur trade appears to have reached a very respectable development, for in one part of the report we find the exports of 1858 classified as follows:—Sea-beavers, 909; young Kamtschatka beavers, 117; young bears, 100; 4,140 foxes, of which 365 dark brown, 856 blackish-grey, and 2,919 red; stone-foxes, 2,245; sea-cats, 5,000; river beavers, 2,000; otters, 1,087; lynxes, 213; making a total of 15,811 skins,

* The Russian empire extends from the confines of Prussia in about 20 deg. east longitude, round by the east to the frontiers of British Columbia, in North America, situate 132 deg. west of Greenwich, and consequently stretches over no less than 208 deg. of longitude, being considerably more than one-half of the circumference of the globe. Even in those high latitudes the absolute distance of the two extreme points from each other is about ten thousand miles.

and 1,126 beavers’ tails. All these were sent to Siberia; 8,295 furs and the beavers’ tails were sent to Kiachta to barter for tea, and the remaining 7,516 furs overland to St. Petersburg; whilst the exports by ocean route were 20,664 sea-cats, 139 bears, 295lbs. castoreum, 11,273lbs. walrus’ teeth, and lastly, to New York, 12,839 sea-cats, 4,004 river-beavers, and 544 white stone-foxes. In addition to the above the chase on the Amoor produced 2,250 sables, which were sent exclusively to St. Petersburg.

The company’s tea trade during the year was accompanied by the most favourable results, for the furs and beavers’ tails were all immediately sold, or rather bartered, for no less than 2,198 bales of tea. The quality of the gunpowder tea offered by the Chinese was inferior, both in quality and quantity, to that of the preceding year, and the company were consequently only able to obtain 387 chests of it. The very unsatisfactory quality of this description of tea was ascribed to the leaves having been gathered too late in the season. From Shanghai the company imported 4,943 chests of tea, 3,823 of which were sent on consignment to Hamburg, by their own ship the *Cesarowitsch*, and, being of very good quality, were sold by the company’s agent there at very remunerative prices. Besides the above furs, the produce of the chase of 1858, the following articles of fur, proceeding from previous years, were sold at Kiachta:—360 sea-beavers, 40 young Kamtschatka beavers, 7,212 sea-cats, 3,772 river-beavers, 915 otters, 485 white stone-foxes, and 112 lynxes; total, 14,896 furs and skins together, 3,748 tails of different animals, and 4,657 bears’ paws. All these were bartered at Kiachta for 2,335 chests of tea of different descriptions, about one-half of which had been realised, and the rest was in the market at the company’s depots at St. Petersburg and Moscow. Besides the cargo of tea sent to Hamburg by the *Cesarowitsch*, the company consigned 1,120 chests to London by the ship *Anna*, which were also sold at very satisfactory prices.

It may not be irrelevant to the subject to say a few words here relative to the origin of the Russian American Company, and the discovery of what is now known as Russian America, which was more the work of chance than scientific exploration. About the year 1775 some Russian adventurers, with more spirit of enterprise than scruples of conscience, had discovered the Aleutic (or Fox) Islands, and realised considerable wealth in trading with the native islanders, whom they treated with overbearing pride and great cruelty. It was in consequence of complaints that reached St. Petersburg about that time that the Empress Catharine II., in a letter dated March 2, 1776, to General Tschitscherine, then Governor of Siberia, instructed him “to recommend the merchants trading with those newly-acquired islands to treat the natives, their new brothers, with an affable and conciliatory spirit, and to be careful not to injure them by fraudulent dealings or vexatious exactions.” Deeply impressed with sympathy for these “new brothers,” Gregory Schelekoff, an enterprising young merchant, conceived the idea of joining with others to trade with the natives of these distant regions, and, his proposal receiving ready support, he fitted out, at their joint expense, three vessels, with which he sailed, on the 16th August, 1783, from the mouth of the river Ourak, in the Sea of Okhotsk. After passing the first island of the Kurile group all in company, they were separated on the 12th September by a heavy gale, which lasted twenty-four hours, and after being in great danger they eventually succeeded in meeting again at Behring’s Island, the appointed place of rendezvous. There they repaired damages and passed the winter, and in the ensuing summer continued their voyage, and arrived on the 21st June at the island of Kyktak or Kodiack. Their first reception on the part of the natives was anything but favourable, and they were obliged to use force to effect a landing, but Schelekoff managed to conciliate them in a very short time, and, having thrown up some entrenchments to secure himself and his followers from any sudden attack, hoisted the Russian standard and took formal possession of the island and adjacent territory in the name of the Empress Catharine. The successful results of this undertaking awakened the jealousy of other adventurers, who got up a rival company for the purpose of driving away the original colonists; but instead of a meeting in arms, at Schelekoff’s suggestion the two bands of adventurers made common cause and merged into one trading company, which was placed the following year under the immediate protection of the Empress, and received the name of the Russian-American Company in virtue of the Imperial Ukase, dated July 8, 1799. The company’s territory extends over the north-

west portions of the American continent as far as the British possessions and the country of the Esquimaux, and includes the numerous islands to this northern Archipelago as far east as Japan. Their trading capital amounts to seven millions and a-half of silver roubles, in 7,500 shares of 100 roubles each. In the course of time sixteen shares have become lost or forfeited, and we have shown by the above financial report that they pay twenty silver roubles each share annually, which is equal to twenty per cent. Their principal establishment is at New Archangel, on Sitka Island.

LORD ELGIN'S SECOND MISSION.—We have good grounds for confirming the statement in our last, that his lordship will proceed by the next mail. It is believed Mr. Oliphant will accompany his lordship. Baron Gros will also proceed as French ambassador, and Lord Elgin is now in Paris arranging the intended mission. It is reported that the Emperor is more pacific in his intentions than the following extract from his late speech implies:—"As regards China, a serious expedition, combined with the forces of Great Britain, will inflict on her the chastisement of her perfidy."

MR. TARRANT'S CASE.—This case has been brought forward in Parliament by Mr. E. James, and by the answer given by Mr. Fortescue, it is presumed that Mr. Tarrant will be released at the expiration of six months. Considerable anxiety exists among the friends of Mr. Tarrant here in consequence of the non receipt of letters from him for four mails.

SINGAPORE.—Sir Charles Wood, in reply to a question put by Mr. Gregson, stated that no objection existed to the transfer of that settlement to the Colonial-office. It only remains now for the Duke of Newcastle to accept of the same, which, it appears, he is at least tardy in doing, and we trust, for the interest of the settlement, he will decline it, and that the final resolve will be to put it under the Indian Government here *not* at Calcutta.

COOLIE EMIGRATION.—The importation of Chinese at Cuba is to stop on the 31st Dec. next. A petition from California has been presented at Washington, signed by 100,000 citizens, against the further introduction of Chinese.

NEW ROUTE TO CHINA.—A project is announced for a road between Pegu and China.

JAPAN.—Mr. Alcock's despatch to Lord J. Russell has been published. The Supreme Court at Hong Kong has been empowered to adjudicate on cases originating in Japan.

RETURN OF THE RUSSIAN AMBASSADOR.—General Count Mourawieff Amoursky, Governor-General of Eastern Siberia, has arrived in the Russian capital from a journey which he had made to China and Japan, with the ratifications of the treaty between the Court of Peking for the cession of territory situated in Mongolia, on the banks of the Amoor.

EASTERN ARCHIPELAGO COMPANY.—Arrangements are being made to work the company's coal mines at Labuan on a large scale.

CHINESE AT FRASER RIVER.—It has been announced that the Chinese were likely to get the principal benefits of the mines. They were arriving in large numbers, and while others were grumbling and hesitating, and in too many cases drinking and gambling, the Chinese were proceeding at once to the mines.

CHINESE INGENUITY.—Some ingeniously-made gold eagles were in circulation at New York. The eagle is split, and the vacancy filled with a white base metal. It is stated that the white metal is known to the Chinese. It is supposed that they emanate from the Chinese quarters of San Francisco, California, where many counterfeit gold coins are in circulation, all of which are well executed, and taken in the California Branch Mint. This metal, like the gong metal, is still a secret with the Chinese.

HONG KONG APPOINTMENTS.—In reference to the announcement which we make elsewhere of the pension granted to Mr. Chief Justice Hulme, we are enabled to state that it has not yet been decided on whom the vacant appointment shall be conferred. The applications of Mr. Mercer, the colonial secretary, and Mr. Mitchell, the acting chief magistrate, for pensions, also have not been determined.

SIR JAMES BROOKE.—We understand the total amount realised by subscription for this gentleman amounted to £9,000. His health is still very indifferent, and Captain Brooke has proceeded to Borneo as chief of the Sarawak Government, and representative of Sir James. All efforts to induce the British Government to purchase the settlement are now relinquished.

THE STEAMERS "IMPERADOR" AND "IMPERATRIZ."—These vessels, the property of Messrs. Newall and Co., the Electric Cable contractors, have completed the laying of the Red Sea cable, and the *Imperador* returns to England at once. The *Imperatriz* had been offered a charter to convey troops to China.

THE FRENCH COOLIE TRADE.—The following remarks are from the *Times*, on the discussion which took place in the House of Lords on Coolie emigration from India to France.—"The transfer of men and women from a land where population is in excess to a land where it is deficient is a proceeding so comprehensively beneficial that to impede it would be to injure one of the greatest interests of humanity. That precaution should be adopted to insure the Coolies as good terms as can be obtained is certainly proper, nor can we quarrel with the sentiments on which Lord Elborough's objections were based. We only say this,—that, considering the actual position of the Coolie in India, and his prospective position as a well-paid labourer in a French colony, it would, in reality, be false philanthropy to oppose any barrier to his emigration."

MEETING ON CHINA.—A meeting was held in the Town Hall, Birmingham, on the 28th ult., to consider the propriety of petitioning Parliament in reference to the impending war with China, with a view to the settlement of the present difficulty without further bloodshed. About eight or nine hundred persons were present. The chair was taken by Alderman Baldwin. Resolutions were passed reprobating the conduct of Mr. Bruce, declaring that the circumstances of the dispute furnish no sufficient ground for further hostilities, and calling on the Government forthwith to make choice of a plenipotentiary of reliable experience and of conciliatory temper and judgment. A memorial to the Queen, and petitions to both Houses of Parliament, were also adopted.

THE CHIEF JUSTICESHIP OF CEYLON.—The friends of Mr. Paul Ivy Stirling will be disappointed at the appointment of Mr. Creasy as Chief Justice of Ceylon. Mr. Stirling has been for many years Attorney-General at that island and Hong Kong previously.

DR. MACGOWAN ON JAPAN.—This gentleman has been lecturing at Willis's Rooms, St. James's, with the Earl of Shaftesbury in the chair. The subjects touched upon have been similar to those lately given by him in Scotland, which we have noticed from time to time. These lectures are illustrated by drawings and various articles of Japanese use, and will be found very interesting even to those who have visited that country, and especially to the general public. The doctor delivers one of a series to day, at Willis's-rooms, and, we understand, will continue them at various parts of the metropolis, previous to embarking for his native land, the United States.

THE SUPREME COURT AT HONG KONG.—The *Gazette* of the 2nd March notifies that the Queen has been pleased to direct letters patent to be passed under the great seal of the United Kingdom, for investing the Supreme Court of Hong Kong with appellate jurisdiction in cases of civil suits between British subjects heard and determined under the authority of her Majesty's Order in Council of 3rd of March, 1859, by British consuls within the dominions of the Emperor of Japan.

THE PENINSULAR AND ORIENTAL COMPANY'S MAIL CONTRACTS.—As already announced, the mail packets between Suez and Sydney will in future call at Point de Galle instead of St. Louis (Mauritius), commencing with the packet of the 12th inst., and *via* Marseilles on the 18th. Mails for Ceylon can be forwarded by these opportunities.

CHIEF JUSTICE HULME.—We have much pleasure in announcing that Mr. Hulme, for twelve years Chief Justice of Hong Kong, has been pensioned by Government on half-pay (£1,500 per annum). We trust his successor, who we doubt not will be Mr. Adams, who at present holds the acting appointment, will discharge the duties with the same satisfaction to the community as Judge Hulme. Throughout his career he has ever advocated the interests of the colonists, and was foremost in checking any encroachments of Government. This conduct, on one occasion, indirectly caused his suspension, but he very wisely put himself on board the mail steamer carrying home the charges against him, and, if report be true, was simply informed by the Secretary of State for the Colonies that he was re-instated, and accordingly he returned at once to his post, and so strong was the feeling that the principal streets were illuminated. His decisions were tempered always more by the merits than the law of the case, but we think he can challenge a comparison of his decisions for legal correctness also—at least we only know of one or two exceptions. We regret he could not be aware of his pension before leaving Hong Kong, as his retirement would have been marked by the community in a suitable address and testimonial, somewhat similar to that of Admiral Seymour. We sincerely hope he will live long to enjoy what he has undergone so many risks and privations to secure. Many of the residents in Hong Kong will regret the loss of his society, but will consider him better here than taking his daily walks in the "Happy Valley," with his "belt and revolver," during the reign of terror established by Commissioner Yeh. He always looked so perfect an English gentleman in these excursions.

A NEW ROUTE TO CHINA.—The *Times* has the following:—"A new opening to China, which might, it is alleged, be effected at small expense and with little difficulty, and which, while it would save about 1,500 miles in distance, would bring us into communication with certain rich provinces of that empire containing a population of 80,000,000, is being actively urged on the consideration of the Government. Among our Indian possessions none have made more rapid strides than the province of Pegu, and its chief port, Rangoon, promises to constitute at some future day an emporium in the far east of those possessions that will rival the prosperity anticipated from Kurrachee in the west. The distance from Rangoon to the south-western provinces of China is only 500 miles, and the plan is to make a road of that length. Two hundred and fifty miles of it would be through our own territory, to the Burmese frontier, and the remaining 250 would be across Burmah to the Chinese city of Esmok. It could be either a bullock-road, a tramroad, or a railroad, as economy or expediency might in the first instance dictate. According to the views of the Rangoon merchants and other persons of experience with whom the scheme has originated, the entire work would be simple. The Burmese Government are friendly, and it is alleged that the special authorities of the

district through which the road would pass, are cordially desirous of promoting not only a transit commerce with China, but also a direct increase of intercourse with our people. The country, also, is affirmed to be free from difficulties, to be highly favourable to health, and to possess abundant resources. Assuming these statements to be correct, it would seem marvellous if we were to delay acting upon them, and, even if it should prove that objections and obstacles have been overlooked, it is scarcely probable that they can be insurmountable. A great point in connection with the matter is, that the portion of China which would be placed in connection with us is one which, although reputed to be extraordinarily rich, and to be carrying on by roads, rivers, and canals, a most active inland trade, is at present shut out from all exterior commerce, and destined to remain in that condition unless the proposed work be executed, or the French succeed in effecting a transit to it through Cochin China. Hence there is every reason to induce the Government to undertake, at all events, a careful examination of the suggestion. The movements of Russia to obtain complete control over the inland operations of China in the north have apparently been as successful as they have been vigorous and adroit, and it would be well at least that we should not remain dormant while superior means are open to us in the south.

TESTIMONIAL PRESENTED TO H. E. REAR-ADMIRAL SIR MICHAEL SEYMOUR, G.C.B.—We have already noticed, in a previous issue, that in March of last year the British and foreign merchants and chief inhabitants of Hong Kong determined to present Sir M. Seymour, the admiral commanding the East India and China station, with a testimonial of the esteem in which they held him, and of the sense they had of the services which he had rendered them during a period of unprecedented difficulty and trouble. In an address to Sir Michael they thanked him for his services, and intimated that they had transmitted to Europe £2,000, to be expended in a testimonial, the choice of which was left entirely to him. The fruit of this was to be seen during the last few days at Messrs. Hunt and Roskell's, of New Bond-street, the silversmiths chosen by Sir Michael to carry out the design. The testimonial consists of about forty pieces of plate, of which seven may be said to be the principal. The chief of these is a centre piece, consisting of a handsome shaft, rising from a base, on which are views of Peking, Canton, and Victoria, Hong Kong, and the inscription. Above this are pedestals for four figures, representing China, Great Britain, Commerce, and Navigation, the latter accompanied by symbols of naval power. The ornament of the shaft is Chinese, combining the tea plant, sweet orange, and other indigenous plants. Dividing the compartments of the base are four Chinese dragons, and around the base of the two larger candelabra, for seven lights each, the symbol of China is also to be seen. There are also two simpler candelabra for five lights, two soup tureens, a large waiter engraved with inscription and the arms of Sir Michael, two dessert stands, sauce boats, domed covers, &c., all in silver. The testimonial presents a splendid *ensemble*, and is worthy both of the donors and the recipient. It has been designed throughout by Mr. Thomas Brown, an artist attached for many years to Messrs. Hunt and Roskell's establishment. The inscription is as follows:—"Presented to H. E. Rear-Admiral Seymour, K.C.B., commander-in-Chief of H.M. naval forces on the East India and China Station, by the British mercantile community of Hong Kong, in testimony of their sense of his distinguished services during the three eventful and anxious years of his command, as well as of their heartfelt esteem and regard for his private worth, March, 1859." Mr. Thomas Dent, Mr. T. A. Gibb, and others, made the formal presentation.

NAGASAKI, JAPAN.—The following is from the pen of an officer of the U. S. ship *Porkattan*:—"The *Porkattan* (he says) was the second American ship which entered the port of Nagasaki, no English, French, or Russian flag having floated there before. At that time a few Japanese junks, a small Government steamer, a Dutch ship from Batavia, and a Chinese junk were the only shipping in the harbour; but on his return there were a hundred Japanese junks and about twenty foreign merchantmen at anchor there. The merchants who reached Nagasaki first were making great profits, and they sought to keep the trade in their own hands by refusing to give strangers any information respecting it. The 'stars and stripes' were floating from a tall flag-staff, indicating the residence of the American Consul, Mr. Walsh. Three American houses were already established there. A quarter had been assigned to the Americans just outside the city, and was commodiously situated for the anchoring of vessels and the discharge of goods. A wharf was being constructed, the wall being carried out a good distance into the bay, and the Custom-house being located only a few rods in the rear. On the opposite side of a small creek floated the old Cross of St. George, and from the very spot where tens of thousands were martyred, and where, till within three years, the cross was annually trampled under foot by an imperial edict, which had been in force for nearly two centuries and a half. The British consulate, a new and handsome edifice, had once been a Buddhist temple. Near it was another house, embowered in trees, which was occupied by the agent of the Oriental and Peninsular Mail Line of Steamers, which connects Japan with Suez, in Egypt, and thus with Europe, England, and the United States. A steamer connected with the same line runs once a month between Shanghai and Nagasaki, which also carries a mail, as well as merchandise and passengers, the latter paying only 150 dol. for a two days' passage. The Dutch settlement at Desima had been almost destroyed by fire, and was rebuilt in better style and with more liberal design, some of the houses and stores being allowed to be occupied by merchants of other nations. Only one or two Dutch vessels were in port, and those looked dismal and decayed by the side of others, larger, newer, and of better construction, which seemed to share in the life, energy, and enterprise of those who owned and manned them. The little island of Desima, where the Dutch are located, is only forty or fifty rods long, by about twenty or thirty broad; it is surrounded by a high wall and gates, and connected with the town by a solitary bridge, always guarded by soldiers, even when the gates are closed and barred at night. This place had been the goal of a handful of Dutchmen for more than two centuries; the only representatives during that period of European civilisation in that distant land, and where they had lived in such a state of licentiousness and degradation that even now, when the subject of Christianity is named to the Japanese of Nagasaki, they point to the Dutchmen who have lived there for ages, and say, if they renounced their own religion, and embraced Chris-

tianity, they would become as immoral and vile as they. But with their gains, they have lost all prestige and influence, and never can recover them now that the Japanese discover how grossly they have been deceived. The square appropriated to the Russian bazaar had become a solitude. The goods had been carried away and scattered in stores over the city. The owners and sellers (whose smiles and salutations—'Ohio!—Good morning! How do you do? and invitation to trade, 'Avatta!—Look here! made business so pleasant) were all gone. An English house in Hong Kong had hired all the ground and the buildings."

PRESENTATION OF THE FREEDOM OF THE CITY OF LONDON TO THE EARL OF ELGIN.—The following is a description of the gold box presented to his lordship with the freedom of the City on the 1st inst.:—"The gold box was placed on a table beneath a glass shade, and attracted universal notice from the beauty of its design and brilliancy of its execution, being made of eighteen carat gold, covered with bouquets of flowers, intermixed with elaborate piercings, and surmounted by three figures, viz., that of Britannia, in the centre, with a Chinese upon her right hand and a Japanese upon her left hand, in the costumes of their respective countries. As a whole, connoisseurs have pronounced this box to be one of the finest works of art in gold ever produced in England, or indeed in the world. His lordship, in reply to the address of the Lord Mayor, who complimented him on his missions to Canada, China, and Japan, said—My lord, ladies, and gentlemen, allow me in answer to that enthusiastic applause with which you have received me in the presence of my son, to express a hope to assure him how well, how kindly, and how generously the citizens of London know how to reward those who do their best to serve their country. (Hear, hear.) It is altogether out of my power to find words to express what I feel, for I have always considered the favour and approbation of the authorities and corporation of this great city one of the greatest rewards to which a public man can aspire. (Hear, hear.) I need hardly say, then, that I receive this beautiful casket, with the document which it contains, as one of the most precious memorials of my public life, or that I can hardly claim such a token of your esteem, or deserve the flattering terms in which the City Chamberlain has complimented me, pleased as I feel. And I am bound to state that my feeling of gratitude is not without alloy, and that one portion of my public services which has been referred to, owing to the circumstances of the present time, contrasts unfavourably with the circumstances of the time when the vote of the corporation was taken, of which this ceremonial is the result. I cannot but feel that the freedom of the City of London was voted, not alone because I was Governor of Canada and of Jamaica at important periods, but that my subsequent career is embraced in the vote. (Hear, hear.) In Canada I was principally engaged in establishing that principle of colonial self-government, in trying an experiment, the success of which, I am bold to say, set at rest all perplexing doubts connected with the self-government of colonies, and which has bound the colonies to the mother country by ties far stronger and more durable than any that could be created by the rule of coercion. I shall always look back with pleasure and gratification to that part of my public career connected with Canada, a career in which I devoted my energies to the establishment of a wide franchise, the promotion of education, the extension of trade and commerce, and the creation in that colony of a fitting home for freeborn Englishmen. (Loud cheers.) And I brought to bear upon that work, whatever might be my other merits, at least one qualification—a profound belief in the loyalty and capacity for self-government which characterise the people of our country in all parts of the world. (Cheers.) But I know that the freedom of this City is not conferred upon me only because I occupied that important position at an important period in the history of Canada, nor only because of the part I took in the conclusion of the treaty of Washington, to which the City Chamberlain has referred, but I may remind you that when I went to Washington a British Admiral and an American Commodore were sailing on the coast, with instructions founded upon opposite conclusions, and that a single indiscreet act upon the part of one or the other of those two naval officers might have brought on a conflict which would have involved us in all the horrors of war. (Hear.) With regard to the treaty of Washington there has been a good deal of talk lately about reciprocity treaties, and I may say that if all such treaties work so satisfactorily as that between Great Britain and the United States I think we shall not have much reason to complain of reciprocity treaties. (Cheers.) I happened to meet Mr. Buchanan, then ambassador here, but now president of the United States, about two years after the conclusion of that treaty, walking in Hyde-park, and said to him, "I hear, Mr. Buchanan, by the reports of the Chamber of Commerce at New York, that the trade under the treaty has troubled." (Hear, hear.) He said, "Oh, that isn't what I hear; I hear it has quintupled—(cheers)—so that that treaty has not acted prejudicially at all events. (Hear, hear.) But it was not for this only that you have conferred the freedom of the City; nor merely because I concluded a treaty for opening to commerce the kingdom of Japan; but it was, I know, because it was hoped and believed that the treaty which had been entered into with the authorities of the Chinese empire would be the forerunner of a peaceful and prosperous trade with that empire of 400,000,000 people. (Cheers.) Gentlemen, I do not yet abandon that hope. (Cheers.) On the contrary, I have a firm conviction that it will be fulfilled at no distant period. (Renewed cheers.) But I cannot deny that a great calamity has happened to prostrate it for the present—although even that calamity was marked by circumstances which rank it among the great deeds of heroism. (Cheers.) But while I express my conviction that by this calamity and its attendant consequences the fulfilment of our hope is but deferred, I confess that the impression which that calamity and its consequences produced on me was so painful, that when I was honoured with an invitation from the Lord Mayor to attend on this occasion, my first impulse was to request that the ceremony might be deferred until the treaty of Tientsin had been ratified. But, upon second thoughts, and from the way in which you have received me, I thought that it would be both more manly in myself and more respectful to this court to come forward at once, cast myself on your kindness, and find in your generous forbearance an encouragement to more successful efforts in time to come. (Loud cheers.) This is the spirit in which I present myself to-day to be the recipient of your bounty, and I accept the honour you have conferred upon me with the determination and the hope that for the time to come, wherever I may be, and under whatever circumstances I may be placed, my conduct may give you the assurance that I am not unworthy of

it. (Loud cheers.) It was then ordered that the address of the Chamberlain and the reply of the noble earl should be entered upon the journals of the court; and the earl, after shaking hands with the Lord Mayor, aldermen, and many of the commoners, withdrew. The court then broke up.

Laurence Oliphant, Esq., has been "Gazetted" as Captain to the West Middlesex Rifle Corps.

A gigantic salamander of Japan is being exhibited at the Zoological Gardens. It inhabits the lakes of the basaltic mountains of Japan, where it was discovered by Dr. von Siebold.

A return was made on the 2nd inst. which shows that 49,000 ounces weight of letters, and 492,000 ounces weight of papers, were transmitted to China in one year. The total quantity to India, Ceylon, China, and Australia, was 15,779,000 ounces.

The Siamese Twins are still living in Surrey Co., North Carolina. At a late revival the wife of Chang was baptised. Chang and Eng seemed to be much concerned for themselves, and requested an interest in the prayers of the minister.

It is announced by telegraph that two American barks sailed from San Francisco for Japan on Dec. 24, to obtain cargoes of fancy goods and other productions of that country, such as have recently sold in California at enormous profits, and we are informed that some skilful designers accompanied these vessels with the purpose of furnishing Japanese mechanics or artists with models after which to manufacture articles better designed for the American market, the object being to get the advantage of Japanese skill in execution for the manufacture of articles of furniture, &c., after plans designed by Americans.

The Royal Asiatic Society has sent a number of valuable Chinese publications to New York, which have excited much attention. The works were printed at Shanghai, in the office of the *North China Herald*, and No. 1 of the series is the first publication ever issued in the north of China, and, besides being a curiosity in its way, contains articles of great research, and of particular interest to Oriental scholars. Prof. Agassiz, Prof. Jewett (for Public Library), Dr. Dana (Academy of Arts and Sciences), various Salem institutions, Harvard College, and numerous individuals interested in such matters, have purchased copies, finding them works of rare value.

SIR JOHN BOWRING AT LEEDS.

Sir John Bowring, LL.D., F.R.S., on the 21st ult., attended a special meeting of the Leeds Chamber of Commerce for the purpose of making some observations on the commercial treaty with France, &c. Sir John said that in 1831 or 1832 Lord Clarendon and himself were appointed commissioners to endeavour to induce the French Government to make some reductions in their tariff, but the powers of monopoly prevailed. Since then, however, a generation has passed away, and Bastiat had destroyed the exclusive and protective system. Men like Leon Faucher, Chevalier, and Walewski, had formed another school of political economists, who had been exerting far greater influence upon the country than a few French colonels, desirous of using exciting language towards England. They had prepared the mind of France to a considerable extent for the adoption of free trade. Under the old regime, any proposition to make important changes in the tariff of the country would have been sure to have met with the opposition of the House of Representatives, but the present Emperor had obtained the power to make such changes regardless of their opposition. After expressing his conviction that the revenue of France would be increased by the adoption of free-trade principles, Sir John alluded to an allegation made by Mr. Disraeli and others in the House of Commons, to the effect that really nothing had been gained by this treaty, inasmuch as the Emperor had previously engaged to put an end to monopoly in 1861. The Emperor had made no such promise, and it was unjust that Mr. Cobden's exertions, which had really been beyond all praise, should be ignored. He (Sir John) lately visited Paris. He went there with the approval of Lord Palmerston and Lord John Russell, though not in any official capacity. He readily obtained an interview with the Emperor on presenting his card at the Tuileries. The Emperor explained his difficulties on the subject, asked for information on certain matters, and expressed himself both obliged for, and surprised at, the facts which he (Sir John) produced to show that free trade had not only augmented the amount of the exports and imports of this country, and had enabled it to take off millions and millions of taxes, but had also enabled it to add millions to the revenue. He showed the Emperor that with respect to the silk manufacture—in which the manufacturers of England were least able to compete with those of France—England exported seven times the quantity of silk goods that it formerly did. The fact was that by the removal of the restrictive duties on the importation of silk from France, the taste for silk goods had increased, and the English trade in these materials had been extended. Such was the case with other branches of industry. Proceeding to notice the treaty, Sir John expressed his belief that the Emperor of the French had acted very wisely in modifying the tariff for the introduction of wools and woollens into France, and added that he had no doubt but that in the course of time the demand in France for woollen goods would be enormous. The cost of clothing in France, in consequence of the protective system which had hitherto prevailed there, was very high, and he had seen many persons ill clad and shivering in winter whom he should have been very glad to have seen wearing some outer covering of coarse woollen cloth. In conclusion, Sir John said that his reception by the Emperor of the French was of the most cordial character, and he believed that the Emperor was thoroughly determined to give effect to the principles of free trade. He thought it would be a very disastrous event if Mr. Gladstone's Budget did not pass, though he had no doubt that any wise modification of any of its details would gladly be adopted. As regarded the great principles of commerce, as regarded the treaty with France, and as regarded the political interests which were connected with both, he did not believe that in the history of mankind so important, so gigantic a step had been taken as that which had been taken during the reign of the present Chancellor of the Exchequer. (Applause.)

Literature.

Our Affairs in China. James Ridgway, Piccadilly.

An anonymous pamphlet under this title is before us. It shows pretty distinctly that the author has not been a resident in China. To say that his suggestions are impracticable, we think, conveys a correct impression. If, says the writer, "the satisfaction is to consist in the seizure and annexation of certain positions in the empire, we may of course stay our hands as soon as the force is firmly established there, and the civil, military, and fiscal administrations are in due operation. Whether the force is to consist of 1,000 or of 100,000 men, and whether it is to march 100 miles or 1,000, one condition is vital to the security of her Majesty's army, namely, that continuous communications should be perfectly and securely maintained between the advanced posts of the leading columns and the flotilla, in perfectly secure communication with the fleet. Any departure from that principle in China would in all probability lead to abortive political results, with disastrous military consequences." We are glad to perceive, however, he adds his testimony to the imprudence of our late operations at the Peiho. He says, "One frigate and two gunboats would have been ample for our Ambassador to communicate to the Court of Peking our readiness to exchange ratifications. If this notification did not obtain suitable arrangements for the same, it is clear that the treaty remained a valid instrument whereon we could base future claims and operations."

Twelve Years in China. By JOHN SCARTH, Esq. Constable and Co., Edinburgh; Hamilton, Adams, and Co., London. (Second notice.)

A more extended perusal of this book enables us to pronounce it as one of the best among the many that have appeared on this interesting country, now occupying so prominent a feature in the consideration of our legislators. It opens with a quotation from Wingrove Cooke—"The plan to pursue in China is this—dare to act honestly, and dare to tell them truth."

The book is full of attractive information, both on the manners of the people and their peculiar avocations, giving such an insight into the Chinese general character and the best mode of treating them to secure and extend British interests in China. Mr. Scarth, unlike so many merchants who have resided in China for years, has taken great interest in the country. We must here remark, however, that it is the most difficult thing for merchants in China to combine literary pursuits with their daily avocations, which extend often from 6 a.m. to 10 p.m. There are no railroads to whiz a man off a dozen miles at 5 or 6 p.m., and the consequence is that Chinese merchants come at all times to transact business, and the temptation to get "a certain chop of teas" settled, is great. The coloured engravings are true to life, and the map of the rebellion a most arduous and able production. The entire volume is well got up, and written in an easy, graphic, and unassuming style, but it must be read as a whole to be appreciated. We regret our space precludes a longer notice, but would direct special attention to the author's comments on the silk and sugar districts, rebellion, religion, mandarins and government, emigration, character of the people, the *Arrow* affair, Lord Elgin's mission and his interpreters, and the just tribute to Admiral Seymour's conduct.

McClintock's Voyage of the "Fox." John Murray, Albemarle-street.

The twelfth thousand of this very excellent work has been announced. It forms one of the greatest books of the day, it is a national monument, and as a standard work compares with *Oliphant's Narrative of Lord Elgin's Mission to China and Japan*. The faithful detail of the fortitude and great powers of endurance on the part of the gallant band on board the *Fox*, adds much to the renown of our officers and seamen. A soldier has generally a quick death or a glorious victory, but seamen, in connection with their duties, are subject to more prolonged trials of real courage. The success which crowned their efforts in tracing the remains of Sir John Franklin and his companions, is of course the thrilling part of the narrative, but to lead up to that through a winter in the Arctic regions, the book must be read. The engravings greatly assist in this particular, and with the volume throughout are well-executed. We are glad to observe that it is likely that the captain, officers, and crew of the *Fox* will be rewarded by a vote of Parliament at the instance of Sir Francis Baring, M.P.

SELECTIONS.

A CHINESE TOPER.—A story is current among them of a great wine drinker, who was able to sit on all the day at table, and, after consuming what would have been sufficient to drive the reason out of half-a-dozen men, would rise up perfectly sober. The Emperor, hearing the fame of this deep drinker, asked him to dinner that he might test his marvellous powers. As the story goes, the King had ordered a hollow figure to be cast in bronze, of the exact size and model of this man, and, as the wine was served, for each cup that the guest drank a similar cup was poured into the opening on the top of the head of the image. This went on for some hours, until at length the bronze statue overflowed, while the guest continued at the table, and rose from it perfectly sober.—*Cobbold's Pictures of the Chinese.*

LORD ELGIN'S MISSION.—I have had occasion to notice how much Lord Elgin was guided by his interpreters, Messrs. Wade and Lay; they did not, in fact, act merely as interpreters, but became the negotiators of the treaty, and were employed in this manner to an extent far beyond what we credited in China. By the papers furnished to Parliament it would appear that Mr. Lay, then an officer in the Chinese service, was the principal party employed in arranging the points of the treaty directly with the commissioners and at their own request. The Takoo disaster would never have occurred had Tien-tsin been opened as a port when the treaty was signed; but with advisers such as Mr. Lay and Mr. Wade, who appear to have thought that it would be dangerous to the empire if foreigners obtained admission to Peking.—*Twelve Years in China.*

STATIONS OF THE BRITISH ARMY.

(From the Army and Navy Gazette.)

Corrected up to 3rd March, 1860.

[Where two places are mentioned, the last-named is that at which the Depot is stationed.]

1st Life Guards—Windsor	26th do.—Dublin; Belfast
2nd do.—Regent's Park	27th do.—Umballa; Buttevant
Royal Horse Guards—Hyde Park	28th do.—Bombay; Fermoey
1st Dragoon Guards—Bangalore; Canthry.	29th do.—Preston; Devonport
2nd do. Lucknow; Canterbury	30th do.—Carragh; Parkhurst
3rd do.—Mhow; Canterbury	31st do.—Ordered to China; Chatham
4th do.—Brighton	32nd do.—Dover; Devonport

The following shows the intended departures of mails, by the P. and O. Co.'s steamers, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo, are despatched via Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. The departures from Hong Kong for the ensuing year will be:—

Feb. 15 and 27	..	June 5 and 22	..	Oct. 13 and 29
March 15 and 30	..	July 5 and 22	..	Nov. 15 and 28
April 13 and 23	..	Aug. 10 and 24	..	Dec. 15 and 30

Arriving in London, via Marseilles on the 12th to 15th, and 26th to 29th of each month, and via Southampton five days later.

Births, Marriages, and Deaths.

BIRTHS.

BOWMAN.—On the 24th Feb., at Stangrove, Edenbridge, Kent, the wife of A. Bowman, Esq., of a daughter.
GIBBS.—On the 1st inst., at Park-road, Stoke Newington, the wife of Alfred West Gibbs, Esq., of a daughter.
HILL.—On the 6th inst., at 20, Canonbury-place, the wife of Mr. Thomas Rowland Hill, of a daughter.
HOUGHTON.—On the 6th inst., at 6, Union-terrace, Barnstaple, the wife of A. J. Houghton, Esq., of a daughter.
DAY.—On the 12th instant, at No. 6, Howley-place Villas, the residence of her brother-in-law, Henry M. S. O'Brien, Esq., the wife of Commander George Fiott Day, R.N., V.C., of H.M.S. *Sphinx*, of a daughter.

GRANT.—On the 3rd Feb., at Singapore, Mrs. Charles Grant, of a daughter.
SAUNDERS.—On the 13th inst., at Abergavenny-lodge, Tunbridge Wells, the wife of Francis Saunders Esq., of Rio Janeiro, of a son.
WITCHELL.—On the 11th inst., at Woolwich, the wife of J. Witchell, Esq., Lieut. and Adjutant of H.M. 3rd batt. Military Train, of a daughter.
SAVILLE.—On the 14th inst., at Torquay, Devon, the wife of Captain J. Walter Savile, retired list H.M. L.F., of a son.
NEWTON.—On the 14th inst., at Brighton, the wife of the Rev. J. Newton, of a son, still born.
PURDON.—At Spring Gardens, Hong Kong, on 21st Jan., the wife of James Purdon, Esq., of a daughter.

MARRIAGES.

MELBOURN.—On the 2nd Jan., at the British Consulate, Batavia, by the Rev. J. Scott Moncrieff, George Melbourn, Esq., of Batavia, to Anna Eliza, eldest daughter of Robert Peile Tolson, Esq., of the same place.

MACDONALD.—On the 10th Jan., at Singapore, by the Rev. H. Smythe, John R. Macdonald, Esq., son of the late Captain Macdonald, of the 91st Regt., to Emilie Sophia, eldest daughter of Thomas Williamson, Esq., of Savage-gardens, Trinity-square.

MARQUES.—On the 6th Jan., Ignacia Francisca Marques, relict of the late D. P. Marques, aged 75.

JEFFRIES.—At Hong Kong, on 28th Jan., Mrs. Jeffries, aged 45.

Monetary and Commercial.

The following is an account of the gross produce of the Customs' duties. Among the principal items which will never appear again—the duties having been entirely abolished—are silk manufactures, butter, cheese, and tallow.

	1857.	1858.	1859.
	£	£	£
Sugar	4,942,081	5,786,987	5,891,192

Other articles	265,533	289,941	311,060
Total	£22,956,371	£24,155,852	£25,065,066

The committee appointed to address the Chancellor of the

Exchequer on the subject of imposts on goods imported, &c., make the following remarks:—

"Taking the article of tea as an example—which already contributes one-fifth of the Customs' revenue—the charge proposed is on the average tenfold greater than that now made by the Customs, and would exceed the actual amount of the charges of the dock companies, by whom the operations in question are, in fact, performed. On coffee, sugar, pepper, &c., the dock charge for performing the operations averages about 4d. and 6d., while it is proposed that the Customs shall receive 1s. per package for permitting them. Those for the convenience of trade, such as repacking into small packages, &c., are rated equally out of proportion to the duties discharged; while we can only suppose the application of the tax to the last class can scarcely be intended."

The Agra Bank has declared a dividend at the rate of 10 per cent., with a bonus of £1 per share, being equal to 12 per cent. for the past year.

A prospectus has been issued of the Oriental and Colonial Cotton, Flax, and Fibres Company, with a capital of £100,000 in £25 shares. The object is to stimulate native cultivation in India of some of the products most needed in Europe, by establishing agencies for bringing them to our markets. Punjaub flax and the rheea of Assam, one of the best fibres known, are among the articles especially contemplated.

At a meeting of the creditors of Messrs. Smythe, Searle, and Co., it appeared that acceptances had been granted on shipments made by Messrs. Framjee, Rustumjee, and Co., Bombay, which in some cases had only realised 15s., against bills drawn for £450; goods invoiced as goats' wool turned out to be common tow.

According to some of the private letters from Manchester, the profits of that city continue on an unprecedented scale, and are expected for the future, under the commercial treaty and the simplified tariff, to increase even at a still greater pace, supposing the contingency of a cotton failure to be avoided. Three individuals are each said to have recently returned £100,000 to the income-tax, and the general gains of the cotton trade at present are roughly estimated at £1,000,000 sterling per month. During January and February the deposits at the Manchester Savings-bank alone were £37,000.

The winding up in the Court of Chancery of the affairs of the Royal British Bank is now virtually at an end. From Chancery and Bankruptcy the creditors have already obtained 14s. 6d. in the pound.

In consequence of the fall in the China exchanges the bullion by last mail was only £171,894, as follows:—For Calcutta, £105,510; Singapore, £15,625; Shanghai, £15,341; Madras, £25,294; Hong Kong, £7,094; Alexandria, £3,000; and Ceylon, £30.

The telegraphic communication with Malta has been somewhat improved since the late remonstrances, but it still takes 36 hours for the transmission of a message, and longer when the lines are occupied by the Neapolitan Government. The submarine portion of the cable between Cagliari and Malta will not be restored for the present by the company, and consequently messages will continue to come as at present; it is, however, intended to lay a wire specially for the English company through Sicily. A portion of the old Cagliari cable, that is from Malta to Marsala on Sicily, is in working order, and can at any time be used as a duplicate. It is contemplated by the French Government to lay a submarine telegraph from Toulon to Corsica, thence to Gacta, which will connect with the Neapolitan lines, and by this means give us still greater facilities. The messages then will occupy about three hours. We are happy to state that the company intend reimbursing the parties whose messages have been delayed. The link between Malta and Alexandria is still in suspense, and until this is completed the communication with Aden and India is incomplete, and causes a delay of several days. The line between Aden and Kurrachee is reported to be working well, messages and answers occupying only ten minutes. The cable to connect Falmouth with Gibraltar is in a forward state, but it is not yet decided if it is to be used for that line, or between Rangoon and Singapore, in order to connect the latter settlement with India and England. A paragraph has gone the round of the papers, calculating how long messages will be when India and Ceylon are in connection! This cable has been working some months.

ARTICLES OF IMPORT.

TEA.—The public sales since our last have passed off better than had been anticipated, but the result of the month's transactions show a decline of ¼d. to 1d. per lb. on all descriptions except common Congou, which maintains previous prices. There have been a few export orders for good common Congou which is now in limited supply, and is difficult to buy at 1s. 5½d. to 1s. 5½d. per lb. The lower qualities have realised 1s. 4d. to 1s. 4½d. per lb. The large quantity of flavory Congous offered for public sale without reserve, have supplied the demand, and prices show a decline of fully ¼d. per lb. Common black-leaf kinds have sold ¼d. to 1d. per lb. lower; the better kinds of these, as also of Monings and Wopaks, are only saleable at a reduction of about 1d. per lb., but they are held with great firmness. Good and fine Kaisows nearly maintain former rates. Tayshans have been difficult of sale at the late advance. In Oolongs and Souchongs business has been limited, and prices show no material change. In flowery Pekoes there have been some few transactions, at prices rather in favour of the buyer. Scented teas have declined 1d. per lb. from the highest point obtained under speculative purchases, some large parcels of common to fair descriptions having been sold without reserve at public auction. The finer kinds of orange Pekoe remain difficult of sale, but Capers are in better demand. There has been some inquiry for the Foo-Chow-Foo qualities. Green teas have not been much in demand, but holders have shown great firmness. Some Taiping gunpowders, from New York, sold at public auction, at rather lower prices, but for most other kinds last month's prices are about maintained. The stock in the United Kingdom is estimated at 64 million lbs.

SILK.—During the month we have had upon several occasions symptoms of a less depressed feeling, but these have successively passed away without any extent of business—prices, however, have been fairly supported. It is supposed that the long-continued quiet may have been caused by the uncertainty as to politics and the financial movements of the Government. This may have affected the home trade, but could scarcely have had any influence upon the demand from distant markets.

SUGAR.—Clayed as well as Muscovade Manila has met but a partial demand, and the transactions effected have been on rather lower terms. The limited supply of Sim, again consisting of strong and superior refining sorts, has mostly found ready buyers at improved rates. In Java, no business worthy of note has transpired on the spot, but floating, a cargo has been sold, to be landed in this port, as also some parcels from Holland, and large arrivals have increased our stock to about 2,700 tons.

RUM.—In East India kinds nothing of importance has occurred.

COFFEE.—The improvement noticed in our last has been maintained. Rates may now be quoted 1s. per cwt. higher, chiefly by reason of the small supply.

TOBACCO.—The market is in such a stagnant condition that no deviation can be noticed on last quotations.

RICE.—An improved demand, chiefly for the commoner kinds of soft grain, which has been steadily maintained, and although stiff prices have lately been required, transactions to a fair extent have resulted at some improvement. The total sales comprise 120,000 bags, great-r part soft grain descriptions, viz., common old Maulnain, 7s. 9d. to 8. 3d.; new, 9s. 6d.; ordinary old to fair n-w Rangoon, 7s. 9d. to 9s. 6d.; old Necranzie Arracan, 8s. 3d. to 9s.; Larong, 8s.; also Java, of some amount, but prices kept secret.

PEPPER.—Less disposition to purchase has been evinced since our last advice, and while holders have generally shown firmness, the parcels offered have been rather numerous, and in the business done, comprising about 11,000 bags, prices of late have slightly given way, viz. greyish to good black Singapore, 4½d. to 4½d.; common dusty Penang, 4d. to 4½d.; good (Trang kind), 4½d. White has been taken sparingly, but though prices have ruled rather irregularly, no quotable change in the value can be noticed: 350 bags Penang have been sold, common and middling 7½d. to 7½d, good 7½d.; and 300 bags fair Singapore, at 7d. to 7½d. per lb.

SAGO has latterly been rather more inquired for, and about 1,500 boxes Pearl have been placed at full rates. Of SAGO FLOUR 800 bags have lately been taken at 16s.

HEMP.—The demand for Manila hemp has improved, and 2,000 bales have been cleared off at enhanced rates; common to fair current quality £21 10s. to £24, good roping £24 10s. to £26 10s.

JAPAN WAX.—Dull 1088 cases and 20 tubs, nearly all taken; block 70s., saucer 72s. to 75s.

TIN.—The market during the last few days has somewhat improved, owing to short arrivals in Banca. The stock in London of Straits and Banca may be computed at 880 tons, and in Holland at 4,000 tons. Banca may be quoted at 137s. to 138s., Straits 131s. to 132s.

DRUGS AND SPICES.—Transactions have been trifling at about our last quotations.

ARTICLES OF EXPORT.

IRON.—Business has been dull. Scotch pig has been mostly in request for shipment. Quotations are about the same as in our last.

COPPER.—The great demand for copper which arose at the beginning of the year has subsided, and although the price is maintained, but few transactions of moment take place. The price of yellow metal was yesterday reduced one farthing per pound.

SPELTER.—Market very quiet at £21; stock, 3,264 tons.

LEAD, &c.—English pig, £22 10s. to £23 5s.; sheet, £23 5s. to £23 10s.; zinc sheet, £27; regulus of antimony, £51; steel, Swedish keg, £20.

TIN PLATES.—Best Charcoal I. C., 32s. to 33s.; coke, 25s. to 28s. 6d.

STEAM COALS.—Beaside West Hartley, screened, 8s. 6d.; unscreened, 7s. 6d.; small, 8s.; Lambert's West Hartley, screened, 8s.; unscreened, 7s.; small, 8s.; Ward's West Hartley, screened, 7s.; unscreened, 6s.; small, 7s.; Purvis' Hartley, screened, 6s. 3d.; unscreened, 5s. 6d.; small, 7s. (the three West Hartleys are 2d. less at Blyth); Welsh Nixon's Duffryn, 9s. 6d. at Cardiff.

MANCHESTER MARKETS.

The market is exceedingly flat. Goods for India are worse to sell, and, though the engagements of spinners and manufacturers generally keep prices pretty firm, they are rather easier where parties are disposed to press them upon the market. There is also some weakness, as mentioned on Tuesday, in 9-8ths printing cloths.

HAMBURG MARKETS.

During the last fortnight our market has been rather quiet on the whole, for though the navigation, which had been interrupted by the frost, is now again open, and supplies are dropping in from all parts of the globe, speculation has not been entered into to any extent. In the present uncertain aspect of political affairs, a corresponding cloud has been thrown on mercantile enterprises, which, though not enough to intimidate holders of stock, renders purchasers cautious and limits the transactions to the wants of the trade.

COFFEE.—Small arrivals, reduced stocks, and the limited quantity of East India to be brought forward at the March sale in Holland, have had the effect of keeping up the confidence in this article. Sales effected 41,400, of which about one half were floating cargoes taken for the Mediterranean and the North of Europe. No alteration to report in the quotations.

SUGAR commands a steady sale at former prices, and sales of several lots of Java and Manila.

RICE quiet, and the business confined to the execution of small orders from the interior.

TEA.—A good deal of business has been transacted, and common Congou may be quoted 4 sch. banco per lb. higher. A good many arrivals have taken place, and the market again offers a good assortment to tempt purchasers.

POSTSCRIPT.

CITY, SATURDAY MORNING.

The tea and silk markets have been quiet since the 10th inst. No alteration in prices of teas—in silks, Tsatlee No. 5 is now ruling at from 20s. 9d. to 21s. 6d.

A telegram by the through line was received this morning, bringing news from Calcutta as late as Saturday last, the 10th inst. It announces the burning of the *Redgauntlet*, a large vessel sailing for London, with a valuable cargo, and many pecuniary interests will probably be affected by the message, since it is likely that the letters by the next mails may bring orders for insurance.

ARRIVALS.—Feb. 22, at New York, from Manila; Leicester, from Amoy; Dido, March 6, off Plymouth, from Shanghai, Beemah; March 10 at Liverpool, from Maulmain, Saama; 12, at Gravesend, from Maulmain, Rienzi; off Portland, from Shanghai, Strathmore; 13, at Falmouth, from Maulmain, Renata; Feb. 26, at New York, from Whampoa, Western Continent; 27, from Foo-chow-Foo, Phantom; from Sumatra Monterey; 28, from Singapore and Penang, Tropic, at Boston; Feb. 27, from Foo-chow-Foo, Argonaut, from Manila, William Sprague; March 14, at London, from Whampoa, Lord of the Isles; 13, at Deal, from Foo-chow-Foo, Lauderdale; 14, from Woosung, Friar Tuck; 13, at Portsmouth, from Hong Kong, Canaan; at Liverpool, from Manila, Queen of England; 1, off New York, from Whampoa, David Brown; 16, at Deal, from Foo-chow-Foo, Alfred the Great; 13, off Eastbourne, from Batavia, Cosmopoliet; off Portland, from Banjoewangie, Doctrina et Amicitia; 15, at Deal, from Penang, James Piton; 16, from Shanghai, Evening Star; off Falmouth, from Manila, Boldon Lawn.

CASUALTIES.—The Wagoala, Jardine, of and from London for Shanghai, went on shore at about 10.30 p.m., on the 10th March, a mile to the eastward of Folkestone, a portion of her cargo was discharged the following morning, and an anchor having been got out, two powerful steam-tugs

attempted to tow her off at high water, but in vain, in consequence of the very strong wind and heavy swell. About 500 tons of the cargo have been landed quite dry.

The Caducues, Cass, from China, arrived in the East India Docks, 9th March, with starboard quarter stove, and other damage, having been in collision; she had also driven on shore off the Custom-house at Gravesend, having broken from her anchor; she was assisted off by two steam-tugs, and towed to Greenhithe.

From PENANG.—At London: Malacca, Walsokem, Malvern, Sanderson, James Paton, Undaunted, British Tar.

From BATAVIA.—At London: Richard Thornton. At Falmouth and other ports: Jane, Elise, Memesis.

VESSELS SPOKEN.

ARDVILLE, MacLachlan, from Shanghai to London, Dec. 29, 25 S., 5 E.

HELENE, Batavia to Rotterdam, Jan. 31, 33 N., 31 W.

LINCELLES, London to Hong Kong, Dec. 7, 5 N., 23 W.

MACAO, Batavia to Amsterdam, Dec. 28, 35 S., 20 E.

VESTA, Batavia to Rotterdam, Dec. 25.

VIRGINIA, Penang to London, Dec. 28.

LAWSON, Batavia to Rotterdam, Dec. 13.

OCEAN QUEEN, Singapore to London.

JOHN HARLEY, Manila to New York, Dec. 22, 21 S., 35 E.

GERTRUDAS, Manila to Sardinia, Dec. 24, 33 S., 16 E.

MERPHISTA, Hong Kong to Hamburg, Dec. 1.

CELANTINE, Batavia to Rotterdam, Dec. 16, 28 S., 9 E.

CATHARINA, Batavia to Amsterdam, Dec. 19, 23 S., 3 E.

ELECTRIC, Sunderland to Hong Kong, Jan. 12, 2 N., 19 W.

MATILDA, Manila to Havre, 27 S., 58 E.

INDIANA, Hong Kong to London, Jan. 18, 26 S., 6 W.

BOLDEN LAWN, Manila to Falmouth, Jan. 13, 32 S., 2 E.

SANDERSON, from Penang, Jan. 16, 27 S., 7 E.

LADY CECILIA, Manila to Queenstown, Jan. 19, 22 S., 1 E.

ROBERT AND ANN, Maulmain to Queenstown, Dec. 7, 31 S., 43 E.

ELIZABETH, Manila to London, Jan. 8, 36 S., 20 E.

AUGUSTE AND EMILIA, Newcastle to Shanghai, Dec. 26, 33 S., 17 W.

PHOEBUS, Batavia to Amsterdam, Dec. 11, 29 S., 46 E.

SEA QUEEN, Singapore to London, Dec. 21, 35 S., 22 E.

HELENE AND ANNA, Batavia to Rotterdam, Dec. 25, 23 S., 12 W.

CANAAN, Hong Kong to Portsmouth, Feb. 3, 1 N., 19 W.

HORATIO, Shanghai to New York, Dec. 19, 10 S., 103 E.

SYDNEY, Macao to Cork, Dec. 19, 34 S., 30 E.

CASUALTIES.

The Malacca, Bedel, from Penang to London, which arrived at St. Helena on the 16th Dec., with damage, has been surveyed and sold by auction.

The Von der Heydt (Pruss.), Neumann, from Liverpool for Batavia, put into Lisbon, 9th Feb., with rudder broken, top sides open, sails sp'it, &c. She made a good deal of water at sea, but very little at Lisbon. She would have to discharge part of her cargo to get at the lock of the rudder.

The Sea Serpent (Amer.), Whitmore, from London to Hong Kong, put into Rio Janeiro, 9th Jan., leaky. She was there discharged, to repair some slight damage in the bottom of the ship, and on the 7th Feb. was nearly ready to take in cargo again.

The Ann McLean, Lamzed, from Singapore to London, which put into Mauritius 4th Aug., with foremast sprung, has been sold at that port.

The Calloe, Schmidt, from Sourabaya to Amsterdam, put into Mauritius, 21st Jan., and was discharging cargo on the 7th Feb. She had experienced a heavy gale on 15th and 16th Jan., in lat. 26 S., long. 63 E., and sprung a leak.

The Portuguese brig of war Mondego, from China, has been abandoned at sea. The crew were taken into Mauritius by the Uriel (Amer.), Walker, from Calcutta.

The Argo, Dahlberg, from Maulmain, arrived at Gibraltar, Feb. 27, with loss of sails, spars, rigging, &c.

FREIGHTS AND CHARTERS.

The demand for tonnage is active principally for China. The large number of vessels from this and India will no doubt cause rates in China to recede to the lowest point current last year.

For coals a large amount of tonnage has been fixed "to arrive" from India, the Pacific, and North America, at 51s. to Aden, 45s. or £51 Bombay, 48s. or £52 Galle, £51 Singapore, &c.; about 20,000 tons having been engaged within a few days, rates have become weaker; tonnage "to arrive" is neglected, and for ready ships the utmost obtainable is £57 Aden, £51 Bombay, £52 Ceylon, £51 Singapore, £48 Calcutta, &c. Ships for general cargoes to India are in less demand, the rates offered in London for Bombay being about 42s. 6d. to 45s. per ton on dead weight capacity, 40s. to 42s. 6d. Calcutta, 65s. register ton Kurrachee, 60s. register ton Cape of Good Hope, &c. In homeward charters and freights on the round, we have had an improving business. £6. 10s. Swansea to Aden, and back with teak from Maulmain, £6. 17s. 6d. for the same round, loading outward at Sunderland; 100s. is offered on the round Antwerp to Bombay and back from that port, Cochin, Tillichery, Colombo, or Tuticorin, 100s. Coal port to Ceylon and back, 100s. Hamburg to Java and back, 110s. Coal port to China and back, Maulmain home 75s. Teak, Calcutta to London or Liverpool 55s., Bombay 35s. to 37s. 6d., Manila 50s., Java 50s., &c.

Rates of freight current for vessels on berth to Shanghai 70s. per ton dead weight; 55s. per ton of 40-foot measurement. To Hong Kong, 60s. weight, 50s. measurement. To Singapore, 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

INSURANCE.

The following are the current rates of premium at Lloyd's according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila 50s. to 60s.

At TABLE BAY.—Dec. 22, Deane, Brabner, from Hong Kong; Windeck, Ritter, for Batavia; 24, Columbine (late Spencer, dead), from Manila; Jan. 10, Emma Jantzen, from Amoy; 12, Energie, Ranadh, from Batavia, and sailed 19th for Amsterdam; 17, Superior, Cullberg, from Batavia; Crouch Brothers, Crouch, from Sourabaya; Dec. 26, Constantia, Sinclair, for Shanghai; Jan. 17, H.I.F.M. steamer Renomme, for China.

HELENA.—Jan. 4, Walsoken, Brigobock, from Penang, and sailed 5th for London; 5th, Leicester, Robins, from Manila, and sailed 8th for New York; 6, Dido, Ipland, from Amoy, and sailed for New York; 7, Monterey, Smith, from Sumatra, and sailed for New York; 8, Borneo, Amaranger, from Batavia, and sailed 10th for Rotterdam; 14, Adele, Jaski, from Batavia, and sailed 15th for Amsterdam; 18, Gebrueders Houtman, Bax, from Batavia, and sailed 19th for Amsterdam; 20, Maria Agnes, Brink, from Batavia, and sailed 21st for Amsterdam; Phantom, Peterson, from Foo-Chow-Foo, and sailed for New York; 21, Doctrina and Amicitia, Strootman, from Banjoengie, and sailed for Amsterdam; Renata, Koehn, from Maulmain, and sailed for Falmouth; 22, Cornelius Weynard, Eduard Bakker, from Java, and sailed 23 for Schiedam; Regina Maris, Ouwehand, from Java, and Prins Veldmaarschalk, Immink, from Batavia, and both sailed 23rd for Middelburg; Penang, Zwart, from Java, and sailed 23rd for Rotterdam; Friar Tuck, Darlington, from Shanghai, and sailed 23rd for London; Nancy Jacobson, from Whampoa, and sailed 24th for Hamburg; Beemah, Pickernell, from Shanghai, and sailed 23rd for London; 23, Elizabeth, Owen, from Manila, and sailed 25th for London; Maalstroem, Mellnk, from Batavia, and Johannes Christiaan, Obeldt, from Batavia, and both sailed for Amsterdam; Bengalen, Planten, from Batavia, and sailed 24th for Rotterdam; Sophie Koningen der Nederlanden, Klein, from Batavia, and sailed 24th for Rotterdam; William, Milton, from Shanghai, and sailed 24th for London; Stad Leyden, Dekker, from Batavia, and sailed 26th for Amsterdam; Quatre Bras, Bondix, from Batavia, and sailed 27th for Amsterdam; 25, Canaan, Wilson, from Hong Kong, and sailed for London; Vrienden Trouw, Grave-link, from Batavia, and sailed 26th for Amsterdam; 26, Richard Thornton, Sinclair, from Batavia; Heilige Willebrodus, de Boer, from Batavia; 23, Macao, Krill, from Batavia, and sailed 24th for Schiedam; 24, Monnequash, Armstrong, from Maulmain, and sailed for Falmouth; Jan Schouten, Meyer, from Batavia, and sailed 25th for Dordt; Manzanilla, Martineau, from Manila, and sailed 26th for Havre; 26, Norway, Meagher, from Macao.

At MAURITIUS.—Jan. 10, Ile Marie, Patour, from Singapore; 20, En-deavour, Wilson, from Hong Kong; 21, Calloe, Schmidt, from Sourabaya.

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,**MANUFACTURERS OF IMPROVED INDIAN LAMPS.**

"Messrs. TUCKER & SON.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed) "A. Ross, Bengal Civil Service."

BROWN AND POLSON,
Manufacturers to Her Majesty the Queen;
PAISLEY, and 23, IRONMONGER-LANE, LONDON.

DIVING APPARATUS.
C. E. HEINKER,
Submarine Engineer
103, Great Portland-st.,
London.

Begs to call the attention of Shipowners, Merchants, Captains, &c. &c., to the important improvements made by him in the

SUBMARINE HELMET DRESS AND APPARATUS, which enables a diver to remain any length of time

under water. For the Recovery of Property from Wrecks, Making and Repairing Foundations of Harbours and Bridges, and also

FOR PEARL AND SPONGE DIVING.

BURROWS AND CO., WHOLESALE WINE MERCHANTS, LIVERPOOL.

Stores, Lime-street.—Offices, 54, Duke-street.

The proprietors beg most respectfully to call the attention of the Trade, Noblemen, Clergy, and the public in general, to their extensive stock of CHOICE WINES of rare vintages.

B and C. are not disposed to comment upon the purity of their wines, which is daily most laudably acknowledged by the public and eminent medical men of all countries; as the increasing patronage of the highest families of the land is a sufficient guarantee.

They beg to call particular attention to their pure Tonic Wines, as being so valuable to invalids and persons of weak stomachs.

A sample case, containing 3 full-sized wine-bottles, will be forwarded to any address on receipt of Post-office Order for 6s. 6d., or a dozen for 24s.

It is a well-known fact that impure and adulterated wines are the greatest foes to health, producing acidity in the stomach and debilitating the digestive organs; while pure wines will accelerate the digestive powers—invigorating, strengthening, and bracing the nervous system.

Their Tonic Wine is admitted to be most essential to invalids, both old and young, and should never be absent from the homes of the weak and sickly. Its properties are duly acknowledged and appreciated by the leading men of the faculty both at home and abroad. To prevent imposition, each bottle is sealed with the name of the Firm. All orders to be made payable to Henry Burrows.

GALVANISM.—PERSONS desirous of availing themselves of the MODERN DISCOVERIES in ELECTRO-MAGNETISM and GALVANISM as a curative agent in the treatment of various forms of Paralysis, Muscular and Nervous Debility, Chronic Rheumatism, Spasmodic Asthma, &c., can have it applied by properly-qualified medical men of experience at the Galvanic Institution, No. 52, Euston-road, every day (except Sunday), from 12 to 4 o'clock. Accommodation for board and attendance of a first-class character for those coming from a distance.

HOLLOWAY'S OINTMENT.—Bad Legs, Wounds, Ulcers, and all descriptions of Sores are remediable by the proper and diligent use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of the wound together is a folly; for should the skin unite, a boggy diseased condition remains underneath to break out with tenfold fury in a few days. The only rational and permanent treatment, as indicated by nature, is to reduce the inflammation in and about the wound, to soothe the neighbouring nerves, to cool the heated blood as it courses along its vessels, and to render the thin, watery, ichorous discharge consistent and healthy. Happily for suffering humanity Holloway's Ointment accomplishes these ends with unfailing certainty.

JOHN LITTLE AND CO., GENERAL STOREKEEPERS AND COMMISSION AGENTS, SINGAPORE.

TALBOT DEVINE AND CO., SHIP CHANDLERS, AUCTIONEERS, AND COMMISSION AGENTS.

Importers of all descriptions of Ship and Private Stores, from Europe and America.
WHAMPOA, CANTON.

COPLAND AND CO., Original Preservers of JAMS, JELLIES, MARMALADE, ETC., in Hermetically Sealed 1 lb. and 2 lb. Tin Cases. WHOLESALE AND EXPORT OILMEN. 30, Bury-street, St. Mary Axe, London, E.C.

BILLIARD TABLES. THE ONLY BILLIARD TABLES appreciated in India, China, and the Colonies, are those made by THURSTON & Co., who have supplied Her Majesty's and Native Regiments for the last FORTY YEARS. 11, CATHERINE-STREET, STRAND, LONDON.

GLENFIELD PATENT STARCH. USED IN THE ROYAL LAUNDRY. AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED. Sold by all Chandlers, Grocers, &c., &c.

PATRONISED BY THE COURT. THE MALLOW SOAP is the best Soap for the Skin. Made only by J. GROSSMITH, 85, Newgate-Street, London. Its perfume is exquisite and lasting. Tablets, 3d., 4d., and 6d. each. Sold everywhere. The "SOVEREIGN OF SCENTS." A new perfume for the Handkerchief; needs but a trial to be approved.

MILLINERY ROOMS, QUEEN'S ROAD, HONG KONG; Consulate-road, Shanghai; Praya Grande, Macao. Mrs. MARSH begs to inform Ladies visiting China that they will always find at her Show Rooms, in any of the above places, everything they may require in articles of dress and fashion. A large and superior assortment suitable for the climate always kept on hand. The latest fashions received every mail from Paris.

GEYELIN'S PATENTS.—HYGIENIC SPRING LATHS BEDSTEADS, invaluable for invalids and hot climates; cannot possibly harbour vermin. Endless Power Brick and Socket Pipe Machines, Universal Gas Burners' Regulator, Magic Horse-Taming Nose-Pinchers; fit any blade. Agents (wholesale and retail): J. GRIGG, 47, Baker-street, W.; and W. H. KENNEDY, 462, Oxford-street, W.C.

JEAN MARIA FARINA Cologne; London, 2, Salters'-hall-court, and 16, St. Swithin's-lane, E.C., begs to commend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond—Double, at 9s. Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TO MERCHANTS, CAPTAINS, EMIGRANTS, AND OTHERS.

THOMAS CLAY & Co., 4, KING STREET, Covent Garden, W.C., SURGICAL MACHINISTS, and Manufacturers of TRUSSES of every description, Umbilical Hernia, &c.

Trusses, 10s., 15s., 21s., and upwards; Elastic Stockings, 6s., 7s. 6d., to 15s. Post-office Orders payable Charing-cross, W.C.

An Elastic Monthly Suspensory Bandage, solely invented for the convenience and comfort of Ladies, 3s. 6d. Ladies' Surgical Stays, Belts, Monitors, Dumb Bells, &c. Spinal Apparatus, Leg Instruments, &c. Elastic Stockings, to lace or draw on. Artificial Legs and Arms, Spring Crutches, &c. India-rubber Urinals, for Railway or Night use. Corsets for Spinal Affections, Corpulency, &c., and every other department connected with the business. Also a Patent Chain Pocket to prevent Picking or Cutting.

Address, THOMAS CLAY and Co., 4, King-street, Covent Garden, London, W.C.

A liberal discount to the Trade, the Medical Profession, Charitable Institutions, &c.

EXPORT AGENT.—An Agent Wanted by an eminent Continental Perfumer, whose manufacture is particularly adapted for exportation to all climates. A fixed salary guaranteed, with a liberal commission allowed on sales effected. Only competent salesmen, who command an extensive connection among shippers, need apply. First-rate references required. Letters addressed to M., care of Mr. F. Algar, 11, Clements-lane, Lombard-street, London.

HENRY BOXBY AND CO., EXPORT BEER MERCHANTS, Agents for, and bottlers of, BASS'S ALE, BARCLAY'S PORTER, and GUINNESS'S STOUT. 40, LIME-STREET, LONDON, E.C.

BOTTLED ALES AND WINES, &c. "NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS and COOLERS. Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future. SEYMER & CO., 37, Eastcheap, E.C.

HOTEL ABBAT. PLACE STE. CATHERINE, ALEXANDRIA.

The Proprietor of this Establishment begs leave to call the attention of Passengers and Families to his Hotel, where they will find every convenience and comfort combined with moderate charges. Waiters European, table both English and French, wines of the best vintage, and all arrangements such as he hopes will give satisfaction to his clients.

Baths near the Hotel, and an English omnibus at attendance upon the arrival of the Train and Steamers.

Established A.D. 1746.

BLAIR'S GOUT AND RHEUMATIC PILLS.

Price 1s. 1½d. and 2s. 9d. per box. This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part. Sold by all medicine vendors. Observe "Thomas Prout, 225, Strand, London," on the Government Stamp.

OVERLAND ROUTE.

"I have subjected Plumb's Arrow-root to careful ex-
amination, microscopical and chemical. I find it to be
perfectly genuine, and of superior quality; equal in all
respects to the best Bermuda, for which so high a price is
usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which
bears the signature of A. S. PLUMBE, 3, Alic-place, Alic-
street, London, E.

Retailed in London by Snow, Paternoster-row; Ford,
Islington; Morgan, Sloane-street; Williams and Lloyd,
Moorgate-street; Meades, Canberwell.

AGENTS WANTED.

CLOGGY BLACK INK—WHY USE IT?

FRANK BAILEY, Twenty Years Practical

Ink Manufacturer, can warrant his IMPROVED
FILTERED WRITING FLUID to flow freely, never
thicken, and turn intensely Black.

Particularly adapted for Hot Climates

Depot: 10, Cursitor-street, Chancery-lane, London.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins,
Rheumatism, Lumbago, or who are given to corpulency,
are advised to wear NELSON'S MEDICATED BELT, as
it gives a great support to the entire frame, and a comfort-
able and genial warmth to the back and abdomen, promot-
ing health and digestion. Gentlemen who ride for business
or pleasure should wear this belt as a preventive of Rup-
ture, &c.

NELSON'S MEDICATED MARINE BELT for the
prevention of Sea Sickness and the support of the back and
loins during a long voyage.

"All those whose duty or pleasure calls them to sea should
possess this Belt, for putting aside its use on board ship,
it is invaluable as a riding belt, fitting easily, and support-
ing the back."
"MARK PERCIAVAL."

These Belts are sold by Mr. WHITEBURN, Chemist, 174,
Regent-street, price 21s. each, or direct from the Maker,
WM. ELSTON, 12, Avery-row, New Bond-street. Circulars
free. Orders from the country must have the size of waist
and hips, and a post-office order for 21s., payable to WM.
ELSTON, at Cavendish-street.

These belts can be had of any tailor in the kingdom.

FACILITIES in BOOK-KEEPING

DRAPER'S PATENT SEMI-DETACHED DOUBLE
REFERENCE INDEX effects great saving of time, and
expedites posting. All descriptions of Account Books
fitted with Patent Index. Account Books, Copying Ma-
chines, and Stationery supplied, of the best quality,
Wholesale and for Exportation, 5, Tower-street, London.
Sample of Patent Index can be seen at Mr. GEORGE
HOFMES', Hong Kong. Sample Book of Papers, with
prices, forwarded on application.

SUBMARINE TELEGRAPH COMPANY.

MESSAGES are now received for the LEVANT,
Charge for 20 words as follows:—

Athens, 41s. 9d. | Piræus, 41s. 0d. | Syra, 39s. 0d.
Chios, 37s. 0d. | Smyrna, 41s. 9d.

Per Francis I., from Marseilles.—Monsr. Imbart, and three Italian Padres, Scirati, Giacomo, Volenden Simeon, and Gaet na Fairui.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The American frigate *Powhattan* was to leave on the 10th February for San Francisco, with the Japanese ambassadors, and suite of seventy attendants.

It appears that the *C. L. Devan*, which was reported by last mail to be lost, is all safe.

NAGASAKI.

A meeting has been held in connection with the fires reported in our last, for the purpose of establishing a Volunteer Fire Brigade, and for the formation of regulations and bye-laws for the government of the same. All residents will become members, and are required to attend in person, armed with an axe, and wearing a distinguishing badge, at any alarm of fire; there are also to be station-houses, in which will be kept hook-ropes, ladders, buckets, and lanterns. H.M.S. *Roe-buck* has been cruising outside, testing the Japanese coal, and trying to find out where the principal mines are in this vicinity; she proceeded to Yedo direct to try and obtain permission from the Emperor to see the mines, and how they are worked, or could be worked, and if possible to make contracts for regular supplies. An engineer who is on board her, states that from the appearance of the different samples of coal he has had, he is of opinion the Japanese, not understanding the art of mining, work indiscriminately from bad or good seams, thereby producing a mixture unfit for general steam purposes, but that there must be splendid coal in the country, if they will only allow of the aid of a little science in working the mines.

CHINA.

PEKIN.

The death of Hwashana, lately assistant to Kweiliang, the Imperial Commissioner for Foreign Affairs, has been reported to the Emperor, and the following edict has been issued:—
"Hwashana, lately president of the Civil Board, was a man of excellent natural abilities, and of extensive learning, owing to which he had been raised to the rank of a member of the Hanlin College. He had frequently had the honour to be pro-

moted by our father, the late Emperor, until at last he had reached the position of assistant president of the Civil Board; and since we ascended the throne we raised him to the rank of president of the same Board. He was diligent, attentive, and laborious, and was always competent to perform the duties of his post. Just as we were going to employ him—his years being few and his strength to bear the duties of office good—we suddenly received intelligence of his death, which event has caused us much grief. We have issued commands that his corpse be wrapped in a Tolochin winding-sheet, and we have appointed Tsacche, our nephew, accompanied by ten officers, to repair to the place where the corpse is lying, to offer up sacrifices; and we have issued commands that his family be presented with three hundred taels to pay the expenses of his funeral, which sum will be obtained at the Kwan-choo-sze. The Civil Board will carry out every observance which is due; and all penalties of office which Hwashana was lying under shall be removed. We command that his son named Hekae, employed in the Military Board, after a period of a hundred days, be introduced to us by his superior officer.—Respect this."

The *Gazette* announces that a party of soldiers, carrying some 27,000 taels of silver from Niu-chuang to the capital, was set upon by a band of mounted robbers, near Ning-yuen. The robbers fired a volley, and the soldiers took to their heels, leaving the treasure to the freebooters, who speedily made off with it. His Majesty orders the suspension of the sub-prefect of Ning-yuen, and threatens him with further punishment if he does not recover the money and catch the bandits within a month.

SHANGHAI.

We have to repeat the remark made in our last issue, that there is no intelligence as to the action of Mr. Bruce or the Chinese authorities.

The London mail of the 10th Dec. arrived on the 3rd February.

A court of inquiry has been held on the loss of the *Lady Inglis*, reported in our last, at which the finding was as follows, viz.:—From the evidence of the master and chief mate, it appears that the vessel struck on the night of the 25th December last, on a reef not laid down in the chart, off the Cape Omac-Saki; and the court, having very maturely and deliberately weighed the circumstances of the case, are of opinion, from the evidence adduced, that no blame is to be attached to the aforementioned Mr. Henry Twizell, master of the late British barque the *Lady Inglis*, for the loss of the said vessel, but the court is further of opinion that blame is attributable to the lee lookout at the time the ship struck. Capt. Twizell, Mrs. Twizell, infant and servant, with two mates, carpenter, steward, and four boys of that ill-fated vessel, arrived here on the 26th Jan. by the *Azof*, from Kanagawa.

If the reports concerning the rebels be correct, the government has now much more to fear from them than from the outsiders, Russians, French, and English, all put together. The largest part of the old Kwang rebels appear once more to be directing their course towards the north; and the local bands, now as formerly, go before them, and follow in their way. The belief is strong among the native officials in Shanghai, that the rebels are close to the capital of Honam, being already in possession of the prefectural city Kweitch, on the right bank of the Yellow River.

On the 20th January a funeral mass was celebrated at the Cathedral of Tuncadon for Madame de Montigny, wife of the Consul-General of H.I.M. the Emperor of the French, at this port, whose death, which happened at sea between Malta and Marseilles, on the 5th November, has created unanimous and well-deserved regret among the community. The bishop himself officiated on the occasion, and nothing was wanting which could give proper solemnity to the mournful ceremony, in which the friends of M. de Montigny took a part.

Messrs. Crampton, Hanbury, and Co., have addressed a letter to the *North China Herald*, complaining of the settlement at the Consular Court of their case against Chang, and which was confirmed by Mr. Bruce as reported in our last. The P. and O. Company's steamer *Azof* continues to trade to Nagasaki.

NINGPO.

Matters in connection with the coming war with foreigners are continued to be treated with the indifference as noticed in our last. The New Year's rejoicings have passed off quietly, and the only topic now exciting general attention is a rather serious fight which has lately taken place, in the adjoining Foo of Shaou-lying, between the retainers of an extensive landowner and his tenantry, in consequence of his attempting to exact

exorbitant rents. Some tens on both sides were either killed or wounded, which led to the intervention of the Ningpo Taotao with a force of Braves, Shaou-ying Foo as well as Ningpo being under his jurisdiction. They have already succeeded in capturing two of the ringleaders, thus restoring tranquillity to the disturbed district.

FOO-CHOW-FOO.

It appears that there are eight foreign flags hoisted at this settlement, namely, British, United States, Danish, Hamburg, Spanish, Netherlands, Portuguese, and Swedish. The foreign population consists of 55 British, 37 Americans, and 13 Germans, &c. We noticed in our last several attacks upon Europeans. A correspondent of the *China Mail* reports the following:—"On the 25th of January, our worthy consul and family were out strolling towards a flower garden. As they had occasion to return through a village in the vicinity, the natives mobbed, insulted, and pelted them with mud, &c. This act of wanton impudence, we learn, was without delay reported to the prefect, and we have no doubt that instant vengeance was demanded upon the heads of those vulgar creatures. Nevertheless it is but to-day, as we were looking towards the gates of the palatial residence of H.B.M.'s representative, we beheld, and lo! there were issuing forth four or five portly policemen, all *cap-a-pie* rigged as *ch'ai-yih*, and our curiosity was satisfied only when we were assured they were proceeding with the *Lien's* warrant to visit the obnoxious hamlet, and capture the insulting villagers. This after nearly a fortnight had expired since the day of the insult! Probably such sickening delay of attending to the claims of justice is traceable to the necessity, which a Chinese mandarin would insist upon, of observing certain forms, communicating with this official and that board, and waiting for many days, &c.; but all we can say is, out upon such red-tapism."

The British Consul has issued a notice to foreigners that they had better desist from rapid riding along the narrow streets, and throughout the villages, and to avoid taking dogs with them.

SWATOW.

A collision has taken place between the Chinese Custom-house boats and the British barque *Chin Chin*, Captain Saunders, of Hongkong. The *Daily Press* thus reports the case:—"Captain Saunders duly reported himself at the Double Island Custom-house, and obtained a permit to proceed to Swatow. During the night Captain Saunders' attention was drawn to a China boat which had anchored so close to him as to give him a foul berth. He hailed the boat, when a notorious ruffian, named White, answered in the most blasphemous obscene manner, stating that it was a Custom-house boat, and that he would take the ship, &c. &c. He commenced preparing for action, beating the Chinese crew in a brutal manner, and then hove up the anchor. Captain Saunders warned him not to come alongside, but the scoundrel was violent and abusive to a degree, Captain Saunders then fired his double-barrelled gun with a ball in each barrel over the China boat, trusting that the man might be intimidated; but no, he went on loading the guns and run right under the *Chin Chin's* bows. The crew of that vessel being Europeans were hardly likely to submit to this. They collected on the forecastle, and, finding threats useless, they fired into the China boat twice only; first small shot, and then a bullet. The small shot wounded some of the Chinese, and the bullet took fatal effect on another. The boat then sheered off, and, after attaining some distance, fired both grape and cannister at the *Chin Chin*, fortunately without effect; but such was the forbearance of Captain Saunders, that, although his large guns were loaded, he never returned this fire. In fact, from first to last, the lenity and circumspection evinced by those on board the *Chin Chin* is worthy of all praise. There being no tribunal to refer the matter to on the spot, Mr. Lay has come down here to have the subject taken up. As law here goes by favour, like kisses, Mr. Lay being of course a bravado to the patronage of the Bruces, will naturally move effectively, and cause Captain Saunders both trouble and expense. We are sure that the public sympathy will support Captain Saunders, and that he need fear nothing; for in our Supreme Court ample justice will be done, and all extraneous influences ejected. Meantime the *Chin Chin's* papers being in possession of the Chinese Custom-house, the vessel is virtually under seizure. One of Her Majesty's gun-boats was despatched to Swatow to procure a settlement and examine into the matter. The following notification has been issued by the Customs' authorities:—"The Governor General and Hoppo of the district, having issued instructions on the 18th day of January, 1860, that a

portion of the duty upon opium, viz., ten taels per chest, should be levied upon the article on its discharge from the ship. The public is hereby notified, that the abovementioned amount will henceforth be collected by this office.—W. Wallace Ward, Commissioner of Customs."

HONG KONG.

Further reinforcements have arrived from Calcutta per steam troop ship *Adventure*, consisting of Lieut.-Col. Sargent, 3rd Buffs, Lieut. Beeville, 19th Bombay N.I., Capts. Gaynar and Burton, 99th Regt., Lieuts. Townshend and Jacob, 99th Regt., Ensigns P. Folliot, B. Somerset, E. Egan, and 487 men.

The emigration to the British West Indies continues to proceed satisfactorily under the superintendence of Mr. Austin. The *Minerva* cleared on the 8th Feb. with 233 men, 65 women, 8 boys, 2 girls, and 2 infants; total, 310. The *Red Riding Hood* which we noticed in our last, sailed from Whampoa on the 23rd January. One of the most prominent features of Mr. Austin's management is the ample space he allows them on board ship. The *Minerva* is a vessel of 829 tons, and has only 310 on board; in former times, a vessel of this size would have 400 to 500. We have much pleasure in announcing that the Governor of Hong Kong has reduced the period of sentence passed on Mr. Tarrant to six months; this period would expire on the 20th inst., consequently at this date that gentleman is free. A perusal of the following letter, published in the *China Mail*, will show there was much need of it:—

"The Gaol, 1st February, 1860.

"M. MacLeod, Esq., *China Chronicle*.

"SIR,—A friend has just sent me your issue of Monday, and draws my attention to the article regarding what you call the violent and injudicious clamour on the subject of my incarceration; and you designate the *China Mail's* account of my treatment as purely fabulous. You opine that the press demanded strong and forcible means to reduce it; and you assert that each of your contemporaries has been obliged to apologise and retract. Permit me to tell you that the *China Mail's* account of my incarceration was in no way fabulous. I read the article hastily, and returned the paper. I presume that of Thursday last was the one you refer to. If anything, it was understated, not overdrawn. Yes, it was considerably understated; and not only may the Governor flog me, but punishment of some kind has been threatened, and that simply for resenting, in the presence of a justice of peace, a coarse insult. Why, no longer ago than Saturday week, I was so grossly insulted by the gaol governor, that I had to send for a justice of the peace, and wrote both to the Colonial Secretary and the Governor of the Colony, and yet I have no redress, and am still liable to have my bed-clothes, person even, searched, when the gaol governor wishes to annoy me. If I give him my word of honour there is no tobacco in my cell, which is what he wants to find, he tells me he won't take my word. To a sensitive man, as everyone in Hong Kong knows me to be, is not this cruelty? Indeed, what with anxiety about this treatment and other matters, I am so nervous and afflicted with pain over the region of the liver (incipient inflammation) that I am obliged to-day to put myself in the doctor's hands. What do you mean then, sir, by affirming an untruth? Have I not enough to contend with without your addition? You may opine what you like about the strong means requisite to reduce the press, but please adhere to truth when you point your inferences. Excepting in my libel actions (five, or properly four), I have never been called on to retract. Two of my libels (?) were justified in court. For one I paid £100; and when I tell you the subject was Dr. Bridges's moderation in costs, you will judge how far morally I was wrong. As regards the action for which I am in here, do not be too hasty with your decision; it may be that Colonel Caine will find he dug a pit for another, and fell into it himself. I have omitted one call for retraction,—a call which I point-blank refused; and when I tell you that if my informant on the subject lied the *Times'* correspondent lied also (as it turned out, if General Van Straubenzee's word were preferable), you will see how far I wilfully offended. I mark this letter private, to indicate that I do not want it printed. I have no doubt but Mr. Wilson is quite able to defend his own allegations in this respect. I perfectly agree with you that the 'clamour' at this stage is in marked contrast with what preceded; and to me, who may be deemed an impartial observer, the clamour savours much more of fear for their own chickens (as Wilson once put it) than of commiseration for me, who might die and be d—d, I'm sure, for aught they care personally.

In conclusion, let me ask you to leave me and my affairs alone. Nothing that you, one and all, can say, will abate one jot of my imprisonment—nor, I am confident in the belief, will it abate the progress of truth about to vindicate itself. As I wrote this, my dinner meal came, one mouthful (I am serious) of boiled pork, and three of vegetables. I've gulped it down in less time than I could write this page full. Had I the means to send, or would the craving of a hungry stomach permit, I would have sent it all to you as a proof of the style of my treatment, 'a plain unvarnished fact.'—I am, sir, your obedient servant, W. TARRANT."

H.M.S. *Imperieuse* and *Pioneer* arrived on the 31st of January.

The *Chey Chase* and *Yangtze* both started for Shanghai together on the 11th of February, upon the delivery of the Europe mails. Much interest is felt here as to the result of the race. Steamers on the coast find but poor employment, and it is rumoured that the fine American steamer *Peiho*, which has latterly maintained a rapid communication with all the open ports and this colony, will shortly be withdrawn. This will be a sad pity, and it would be a most expedient act if the British and United States Governments were to allow her owners a subsidy.

The rumours at Canton alluded to in our last have proved to be entirely without foundation. The case of *Tam Achoy v. The Captain and Officers of the Steamer Sir Jamsetjee Jejeebhoy*, has not yet been decided by the Supreme Court.

The *China Chronicle* announces that the editor of the *Daily Press* has been committed to take his trial at the next Criminal Sessions for a libel on the Rev. M. Lobschied.

The Hong Kong Government *Gazette*, printed and published by Mr. D. Noronho, has the following return of notes in connection with the Oriental Bank—Notes issued, 627,970 dollars; specie in reserve, 300,000 dollars;—and of the Chartered Mercantile Bank—Notes issued, 342,291 dollars, exclusive of those issued before incorporation; specie in reserve, 150,000 dollars.

His Excellency Governor Robinson and Acting Judge Adams seem to be conducting their respective duties to the satisfaction of the community. This is a relief to parties in this country who have interest in the colony, for during the past ten years the dissatisfaction and squabbling has been quite intolerable.

PHILIPPINES.

MANILA.

The enthusiasm in favour of the war between the Cross and the Crescent still continues, and has taken a more tangible shape by a voluntary subscription opened under the auspices and by the direction of H.E. the acting Captain-General. No doubt a large amount will be collected, for the whole of the natives and Spaniards will subscribe according to their means. Don Gabriel Gonzales, who is appointed to receive the subscriptions, has given for himself and children 300 dols.; the commercial firm of Bustamante and Nephews 2,000 dols., and its head, Senor de Castro, 1,000 dols. more; the editors of the *Boletin* subscribe 200 dols., and the people employed in their establishment jointly 60 dols. A pretty large sum has also been contributed towards the re-erection of the church and college of the Catholic mission at Hong Kong, which were burned down some months ago.

On Captain Norie's (of the *Rajah*) last visit here, he was presented by the foreign community with an address and a gold watch and chain, in testimony of the esteem in which he is so generally and deservedly held here by all who know him.

COCHIN CHINA.

SAIGON.

We noticed in our last the opening of this port we now subjoin the French Admiral's proclamation, dated February 2:—"By intolerable acts of cruelty—imprisoning and torturing some, and putting many to a painful death, the Annamese Government committed towards French subjects the most culpable acts. To put an end to such a state of things, France declared war against the kingdom of Annam, and Spain, which had equal injuries to resent, united her soldiers to those of France. The Emperor of the French commissioned me to establish by a treaty, and to secure for the future on a firm basis, the relations of French subjects with those of the Annamese country, similar to those existing in civilised countries, even as in China and Japan, or to continue the war. I exerted myself strenuously to obtain by a treaty that which is recognised by nearly all the nations of the earth—namely, a certain freedom of commerce and the guarantee

that no French subject would be unprotectedly sacrificed to the caprice of the uncivilised mandarins. I stipulated also that in the precincts of the kingdom none, if duly obeying its laws would be persecuted solely for their religious principles. I was not even granted these simple and to them unimportant conditions; the Annamese Government places itself without the pale of civilisation, and obliges me to continue the war. My first act is to place the city and territory of Saigon under French authority, no Annamese soldier or mandarin will be allowed within it, and if captured will be considered and punished as a spy. The laws and usages of the country will be respected, but the administration of justice and measures of public safety will be in the hands of the French authorities. The ulterior steps which I shall shortly take will be beneficial, and bring to this city a large trade. The justice and equity of our laws, protecting equally the rights and interests of all men, will no doubt call from all parts numerous inhabitants, and you will soon learn to appreciate and rejoice at the blessing of the benign influence of European civilisation.—Saigon, 2nd February, 1860.—The C. Amiral Commandant-en-Chef, PAGE."

SIAM. BANKOK.

The following interesting particulars have been placed at our disposal by a correspondent dating from Bankok, 28th January:—

"I have just returned from a journey to Pra Bat, the Mecca of the Buddhists of this part of the world. There is shown to you the footprint of Buddha imprinted in the rock, above which is built a gorgeous little temple almost covered with a bright mineral which resembles gems of various colours at a short distance. Pra Bat is built upon rocks jutting out from an almost perpendicular hill; it may be appropriately called the City of Temples, as there is not a single dwelling which is not occupied by Zalapouns. Pagodas and wats, containing Buddhs of various influences, are only to be seen, and most of them are difficult of access from the slippery nature of the rocks, which are much foot-worn. The last temple I visited contained a Buddha whose sole influence was that of curing gout. It resembled Magog very much, in a sitting position; and two pilgrims were manipulating his swollen legs.

"A white elephant has been seen above a hundred miles from Bankok. The first person who gives information of a white elephant receives, besides other privileges, one hundred catties of silver—£1,000. The second king, accompanied by his brother Chow Fa, grand master of the elephants, with a numerous suite, will leave Bankok on or about the 1st of Feb., for the purpose of catching it. Great rejoicings will follow should they succeed. The last white elephant died on the 8th Sept., 1855, but, as a facetious missionary observes, 'the nation still moves on prosperously.'"

We have to acknowledge the receipt of the *Bankok Calendar* for 1860, a very creditable production, from which we make the following extract:—

"Dec. 12th.—Sir Robert Schomburgk, accompanied by Mr. Clark, interpreter, left on a tour overland to Maulmain *via* Chang-mei, the capital of the tributary kingdom of Laos. He will, it is hoped, make many valuable geographical observations in regions as yet very little known by Europeans, which is true with regard to three-fourths of Siamese territory. The sovereigns of the country even, with all their praiseworthy advance in knowledge, know very little of their own domains. Native maps cannot be relied upon at all."

BORNEO. SARAWAK.

The following is a continuation of the article noticed in our last, which was communicated to the *Straits Times*:—

"The country is rich—very rich—in mineral wealth of nearly all kinds, and requires merely an adequate capital to be developed. There is, we have been informed by the very party who examined it, a coal stratum extending through upwards of a million acres. Gold-dust is to be found beneath all the dry river courses along the declivities of the mountains and hills. Iron is abundant all over. There are diamond mines—now left unworked—copper ore has been discovered, which would yield 70 per cent.; and there are even pearl oyster banks.

"The agricultural resources of the country are great likewise. Paddy yields two hundred-fold. Borneo could be made into a rice-growing country, which would supply food for fifty millions

of mouths. Indigo thrives beautifully. We have seen the plants there far higher, and more leaf, than any in Bengal. The forests could supply gutta percha for many a decade yet to come. Manchester and Liverpool cry out more cotton, more cotton! Here is Sarawak capable of producing—and in fact does produce, though, as it must needs be, because of the paucity of cultivators—the best, A 1, of cotton. Sarawak is really an El Dorado compared with the West Indies, after which so many ran mad in dreams in the times of our great-grandfathers. What is required is capital, and a spirit of enterprise. British enterprise must either have degenerated during the last few centuries, or it must have been spread into a thousand channels, widely apart, that such a country as Borneo is still left untouched. The Dutch—exclusive in spirit—are secretly tapping the wealth of the island; but it is after all only a fraction of the wealth that they abstract with all their efforts. Let a band of 100 English gold-seekers, or prospectors, settle down on any part of the island, and they could defy any force the Malays might bring against them. They would always have the Dyak—the more numerous—population with them, if they regarded the sanctity of their homes, and did not take advantage of their obedient good-nature to tyrannise over them in any way. Cannot such a band, even of forty or fifty, be formed from among the 2,000,000 of half-starved, wretched Irish peasantry? Verily, yes, with a *leetel* money, and a *leetel* energy, and a *leetel* persuasion. The Jesuit missionaries at Labuan, too, would not be sorry. Just as Rome colonised whatever conquests she made, and just as England must colonise India before she can hope to be permanently established in it, even so must Rajah Brooke colonise Sarawak ere he can hope that his demise will not be the occasion of serious troubles."

JAVA. BATAVIA.

The war on Boni has been brought to a close by the complete reduction of that country. On the 14th December General Van Swieten proceeded with a column from Palakka to Pampanua, accompanied by the Prince Aru Palakka and his followers. The march was accomplished in three days.

The contract entered into between the Dutch Government and Messrs. Enthoven and Co. for lighting Batavia with gas has occasioned considerable surprise there, as it was apparently concluded without the knowledge of the Indian Government, which was in treaty with Mr. R. W. Thompson for the same purpose.

Out of a detachment of European troops which lately arrived at Batavia, 23 out of the men were landed in irons. The leader of the mutiny on board the *Alcor* had been tried by court martial and condemned to death.

MALACCA STRAITS. SINGAPORE.

Mr. Groll, the chief engineer of the Singapore and Batavia Cable, has discovered and repaired the two flaws announced in our issue of the 28th of February. We regret to add that he believes the fracture near Batavia to have resulted from an attempt to cut it, in order to obtain the wire and gutta percha. The other break near Lucipara was most probably occasioned by a ship's anchor. The line is again open.

The *Singapore Free Press* announces a report that a Bill would be speedily passed through the House incorporating the settlement under the Colonial-office. Our contemporary will find, on receipt of the last outward mail, that his information is in advance of the facts.

Her Majesty's Indian Navy steamer *Punjab* has arrived here, having in tow the transport sailing ships *Cressy* and *Sir Robert Seppings*. The *Punjab* left Madras on the 1st instant. On board of each of the transports are 250 men of Her Majesty's 44th regiment, for service in China.

H. E. General Montaubon, the French Commander-in-Chief, has arrived in the mail steamer *Ganges*, and landed under a salute; there was a guard of honour at the landing place, and most of the officials were in attendance to meet His Excellency, who was shortly to embark and proceed in the mail steamer to Hongkong.

PENANG.

The *Penang Gazette* has the following:—"In the ordinary course of nature the fruit season of the Straits includes the months of June, July, and August; but there are exceptions to this, as was the case last year, when trees produced as heavy crops in the second season as in the regular fruit months.

Trees thus sometimes bear two crops in one year, but when they produce in this double ratio they generally take a rest for the next year; and even in this bountiful climate of ours trees that bear a heavy crop one season give but an indifferent one the next. This irregularity of season does not appear to be local. It extends over the Straits, nor is it confined to indigenous trees. The nutmeg crops are so inconstant as to defy the calculations of the most experienced planter. Collections rise and fall irregularly and without any appreciable cause, so that it is impossible for a planter to predict with any exactness what his crops are to be. This uncertainty in the Myristic crop is so marked that even in neighbouring estates of similar extent, the difference in collections amounts to several thousands daily, and coolies are often blamed, sometimes without reason, we believe, for making away with the nuts. This fluctuation in the case of the nutmeg may arise partly from cultivation, but as very few indigenous fruit trees receive any attention whatever, or manure beyond what nature bestows on them, it is clear that cultivation can have nothing to do with it in their case. The reason which strikes us as best accounting for the phenomenon is the varying succession of drenchings and droughts to which the Straits are exposed. The latter part of the season of 1859 was remarkable for the amount of rain, and for a second drought which took place in July, and we are inclined to believe that the heavy rains after the drought may have something to do with the second fruitage. We have heard of root pruning and other appliances for checking the growth of plants and throwing them into a bearing state, and there may be some truth in the reason ascribed by the Malays for the *musim dua kichil*—the little fruit season,—high winds shaking the branches. What crops we have seen at this time have been on trees either pretty well exposed or growing near the sea. To the naturalist the subject is well worthy of attention, and we trust some of our older residents will favour us with their views on the subject. Colonel Low mentions that besides the usual crop of the three months above named, there is occasionally a small irregular one at some intervening period; but as this is all he says on the subject, the crops may not have been so plentiful then as now."

COMMERCIAL REPORT.

LONDON, March 26, 1860.

The outward mails of the 27th December reached Hong Kong on the 10th February, the present advices being up to the 15th, being 40 days *en route*, or fully three days quicker than usual. The China New Year's holidays have passed off, and business has been actively resumed at all ports. The most noticeable event is in connection with the new Chinese customs at Swatow, which will be found detailed in our summary. A long examination of coolies for the Havana has taken place before the allied commissioners at Canton, who have addressed a circular letter to all the consuls on the subject, in which they make the following remarks:—"We doubt not that you will concur with us in thinking that it can be no sufficient defence of the system to say that this violence and deception is in most cases the act of the Chinese, and not of foreigners engaged in the trade. The latter must long ere this have become acquainted both with the true character of the instruments they employ, and the abuse to which the payment of head-money must lead; and there is moreover evidence to show that the ill-treatment of which the coolies complain is not unfrequently inflicted on board the foreign vessels, and by foreign hands." The following examination of one of the victims may be taken as a specimen of the whole. The *Daily Press* has published 60 examinations with some comments intended for the information of the members of Parliament:—"Ung Cheo-Fo, a Tartar, states: About 12 days ago I was selling herbs in the street of Canton; it was in the south suburbs. A man (Chinese) came up and asked me to go to Honam to fetch something to Canton, got into a boat and was taken to Chung Chow. I objected to go to that place, and was struck. I was placed on board a foreign ship and asked if I would go to a foreign country. I declined. The foreigner said I was to be taken back, as I had refused to go. I was again put into the kidnapping boat and beaten on my back with the flat of a sword. I received four blows, and was told I must, when on board the foreign ship, say I was willing to go, or I should be killed. I was afraid, and consented to go. I was kept below in the foreign ship, my dress was changed, and I was not allowed on deck. There were 189 coolies down in this place; we had plenty of room and plenty to eat—all were unwilling to go, and had been kidnapped. Six days ago I was

brought away from the foreign vessel." It appears the *Messenger* is still detained, and that the *E. Pereira*, *S. Casard*, *Solide*, are loading for the Havana, and the *Galilee* on French account for Martinique. It is reported that this trade at Macao is to stop on the 1st of April, and at Swatow the new Custom-house officers will look into abuses.

The Spanish Government, it is announced, intend running their mails between Manila and Singapore, instead of Hongkong, as hitherto. We presume this applies only to the S.W. monsoon season.

An important legal case has been tried at Hongkong, arising out of the purchase of a cargo of rice made by Messrs. Revelly and Co., of Penang, at the request of Mr. Gassett, of Hongkong, which resulted in a verdict for the defendant, the amount claimed being about 25,000 dollars, owing to the rise in the price of rice at Akyab, which Mr. Gassett contended he was not liable for.

Business at Japan appears to be fully resumed, and it is expected that the port of Miaco will soon be opened.

EXPORTS.

TEA.—All accounts agree in the shortness of the supply of the present season, but greater confidence appears to have sprung up among the tea men in making arrangements for the next season's supply. Our export tables show an increase of nearly twenty millions over last season to Great Britain, of two millions to the United States, the Continent one and a-half millions, and Australia two and a-half millions. At Shanghai the settlements are announced at 7,500 chests of Congou, at 24 to 26 taels for Ningchow, 25 for Kaisow, and 21 for Hohow. The market may be considered to have had a downward tendency. At Foo-Chow-Foo settlements 16,000 chests of Congou, at 10 to 15 taels for common, and 16 to 20 for better kinds, 3,000 half-chests of Oolongs, at 18 to 22, purchasers being very difficult. To the United States the season appears to have closed. At Amoy no settlements or shipments. At Canton 28 chops of Congou are reported at 25 to 32 taels for Oopacks.

RAW SILK.—At Shanghai the settlements are reported to be nearly 3,000 bales, at rates slightly in advance of last quotations. Tsatlee No. 1 is quoted at 4.55 to 65, Taysaam No. 1 3.85 to 90. The settlements appear to be 10,000 bales short of last season, the unsold stock is about 4,000 bales. At Canton the stock is very small, rates being 465 dols. for re-reeled Kum-Chook.

DRUGS, &c.—Cassia Lignea: no settlements reported—stock 3,000 piculs, for which 17 to 17½ dols. is asked. Cassia Buds: A settlement of 60 piculs is reported at 34 to 36 dols., leaving no stock. Cassia Oil: Settlements have been made at 295 dols., and can now be made on easier terms. Star Aniseed: No settlements are reported—50 piculs are on the market, for which 18 dols. is asked. Aniseed Oil: Can be had at 210 dols. Galls: No settlements—stock 100 piculs, for which 18 to 19 dols. is asked. Rhubarb: No settlements—stock 300 piculs, 35 to 65 dols. is asked.

IMPORTS.

At Shanghai shirting and T. cloths have been sold to a fair extent. At other ports the sales have been on an average. American drills are quoted at rather less rates. Woollen stocks have been considerably increased, but sales continue at a slight reduction. Cotton Yam: Stocks heavy and prices lower.

METALS.—Stock of iron large. Tin and lead in fair request.

MANILA.—The import market is in the same firm state with light stocks. The *Reyna dell'Oceano*, with a cargo of English goods from Liverpool, had put into Batavia dismantled. In exports, 16,00 piculs of sugar current clayed had been sold at 5 dols. 18c., and 3,000 at 5 dols. 12c.

SINGAPORE.—During the fortnight there has been more animation in the demand for manufactured goods, and as the arrivals have been small, the stocks of suitable descriptions, particularly plain grey goods, are now very small in first hands. In exports the shipments in progress for England are on a very small scale, the shortness of supplies tending to keep up prices beyond the views of most shippers.

EXPORTS FROM MANILA.

Per Aurora for New York: hemp, 15,683 piculs; sapan wood, 493; cigars, 262 mil. Per Southern Cross to Boston: hemp, 22,784 piculs; sugar, 8,935; sapan wood, 897; cigars, 1,015 mil. Per Winged Arrow, to Boston: hemp, 9,083 piculs; sugar, 3,833; sapan wood, 620; cigars, 410 mil. Per Margaret Mitchell to Sydney: sugar, 17,600 piculs; coffee, 240; rope, 244; cigars, 1,466 mil.

EXPORTS FROM SINGAPORE.

Per *Laughing Water* to London; gambier, 1,346 bales, 3,308 piculs; black pepper, 4,573 bags, 3,321 piculs; white pepper, 240 bags, 233 piculs; 141 bags curch, 163 piculs; 262 boxes sticklac, 214 piculs; 152 slabs tin, 302 piculs; blocks 19,517, bags 65, gutta percha, 1,579 piculs; 39 bags cubebs, 25 piculs; 89 baskets India rubber, 250 piculs; 6,183 bundles rattans, 378 piculs; 55,600 canes; 137 cases merchandize; 431 boxes tea; 1 case cigar.

Per R. B. Forbes, to Boston: in bulk and 70 bags black pepper, 718 piculs; 25 bales gambier, 44 piculs; 24,305 bundles rattans, 838 piculs; 890 boxes tea.

Per *Cyclone*, to Boston: 2,001 bales gambier, 3,439 piculs; 411 pieces sapanwood, 54 piculs; 759 bags sugar, 489 piculs; 113,710 bundles rattans, 4,724 piculs; 650 boxes tea.

Per *Calder*, to Liverpool: 915 bales gambier, 1,953 piculs; 1,348 bags rago flour, 1,484 piculs; 398 bags black pepper, 292 piculs; 197 bags white do., 198 piculs; 1,123 pieces sapanwood, 168 piculs; 2,250 bundles rattans, 88 piculs; 117 boxes gum damar, 124 piculs.

Per *Cambert*, to Havre: 2,109 slabs Malacca tin, 1,510 piculs; 2,006 bales gambier, 4,367 piculs; 603 baskets do., 751 piculs; 7,412 bags black pepper, 5,403 piculs; 3,225 bags coffee, 3,037 piculs; 810 buffalo hides, 201 piculs; 28,072 pieces sapanwood, 409 piculs; 11,360 bundles rattans, 402 piculs; 3 cases nutmegs, 2 piculs; India rubber, 140 piculs; gutta percha, 120 piculs; gum damar, 200 piculs; 2 cases tortoiseshell; 50,000 Malacca canes; 21 baskets, 6 cases, shells; 23 packages sundries; 10 cases Nankeen, 1 case chinaware, transhipped.

EXPORTS FROM PENANG.

Per R. B. Forbes, to Boston via Singapore: tin, 549 piculs; black pepper, 1,000 piculs; nutmegs, 107 piculs; rattans, 211 piculs; tapioca, 201 piculs.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

SHIPPING INTELLIGENCE.

ARRIVED.

At HONGKONG, MACAO, and CANTON.—From London: Jan. 30, *Cadiz* (str.); Feb. 1, *Ringleader*; 11, *Singapore* (str.) From Portsmouth: Jan. 31, *H.M.S. Imperieuse*. From Sunderland: Feb. 9, *Amoy*, *Trader*. From Hamburg: 6, *Mariet* *Philippine*; 7, *Bertha*, *Kohen*.

At SINGAPORE.—From London: Feb. 11, *Caroline Agnes*. From Liverpool: 8, *Crisis*. From Sunderland: 7, *Araby* *Maid*. From Glasgow: 7, *Caledonia*. From Portsmouth: *H.M.S. Reynard*. From Hamburg: 18, *Arab*. From England: Jan. 24, *H.M. steamer Scout*; Feb. 21, *Ringdove* and *Simoom*.

SAILED.

From SHANGHAI.—For London: Jan. 24, *Bride of the Seas*; 26, *Donna Anita*; 29, *Melancthon*. For New York: 24, *Canvas Back*.

From Foo-chow-Foo.—For London: Feb. 2, *Spartan*; 3, *Spirit of the North*. For New York: 4, *Flying Childers*.

From HONG KONG, MACAO, and CANTON.—For London: Jan. 29, *Myrtle*; 30, *Norma* (steamer).

From SINGAPORE.—For London: Feb. 12, *Laughing Water*. For Liverpool: 20, *Calder*. For Falmouth: 7, *Imina Brono*. For Europe: Jan. 31, *H.I.M. steamer Catinat*; Feb. 8, *Fanny Kirchner*. For Boston: Feb. 18, *R. B. Forbes*; 20, *Cyclone*.

LOADING.

At SHANGHAI.—For London: *Biobio*, *Cornubia*, *John Robinson*, *Maori*, *Vanguard*. For New York: *Edwin Forrest*, *Golden Rule*.

At Foo-chow-Foo.—For London: *Aalborg*, *L. Brown*, *Yaratilda*. For New York: *Sarah H. Snow*. For Sydney: *Asa Packer*. For Melbourne: *Wild Wave*.

At AMOY.—For Havana: *Ann*.

At HONG KONG, MACAO, AND CANTON.—For London: *Banian*, *Saxonville*, *Dominion*, *Sophie*, *N. Morrison*. For Liverpool: *Abeoha*. For New York: *Intrepid*. For Havana: *Francois I.*, *J. Wakefield*, *Live Yankee*, *Maria*, *Elizabeth*, *Albero*, *Messenger*, *Solide*, *Governor Morton*, *Guadeloupe*, *Pioneer*, *Santa Lucia*, *Sigisbert Casard*. For Sydney and Melbourne: *Continental*, *Eagle*, *Francis*, *P. Sage*, *Helios*, *Justyn*, *Minnehaha*, *Statesman*. For San Francisco: *Aurifera*, *Black Warrior*, *Eliza* and *Ella*, *Flying Mist*, *James Browne*, *Robert Passenger*, *Viking*.

At MANILA.—For Liverpool: *City of Boston*. For Falmouth: *Torre del Oro*. For New York: *Dardo*, *Superior*. For Havana: *Carmencia*. For Sydney: *Margarita*, *S. H. Talbot*. For Melbourne: *Olympia*.

At SINGAPORE.—For London: *Tunandra*. For Liverpool: *Athelstan*, *Potosi*, and *Crisis*. For Cape and Liverpool: *Caledonia*. For New York: *Azzan*. For Sydney: *Alma*.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Feb. 4, *Westminster*. From China to England and Continent: Jan. 18, *Solent*; 19, *St. Ia*; 27, *Chryseis*; 28, *Robert Henderson*; 29, *Scawfell*; 31, *Scampore*; Feb. 2, *Boreas*; 3, *Patna*. To New York: Jan. 30, *Maury*. To Havana: 30, *Ville de Lima*. To Melbourne: 23, *Amherst*; 27, *Blanch*. From Hamburg to Singapore: 29, *Arab*. From Melbourne: 22, *Hanlet*. From Singapore to England and Continent: 30, *Lady Raglan*. From Manila to England and Continent: 20, *Bahia*; 30 *Spirit of Trade*. To Melbourne: 28, *Charlota*. To Sydney: 30, *Margaret Mitchell*.

CASUALTIES.

HONG KONG.—The brig *Eena* was lost off Formosa. Captain and crew arrived at Tamsui, after being badly treated by the Chinese. The *China Mail* notices the loss of the *Voltaire*, from Liverpool, off Suzon, but gives no particulars.

FREIGHTS AND CHARTERS.

At SHANGHAI.—There is no alteration since our last. There is an improved request in small vessels for the coasting trade. There is also a superabundance of large ships.

At Foo-chow-Foo.—For England: £2 10s. For New York: 8 dollars.

At HONG KONG, MACAO, AND CANTON.—For London: £2. For New York: 7 dollars. For California and Australia: 23 dollars to 25 dollars passage money, and 5 dollars to 6 dollars freight. A great decrease has been made in the number of disengaged vessels, and shipping shows a material improvement.

At SINGAPORE.—The demand for vessels for the rice ports has abated, with a slight concession in rates. Tonnage is still in demand. The current rates are £2 for tin, gambier, sago, flour, and sugar; £2 10s for pearl sago and measurement goods. The *Wild Flower* is loading from Sarawak and Singapore for London, at £3 per ton all round; the *Alma*, to Sidney and back, for £700.

At MANILA.—For England: £3. For New York: 7 dollars. There has been a desire to get forward any sugar awaiting shipment, the *Sappho* being chartered for Cork and a port in the United Kingdom at £3 per ton for half-dry unclayed sugar. The *Superior* is loading at 7 dollars 50c. per 4 bales hemp for New York.

BRITISH GUNBOATS IN THE CHINA WATERS.

69 Kestrel	79 Banterer	87 Forester	94 Opossum
72 Clown	81 Firm	89 Haughty	96 Dove
73 Woodcock	83 Slaney	91 Staunch	97 Drake

Dent and Co., Yangtze; Mr. Lapraik's Undine; Messrs. Burd and Co.'s Toeywan; Messrs. Remi, Schmidt, and Co.'s Remi; Messrs. Russell and Co.'s Peiho (American).

Continental Intelligence.

FRANCE.

PARIS, March 22.

Once more has the Emperor executed one of those clever *coups-de-main* for which he has made himself famous. Again has he astonished Europe and the French nation, by announcing one of those model programmes of brilliant diplomacy which, by their invariable success, have commanded the attention while they have shaken the nerves of every state and people that has anything to risk or to lose. And behold!—*comme autrefois*—no sooner are the bills of the play distributed, and the audience are on tiptoe to know what is the plot, and how it will be developed, than the curtain rises up on the final act, and the spectators find they are but just in time for the grand *dénouement* of orchestral brass and stage fireworks. The age of long tragedies and dreary five-act comedies is past and gone. The Emperor knows that well, and like a wise caterer suits his performances to his company. The French people, bold and brave as they are when they have serious business on hand, are light-hearted and impulsive at all times. They love excitement, and tableaux, and glory, and everything that looks sunny and bright, even though the glittering particles presented to them be not always of the genuine metal. What could be a nicer, prettier, more romantic, or more poetical subject for a bit of drawing-room theatricals than a *petite comédie* "by the whole strength of the company," terminating with the annexation of Savoy and Nice, and the "*reclamation et revendication*" of the "French slopes of the Alps"? Such is the last little *pièce de circonstance* produced at the Tuileries with great success—so great indeed, and so sudden, that the critics have not had a chance of condemning it. *C'est un fait accompli*, and before gasping Europe can recover its breath to remonstrate, *voilà messieurs les Savoyards* at the feet, holding forth in the following style:—

"Sire,—In approaching your Majesty, the first sentiment which inspires us is the profound admiration for a sovereign who, after having been elected by the whole of France, has still further extended her glory and prosperity. Sire, so many natural links, so many glorious souvenirs, so many sympathies unite Savoy to France, that she trembled with happiness when the august word of your Majesty gave our country the hope that she would be called to form part of the great French family with the consent of her legitimate Sovereign. A single preoccupation checked her ardour in this matter. It was the fear of seeing dismembered in favour of Switzerland a nationality bound together by affection and so many other ties. The provincial coun-

cillors who represent Savoy have charged us, sire, to deposit at the feet of your Majesty the earnest prayer to protect our country from such a misfortune, and the municipal councillors of the principal towns unite their deputations to ours. Sire, your Majesty will appreciate the reserve imposed on a constituted body, on men who have always been faithful to their king, as they shall also be to your Majesty. But, after the acts of the Government of the King, it will doubtless be permitted us to express to your Majesty the sentiments that we entertain towards France, united to which Savoy shall find, not only greatness and glory, but also sympathy, and the safeguard of all her interests, moral as well as material. From the banks of Lake Leman to the valleys of Mount Cenis, those who have been honoured with the suffrages of their fellow-citizens have approached your Majesty to express the joy that Savoy will experience when she shall be entirely reunited to France, and be able always with that great and noble nation to have but one cry—that of 'Vive l'Empereur! Vive la France!'

Such is the language of the patriots who have not been forcibly deprived of their country, but have actually gone all the way to Paris to make the Emperor a present of it. To such a neat and pretty speech what could the Emperor say but what he did say? Why should people who ought to mind their own business stop to criticise the incidents of the *vaudeville*, or comment on the wonderful similarity in the styles of the address and the reply? We should have thought it a great piece of impertinence had the King of Denmark interfered with our English annexations of the Punjab and Oude, and why should we grumble at the French for annexing the territory and willing population of Savoy? Let us read the Emperor's reply, and feel considerably obliged to him for keeping his lively subjects amused as he does, and allowing us to go on with our "shop-keeping" and trading in peace. This is what Napoleon III. says to his newly adopted *enfants trouvés*:—

"Gentlemen,—I thank you for the kind feelings you have expressed towards me, and I accept them with pleasure. The King of Sardinia having acceded to the principle of the reunion of Savoy and the county of Nice to France, I am enabled, without failing in any international duty, to testify my sympathy and accept the expression of your wishes. The circumstances under which the ratification of frontiers is produced are so exceptional that, while answering the requirements of legitimate interests, they injure no principle, and consequently do not establish any dangerous precedent. In effect, it is not by conquest nor by insurrection that Savoy and Nice are reunited to France, but by the free consent of the legitimate sovereign, supported by popular adhesion. Everybody in Europe who does not yield to the spirit of antagonism of another epoch considers this annexation of territory as natural and equitable. The reception given to the communications addressed by my government to the powers represented by the Congress of Vienna authorise from the greater part of them the hope of a favourable examination. My friendship for Switzerland made me regard as possible the detachment of some portions of the territory of Savoy in favour of the Confederation, but in presence of the resistance manifested among you, the idea of dismembering a country which has created in the progress of ages a glorious individuality, and given to herself a national history, it is natural for me to declare that I cannot constrain, for the advantage of another, the will of the populations. As to the political and commercial interests which bind Switzerland to certain parts of Savoy, it will be easy, I think, to satisfy them by particular arrangements. I hope, then, gentlemen, to be able soon to consider you as members of the great French family. I shall have the honour to realise all your hopes, and the annexation of a country bound by so many ties to France will become for her a new cause of prosperity and progress. When you return among your fellow-citizens, tell them how greatly I have been affected by the manifestation of which you have been the honourable organs. There are among you so many descendants of families who have contributed to the honour of France in the career of science as well as in that of arms, that everything concurs to justify the work of union which is in preparation."

It is announced that Lord Elgin and Baron Gros proceed to China by the mail of the 12th April, and are quite agreed on a pacific solution of the present difficulties.

The news of the telegraphic message which had been despatched to Toulon, countermanding the embarkation of the gunboats for China, has been confirmed by information direct from that place. This fact has made many people regard the Chinese question as about to be amicably settled. Some reports say the boats are not suitable in equipment.

RUSSIA.

ST. PETERSBURG, March 20.

The departure of Prince Bariatsinsky, the conqueror of Schamyl, for his seat of government in the Caucasus, had scarcely taken place before he was succeeded by the arrival of another no less celebrated officer, viz., Count Murawieff-Amoorsky, the Governor-General of East Siberia, who, after an absence of ten years, is now on a visit to the capital attended by a large suite of aides-de-camp, secretaries, and domestics. Coming as he does almost direct from Japan and China, and of course able to give a good account of his mission, his reception on the part of the Czar and the members of the Imperial family was extremely flattering, which ensured his being received with great consideration in other circles, amongst whom he is the "lion of the day." Great curiosity is expressed to learn his opinion of the capabilities of the newly-acquired provinces on the Amoor, and I hope to be able shortly to communicate

to you some particulars of the report on the subject which he has drawn up and presented to the Emperor. It is still uncertain how long he will remain here, it being understood that he has applied for a twelvemonth's leave of absence, to enjoy, for a time, the milder climate of Paris and genial warmth of Italy.

Accounts have been received here of the loss of the *Oxus*, Captain Prutz, from London to Nicolayefsk, on the Amoor. She arrived safely in De Castries' Bay on the 18th September (old style), when the director of the Amoor Company sent out the screw steamer *St. Theodosius* to take her in tow, but the latter grounded when about thirty wersts from the *Oxus*, and remained in a position of great danger for seven whole days, when she succeeded in getting afloat again. Just then the frost set in, the thermometer falling 15 deg. Reaumur below the freezing point, in consequence of which the gulf was covered with ice, and the *Oxus* was obliged to proceed to Alaxodate, where she wintered. After discharging a part of her cargo there, she was taken in tow by the steamer *America*, but had scarcely got over the bar when the bows of the *Oxus* were cut through by the ice, and in the course of a few minutes she had ten feet of water in her hold. All attempts to lighten her were of no avail, and though a part of her cargo was thrown overboard, she could not be moved, and, becoming embedded in the ice, was abandoned. It was not before the 14th November that Captain Prutz was able to approach her in order to try to save the rest of her cargo. The latest accounts from Nicolayefsk, up to the end of that month, state that great doubts were entertained of the efforts of the captain being crowned with success.

In a paper on the antiquities of Siberia, read by M. Spasky at a late sitting of the Geographical Society, that learned gentleman gives some interesting particulars of the former history of the Mongolian race, of which the following is an extract:—"More than two centuries before the Christian era, the Mongols were divided into two branches, the Huns to the west, and the Doun-Khous to the east, the latter occupying the mountainous country bordering on the great sandy desert of Chamo, and extending from the Gulf of Corea to the Kin-ghan ranges. Schoun-Bey, who was the founder of the reigning dynasty of the Huns or Western Mongolians, belonged to the Chinese dynasty Kia-Kiou, as did also Doun-Khou, the head of the tribe that bears his name. The repeated hostile incursions of the Huns kept the Chinese for many centuries in a state of continual warfare with their predatory neighbours, who, being at length tired of their continued repulses, made war on their kindred race, the Mongols of the east, and eventually subjugated them completely, with the exception of a small but warlike clan, who afterwards became so powerful as to be a formidable enemy of the Chinese. They had hitherto been tributary to China, but about the middle of the fourth century they asserted their independence, declared war against the Chinese, and, after a succession of triumphal military achievements, took possession of Pekin, under their chieftain Moyoun-Tsioune, at the head of 200,000 men. The Khan Djan-Min was put to death by order of the conqueror, who declared himself Emperor of China, and took possession of the throne."

The last accounts received here from Kiachta state that the Chinese are now again willing to receive produce in exchange for their tea, and no longer insist on payment in specie, a significant sign that China has now enough of the precious metals, of which she has received so many millions within the last few years from Europe and Asia. It is further stated that the Kiachta merchants have sent agents to Japan and China to open commercial relations with those countries, and that they have purchased at Shanghai 10,000 chests of tea to be shipped in neutral vessels for Hamburg, as the direct importation of tea in the ports of Russia has hitherto been prohibited.

The discussion is still going on between the Emperor, the nobility, and the Committee for Emancipating the Serfs. The course adopted by the Emperor to carry out this object is extremely moderate and pacific, and will probably terminate successfully.

The news from St. Petersburg is not satisfactory, from a financial point of view. It appears that there is a complete stagnation of trade—a general dearth of produce—a complete absence of gold or silver coin; this situation, far from improving, is becoming worse every day. The dulness of trade is the principal cause of this financial crisis. It is calculated that silver coin to the amount of 175,000,000 roubles was exported between the 1st of January, 1854, and the 1st of January, 1860. The total amount of the gold and silver coin current at present in Russia does not exceed 220,000,000 roubles. The paper money in circulation increased on the 1st of January, 1859, to 735,000,000 roubles. The financial condition of the country is becoming worse, in consequence of the continued stagnation in the foreign trade which has been in a most deplorable condition during the last

three years. There is but one opinion among the official financiers, and that is, that the Government must contract a foreign loan on any terms, and that the amount cannot be less than 400,000,000 roubles. The circulation of such a sum in the interior of the country exclusively can alone facilitate the operations of the Minister of Finance, and relieve him from paying the interest of the national debt in gold. The Government is about to make an appeal to private speculators to work the gold mines discovered in the districts lately ceded by the Emperor of China to the Emperor of Russia. The Government will offer advantageous terms, not so much on account of the quantity of gold to be obtained as to encourage emigration to that fertile country, which is now a complete desert.

HOLLAND.

AMSTERDAM, March 20, 1860.

In addition to the twenty-five vessels chartered by the Netherlands Trading Company for the East, as mentioned in my letter last month, they have taken up another batch for the same destination, as follows:—To sail from Amsterdam, the ships *Amsterdam*, *Maria Veronica*, *Zaanstrom*, *America*, *Princes Frederick of the Netherlands*, *Yssel*, *Petronella Catharina*, *Walvisch*, *Loevestein*, *Hollandia*, and *Sophia Amalia*; from Rotterdam, the *Oldenbarnefeld*, *Gerardus Jacobus*, *Jan van Brackel*, *Nova Zembla*, *Valparaiso*, and *Fop Smit*; from Dordrecht, the *Ida Wilhelmina*, *Biesbosch*, *Juno*, and *Sumatra*; and from Schiedam, the *Stad Schiedam*.

Baron C. J. von Bunsen, son of the Chevalier Bunsen for many years Prussian Ambassador in London, has been spending some months at the university of Leyden for the purpose of studying the language, customs, manners, and religion of the Japanese, under the able tuition of Dr. Leemans, professor at that university, to prepare himself for visiting Japan in his capacity of Secretary to the Prussian Embassy. He has now quitted Leyden to take leave of his venerable father, who resides at Heidelberg, and will then join his chief, Count Eulenburg, to proceed to their destination by the next overland mail.

Accounts from Nieuwe Deep state that the detachment of troops under orders to embark at that port for Batavia by the ship *Hercules*, had arrived here from the East India depot at Harderwyk, but their departure had been postponed on account of the harbour being full of ice. Another detachment, consisting of 125 men, under the command of Lieut. P. F. La Fors, of the 7th Regt. of Infantry, are under orders to embark at the same port on the 26th inst., on board the *Baron van Hardenbroek* for Batavia.

Despatches have been received by the naval department, announcing the safe arrival at Table Bay of the steam corvettes *Reinier Classen*, Lieut. J. E. Van Raders (which sailed from Plymouth Sound on the 18th October last), on the 23rd December, and the *Loo*, Lieut. J. Van Gogh, arrived there on the 29th of the same month. The sailing corvette *Juno*, under the command of Lieut. R. C. Sloos, also arrived at Cape Town on the 15th January. All three were about to proceed to Batavia.

The Dutch troops, at present serving in their East India colonies, are composed of 10,765 Europeans, 437 Africans, and 15,036 natives of Amboyna and other islands, making together a total of 26,238 men.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE CHINA EXPEDITION.—On going into committee General Sir DE LAOY EVANS rose to move a series of resolutions to the effect that, in the opinion of the House, no sufficient proof had been adduced that the Government had authorised the late attack on the Peiho forts; that the recourse to arms to force a particular route for plenipotentiaries proceeding to exchange ratifications of peace was unprecedented and inconsistent with the objects of an amicable mission; that although a military demonstration might now be necessary to restore satisfactory relations with the Chinese Government, yet were the failure of an unauthorised collision made the pretext for an attack on the city of Pekin or the conquest of territory, such a step would be contrary to every principle of international law; that the House participates in the peaceful expressions used in her Majesty's speech on the opening of Parliament with regard to the Emperor of China; that, similar peaceful expressions having been stated to have been employed by the Emperor of China, it was most important to choose a plenipotentiary of reliable experience and of conciliatory temper and judgment to conduct the negotiations and direct her Majesty's forces. The hon. and gallant member, however, confined himself to that portion respecting her Majesty's speech, having heard that Lord Elgin was to be despatched, of whom he had a very high opinion. He should, however, like to know what instructions had been given to his lordship, whether they were strictly defined, and whether the naval and military commanders would be kept under his control.—Lord JOHN RUSSELL said it would be very unwise to give very restricted instructions to a minister going on such an important and far-distant expedition. At 16,000 miles away, circumstances might arise which would prevent their being obeyed,

but even if that were not so, it would be very inexpedient—in fact it would be a breach of duty—to make public instructions given to our naval and military commanders. Lord Elgin had gone over to Paris for the purpose of consulting with Baron Gros, with whom he had formerly acted, as to the two ambassadors having the supreme command over the commanders of the forces, and the power of stopping military operations when they thought fit. That would have been very desirable, but it was hardly possible, because the naval and military commanders would represent that they could not then be responsible for the safety of their ships and men. He did not wish to revive the question about Mr. Bruce's proceedings, but unless they demanded some reparation for the injury we had received, it was evident the lives and property of Englishmen would no longer be safe. Whether they went up rightly or wrongly, it was clear that Mr. Bruce and Admiral Hope had no notice that their passage would be obstructed, and after what had happened, he (Lord John Russell) must say that some reparation was necessary. Our demands had been extremely moderate, and he hoped there would be no necessity to go beyond the first portion of the instructions given by her Majesty's Government. Nobody could regret the whole affair more than he did, but it was quite wrong for anybody to say that we were going to China for the purpose of obtaining territory. There were no boundary questions to settle there or anything of the sort. All we required was security for the persons and property of our countrymen. The trade of Shanghai and Peking was very considerable, and as there were large numbers of persons engaged in it it was very necessary that we should have a resident minister either at one place or the other. He might reside at Peking or at Shanghai, and make occasional visits to Peking. Lord Elgin would proceed almost immediately on his mission, and the Government had great hopes from the knowledge that he was animated by the most pacific feelings and the greatest anxiety to do the best he could for the interests of his country.—Sir J. ELPHINSTONE said he had hoped that the noble lord would have laid before them some plan of a comprehensive policy for regulating our future relations with China, and for bringing to a close the discreditable position we had hitherto occupied in that country. In the year 1832 our trade with China had first been thrown open, the charter of the East India Company having then expired. Our relations with China had immediately assumed a most irregular character; and the natural result was the outbreak of the first Chinese war. Sir Henry Pottinger had been sent out from this country to terminate the difficulties, and he had concluded a treaty at Nankin which brought the Chinese government into great disrepute with its own subjects. Hostilities had been deferred; but we had submitted to every indignity; we allowed our fellow-subjects to be massacred; and had been kept out of Canton, which ought to have been thrown open to us under the treaty. The affair of the Arrow was only the culminating point in a long series of indignities; but our Government had been perfectly right, inasmuch as, if we were to allow vessels which carried our licence to be interfered with, the trade of our Straits settlements, which rested on the same system, would at once have been destroyed. They next came to the second Chinese war, and the mission of Lord Elgin. All the operations in that case had been admirably conducted both by Lord Elgin and by the gallant admiral who commanded our naval forces. A treaty had then been concluded, which, although an improvement on that negotiated by Sir H. Pottinger, did not embrace a comprehensive policy; and he trusted that any future treaty into which Lord Elgin might enter, would contain provisions for placing our trade with China on such a footing that it might be carried on creditably and peacefully, and with a chance of exercising a civilising influence on the people of that country. But as regarded military operations, he believed that it would be a most fatal mistake for our troops to advance on Peking. He agreed with the noble lord that the insult offered to us called for retribution; but he thought that in the first instance it ought to be put to the Chinese that they should make an ample apology, and give compensation for the loss of our vessels, and for the injury done to private individuals. That was as much as we ought to do at the outset. If that attempt to settle the question were to fail, he would fall back upon Nankin. That city was the strategic point which we ought to occupy in China. It would give complete control over all the great producing districts, by the possession which it would give of all the commercial arteries of the country, and it would then be impossible for the Emperor to collect his revenue. He (Sir James Elphinstone) would first, therefore, take possession of the Taku forts, and then fall back upon Nankin, where he would make it known to the inhabitants that we were prepared to maintain order, and to receive their produce. If our forces were to go to Peking, the fleet must start in the month of April; some time would be required to reduce the Taku forts, and the month of August would have arrived before the troops could reach the Chinese capital. It was the general opinion that in that event the Emperor would retire into Manchouria. Our army would then have to maintain order among a vast rabble; they would have to spend the winter under a climate sometimes 20 or 30 degrees below zero, and their communications would be cut off by myriads of Tartars. They had all heard of the disaster of Cabul; let them not enter upon a course calculated to end in a repetition of that calamity. No doubt we should have a force which could scatter any number of Chinese who might meet us in the field; but the Chinese would not assemble in masses, and would only fight upon their own conditions. He would keep them in check, and take possession of Nankin with a force of gunboats, by which we should be able to maintain possession of the whole internal navigation of the country, and at the same time prevent the Emperor from having access to the fairest portions of his dominions. Our policy in China had hitherto been of a most vacillating and uncertain character, at one time favourable to the rebels, and at another to the constituted authorities. The rebellion itself was not an affair of recent growth, but seemed to have existed in one shape or another from time immemorial. In the year 1820 there had been an insurrection in the province of Kwantung, and among the people employed for its suppression was an American of the name of Magee, who kept a public-house, and who, having afterwards been made a mandarin for his services, used to wait at dinner with the peacock's feather, which was the emblem of his dignity. (A laugh.) The rebels had never been able to create any sort of government themselves, so that our only chance of maintaining regularity at all was to support the Imperial Government. The noble lord at the head of foreign affairs pointed out, in his statement that evening, the eventuality, in case of other negotiations failing, of our being obliged to demand an indemnity from the Chinese; but we could not secure any indemnification unless we held the export

duties of the Chinese in our own hands. Lord Elgin took the same view of the matter in a despatch to Lord Malmesbury in July 1858, in which he described the Chinese treasury as being in a state of penury. Lord Elgin then came to the conclusion that it would be most unwise to drive the Chinese to resistance and despair by insisting upon a settlement of pecuniary claims which under no circumstances could be reasonably satisfied. (Hear, hear.) That settled the question of indemnity.—Lord J. RUSSELL: The claim then was £1,200,000.—Sir J. ELPHINSTONE said he thought that 120,000 dollars would be as difficult to obtain from the Chinese as £1,200,000.—Lord J. RUSSELL said that was an indemnity for the merchants and the Government under the Tien-tsin treaty.—Sir J. ELPHINSTONE: Yes, but the noble lord now asked for an indemnity for the great armaments we were sending out to China. That was impossible. We had the Persian expedition to guide us in our calculations as to the probable expense of this expedition to China. The Persian expedition only lasted about five months, and the sum the country was called upon to pay in order to meet the expenses of that expedition was £2,225,000. How much of that amount was laid upon India he never could ascertain. But that amount was expended upon a small force going a distance of 3,500 miles. Now, the distance from Bombay to the mouth of the Peiho was 5,000 miles, from Calcutta 4,700 miles, and from Madras 4,800 miles. The price of coal for the expedition to the Peiho would be £3 per ton. The horses, artillery, and attendants upon an army of 10,000 or 12,000 men going such a distance, must be much larger than the number which was required for the Persian expedition; and the basis of the operations being India the army must necessarily carry the greater part of its supplies with it. But supposing the whole thing to be done in a few weeks—though he did not expect it would take less than twelve months—and supposing it would not be necessary to leave any force in the country to enforce the provisions of the treaty, in that case his belief was that they would not get out of this Chinese war at a less cost than £10,000,000. (Hear, hear.) And all this was to be incurred at a time when they had a deficiency of £7,000,000 or £8,000,000, which must eventually come out of the pockets of the people. (Hear, hear.) He could not conceive what brought them into this Chinese matter at all. (Hear, hear.) During the sixteen years when he was in the habit of going backwards and forwards to China he found the whole of the French trade to that country was represented by one ship, that brought out claret to China and took back some toys and green tea, the only freight it could get. He believed that that trade had increased a little since, but in a most unfavourable direction; namely, in the carrying coolies, which was neither more nor less than a system of slavery. This trade had been gradually increasing of late years, and was spreading throughout China a distrust and hatred of the Europeans, and especially of the English, because the inhabitants of China could not distinguish between us and the French in regard to this obnoxious trade, believing us to be the great promoters of that trade, because we were the only nation that appeared to have commercial transactions with them to any great extent. (Hear, hear.) He was of opinion that this coolie question was a most serious one, and must be dealt with summarily by us. (Hear, hear.) He had heard nothing said by the Government as to the propriety of putting a question to the French Government upon this subject, but it was one that was eating into the vitals of every Chinese treaty, and would continue to do so until we took up the matter as we ought to do. The present was a favourable moment for such a course, now that we had an opportunity of placing our trade with China in a position of security such as became a great Christian nation. (Hear.)—MR. BRIGHT said: When the speech with which her Majesty opened the present session first met my eyes, I was glad to observe the paragraph which referred to these unhappy affairs of China, inasmuch as it indicated a disposition on the part of the Government to avoid re-opening the war with China. The resolutions moved by my honourable friend near me were calling upon the Government to support the policy indicated in her Majesty's speech, which is such as I am sure every member of the House will be willing to vote for and the Government willing to accept. Another object of my hon. friend in bringing forward his resolutions was to enable the noble lord to make that statement of which he had given notice to the House a few nights ago. Now, in regard to the statement which the noble lord has made to-night, I confess I am much disappointed. The noble lord has told us scarcely anything, except that the force being sent to China is only one-half of what it was stated to be by my hon. friend near me. It appears to me that on an occasion of this nature, when this country may possibly be dragged into a bloody and costly contest, it is the duty of the foreign minister to be a little more explicit to the House. (Hear.) The Persian war, to which the hon. baronet opposite has alluded, cost this country upwards of £2,000,000, and that was a case about which we had heard nothing when it began or how it had been carried on, except the enormous amount which it had cost the country. (Hear, hear.) We are now apparently involved in another transaction of a similar character, which I think the most robust conscience in this House will decline to accept as a just and honourable cause. (Hear, hear.) Let us for a moment trace the progress of these transactions. I will not go back to the original China war, which was as bad as anything could be, but only to the war which had been commenced by the indiscretion, to use no harsher phrase, of our English plenipotentiary, Sir John Bowring. That was based upon a fraud, and that which the House of Commons, by a large majority, condemned as a positive lie. And although, after a dissolution of parliament, a majority was returned to this House in support of the ministers then in office, yet no attempt had ever been made, nor had any one of those ministers ever dared to induce the House of Commons to reverse its decision and the judgment it had come to on that question. (Hear, hear.) I believe now there could be found scarcely one dissident opinion throughout the country as to the folly and the guilt of that transaction. Well, that war came to an end, and a treaty was made under the auspices of a noble lord now a member of the Cabinet. I think there was in the formation of that treaty a grievous error. There seemed to be a constant wish to introduce something into those treaties which was a special aggravation to the Chinese, but which no man could ever show to be of the smallest use to the trade or honour of the country. One thing was insisted upon which had never before been heard of in China, namely, an English minister taking up his residence in Peking. Now, it is a question still open whether it is really worth while to have a resident minister in any court of the world. (Laughter.) It is, I think, a question whether it would not be better to have all our ambassadors withdrawn, and when we had special questions to arrange with foreign

courts to send out special ambassadors for the purpose. However that may be, the question must be decided by the European powers. That man must have a wonderful notion of English policy and English commerce who thinks that anything can be gained by picking up some veteran diplomatist, and sending him to reside in Peking, which is a place above all others where he would be the least comfortable, and certainly the least wanted. (Hear.) That was a clause inserted in that treaty with the especial object of humiliating the Chinese, and proving the absolute supremacy which the arms of England had obtained over the Chinese. Now we come to the question of the ratification of the treaty, and I cannot understand how it was that the minister who had made the treaty should not have stayed to ratify it. But, however, there may have been reasons for his return. It may be the minister who succeeded was perfectly competent in any subordinate situation which he may have filled; I never heard his name before he was mixed up in this transaction so calamitous to the country and to the Government, and the people of China. In this second case I maintain we are just as wrong as we were in the Canton affair under Sir J. Bowring, and everything the noble lord the Secretary of State said in 1857 would be valid against the cause he has undertaken to apologise for to-night. The House has it, on the authority of one of the officers engaged in the sanguinary and unhappy affair at Peiho, that there was no treachery on the part of the Chinese whatever, and if there had been, and the Chinese had taken the opportunity afforded them of firing upon the squadron, not a single vessel could have survived, or a single person on board of them. It is not worth while, then, to seek to cover this matter by a charge of treachery; on the contrary, we ought to substitute for it a charge of folly and imbecility on the part of our own minister, and, notwithstanding all that may be said about the valour of your Admiral, it was a great indiscretion on his part. I hold that valour and prudence are twins; that, combined, they will do great things, but, separate, they lead to disasters such as this; and I cannot but think that on this occasion the 400 or 500 men were sacrificed to the bad arrangements of the Admiral, and the folly of our minister; and that, I undertake to say, is the opinion of 99 out of 100 men in England who have read the narrative of these miserable transactions. Up to this period of course no man can blame the present Government. Indeed, I believe the noble lord had only taken office about the same week at which the Peiho business occurred, and he cannot therefore be blamed for what happened 15,000 miles away. But the noble lord and his colleagues did not take the steps which might have been expected when they received the narrative of the transaction. No man could read that narrative, either from the correspondence of a London newspaper, from a paper in India, or from private letters, without coming to the conclusion that Mr. Bruce had been guilty of great want of judgment, and that the consequence was a most disastrous failure. But what is to be done with a man who evinces such lamentable judgment? What is to be said when a minister, placed in a responsible position 15,000 miles away, commits an error so grievous, with a result so alarming? Surely it was not prudent to continue such a man in the same position. I do not believe that out of all the world could the ministry have chosen a person more utterly unfitted for the conduct of negotiations in China than Mr. Bruce. Indeed, any gentleman who will read his despatches will see that he never was fitted for the post, for he commences his negotiations under feelings of the most unfair suspicion and distrust. Almost every expression he makes use of shows how much he was disposed to offend rather than conciliate, and he makes it a claim to the confidence of his employers that he wishes to do those things which should most mortify and disgust the dignitaries of the Chinese empire. Surely a prime minister over 300,000,000 of people was a sufficiently great man to meet him. When you intrusted him with the power of negotiating this matter, you had not the smallest expectation that it would lead to such disastrous results, and I am not at all prepared to say that the course which the government are now taking to send out Lord Elgin may not be the right course, but what I do say is, that the noble lord ought not to insist on that part of the treaty giving power to an English minister to reside at Peking. I see no advantage to the country in adhering to that line of policy. If we are a more powerful nation, doubtless we can find a field more appropriate for our arms than the breaking up of a great nation which has existed centuries before we were ever heard of. I consider this nothing but going to war, as the phrase is, for an idea, and that idea about as stupid an idea as any statesman could entertain. The hon. member for Portsmouth has referred to the course taken in the previous war. We are going to enter into this crime—for I cannot call it by any other name—in alliance with another nation. I am not one of those who are always expressing distrust of the Emperor of the French, but I speak on all occasions with respect for the ruler of a great nation, whether it be France, or Russia, or Austria. But it may be the case that the objects of the one government are different from the objects of the other government. The noble lord told us that there is no substantive agreement as to how many of our troops are going out, upon what terms, how the costs are to be provided, and whether any power shall retain territory in China, all of which points were arranged before the commencement of the Russian war. We may, therefore, be permitting ourselves to be dragged into a war with China, which may afterwards lead to serious complications nearer home. The Chancellor of the Exchequer could not be happy if he heard the speech of the hon. member for Portsmouth as to the expenses. It seems to me as if parliament and the country had become absolutely drunk, and the words of truth and soberness with which I speak to you are treated as if I was talking of something which concerns the people of another planet. We have a population of 30,000,000, increasing, I do not know how rapidly, every census, and exporting and importing double as much as in former years. This is the vast reservoir from which parliament and the Chancellor of the Exchequer fancy they may draw inexhaustible streams to enable them to carry out their idiotic policy in China. Why, sir, I believe that the expenditure which has been mentioned is the mere fringe of the mass of costs we shall have to pay in reference to this China matter another year. Hon. gentlemen opposite charge me with having a special affection for hon. gentlemen who sit on these benches. I have great admiration for the occupants of the Treasury bench when I find them pursuing a course which is in harmony with what I consider to be the true interests of the country, but I think that it is a great misfortune to them that this difficulty should have occurred, and I should not be surprised if next session the ministers find themselves engulfed by this very China question, which has once before caused a political change in their position. When that discussion took place three years ago I was spending the winter

in Rome, and I remember receiving a letter from the hon. member for Rochdale (Mr. Cobden), written immediately after the division upon the motion which he had submitted to the House respecting our relations with China. I have never referred publicly to the letter, but I remember it contained these words. He said, "Mr. Gladstone's speech was a marvel of persuasive eloquence." That is true, for I have heard the same thing confirmed by scores who listened to that speech. Well, but the right hon. gentleman on that occasion was speaking on behalf of the great principles of justice. He was telling us that what the noble lord calls "English prestige" was utterly valueless to a nation unless it was based on that which was equitable in its policy to other nations. I am not blaming the Government for a policy which is inequitable, I am only warning them against two things—against their partnership with another power in transactions which they cannot control, and against making demands on the government of China based upon disasters caused by the folly of your own minister, and which you had no right, in the sight of God or man, to make. I believe, looking back to the transactions of this country with China for the last few years, that there is nothing more vile or vicious to be found in our history, and that we have no page in our annals more full of real humiliation, because it is full of guilt, than that in which are recorded our transactions with China. And it is because I feel this—that I wish the government to live and prosper, and the House to stand honourably before the country, and the country to hold a position high in credit and morals before the world—that I warn the government and the house against proceeding in a policy which no man in his conscience can say is not a policy in opposition to the law of Heaven, and opposed to those laws and principles of justice without which human society itself could not be held together. (Cheers.)—Mr. S. HERBERT said the policy of the hon. baronet seemed to consist in making an advance upon Nanking, which was either in the hands of the rebels or else had been left by them as utterly deserted waste; and the hon. baronet also seemed to propose that we should take the place with a view to its permanent retention or occupation.—Sir J. ELPHINSTONE. After having first reduced the Taku forts.—Mr. S. HERBERT: That part of the advice the Government certainly would not be likely to follow. It was their desire to localise the war, and to confine it to the Chinese government. The demands they had made had been of a most moderate kind. Despite the outrage at the Peiho, they had only asked for the ratification of the treaty, which was the demand they had made in the first instance, and for an apology for the commission of the outrage. The hon. member for Birmingham had said, and with truth, that this was not a question which the two sides of the House need discuss with asperity, as they had both been more or less engaged in the transactions connected with the affair of the Peiho. He would not enlarge upon the treaty of Tientsin. He had his own opinion upon the events which preceded it, and he would candidly say that he thought they had got into the wrong groove, and that they would find it very difficult to get out. (Hear, hear.) The Chinese plenipotentiaries had been accused of treachery in their diplomatic communications with the British minister, but he was afraid that deceptions almost as glaring had been practised among European nations boasting of the highest civilisation, within a period stretching back no further even than a century. (Cries of "now, now," and laughter.) Whatever might have been our policy during the last twenty years, it would be vain to hope that our remonstrances with the Chinese government would be effectual, unless they were backed by force. The hon. gentleman spoke of the success of the American minister. That official had certainly profited by the presence of the English fleet, and had been successful enough to obtain from the Chinese government the concession of the "favourable nation" clause, but the truth was that the Chinese looked upon all whites, whether Europeans or Americans, as members almost of the same nation, and what they granted to one position they would scarcely think of withholding from the other. With respect to those persons who censured the late proceedings in China, he begged to remind the House that it was an easy thing to be wise after the event, and to criticise the conduct of men acting at a great distance from home, and surrounded by difficulties. Supposing that Admiral Hope had succeeded in his attack, they would have heard nothing of these complaints against Mr. Bruce. He (Mr. S. Herbert) hoped, however, that when Lord Elgin arrived in China he would be able to place matters on a better footing. He was sorry that it should be necessary to make a military demonstration upon the coast of China, but he hoped it would be attended with the beneficial and decisive effect which the Government anticipated. Lord Elgin possessed every quality essential to a negotiator in his position. The correspondence before the House showed that Lord Elgin's opinion was that we were too harsh in our demands upon the Chinese, and, moreover, that correspondence displayed that great wisdom and spirit of conciliation which led naturally to the hope that our present unsatisfactory relations with China might be converted into those that would secure the blessings of commerce and peace. (Hear, hear.)—Sir J. PAKINGTON: I quite agree with the desire that has been expressed, that our discussion on this subject should not be conducted in a party spirit, and I hope that the attention of the House will be directed to this question—what is the most just and wise mode of escaping from the difficulty that has arisen? (Hear.) I must say that in the statement the noble lord has made to us this evening, he has not redeemed the pledge he made on a former evening, when he engaged that, at no distant date, after the receipt of despatches then expected, he would make a full statement of the policy of the Government with regard to the distressing state of affairs in China. We are still left in ignorance upon that point. I am sure that the Government cannot complain of having been unduly pressed by the opposition. This question involves the consideration—first, of what hereafter are to be our relations with China in matters of trade; secondly, whether we are to embark in a costly and difficult war; and lastly, what is the most becoming conduct for our Government to pursue after that most disastrous reverse which her Majesty's arms have sustained at the mouth of the Peiho. This last consideration is one surrounded with so much difficulty that I think the Government are entitled to the support of this House. (Hear, hear.) It is, no doubt, desirable that the Government should know the opinions entertained by this side of the House. I quite admit, that after that unhappy affair in the Peiho, it is the duty of the Government to take care that our power and prestige is not lessened, and on that account I am not disposed to find fault with the Government; but to support every demand they may make upon the Emperor of China. I think they have, as far as the demands they have made go, acted wisely. But the hon. gentleman (Mr. Bright), in whose speech for the most part I en-

rely concur, has alluded to a speech delivered about three years ago by the present right hon. the Chancellor of the Exchequer upon the occasion of a debate that then took place on Chinese policy; and he also told us the opinion of the member for Rochdale (Mr. Cobden) upon that speech. To that opinion I willingly subscribe, and I am sure that the right hon. gentleman will not suspect me of flattery when I say with regard to his speech that I regard it as the finest and most impressive speech I ever heard in this House. (Hear, hear.) I only hope that he has not forgotten the sentiments he then expressed. The noble Lord (Lord J. Russell) also addressed us upon that occasion. He was not sitting then side by side with the noble Viscount (Lord Palmerston) as he is now, but stood in a different relation to that noble Lord. (A laugh.) But I believe that neither the House nor the noble Lord have forgotten the emphasis with which, in a spirit of conciliation and wisdom, in which I heartily concurred at the time, he bade this House to "be just and fear not." Such was the maxim that the noble Lord then laid down; and I only hope that, in the present difficult and anxious state of our relations with China, he will act upon that maxim. (Hear, hear.) The noble Lord has told us to-night that he does not intend to raise any question as to the conduct of Mr. Bruce. I have no desire to force such a discussion upon the House; but I must say that the extent to which the noble Lord has abstained from giving us a fair view of the intended policy of the Government does force us in some degree to enter into the conduct of Mr. Bruce, because that conduct lies at the very root of that policy. (Hear, hear.) I think the Government are right in making a demonstration of force in China; and here I must admit that, to a certain extent, the noble Lord has informed us of his future policy—I allude to his announcement that one of the demands the Government mean to make on the Emperor of China is an apology for the transactions at the mouth of the Peiho. My hon. friend the member for Portsmouth (Sir J. Elphinstone) adverted to that demand in terms of approbation. I know not how far the views I entertain upon this subject may find favour with the House, but this is a question involving matters of so much moment that I feel it to be my duty to state them. I wish to put it both to this House and to the Government whether, looking to the origin of that unhappy transaction at the mouth of the Peiho and considering the whole of the conduct of Mr. Bruce, we are entitled to demand an apology. If you determine that that apology should be demanded, your decision involves two questions—viz., first, whether, acting in that spirit of justice to which I have already adverted, the facts of the case justify your demand; secondly, if that apology be refused, what is your alternative course? (Hear, hear.) Now, it is a question that has not been touched upon by the noble lord, but which I have heard adverted to in other places, whether the instructions of Lord Malmesbury under the late government were such as to justify the course pursued by Mr. Bruce. It has been stated that they were.—Lord J. RUSSELL: I did not say so.—Sir J. PAKINGTON: I said you did not allude to it, but I have heard it broadly stated elsewhere. I say that there was nothing in those transactions which justified Mr. Bruce in making that attack. (Hear, hear.) The words Lord Malmesbury used in the despatch dated March 1, 1859, were these:—"The admiral in command of her Majesty's forces has been directed to send up with you to the mouth of the Peiho a sufficient naval force, and unless any unforeseen circumstances should occur to make another arrangement more advisable it would seem desirable that you should reach Tien-tsin in a British ship of war." I know of no other words in those instructions upon which it is possible to assert that Lord Malmesbury instructed Mr. Bruce to force his way up the Peiho, and that is the question upon which the matter will ultimately turn. I will not refer further to these despatches than to show that Mr. Bruce was not justified in the proceedings he took; but I will lay before the House a despatch which really bears materially upon this question. It was sent by the Chinese commissioners to Mr. Bruce at Shanghai. Mr. Bruce acted upon his discretion in refusing to negotiate at Shanghai. It is clear the commissioners wished him to negotiate there. I think Mr. Bruce acted with good judgment in so refusing. But when the Chinese commissioners found that he was determined to proceed on his mission, and not to reopen negotiations, then this important despatch, dated June 12, was written by them, and upon this despatch mainly, if not solely, the question as to the propriety of Mr. Bruce's attack on the Peiho must be considered to turn. [The right hon. gentleman then read the despatch in question, the effect of which was that the commissioners felt it would not be correct to allow the day appointed for the ratification of the treaty at Tien-tsin to pass by without that object being accomplished, and, after due deliberation, they had decided that the only course left to them was to represent the matter fully to their Emperor, and request him to send some high officer to Tien-tsin, to make arrangements for Mr. Bruce's reception; that the memorial containing this request had been sent forward at the rate of 200 miles a day, and would arrive in eight or nine days at Peking; and that this would afford ample time to allow the exchange of ratifications to be effected at Tien-tsin, by the time fixed for that purpose. The despatch concluded thus—that his (Mr. Bruce's) mission being pacific, his treatment by the Government of China would not fail to be most courteous, and it was the sincere wish of the commissioners that on each side confidence might be felt in the good faith and justice of the other.] Now, I ask the Government what diplomatist in any country could have held language more fair and more consistent with a *bona fide* intention to execute the treaty at Tien-tsin than the language I have read? (Hear, hear.) Could Mr. Bruce justly take the slightest exception to it? On the contrary, was he not bound, after receiving such a letter, at all events to await the course of events then indicated? I cannot see that he had the least pretence for doubting the proposals so made. But what did he do? Immediately upon receiving it he proceeded to the mouth of the Peiho, and, without waiting to see whether or not this arrangement would be carried out in good faith (and he would only have had to wait eight or nine days), he gave directions to Admiral Hope to force the passage of the Peiho. What did Mr. Bruce say on the subject? In a despatch to Lord Malmesbury, speaking of the attack on the Peiho, he speaks of the right of using the river as the natural way to the capital, and states that their right to use the only expeditious way to the capital could not be questioned. Hon. gentlemen opposite may be more versed in diplomatic arrangements than I am, but I believe that Mr. Bruce was wrong in his law, and not supported by the law of nations. At all events, he was to blame in not waiting to see how far the promises of the Chinese commissioners were fulfilled. There are some other expressions in

this despatch, with reference to the difficult task of carrying the treaty into effect and as to mortifying the Chinese Emperor, which ought not to have been indulged in. Not waiting for an answer, Mr. Bruce directed the unfortunate attack on the Peiho. This was on the 25th of June, and at nine o'clock in the morning a junk came alongside the *Magicienne*, in which Mr. Bruce was stationed, nine miles from the bar of the Peiho, with the invitation from the Governor-General to land at Pekinghano and proceed to Peking. The Secretary of State for War said we were about to be wise after the event; but we must not allow that consideration to deter us from passing a judgment on the position and acts of our minister at that moment. Why was the *Magicienne* nine miles from the bar of the Peiho? That was not the conduct of the American minister, who was on the spot, although far less interested than the English minister. When the English minister received the invitation to land at Pekinghano, he ought to have stopped the attack if he could. I appeal to the House whether that invitation was not carrying out the avowed intention of the Chinese to receive our minister with proper honour, and expedite his mission to Peking. I must express a very strong opinion that after what passed at Shanghai, and the despatch of the 12th of June, Mr. Bruce was not justified in ordering the attack on the Peiho, and that he is without any excuse for having ordered it. If it was not justified, are we justified in demanding an apology? Who were the aggressors? Not the Chinese. They had done that which, as a nation, they had a right to do. They had barred the entrance to the river. I admit that their conduct at the mouth of the Peiho was not ingenuous or straightforward. There was deceit, I admit. They pretended that there were only militia in the forts when Admiral Hope sent in with certain demands, and he was told that the barrier was only placed there to exclude rebels. Though there might have been dissimulation and deceit, was the noble lord prepared to contend, considering the character of the people, and the *bona fide* communications received from high officers, that because of these doubtful proceedings on the Peiho, we were justified in resorting to force on these grounds to choose our own way to the capital? There was no dispute about our minister going to Peking. That point was conceded, and there were no circumstances to justify the attempt to break through the barrier forcibly. Are we justified, under these circumstances, in demanding an apology, and if an apology is refused, what will be the result? Is the Government going to embark this country in a protracted and sanguinary war with the Chinese because they refuse to apologise under circumstances so doubtful. (Cheers.) I hope not. I think the Government are right in requiring of the Chinese Government that the treaty should be ratified, and in showing a powerful demonstration of force. I take no exception to those two portions of their policy; but, so far as that policy is disclosed, I take exception to the reasons assigned in demanding an apology. The noble lord has alluded to the question how far our ambassador had power over the military and naval commanders to direct their proceedings, and stop operations. That raises a serious question; and I should like to know what the character of any probable operations will be. I believe that by the time our ambassador arrives it will be too late to commence operations in China. I hope the Government will inform us that no military operations will be commenced until our ambassador arrives. (Hear, hear.) With reference to the appointment of Lord Elgin, I am happy to say I make no exception or objection. Looking at the great knowledge that Lord Elgin must have acquired in China of the habits and affairs of that empire, I think Government could not have made a better selection; but I should like to know also on what footing Mr. Bruce is to remain. Is he to continue in his diplomatic position there? or is Lord Elgin to supersede him? and are both Lord Elgin and Mr. Bruce to receive salaries from the public funds of this country for conducting negotiations? (Hear, hear.) I should like some more satisfactory statement as to what our future policy is to be, but I think that neither public opinion in this country nor justice could support the Government in the design or idea of a war with China, because an apology may be refused in respect of any transaction at the best so doubtful as the unhappy transaction at the Peiho. (Cheers.)—Mr. G. W. HOPE said that no one was more ready than himself to assent to the doctrine of the hon. member for Birmingham, when speaking of Admiral Hope, that personal gallantry was no excuse for alleged misdirected operations, and Admiral Hope would endorse that doctrine, but the real question was whether the hon. member for Birmingham was justified in asserting that these operations were undertaken without a reasonable prospect of success. He did not allege that there was any cause for an ambush, and he had not seen any statement in Admiral Hope's despatches that stated that there was. He would put it on a broader ground, and maintain that if we look to the whole history of the war in China there was nothing to justify Admiral Hope in refusing to obey the instructions he received. (Hear, hear.) There was no ground for supposing that the admiral made no reconnaissance, the fact being that he took steps to obtain every information, and from that he found that the forts were in a state of preparation, better than Chinese forts usually were; and, even in the absence of foreign auxiliaries, and the presence of Russian caps and new faces, there was no sufficient reason for him to turn back when he had a sufficient force; and he put it to any professional man whether had he done so he would not have considered that he was disgraced by the proceeding. It had been said that the operations in China had been wholly unsuccessful; but was it true that they were so in every part? Until the hon. member for Birmingham made this observation, the opinions expressed in the House had been so generally favourable to Admiral Hope, that he had not prepared himself with references and despatches, but this he remembered, that the statement by Admiral Hope was distinct—indeed, it was admitted by the Chinese themselves, that the firing from his guns silenced those of the enemy. Now, if the admiral was able to conduct the operations so far successfully, was it possible to say that he had no grounds for undertaking them? He now came to the disastrous part of the affair, the landing. He knew that Admiral Hope took upon himself the responsibility of that part of the operations, but, he asked, was he morally responsible for it? He had stood by his boats, and fought till he could do no more. (Cheers.) And though with the feelings of a gentleman he took on himself the responsibility of the whole operations, it was too much to say that because that part that was not conducted by him had proved unsuccessful, he was responsible for all the disaster. He did not wish further to enter into the question except to protest against the waste of gallant lives in such operations. (Hear, hear.) He was not one of those who looked for the millennium, when we were to have no wars; but he remembered the expression of the late Sir Robert

(Continued in page 205.)

NOTICES TO CORRESPONDENTS.

LONDON, MONDAY, MARCH 26, 1860.

THE PEIHO ECHO.

The Peiho affair has had another ventilation in the House of Commons, and the proceedings of the Hon. F. W. A. Bruce and Admiral Hope have received the fullest approval at the hands of Lord Palmerston and other members of the Cabinet. We presume the sentence in Lord John Russell's despatch of the 10th Nov—which was: "Now, although the denial of a passage to the capital by the usual and most convenient route would have been evidence of an unfriendly disposition, yet it was a matter upon which you might have remonstrated and negotiated, without having recourse to force to clear the passage,"—must be treated as a little slip of his private opinion on the subject, and it is fortunate for him that it was not more fully dwelt on by the opposition, being, as it is, so inconsistent with his speeches in Parliament. The Premier's defence was, as usual, a very able one, and likely to enlist the support of the country, who, we have before remarked, as a body, do not examine minutely the real facts of the case, and in forming a decision they are greatly influenced by the melancholy slaughter of our countrymen, which was, we all know, entirely owing to the indiscretion of landing our men in a mud swamp to take the forts. It is of little practical utility to follow the other speeches on this debate. The question now before us is, what is to be done for the future in order to come to an amicable settlement of the matter? It appears to us the Government have adopted the only possible road open to them, and in the appointment of Lord Elgin on a second mission to the Court of Peking there is the great advantage of avoiding the recal of Mr. Bruce, as it could not be reasonably expected that any other ambassador would be able to act so well in unison with him, the point being of course a most delicate one to deal with. We believe it to be entirely owing to this peculiarity that his lordship has accepted the mission, his own ambition to securely obtain all the rights of his treaty being quite a secondary consideration. That his instructions are to obtain all these rights by a pacific means, we are fully assured, and it is a matter of congratulation that his first step has been successful in bringing the French Government to the same view of the case. There are good grounds for believing that the most perfect accord exists between his lordship and Baron Gros, the French Ambassador. As evidence we may mention that the gunboats which have been in course of embarkation at Toulon for some time past have been countermanded, and it is rumoured that instructions have been forwarded to India to suspend the departure of troops until Lord Elgin is able to communicate his views to the Governor-General. The only point in the treaty which it is at all likely there will be any trouble about, is the one in reference to our ambassador residing at Peking; and as it has been pretty clearly announced by Lord John Russell in Parliament that this obligation on the part of the Chinese Government will not be enforced, we confidently expect a ratified treaty to arrive in this country very shortly after the arrival of Lord Elgin in China. Since the arrival of the intelligence of the unfortunate defeat at the mouth of the Peiho, we have from time to time stated that it would be unwise to attempt a resentment by force. We can most truly sympathise with our gallant soldiers and sailors who were engaged in that affair, and are now waiting for the opportunity of revenge; but we are certain, on a calm consideration of the horrors of war, that they will willingly forego their very pardonable desires. We must, however, add our opinion that the despatch of reinforcements has been quite politic, and calculated to materially assist Lord Elgin in the pacific solution of all the difficulties of the case.

Naval and Military.

There have been no fresh movements in connection with the China expedition. The *Megara* was announced as fitting out for China, but no reliance can be placed in the report. From India, of course, we have plenty of rumours of regiments going forward from India, but orders and counter-orders seem to be all that is doing at present. The *Army and Navy Gazette* has the following on General Mansfield:—"The refusal of Sir W. R. Mansfield to accept the command intrusted to him by the Queen is to be regretted on three grounds; first, because it is injurious to the high reputation of a gallant, zealous, and able officer, and lays his motives open to injurious comment from persons hostile to him; secondly, because it is mischievous in itself, as a precedent set by a distinguished officer, which, if admitted, will cause serious difficulties in reference to the custom of giving local rank to superior officers; thirdly, because it adds another to the number of examples which have been too frequent in the East, of disobedience to orders, of a refractory spirit, and want of military subordination. On examining the grounds of Sir William Mansfield's refusal to accept the post of second in command to Sir Hope Grant, we confess we do not find them valid to justify the General in declining the honour conferred on him by her Majesty. There is the sole step of local rank in Turkey and in Europe to sustain the objections which have been raised to putting Sir W. Mansfield under the orders of the present Commander-in-Chief of the China expedition; in all other points Sir Hope Grant has seniority of service. We have reason to think that Sir W. Mansfield's friends regret he has not accepted a command in which his abilities and military knowledge would assuredly have secured an accession to the reputation he already enjoys."

The following is the last statement received from Bombay of the troops about to proceed to China:—

Artillery.—Two batteries of Royal Artillery from the Bengal army, and two batteries from England with Armstrong guns. No. 7 Battery, 14th Brigade, Royal Artillery; a Company 5th Battalion Native Artillery, and 1st Supplemental Company (Bullock Battery) from Madras; and No. 3 Battery, 13th Brigade, Royal Artillery, from Bombay.

Engineers.—23rd Company Royal Engineers from Madras, two companies from England, and A and K Companies of Madras Sappers and Miners.

European Infantry.—3rd Buffs, 31st, 44th, 56th, 66th, 67th, 87th, 99th Foot, and 2nd Battalion 60th Rifles.

Cavalry.—Two squadrons 1st Dragoon Guards, Fane's Horse, 1st Sikh Cavalry.

Native Infantry.—8th, 11th, 15th, 19th Punjab Infantry; the regiments of Loobianah and Lucknow, 3rd and 5th Bombay Native Infantry, and 21st Madras.

Classifying the force according to the troops furnished respectively by each presidency, it is as follows:—

BOMBAY.

No. 3 Battery, 13th Brigade, R.A.

Her Majesty's 31st and 56th Regiments of Foot.

Her Majesty's 3rd and 5th Regiments Native Infantry (each 1,000).

MADRAS.

No. 7 Battery 14th Brigade Royal Artillery.

A Company 5th Battalion Native Artillery.

23rd Company Royal Engineers.

1st Supplemental Company (Bullock Battery).

A and K Companies Sappers and Miners.

1st (King's) Dragoon Guards (detachment).

Her Majesty's 44th and 66th Regiments of Foot.

Her Majesty's 21st Regiment Native Infantry.

BENGAL.

Two Batteries Royal Artillery.

Fane's Horse and 1st Sikh Cavalry.

Her Majesty's 3rd Buffs, 67th, 87th, 99th Foot, and 2nd Battalion 60th Rifles.

Her Majesty's 8th, 11th, 15th, and 19th Punjab Infantry, and the regiments of Loodianah and Lucknow.

The hired transport *Canaan*, Capt. Wilson, arrived at Spithead with 150 naval invalids on the 13th inst., from Hong Kong, in charge of Lieut. Woodman, R.N., Admiralty agent, and Dr. A. Watson, R.N., surgeon in charge. The greater portion of the invalids are from Admiral Hope's squadron. Dr. Watson states that all the wounded have progressed most favourably, and that only four deaths have occurred during the voyage home. The following officers and passengers have arrived by the *Canaan*:—Mr. H. Ley, master, R.N.; Dr. Charles A. Lees, assist.-surg., R.N., invalided; Mr. W. Bicknell, second master, R.N., ditto; Mr. Powlett, midshipman; R.N., ditto; Mr. Moysey, assist.-engineer, R.N., ditto; Mr. Bertram, assist.-engineer, R.N., ditto; Mr. Mitchell, gunner, R.N., ditto; Mrs. Bampfied, wife of Capt. Bampfied, 1st Royals, two children and servant; Mrs. Rangall, family and servant. The ship sailed from Hong Kong on the 13th of October, 1859, calling at Singapore, Cape of Good Hope, and St. Helena.

Preparations are being made for the intended distribution of an award for salvage services rendered to the treasure on board the *Ava*, between the 12th March and 26th July, 1858, by the *Chesapeake*.

Numerous changes have been made in the disposition of the Bengal troops, in pursuance of instructions from home. Sir Hope Grant, by last advices, was expected daily in Calcutta, Sir Robert Napier having superintended the embarkation up to the 10th ult., so far as it had proceeded—

Some doubt has been cast by the Calcutta press upon the Lucknow regiment joining the force.

An extra supply of war stores, shot, shell, and ammunition for the use of the Armstrong batteries despatched to China, has been forwarded by the present mail to Hong Kong.

We omitted to report the following passengers, per *Caduceus*, from Hong Kong.—Lieut. Jenkins, R.N., Agent Dr. Baird, R.N., Dr. Richardson, Mr. Summons, R.N., late paymaster Princess Charlotte; Mr. Scott, master, R.N.; Mr. Davies, engineer, R.N.; Mr. Spooner, of Messrs. Russell & Co., of China.

THE PRUSSIAN EXPEDITION TO JAPAN.

The transport-ship *Elbe*, belonging to the Prussian navy, commanded by Captain Werner, was taken into the inner dock on Friday morning, for the purpose of transferring to the *Arcona* frigate a quantity of stores which she brought from Hamburg. She will afterwards fill in with coals for the supply of the steamers connected with the Prussian expedition to Japan, and leave some time this week; the *Arcona*, it is expected, following about this day or night. The *Elbe* has on board a small screw steamer, originally built as a pleasure yacht at Hamburg, which has been bought for use in the Japanese waters, to save the sailors of the expeditionary vessels the labour of rowing as much as possible. The scientific and mercantile men who are to take part in the expedition will proceed by the overland route, and join the squadron at Singapore.

The Prussian frigate *Thetis*, Captain Jackmann, accompanied by the schooner *Frauentob*, sailed from Spithead on the 16th instant, for China.

The recruiting for the corps of Royal Engineers, in anticipation of the augmentation of the corps which will take effect from the 1st of April, is proceeding briskly, and a number of intelligent young men, most of them good mechanics and handicraftsmen, have lately arrived at headquarters, Chatham, to join the detachments.

We have a return showing the numbers present at the last annual training of each disembodied regiment, and the number of absentees from each regiment on that occasion. The totals are as follows:—England, 30,597 present, 20,555 absent; Scotland, 4,706 present, 2,065 absent; Ireland, 9,037 present, 7,937 absent.—Total, 44,340 present, and 30,557 absent.

There are at present four iron-cased ships building by contract—two of them of 6,039 tons, and 1,200 horse-power, and two smaller of 3,268 tons each; the total cost for building being estimated at £1,355,807, including machinery.

Efforts are being made at the Chatham dockyard to complete three of the large vessels of war recently ordered by the Admiralty to be constructed, and bring them forward for launching during the approaching summer. These are—the *Atlas*, 91, the *Bulwark*, 91, and the improved screw frigate *Undaunted*, 51, each of which has several hundred hands employed on them to hasten their completion. The *Atlas* is getting very forward, and will be the first of the three completed.

An unfortunate accident occurred off the Platform Battery, at Portsmouth, on the 22nd inst., to the commander's galley of Her Majesty's ship *Firebrand*, lying at Spithead, which caused the loss of five lives. Between 1 and 2 p.m., the galley, with her usual crew, six in number, and a stoker who had obtained leave to go on shore to see his wife, was despatched from the ship to the shore, for the purpose of bringing off Commander Bruce, who was on shore receiving his orders. As soon as the boat, under a lug sail, got into this broken water, she buried her bow in the trough of the sea, and was prevented rising again by the top of the sea having hold of her stern, which at once caused her to broach and capsize. The men clung to the keel, and the boat turned over again, when five out of the seven that were in the boat disappeared.

THE ROYAL MARINES.—A general parade of the Royal Marine Light Infantry took place at Woolwich on the 22nd inst., in the square within the barrack quarters, when Col. Stransham, commanding the division, presented to Acting Sergeant-Major Woon, late of the 1st Battalion, serving in China, a silver medal awarded to him by the Lords of the Admiralty for "meritorious conduct, especially for his gallant behaviour while serving in China." Sergeant-Major Woon has likewise been granted an annuity of £10. This non-commissioned officer succeeded in saving the life of one of his officers, as also of a drummer-boy, about fourteen years of age, during the assault upon the Chinese battery in the Peiho. The poor lad had been struck down by a round shot, which completely carried away the inner part of his thigh. He was lying hopelessly in the mud (according to the report), the missiles of every description flying thickly about him, when he called out to Sergeant-Major Woon to take him to a place of safety, which he did at the imminent risk of his life, and deposited him in a boat at some distance. Sergeant-Major Woon was five years in the Arctic regions with Capt. McClure. On leaving China he was presented with a piece of plate, as a token of the esteem in which he was held by his comrades there. Colour-Sergeant Francis, wounded in the foot under the Chinese forts, was presented at the same time, by Col. Stransham, with a medal, awarded by their Lordships for long service and good conduct, which carries with it a gratuity of £15. Sergeant Francis is about to be invalided, being irrecoverably lamed, and consequently incapacitated for further active service. He served in the Syrian campaign, in the Crimea (for which he was decorated with the medals), in the Black Sea, on board Her Majesty's ship *Retribution*, and was engaged in the attack on Odessa. Several privates, invalids recently joined from China, for survey, on account of wounds, then present, were in succession promoted, in the presence of the battalion, to the rank of corporal; one corporal was made a sergeant, and the distinction of the colours was conferred on Sergeant Donnell, who had received three wounds. The two latter were absent on furlough.

THE ROYAL MIDDY.—Prince Alfred is being brought up in the service precisely the same as if he were the son of a private gentleman. He messes with the midshipmen, keeps his regular watch, dines occasionally in the ward-room, and takes his turn to dine with the captain. He is treated by his messmates as in all respects one of themselves—is called to order by the caterer, and runs the same risk of being made the subject of a practical joke as any other young gentleman—himself, however, being generally pretty forward in the business of playful mischief. Upon one question, that of smoking, the young Prince is sternly denied the privilege indulged in by other officers. On one occasion, we believe, his Royal Highness had his leave stopped for a fortnight for being detected in the act of blowing a cloud.]

HOUSE OF COMMONS.

(Continued from Page 203.)

Feel, that no war undertaken for mere pecuniary purposes was ever worth the cost of blood and treasure expended. (Cheers.) He did not object to war when honour, interest, safety, or justice demanded it, but he did object to wars in which success could bring no honour except for the personal heroism with which it was attended. (Cheers.)—Mr. BRUCE read a despatch from the British minister in China bearing testimony to the praiseworthy conduct of Admiral Hope throughout, and vindicated Mr. Bruce for attempting to obtain the ratification of the treaty between the two countries.—Lord PALMERSTON entirely agreed with what had fallen from the right hon. baronet, that where we judged of the conduct of a man we ought to imagine ourselves in the position in which he was when he performed the act of which we were judging. (Hear, hear.) And this was the way in which the conduct of Mr. Bruce ought to be judged. What were his instructions? To obtain a ratification of the treaty of Tien-tsin. He was told that the exchange was to take place at Peking. He was told to go to Peking. He was told to go to the Peiho. He was told to go up in a ship of war as far as Tien-tsin, and that the admiral was to accompany him, with a sufficient force. What was the interpretation of "a sufficient force?" The only interpretation was a force sufficient to enable him to go to Tien-tsin, and thence by land to Peking, to exchange the ratifications. Then it was said there was a qualifying clause, that he was to pursue that course unless there were circumstances to lead him to take a more advisable course. He thought Mr. Bruce was justified in considering there were no such circumstances as should induce an alteration. (Hear.) The right hon. baronet had quoted a letter from a Chinese commissioner—a letter of peaceable and friendly character. But what did that letter invite Mr. Bruce to do? Why, to go to the mouth of the Peiho, to go thence to Peking. He went to the Peiho, and what did he find there? Did he find an official communication saying that the Government would not allow him to go up the river, and that he must go in some other direction, or his passage would be obstructed by the orders of the Government? Nothing of the kind. He found an impediment. The right hon. baronet said every nation had a right to blockade its own rivers. Against an enemy no doubt. (Hear, hear.) But we could not blockade against a friend who was coming in friendly intercourse. (Hear, hear.) Well, he inquired what did the blockade mean? What was the intention? "Oh," they said, "it is not put up by the Government; it is simply a little arrangement of self-defence, established by the people of the district to protect themselves." Against whom? Against the English and French ministers? No, against pirates. But the English were not pirates, and therefore they had no reason to suppose that the barricades were established there to stop their progress. (Hear, hear.) Then was there any officer of the Chinese Government there, saying, "Here I am, and you can't go this way; go another way?" Not a bit of it. They were told there was nobody but militia and peasants; nobody representing the Chinese Government. Under these circumstances, he contended that Mr. Bruce and Admiral Hope were perfectly justified in endeavouring to remove the obstacles which blocked up the usual passage to Peking, and to which they had been invited by the Chinese commissioners. Did they begin the attack? No; they began quietly to remove the barrier which had been placed there, when the Chinese began the attack upon them. (Hear, hear.) Well, but was the Peiho the wrong road to take? Why, that is so entirely admitted by the Chinese Government to be the proper road to Peking, that in the treaty agreed to with the Russian Government, and which was concluded some five or six weeks before these transactions, it was stipulated that the Russian minister, whenever he comes in that direction, shall proceed to Peking by the way of the Peiho. (Hear, hear.) So that here was an express admission by the Chinese Government that this was the proper road for diplomatic agents to take. And more than that, as by the treaty of Nankin we were admitted to the privileges of the most favoured nations, that Russian treaty actually gave us the right to proceed to Peking, and to proceed by the way which had been shut against us. Therefore, he said, let any man put himself in the situation of Mr. Bruce. Having his instructions on which to act, knowing what the practice was, and being responsible for having the treaty ratified within a given time—for let the House remember that the time assigned within which the treaty was to be ratified was just about to expire, and let him ask himself would he, in such a case, have shrunk from his course, would he have gone away and left the treaty to the chance of being unratified? Had he done so, would he not have been told—You were told to go up the Peiho in a ship of war—you were told that the admiral would accompany you with a sufficient force, and there was a sufficient force as far as any one had the means of judging—why did you run away? Why did you allow the honour of the country to be tarnished in your hands? (Cheers.) But then the right hon. baronet said, that at nine o'clock on the morning of the attack Mr. Bruce received a letter from the Chinese governor, inviting him to go to some other creek, and thence to proceed to Peking. Now the right hon. baronet read that letter very glibly, and if Mr. Bruce had received it in the condition in which it appeared in the blue book, he might have read it as glibly; but, unfortunately, the letter was in Chinese (laughter), and it took no less than two hours to translate. Then he had to communicate with M. Bourdalon, the French minister, and owing to the stormy weather, to the force of the currents, and to the insufficiency of the boats—for all the boats that were suitable were with the expedition in the river—before he could communicate with M. Bourdalon the firing had begun; and it was then too late to make any change in the operations. (Hear, hear.) But suppose the letter had been in time, would it have been wise to accept this invitation, and go round to the other place? They knew what that meant, because the American minister had accepted the invitation, and they knew pretty well how that turned out. The American minister was kept a considerable time before he was allowed to land; and he was then transported up the country in a wooden box on two wheels, without either light or air, so that at the last stage he was actually obliged to get out and walk for the remainder of the way, the jolting was so intolerable. (Laughter.) And when he did arrive at Peking he was kept a close prisoner, and was never allowed to communicate with the Russian minister, whom he wished to see, and was after all not allowed to ratify the treaty at Peking, but was obliged to go back to the coast to get it ratified. Now would this country have been satisfied if they had found their minister, who had been sent to the Peiho with a sufficient naval

force, and who was especially told not to submit to any degrading ceremony on his passage—because, as Lord Malmesbury said, everything that was done on the passage or on his arrival at Peking would become a precedent for the treatment of all succeeding ministers—would this country have been satisfied if our minister, after being left for days without being allowed to land, was at last taken up the country in a covered cart, and so jolted that, to avoid the dislocation of his joints, he was obliged to get out and walk? (Hear, hear.) And let the House remember that in China there were three modes of honour or of degradation. Those who were invested with the highest honour were placed in sedan chairs; those next in rank were allowed to ride; and none but those of the lowest class were put into covered carts, and jolted along the rough roads. (Hear, hear.) Certainly, if he (Lord Palmerston) had been in Mr. Bruce's situation, nothing would have induced him to consider the reception of this letter as such an unforeseen circumstance as to make him undergo this foreseen degradation and great personal discomfort. (Cheers.) As to the conduct of the admiral, that had been well dealt with by the hon. member opposite, but he must say that he never heard of a greater display of heroism, not of the admiral only, but of all who were engaged in the transaction. The circumstance that success had not crowned their efforts, in no degree detracted from their gallant and heroic efforts. However, he would hardly have risen on this occasion, but that the right hon. baronet wanted to know what was to be their policy in China. That was a question the right hon. baronet was entitled to put, though he thought his noble friend had already sufficiently answered it. But when the right hon. baronet asked what instructions were about to be sent out that was a question which he respectfully declined to answer, because the House would see that to tell beforehand what were the instructions by which their naval and military commanders were to be guided, was the sure way to defeat them. (Hear, hear.) As to their policy, it was simple; and he thought the House would admit it to be just. They wanted the ratifications of the treaty to be exchanged. Some people thought that that treaty made greater demands upon China, not than we were entitled to make, but greater than it was handsome to ask. He was not of that opinion. One chief point in the treaty was to insist on the right of our minister, at least occasionally, to reside at Peking, and at all times to have direct communication with the central authorities of the empire. That right was of the utmost importance. It was the want of that right which had led to so much unpleasantness and misunderstandings. Hitherto our ministers could only deal with the Viceroy at Canton, whose business it appeared to have been to put off the barbarians with excuses, whose complaints, as in the case of Commissioner Yeh, were never sent to Peking at all. And there was nothing new to Chinese policy in this demand, because for some years past they had admitted a Russian minister to reside at Peking, so that they really asked no more from the Emperor of China than he had already conceded to the Government of Russia. Another stipulation was that they should be allowed to ascend the great river Yang-tse-kiang and other streams, and to trade with the great towns on their banks. While the rebellion lasted, this right might not be of any great advantage, but it was of great importance with respect to our permanent relations with the country, and for the extension of our commerce with China. It had been said that they might take possession of Nankin. He was of opinion that that town could not at present afford good accommodation either for their troops or their commerce; but there could be no question that the right to navigate the great rivers and to trade in the interior of the country would eventually be of great importance to us. A third stipulation was that British subjects should have a right to travel in the interior of China. That also was of great importance to our commercial intercourse with the people, and it was not repugnant to the feelings and opinions of the people. Some persons were apt to imagine that the conduct of the people at Canton was a sample of what might be expected all over China. But that was a great mistake. There was reason to believe that the ill feeling exhibited towards us at Canton was artificially got up, but, at any rate, it was an exception to the rule. At Shanghai there was a large European community who lived in perfect amity with the Chinese, who visited them, and travelled without molestation all over the country. They wanted no conquest. (Cheers.) They did not want to obtain any other possession in China than the island they already possessed of Hong Kong. But he thought, and he was persuaded the country would be of the same opinion, that it would have been disgraceful to this country—that they would have lost their position in the government—if, after having sustained this disaster, they should go away and allow the treaty to remain unratified, or requiring from the Chinese government that satisfaction to which they were entitled. It was said we were demanding too much when we asked an apology. He thought that was the least which could be asked for such an insult; and there was reason to believe the Emperor would not object to it, as he said that the affair had arisen from what he called the impetuosity of the British commander. (Hear, hear.) The policy of her Majesty's government was to have the treaty fulfilled, but not to acquire any conquest or demand any additional cession of territory in China. The House would remember how the country had praised Sir Henry Pottinger for the treaty of Nankin. In consequence of that treaty our trade with China had been very much increased. It had not, however, provided for that which the treaty of Tientsin did provide for; but he (Lord Palmerston) thought the two treaties would confer great advantages on the commerce of Europe and America, and do a very great service to the Chinese nation itself. —After a few remarks from Mr. WHITESIDE and Mr. COCHRANE, a vote for £850,000 on account of the expedition was agreed to.—On the 19th, on bringing up the report of supply upon this vote, General PEEL took exception to the military and naval estimates generally, and especially to that vote for £850,000, which was simply deceptive, as it would not represent anything like the amount that would be required.—Mr. SIDNEY HERBERT said with regard to the China expedition the troops did not come upon the Imperial establishments till they arrived in China. They knew that the transports did not sail from India with the troops in time to bring them within the financial year. He thought he might confidently state that they had got money enough to cover the present financial year. He would not enter into the question whether this was carrying out the principles of free trade or not. He might, however, state on the question of money voted what it was that had been spent on the war in China. Rather more than £2,500,000 in round numbers had been spent. He was not disposed to

prophecy upon this subject. (Hear, hear.) Various prophecies had been indulged in. The right hon. gentleman opposite (Mr. Whiteside) had alluded to something like £10,000,000.—Mr. WHITESIDE: No, I said as much would be spent as was expended in the Persian war.—Mr. SIDNEY HERBERT said that more than was spent in the Persian war had already been voted. As he had said, he believed that the vote which had been made would be ample for the financial year.—Sir H. WILLOUGHBY said there never was a vote that he had felt more inclined to resist than this. He believed that the whole of the money spent in the Chinese warfare was not only thrown away, but thrown away to the great disadvantage of this empire.—Colonel DUNN asked whether there would be any addition to the estimates on account of the force sent to China.—Sir J. BULPHINSTONE asked what was the state of the Chinese expedition, when it would sail, and what the expense was likely to be. He understood that it cost £3 10s. a ton to take out coal; and if so, there was cause for alarm with regard to the state of the finances next year. He thought there would then be a deficiency of £15,000,000; and that we should drift into a state of difficulty such as that from which Sir Robert Peel once rescued us, but from which he feared we should not again be relieved.—Colonel P. HERBERT inquired who was to pay the expenses of the three regiments sent out to China.—Sir C. WOOD said the expenses of the three regiments would have to be met by this country; but no vote had been taken thereupon, although when the accounts between us and India were balanced, one would probably be necessary. (Hear, hear.) The expense of the transport of troops to China was chargeable to India. When Queen's troops were sent to India the revenues of India were charged with the expense of taking them out, keeping them there, and sending them home. As to the state of the Chinese expedition, two regiments went out to China some time ago; another regiment had gone from Calcutta with a native regiment, and a fourth English regiment had sailed from Madras.—Admiral SEYMOUR wished to say a few words relative to the American minister's visit to Peking. A gentleman holding a high and honourable position in America wrote to him some time back that the newspapers had misinterpreted that affair. The American ambassador was satisfied with his reception. He said he was received at Peking with every mark of respect, and that he had ascertained that arrangements in the way of provision of houses had been made at the capital for the reception of the English and French ministers. (Hear, hear.) The gallant officer then bore testimony to the gallant conduct of Commodore Tatnall and Admiral Hope, the latter of whom had his boat sunk under him, and still did not relax his efforts on behalf of the expedition.—The resolution of the committee of supply was then agreed to.

EXPENSES OF THE COMMISSION TO CHINA AND JAPAN.—(23rd.) Sir DE LACY EVANS moved for a return showing the salaries or allowances of the plenipotentiaries, secretaries, and interpreters, or other officers of the missions to China and Japan, of the Earl of Elgin, the Hon. Mr. Bruce, and Mr. Alcock.—Lord J. RUSSELL said the returns could be given with regard to past missions, but it would be inconvenient to grant them with regard to those employed at present.

Spirit of the Press.

DEBATES ON CHINA.

About this time three years the attention of this country was almost centred upon an expedition which was then leaving our shores for the distant empire of China. Our officers in those seas had become embroiled with the satrap of a province remote from the seat of government. British commerce had been chased out of the Canton River; rewards had been offered for English heads; efforts were being made to starve, or plunder, or poison the European community settled at Hong Kong, and all the compressed myriads of necessitous population who swarm along that thousand miles of sea coast, where our settlements are dotted at rare intervals, were awaiting the moment when they might surge over the foreign communities. Some of us at that time wished to stand still and split hairs, and reason out points of international law; but the more generous instinct of the people of England commanded an immediate rescue. It was in a general acclaim that the expedition went forth, and with it was sent a diplomatist who had already in many parts of the world shown himself skilful to improve occasions and able in difficult conjunctures. How that expedition sped, and how that diplomatist discharged his task, we need not now recount. Atom by atom the power of England in those seas had been almost imperceptibly increased, even before the staff and panoply of the expedition arrived. Those terrible little gun-boats had bulletted in their tiny strength with the great oceans, and had dropped one by one, welcome and exulting, into the harbour of Hong Kong. The Admiral, reinforced, had been already able to destroy those swarms of war junks which had at one time almost blockaded him at his moorings, and was master of the waters. Then Lord Elgin arrived, and, after negotiations had been proffered and refused, pressure was brought to bear. Canton was taken, and there was a pause to ascertain whether enough had been done. It was found that the Court of Peking cared no more for the fall of Canton than if the English fleet had burnt a pirate village. Then the arms and diplomacy of the West moved together to the North. The lesson that had been first read at Canton was renewed at Taku, and quick upon the news of this exploit the strangers who had in vain remonstrated and resented at a distance now came with arms in their hands to demand some security for fair dealing, almost at the gates of the capital. The fear of the selfish court was now as abject as its indifference had been intense. When only the people suffered it would abate no jot of its pretensions; now that the imperial officers themselves were threatened, there was nothing they would hesitate to grant. The only effective, but the always sufficient, threat was an advance upon Peking. They were afraid that even to themselves should be divulged the great secret that the approach to Peking is so easy. They gave us all we asked—and we asked no more than is good alike for them as for us,—and when we went away they re-appealed into their old confidence that, happen what may, their old nests are always safe and out of reach. We came away rejoicing, bringing with us promises of friendly relations, which, if carried out in good faith, would carry cheap comforts home to the doors of our English cottages, and supply remunerative employment to our great English towns.

But we seem, instead of sketching the past, to be describing the present, and imagining a plan for the future. We are at this moment brought back again to the circumstances of the spring of 1857. Again there is a British force held at bay, again there is a disruption of official relations, and again Lord Elgin is setting out from England, and troops and ships of war are rounding the Cape and crossing the Indian seas. Events three years old are re-enacted with almost servile repetition, and—*a'sit omen!*—we almost expect that Lord Elgin will stop at Singapore and make his customary diversion to Calcutta. All our estimates are swollen and inflamed, just as three years ago they were swollen and inflamed. The revenue we obtain from tea we again spend in ships and soldiers to protect the merchants who go up to buy it. There are not wanting counsellors among us who say in their hearts, although they do not proclaim it openly, that "a little war and a moderate commerce" is the most profitable policy for vested interests in China. Once again we are about to recommence this wearying, wasting, blood-spilling, and ineffectual process; and Lord John Russell last night performed the ungrateful task of informing the House of Commons what is the immediate object he has in view in opening this new chapter in the endless history of our Chinese wars. His statement was very much in the tone of the paragraph in the Queen's speech. Lord Elgin is to avoid, if possible, an advance to Peking. He is to ask for the ratification of the treaty, and for an apology for the slaughter of our troops and the destruction of our ships at Taku. Some indemnity, it seems, will be required for the loss inflicted upon us by that act of treachery, but in the first instance it is not proposed that the Chinese shall be called upon to pay the cost of the expedition which their perfidy has rendered necessary, and which has only been occasioned by their breach of engagements. This is, indeed, moderation; and, if the Chinese have learned to appreciate that quality, it deserves to be successful. In the debate which followed, it was sad to note how poor is our House of Commons in the knowledge requisite to deal effectually with this great Imperial question. With a laudable desire for information, and with a readiness to turn and rest upon any man who may have a colourable title to be thought an authority upon such matters, Sir J. Elphinstone was encouraged to dilate upon this subject to a silent and attentive House. Sir John Elphinstone is himself somewhat of a Chinaman in this matter. A Chinaman acts only by precedent. Sir J. Elphinstone has his precedent. He remembers that eighteen years ago a Chinese war was put an end to, and a treaty obtained, by advancing upon Nankin and threatening to occupy that city. He can only suggest that the same course should now be repeated. The circumstances, it is true, are somewhat different. Nankin was then a beautiful Imperial city, exulting in its porcelain tower and its Imperial palaces. It is now a wasting ruin in the hands of a horde of rebels. We have occupied Canton, and we hold it at a cost of some half-million a-year; but, so far from that having brought the Court of Peking to terms, the Emperor is much obliged to us for saving him the trouble of garrisoning it against the rebels who hover round it. If we would only do the same kind office for him at Nankin, at the expense of another half-million a-year, our Tartar friend would feel a double obligation to us. He has had an army besieging that city these eight years. It is now proposed in the English House of Commons that we should take this city of Nankin from the rebels, and hold it from the Emperor, in order to punish him and bring him to terms! Sir J. Elphinstone would deserve as long a peacock's feather as his American friend obtained if he could only induce our Government to make war upon the Emperor of China in this agreeable fashion. We might go on thus and garrison Hankow, which has been five times taken and destroyed by the rebels, and, indeed, every other great city in China south of the Northern River, and the Emperor would be a long time before he would do anything to deprive himself of such accommodating enemies. All things are changed since Sir J. Elphinstone, was in China, but Sir J. Elphinstone's panacea is unchangeable. One bit of modern truth there probably was in what he said, and that is, that it will, if we act under the counsels of such advisers as himself, cost us some ten millions before we are out of this third Chinese war.

We are, in this Chinese difficulty, in the multitude of counsellors, destitute of counsel. Mr. Bright makes his stereotyped declaration that the Chinese are angels and the English are miscreants, and, with a pompous and rather pharisaical protest, washes his hands of the whole business. Lord John Russell and Mr. Sidney Herbert say their official speeches, but for anything like practical information we are driven back upon our naval and military men, who tell us, of course, as Sir J. Elphinstone in effect did last night, to trust it all to them, and let neither statesman nor diplomatist meddle with it. We are warned by no means to go to Peking. All sorts of horrors are predicted from a march over a hundred miles of level hedgeless country. The Chinese Court is depicted as so ancient and magnificent in its power and grandeur, that we ought not to do anything to provoke it. Again, it is said to be so rickety, so insolvent, so powerless to protect its own subjects, or to gather its own taxes, that we ought to abstain from touching it, lest it crumble under our fingers. We are bid at the same time to tremble before a mighty monarchy, and to stand aside lest we are covered by the dust of a falling ruin. If either of these were true we might ask, "Why should we spare this strong Government?" or "Why should we fear this tottering pagoda?" But, in fact, none of those who thus talk know anything about it. Whether Peking is rich or poor, strong or weak, many will guess, but with our present opportunities none can know. In the Palace of Westminster those who decide upon these questions most dogmatically know least, and if we would put their crotchets aside, and be guided by the rules of common sense—if we would deal with the Chinese as with other mortals, believing that they are capable of being moved by hope and by fear, by kindness and by severity, as they may merit the one or deserve the other, we should probably save a large part of these threatened ten millions. There is a shortsightedness about our policy towards this empire, which would cease if they of our statesmen who direct it would study it, or if the House of Commons would insist that they only who have studied the subject should direct the policy. It is a notorious fact that throughout our public offices the only men who have any ripe and useful knowledge of this matter are Lord Palmerston and one gentleman in the Foreign-office. The one knows it as a statesman, and the other as a man of detail. The others only have their heads full of crotchets, which they shake together like bits of glass in a kaleidoscope. It is not their fault that it is so, but it is their fault that they will, by meddling, do harm in so great a matter. Some day it will come to this, that the country, in its weariness and disgust, will flatly refuse to send any

more forces into those seas, happen what may. Nor is it certain that this will be in the end an unwise course in a national point of view. Russia, which stands at so many sick men's beds, has already made the will of the great Tartar Empire. It is her mission, and it is her present work, to absorb all the rich northern provinces. We English have no notion, nor need we care, how quickly this is proceeding. But every treaty right we now secure from the Emperor of China will be of infinite value to us in no long time to come, when we shall have to claim its exercise under a strong Government, recognising the laws, and compelling the observance of the rights of civilised nations.—*Times*.

Eight hundred and fifty thousand pounds were voted on Friday night for the Chinese expedition. We have turned the figures into words—let the reader turn them into ideas. Let every tax-payer who reads these lines endeavour to realise the money's worth of this sum, as measured by similar amounts in expenditure and in revenue. Let him remember how much less the French Treaty costs us in the temporary sacrifice of income, and how much that sacrifice was grudged by men who silently acquiesced in this unprofitable vote. Let him remember, too, that no one pretends that this £850,000 will be enough, and that an old naval commander in Chinese warfare estimates the probable expense, first and last, at ten millions. Sir J. Elphinstone knows well both the basis and the range of these operations; and he reminds us of a few facts that not one man in a thousand is likely to have applied to the question. When we think of war with China we form a vague idea of distance and expense. We think of a dozen men-of-war and frigates, a score of gunboats, and a few thousand of soldiers and marines, sent out direct from England to reinforce a similar force already equipped from Bombay or Calcutta. We think of a rather inglorious species of warfare carried on at the mouths of rivers, against mud forts and junks. We anticipate that in a couple of months or so the diplomatist will once more supersede the commander, and there will be another series of unintelligible negotiations, ultimately consummated by a treaty and an indemnity. We roughly calculate the expense at two or three millions, and we confidently reckon on being reimbursed from the Celestial Treasury. We all agree that it is a great pity so much blood should be shed, even though no such disaster as that of the Peiho mingles the blood of our own braves with that of Tartars. But, for the most part, we think and feel no more about it. To the average Englishman the whole proceeding is as quaint as a Chinese lantern, and as unintelligible as a Chinese puzzle. Sir John Elphinstone has indicated the direction which the public mind is now sure to take. He is not of the party of peace. He did not disapprove of the lorcha war. He does not object to our avenging the Peiho repulse and carrying out our Peking crotchet. He speaks as a strategist in advocacy of another line of operations than that adopted. He is for taking Nankin instead of Peking. His information may, therefore, be received without prejudice. He tells us that the Persian expedition cost £3,750,000. The distance from Bombay to Bushire and back is not 3,000 miles. From Calcutta or Madras to the mouth of the Peiho is nearly 5,000 miles. All these operations cost at the rate of about £1,000,000 sterling per month. If we go up to Peking we may reckon on being gone twelve months. If it is April when the expedition leaves our Indian ports, it will be August before the Taku forts are captured and the road opened to the capital. Once arrived there, our real difficulties will begin. If the Emperor is true to the traditions of his dynasty and the nature of his subjects, he will retire to the foot of his Tartar steppes; leaving the north-east wind and sleet, and the wild tribes whose knives and arrows are keener than either, to re-enact the tragedies of Moscow and Cabul. That is the prospect held out to us by a veteran who offers in exchange that of the winter occupation of a coast city, the loss of which would be nothing to the Emperor, but its retention an incalculable burden to us. In either case, the twelve months and the £10,000,000 are but too easily made out. If the French treaty has, in that time, added as much to our trade with Europe, we shall have been working and trading harder than ever, in order to obtain for Mr. Bruce the privilege of residing, if he likes, at a city where no Englishman in his senses can have any wish to stay more than a few weeks. Mr. Albert Smith or Mr. Meadows might make a good use of the privilege. Mr. Bruce can only desire it for the sake of further irritating and humiliating a people whose blood is already on his head.

We must confess, with Mr. Bright, to being deeply disappointed and pained at the tone held by Lord John Russell on a subject so momentous to every interest of humanity and justice. But any reliance one might be disposed to place on the moderate counsels and secret instructions of the Government is almost destroyed by Lord Palmerston's vicious and wicked speech. If in Lord John Russell we see a ruler perilously tampering with our national honour and with human life, in Lord Palmerston we see a reckless, remorseless trifler with these sacred considerations. We had hoped that a few more years of life, and the wholesome experience of political reverses, had chastened the levity and arrogance of character fatally wanting in the highest attributes of manhood and statesmanship. We are grieved to find that Palmerston is Palmerston still, with his old tendencies to the perpetration of incalculable mischief, barely restrained by colleagues who have at least the grace to be ashamed and serious in the presence of misfortune and of crime. Sir John Pakington shows incontrovertibly, from the blue book, that Mr. Bruce's instructions required him to exercise his judgment as to the mode of approach to Peking. Lord Palmerston's reply is in effect nothing but a revival of the stupid jest about Mr. Wad being carried thither in a box on wheels. When the loss of thousands of human lives—the waste of millions' worth of human labour—the overthrow of an ancient but tottering dynasty—the convulsion of a vast and infinitely complex social order—the break-up, in short, of the Chinese empire, and the entanglement of England in a new Asiatic chaos; when these mighty issues are raised, the Prime Minister of Great Britain would decide them by a rule of etiquette—a scruple of pride—a feeble play of humour over the grave of principle and conscience.—*Star*.

COMMERCIAL TREATY BETWEEN DENMARK AND SIAM.

Appended to the above treaty, of which we gave an abbreviated text in our last impression, are the following general regulations to be observed by the Danes in Siam.

1. The captain of every Danish merchant vessel, upon arriving, is bound to report full particulars to the Custom-house at Paknam, and to state the number of his crew, the port he comes from, and the number of cannon and muskets as well as the quantity of ammunition on board. The latter will be landed there, and returned to him on his departure.

2. Any vessel arriving at Bangkok without having fulfilled the above regulations, will have to go back to Paknam under surveillance of the authorities to land their arms and ammunition, besides which the captain or supercargo will have to pay a fine of 800 ticals for his irregularity.

3. On the arrival of a Danish vessel at Bangkok, the captain is bound to take his papers, including the ship's manifest and bills of lading, within twenty-four hours to the Danish Consul, who will take the needful steps to obtain permission from the Custom-house to discharge his cargo, without which he is not allowed to break bulk. In case of non-compliance with this regulation, or should the captain have presented an incorrect manifest, he becomes liable to a fine of 400 ticals, but he is permitted to amend his entry within 24 hours without subjecting himself to the fine.

4. Any vessel discharging cargo without permission from the Custom-house, or smuggling goods that have not been entered and paid duty, will be punished by a fine of 800 ticals, and confiscation of the goods attempted to be smuggled.

5. Every Danish vessel, having conformed to the regulations, discharged its import cargo, and taken in a fresh one, shall receive from the Custom-house, through the Danish Consul, a Siamese clearance, with which he shall be at liberty to depart for his fresh destination, and on producing which he can reclaim his arms and ammunition landed at Paknam.

6. All Siamese Custom-house officers shall wear a distinguishing mark when on duty, by which they may be immediately recognised, and not more than two such shall be permitted to board any Danish vessel, except to enforce the regulations or seize smuggled goods.

7. Ammunition and all other articles of war can only be offered for sale to the Siamese Government, and any other importation of them for private trade is strictly prohibited.

FURTHER CORRESPONDENCE WITH THE HON. F. W. A. BRUCE.

PUBLISHED 20TH MARCH, 1860.

No. 1 is from Mr. Bruce to Lord J. Russell, dated Shanghai, Dec. 5, 1859, as follows:—"I have the honour to acknowledge the receipt of your lordship's despatch of the 26th September, and to express my grateful sense of your lordship's kindness in conveying to me the expression of the continued confidence of her Majesty's Government. I feel assured that the ultimate decision on the course I have pursued will be pronounced on a deliberate consideration of all the circumstances of the case; and I have only to ask that, if the result be to diminish that confidence, I may be recalled; for no one can act with the boldness required in this distant region unless he feels that he has comprehended aright the broad features of the policy her Majesty's Government wishes to be carried out. Emergencies are of constant occurrence, and must be met without hesitation or delay. It may be very difficult to justify in England the course adopted, but I have no doubt that it met with the approbation of those Chinese who are enlightened enough to know that the true policy of China is to conciliate, by a seasonable surrender of her prejudices, that foreign element which she can no longer hope to repel by force, and that they regret at heart our want of success. Had the execution of the treaty been confided to those hostile to its very principles, the records of our past intercourse are open to show that the contest would have only been deferred to a later, and probably a more inconvenient, period. It is not unimportant to observe that the foreign representatives with whom I was acting agreed in the importance I attached to ascending the river to Tien-tsin under our own flags; and that they were willing, in order to attain that object without an act of war, to take advantage of the absence of any prohibition to use this, the high-road to Peking, in accordance with former precedents. I do not enter into the question of treaty right. I was not going up under the new treaty, as it is not in operation, and under the old treaty I had no right to go to Peking at all. Considering that last year we were at Tien-tsin, that the right to proceed to Peking and see the Emperor on performance of the foreign ceremonial was then recognised, though, in order to avoid what might appear a humiliation of the Emperor, its exercise was, at his own request, deferred, and that every subsequent step on our part had been in the path of conciliation, the Governments of England and France had a right to expect for their ministers an honourable and friendly reception. I am convinced that the closing of the river in our faces was an unequivocal indication to the contrary, and that it would have been a capital mistake to have submitted to this exclusion."

No. 2 is also from Mr. Bruce to Lord John Russell, dated 6th December:—"I have the honour to acknowledge the receipt of your lordship's despatch of the 10th of October, informing me that there is no reason for interrupting friendly relations with the Chinese at Shanghai, Canton, and elsewhere. Before its arrival I had already acted in the spirit of this instruction by addressing the enclosed note to his Excellency Ho, claiming for British ships the privilege of paying tonnage dues at the reduced rate of four mace per ton instead of five, in consequence of a similar reduction of the tonnage dues having been granted to United States' vessels, according to the American treaty. I also propose, as the port of Swatow will be opened to American commerce, and be made the residence of an American Consul on the 1st of January, 1860, to direct Mr. Caine to proceed there as her Majesty's Consul. The fact that Swatow has been for some time practically open to foreign trade, and that there is a British settlement at that port, renders the establishment of some controlling authority desirable, and, under present circumstances, necessary." There is an enclosure of a despatch to Governor-General Ho on the subject.

No. 3 is from Lord John Russell to Mr. Bruce, approving the same.

No. 4 is from Mr. Bruce to Lord John Russell, 21st December:—"There is nothing of importance politically to communicate. The reports which reach us are unanimous as to preparations to resist being continued in the North, and that they are conducted by certain Mongol chiefs called the forty-eight kings, who, I should infer from the statements, impose their will upon the Emperor. The latest and most trustworthy account represents the forts near the mouth of the river Peiho as eight in number, each capable of

holding 1,000 men, with other defences higher up the stream. The Peking Government has made no overtures of accommodation, though there is no symptom of hostility at the ports."

No. 5 is from Mr. Bruce to Lord John Russell, 5th Jan. 1860, reporting that Governor Ho had referred the question of tonnage dues to the Emperor, and that the demand had been duly accorded. A copy of Ho's despatch is enclosed, agreeing to this, but nothing is said in reference to opening Swatow.—"I stated to your lordship in my despatch of the 6th Dec., that I had called upon the Imperial Commissioner Ho, to extend to British vessels the reduction of tonnage dues conceded to the Americans under their new treaty. His Excellency admitted that the request was in accordance with the language of the supplementary treaty, and forwarded it to Peking for the approval of the Emperor, who states in reply, that 'he is graciously pleased, in his considerate regard for the interests of trade, to command the commissioner to send instructions to the five ports to levy tonnage dues on British and French vessels at the same rate as on American vessels, namely, 4 mace per ton.' The different reasons assigned in the two despatches for making the concession are worthy of notice: Ho recognises the obligation of the treaty; the Emperor grants the reduction as a proof of his regard for the interests of his trade. I may remark that it appears from Ho's despatch that he sent the memorial to Peking on the 11th Dec., and the answer to it must have been received at the latest on the 27th, the day on which his reply to me is dated. At the requisition of the allied Commanders-in-Chief, the reduction was carried into effect at Canton, without waiting for the result of my application to the Imperial Commissioner."

No. 6 is from Mr. Bruce to Lord John Russell, 6th Jan.:—"I have the honour to acknowledge the receipt of your lordship's despatches of the 29th of Oct. and 10th Nov. last, conveying the instructions of her Majesty's Government as to the course I am to adopt. As M. de Bourboulon has not received his instructions, and he informs me that, until they arrive, he does not consider himself at liberty to depart from the system of reserve hitherto pursued, I have not yet addressed the Imperial Government. A separate communication would be less likely to be successful than simultaneous notes presented by M. de Bourboulon and myself; and the Chinese might be thereby encouraged to suppose that the views of the two Governments do not coincide as to the course to be pursued."

No. 7 is from Lord Cowley, in Paris, to Lord John Russell, 5th March:—"I have the honour to inform your lordship that the instructions to M. de Bourboulon were transmitted by the Chinese mail, immediately after that which conveyed your lordship's instructions to Mr. Bruce."

Literature.

Souvenirs d'une Ambassade en Chine et au Japon en 1857 et 1858. Par Le Marquis de Moges. Paris: L. Hachette et Cie; and King William-street, London.

This work, appearing so soon after the more laboured and complete "Narrative" of Mr. Oliphant, falls remarkably dull and tame. In truth it only professes to be the "Recollections" of the mission; but even in this aspect it is meagre and spiritless in the extreme. The author, who was an attaché to the French mission, accompanied Baron Gros, in the *Audacieuse*, round the Cape of Good Hope. He visited Teneriffe, of which he gives an interesting account; then Ascension, where evidently our author must have been gulled, for he gravely states that "drunkenness there is a lawful and acknowledged fact; slight walls, whitened by lime, are scored at short distances on the path to the fort, to guide the drunken soldier, and conduct his staggering walk across the lava." Now, although, after our own visit to Ascension, we came away with by a no-means agreeable impression of the island, still we are glad to say that we were perfectly unaware of this startling fact. From thence the *Audacieuse* proceeded to the Cape, where the French embassy was most hospitably received by Sir George Grey and the colonists generally; indeed, the Cape appears to have influenced the marquis as favourably as Ascension had the reverse. Our author then proceeded to Singapore, where, after a few days' stay, the *Audacieuse* set sail for China, arriving at Castle Peak Bay on the 14th October, 1857.

The book then commences with China, and the sayings and doings of the French embassy; but on these matters Mr. Oliphant's book tells us so much more fully, and yet concisely, that we hardly feel it necessary to give even a resumé of the marquis's recollections. These, indeed, appear to have been jotted down on the author's note-book in a very cursory manner, and what is wanting therein seems to have been made up by extracts from the *Moniteur*, which are given very freely, and at considerable length. For one thing, however—although, knowing the insufferable self-esteem of the French, we might, perhaps, have partly expected it—we certainly were not quite prepared, and that is that the author appears altogether to ignore the part the British took in the war; indeed, from the very casual mention occasionally of Lord Elgin and Sir Michael Seymour, the reader might suppose these gentlemen to have been permitted to accompany the French expedition, or, perhaps, to have assisted, as the French term has it. The book speaks very highly of Hong Kong, and gives a just meed of praise to the "colonising genius" of Great Britain. Sir John Bowring receives great credit at the author's hands, and is throughout the work spoken

of in much higher terms than Lord Elgin. The work contains nothing new or original, and must suffer greatly by comparison with that of Mr. Oliphant. The known obstinacy of the French in insisting upon spelling all foreign names after their own fashion, is here most apparent; the names of the Chinese cities, rivers, and even of the Imperial commissioners, are so altered from what we have been accustomed to as to be scarcely recognised; the English names also are frequently misspelt, and we were amused to find that our present Minister in China is in the last page called *Sir Frédéric Bruce*. We observe that this work is about to be translated into English.

Macaulay's Biographies. A. and C. Black, Edinburgh.

In this work, which Mr. Black states would not have been brought before the public so early but for the death of Lord Macaulay, some most interesting records of his life are to be found, especially in connection with Edinburgh, in a correspondence with Mr. Black. The following extract will serve to show his principles:—

"With respect to the past, I have perhaps a little to explain, but certainly nothing to repent or to retract. My opinions from the day on which I entered public life have never varied. I have always considered the principle of protection to agriculture as a vicious principle. I have always thought that this vicious principle took in the Act of 1815, in the Act of 1828, and in the Act of 1842, a singularly vicious form. This I declared twelve years ago when I stood for Leeds; this I declared in May, 1839, when I first presented myself before you; and when a few months later Lord Melbourne invited me to become a member of his Government, I distinctly told him that, in office or out of office, I must vote for the total repeal of the corn laws."

It contains the biography of Pitt, Johnson, Goldsmith, Bunyan, and Atterbury, written by Lord Macaulay for the *Encyclopædia Britannica*, and will be found exceedingly interesting.

Napoleon III. on England. Saunders, Otley, and Co., Conduit-street, London.

The author has collected a vast number of the sayings and writings of Napoleon III., nearly all bearing on our political and domestic affairs; and, if we mistake not, the reader will have new impressions aroused on perusing this volume, which contains some extraordinary revelations of this great man.

"In 1840 Louis Napoleon published *L'Idée Napoléonienne*. This is the only number of a publication which it was intended should come out monthly, but no second number came to light. In August, 1840, the rash attempt at Boulogne ended in the arrest of L. Napoleon. He was condemned to perpetual imprisonment, and was sent to the fortress of Ham, where he remained till May, 1846, at which time he made his escape, and took refuge in England."

One Trial. T. C. Newby, Welbeck-street.

This is a very agreeable story, full of the shade and sunshine of domestic life, and told in a style now amusing, now pathetic, and always interesting. The sunny side of the tale is, that one Ethel Vane is a youthful beauty; is heiress, absolutely and without control, to a large fortune; and is courted by two peers, several commoners, and a handsome young doctor. With the waywardness of untried womanhood, and with the becoming and natural contrariness of the feminine heart at twenty-one, she falls in love with the last and least desirable of the rivals. The shady part of the story consists in her discovering that sweet William, the doctor, is a horribly wicked individual, and that three years before he had plighted his troth to a far-distant maiden on the banks of the blue Moselle, or thereabouts. This makes her so unhappy that she marries Lord Egmont, who has long loved her to distraction, and all in vain. She frets about William, and keeps his love-letters, notwithstanding his treachery, until at last, as a matter of course, her husband one day finds one of them, and raises a small breeze, in the midst of which he accepts an ambassador's post abroad, and prepares for voluntary transportation. He is already on his journey to the coast when the train gets smashed, and so, very nearly, does the runaway Lord Egmont. The already repenting and wretched wife is fetched from London to the supposed death-bed of her husband, and then is told in touching language how all her native generosity of heart returns,—how the approach of the dark tyrant who levels alike all of human kind, restores the wandering love which had long roamed away upon the track of an unworthy object to the more estimable man whom she had theretofore slighted, though she bore his name as a wife. Vows of faith and confidence for the future are exchanged; Egmont does not die, and all ends well. For a reader in search of an amusing book for a quiet afternoon, the *One Trial* is just the article.

Theatrical.

COVENT-GARDEN.—Mr. Harrison's benefit took place on the 17th inst., when the house was crowded in every part. In consequence of the immense success of "*Lurline*," the managers have been induced to give nine extra performances of that opera, it being originally intended to terminate the season on the 17th inst. Miss Pyne will take her benefit on the 28th, and the theatre will be closed. An address was issued to the audience on the evening of Mr. Harrison's benefit, it being the last night of the regular season. The season of the Royal Italian Opera is to be begun on the 10th of April, the programme of which Mr. Gye promises in a few days.

LYCEUM.—Madame Celeste produced a new drama on the 19th inst., entitled "*The Abbé Vaudreuil*." The construction of the piece enables her to assume a series of dresses, and display her power of rapidly changing her manner, which is one of her peculiar characteristics. The principal part of the drama consists of a dream. *Lieut. Delcour* falls asleep while dwelling on the history of the Court of Louis XV., and, through the medium of a diabolical personage who calls himself the *Abbé Vaudreuil*, is transported back to the period in question. The Court at Versailles are beautifully represented, but the incidents are rather too numerous to describe. There is a love story running through both the real and the delusive scene, which, in the end, comes of course to a happy termination. Madame Celeste plays the *Abbé* with great success. The piece was much applauded, and is the work of Col. Addison, who was called before the curtain at its conclusion.

STRAND.—The return to her stage of the directress of this theatre was celebrated on the 12th inst. by the production of a pretty little piece, entitled "*The Loves of Arcadia*," having at least the merit of delicacy and inoffensiveness, praise of no mean order in these days of broad farce. The scene is laid in the time of Louis V. The monarch has planned a match between the *Chevalier de Merrilac* (Mr. Parselle) and *Mdlle. Desirée de Launay* (Miss Swanborough), who have never seen each other, but strongly object to being disposed of in this unceremonious way. They both, therefore, each being in ignorance of the other's proceedings, leave the court, and adopt a shepherd and shepherdess's life. Meeting in these new characters, they fall in love, and eventually, of course, are happily married, though this consummation is not arrived at till after an amusing *imbroglio*, in which the king is concerned. The dialogue is well written, and all the principal actors played their parts with ability.

MR. ALBERT SMITH.—Mr. Albert Smith has announced that on the 5th of April his present entertainment will be closed. On that evening "*China*" will have been given 400 times.

THE NEW ENGLISH OPERA COMPANY.—It is said that this company will have the Princess's Theatre during the season, and will be under the musical direction of Dr. Vech.

HER MAJESTY'S THEATRE.—An *exposé* of Mr. E. T. Smith's intentions with regard to the coming season at her Majesty's Theatre has been issued. Among the artists engaged are *Mdlle. Titiens* and *Signors Giuglini* and *Mongini*, who are now recognised as amongst the foremost among modern operatic singers. *Mdlle. Maria Brunetti*, from the Grand Opera at Paris, and *Madame Borgi Mamo*, are to make their first appearance during the season. *Madame Alboni* is also to appear, as well as the following singers:—*Mdlle. Vaneri*, *Madame Maria Cabel* (of the Imperial Opera Comique, Paris); *Madame Laura Baxter*, *Mdlle. Dell'Anese*, *Mdlle. Nardi*, *Signor Belart*, *Signor Corsi*, *Signor Mercuriali*, *Signor Soldi*, *Signor Everardi*, *Signor Aldighieri*, *Signor Fellar*, *Signor Sebastiani Ronconi*, *Signor Gassier*, *Signor Castelli*, and *Signor Vialetti*. Mr. Benedict and *Signor Ardit* are the directors. Among the operas which Mr. Smith promises to produce are all the old favourites—"Don Giovanni," "Norna," "The Sonnambula," "Lucia di Lammermoor," "Il Barbiere di Siviglia," &c. &c.; and in addition to these he is to bring out the less frequently performed, but not less appreciated, "*Freischütz*," "*Fidelio*," and "*Semiramide*." On the evening of the 10th of April, that on which the season begins, "*Martha*" is to be performed. *Titiens* and *Giuglini* are to sing.

Births, Marriages, and Deaths.

BIRTHS.

- SAVILE—On the 14th inst., at Torquay, Devon, the wife of Captain J. Walter Savile, retired list H.M.I.F., of a son.
 NEWTON—On the 14th inst., at Brighton, the wife of the Rev. J. Newton, of a son, stillborn.
 PUSTAU—On the 15th of March, at Altona, Palmalle 28, the wife of Wm. Pustau, Esq., of a son.
 BARNET—On the 22nd inst., at 2, Leinster-gardens, Hyde-park, Mrs. George Barnett, of a daughter.
 CHALMERS—On the 20th inst., at 12, Douglas-road, Canonbury, N., the wife of William Robert Chalmers, of a daughter.
 BARRAS—On 1st Feb., at Shanghai, Mrs. J. R. Barras, of a daughter.
 JOAQUIM D'ALMEIDA—At Mount Echo, Singapore, on the 8th of February, the wife of Joaquim D'Almeida, Esq., of a daughter.

MARRIAGES.

- TATE—RAWLINSON—On the 14th instant, at Renshaw-street Chapel, by the Rev. J. Hamilton Thom, Joseph Priestley Tate, Esq., of Shanghai, to Harriette Sarah, second daughter of Richard Rawlinson, Esq., of Liverpool.
 CHALDECOTT—LUCAS—On the 17th inst., at All Saints' Church, Wandsworth, by the Rev. J. Buckmaster, vicar, Thomas Andrews Chaldecott, Esq., M.D., of Victoria, Hong Kong, eldest son of T. W. Chaldecott, Esq., of Montague-place, Russell-square, to Ellen L., eldest daughter of Edmund Lucas, Esq., of West-hill, Wandsworth.
 EDE—HOLME—On the 20th inst., at West Hackney Church, by the Rev. T. Davis Lamb, domestic chaplain to the Earl of Mexborough, Frederick Charles, third son of Edward Ede, Esq., of Manchester, to Helen, daughter of the late Thomas Holme, Esq., of Manchester, and niece of Edward Zohral, Esq., late of Rosslyn Lodge, Hampstead.
 MATHESON—SIMPSON—On the 7th Feb., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial Chaplain, Colin S. Matheson, second son of the Rev. C. R. Matheson, of Kilmuir Easter, Ross-shire,

to Rachel Eleanor, third daughter of the late William Simpson, Procurator Fiscal of Aberdeenshire.

BROWN—BOWEN—At Shanghai, on 31st Jan., by the Rev. J. Hobson, British chaplain, Henry Browne, P. & O. Co.'s service, to Martha Elizabeth Bowen, eldest daughter of John Bowen, of Milford, Pembroke.

DEATHS.

LORD—At Ningpo, on the 26th of January, the wife of the Rev. E. C. Lord Bowley—On the 4th inst., at Brighton, aged 78, Jane Bestling, wife of William Bowley, daughter of the late Edward Braxton, shipbuilder, Fareham, Hants.

BROWNLOW—On the 7th inst., at Mentone, aged 21, Charlotte, only daughter of William Brownlow, Esq., of Knapton, Queen's County.

DALB—On the 15th inst., in her 75th year, Jane, the wife of the Rev. Thomas Dade, rector of Broadway and Bincombe, Dorset, and youngest daughter of the late Col. Lloyd, of Bawdeswell Hall, Norfolk.

GROOMBRIDGE—On the 17th inst., at Hertford, aged 27, William, third son of the late Richard Groombridge, Esq., of Paternoster-row.

JAMESON—On the 17th inst., at 57, Conduit-street, Mrs. Anna Jameson, widow of the late Hon. Robert Simpson Jameson, Vice-Chancellor of the Canadas, in her 66th year, admired and loved, as she is most deeply lamented.

LAMBERT—On the 22nd inst., at 34, Albion-street, Arthur Lambert, Esq., late Bengal Artillery, aged 33, son of Vice-Admiral Sir George Lambert, K.C.B.

RICHARDSON—On the 15th inst., at Dalston-rise, George Richardson, Esq., after a long illness, aged 79.

WAGSTAFF—On the 11th inst., at A-h Lodge, Finchley-road, in the 86th year of his age, Charles Digby Wagstaff, Esq., for many years Superintendent of the Foreign Department of the Post-office.

WALKER—On the 17th inst., at his residence, 28, Westbourne-park-terrace, Commander William Walker, R.N., K.T.S., in the 72nd year of his age.

STUART—At Foo-chow, on the 3rd Feb., Walter L. Stuart, aged 23 years, second son of the late Alexander Stuart, of Inchbreck and Luthers, N. B.

BERNARD—In the Straits of Malacca, on the 16th of February, Mr. Charles Bernard, chief officer of the steamer *Ganges*.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE—At Deal, 26th March, from Whampoa: Indiana. From Maulmain: Richard and Harriett. At Bristol, 23, from Sourabaya: Reulura. Off Bamegat, for Boston, 6, from China: Wm. A. Arms rong. At Texel, 22 from Batavia: Gebroeder Hou man. At Brouwershaven, from Padang: Doelwyk.

DEPARTURES—March 24, from London for Hong Kong and Whampoa: Lammermuir.

LAI'D ON AT LONDON FOR SHANGHAI—Florence. **SPOKEN**—Warren Hastings, Shanghai to London, Dec. 9, 26 S., 59 E. Sardinian, Liverpool to Singapore, Feb. 6, 3 N., 23 W. Phœbus, Batavia to Amsterdam, Feb. 5, 3 N., 22 W. Express (French ship), bound to Hong Kong, Feb. 5, 2 N., 21 W.; Asia, Shields to Singapore; Rattler, Gibraltar to Sumatra, Feb. 4, 1 N., 21 W.; Krimpenward, Banjoewanjie to Rotterdam, Feb. 4, 1 S., 20 W.; Golden City, Boston to Manila, Feb. 12, 2 S., 30 W.; C. C. Fowler, Cardiff to Hong Kong, Jan. 21, 6 N., 23 W.; Jane D. Cooper, Batavia to Cowes, Jan. 25, 15 S., 8 W.; Montferrand, Manila to Havre, Jan. 15, 27 S., 7 E.

The Daniel Jeffries (ship) of Glasgow, for Manila, which had been lying at the Tail of the Bank at Greenock for several days, has been brought into harbour, having become leaky; she is making three inches of water per hour, and will have to discharge a portion of her cargo to be examined.

PASSENGERS INWARD—By this Mail from Hong Kong.—For Bombay: Mr. J. F. Buxey. For Suez: Mr. Dorlencourt. For Gibraltar: Mr. Aubrede. For Marsailles: Mrs. Marsh. For Southampton: Mrs. Twiss, child, and servant, Mr. G. Urmon and servant, Captain Paterson, and Dr. Bremner. From Singapore: Capt. Duval, Mons. de Fitzjames, Mons. Don Lopez, Mr. D. Duff, Mr. and Mrs. Pride, child and infant, and European servant, John Clark.

Monetary and Commercial.

At an influential meeting of merchants and capitalists interested in the progress of India, held with the view of considering the desirableness of forming a "Bank of India" on principles that should meet the concurrence of the existing establishments, and at the same time facilitate the public transactions of that empire, the following resolution was adopted:—

"That a deputation wait upon Sir Charles Wood to ascertain his views in reference to the minute understood to have been received from Mr. James Wilson on the subject of the establishment of a State Bank of India, with a view, if deemed expedient, of giving effect to them."

The following is an extract of a communication which has been jointly addressed to the Secretary of State for India by the Agra and United Service Bank (Limited), the Chartered Mercantile Bank of India, London, and China, and the Chartered Bank of India, Australia, and China. Their by no means unreasonable request relates to Mr. Wilson's despatch concerning the proposed formation of a Bank of India:—

"With reference to this important subject, representing, as we do, existing banking establishments (under charter or patent from the Crown), doing business in and with India to an aggregate amount of £7,568,371, and with paid-up capitals of £2,144,000, and proprietary bodies collectively number-

ing 1,588, we beg that you will have the kindness to convey to Sir Charles Wood our request that he would favour us with a copy, or with the substance of the recent despatch from Mr. Wilson, which is said to form the groundwork of the movement in question; and, inasmuch as we are not aware of what may have been asked, or may be sought by those engaged in that movement, we have also to solicit that we may be allowed by Sir Charles Wood an opportunity of expressing our opinion before any new arrangements are concluded. We would further express our confident hope that no exclusive or preferential privileges of any kind whatever may be accorded to any private interests, but that matters of such vital consequence to the prosperity of all India shall be dealt with entirely on public grounds, and for the general advantage."

It is understood that Sir Charles Wood desires to defer receiving the proposed deputation on the "Bank of India" until the question is in a more forward state, and that meanwhile he will not take any steps in the matter without giving the gentlemen of whom the deputation was to have been composed, the opportunity of conferring with him.

The dividend to be declared by the Oriental Bank for the six months ending in December, will, it is understood, be £3 per share, making, with £1 5s. previously paid, a total distribution at the rate of 17 per cent. for the year.

The directors of the Chartered Mercantile Bank of India, London, and China, at a meeting held on the 22nd inst., declared a dividend of 5 per cent., free of income-tax, for the half-year ending Dec. 31 last, making 10 per cent. for the year, and payable on the 26th inst.

The report of the Chartered Bank of India, Australia, and China, preparatory to their meeting on the 29th, states the available balance at £29,517, and recommends a dividend at the rate of 7 per cent. per annum. £5,000 is to be appropriated as reserve, and £4,490 will remain to be carried forward. Since the last meeting a branch has been established at Hong Kong.

At a meeting of the Committee of Bankers, it was definitively resolved, as anticipated, that banking business shall terminate at three o'clock on Saturdays (instead of four, as hitherto), beginning with the 19th of May.

At the special meeting of the Oriental Inland Steam Company, the committee's report, which expressed a belief that Mr. Bourne's system of steam-trains for the navigation of the Indus had not been fully tested, was adopted.

Under the new management of the undertaking, there is at length a good prospect of the *Great Eastern* being really completed and sent to sea, the whole of the £100,000 of additional preference capital, recently authorised to be raised, having been taken up by the present proprietors.

The specie by the present India and China Mail amounts to £259,163, of which £12,952 is in gold, and £246,211 in silver. Of this £2,000 in gold is for Alexandria; £1,852 in gold, and £11,502 in silver, is for Madras; £9,100 in gold, and £110,100 in silver, for Calcutta; £24,150 in silver for Singapore; £60,302 for Hong Kong; £2,300 for Foo-chow, and £37,857 for Shanghai.

The adjourned meeting of proprietors of the Chartered Bank of India, Australia, and China, will take place on the 29th inst. The directors' report is as follows:—

"Referring to their last annual report, the directors have to inform the shareholders that the agency at Singapore is now in active operation, and that a branch of the bank has since been established at Hong Kong. The directors trust that the general balance-sheet and accounts now submitted will be satisfactory to the shareholders. It will be seen that the net profits on the bank's operations for the year ended 31st December last amount to £37,211 7s. 5d.; and that after deduction of the interim dividend at the rate of five per cent., declared on 22nd Sept. last, there now remains an available balance at the credit of profit and loss, of £29,517 12s. 2d. Out of this sum the directors recommend a dividend (free of income-tax) for the half-year ended Dec. 31 last, at the rate of 7 per cent. per annum, on the capital paid up to the 30th of June last, and on the subsequent calls from their respective dates of payment. Of the remainder they propose transferring £5,000 to the credit of a 'Reserve Fund,' carrying forward the balance of £4,490 13s. 8d., as 'undivided profits.' When the first dividend of five per cent. per annum was declared, a year ago, the shareholders cordially adopted the directors' proposal to apply the surplus profits at that period to the extinction of the whole of the preliminary expenses of the institution and its branches. The directors doubt not that the shareholders will equally approve their present proposal to appropriate £5,000 towards the commencement of a reserve fund, to be hereafter increased from time to time. The shareholders will observe by the balance-sheet that the subscribed capital of the bank, £644,000, is now paid up in full; and the requisite certificate to that effect has been obtained from the Lords Commissioners of her Majesty's Treasury. The directors who now retire are Mr. Thomas A. Mitchell, M.P., Sir Henry Muggersidge, and Mr. Wm. S. Lindsay, M.P.; and one of them being immediately re-eligible, Mr. Mitchell offers himself to the choice of the shareholders. For the vacancies created by the retirement of the other two directors, the following gentlemen present themselves as candidates, viz.:—Mr. Thomas Lancaster, and Mr. Joseph B. Morrison. The auditors, Mr. Thomas Dakin and Mr. Jonathan Thorp, now complete their term of office, and offer themselves for re-election as auditors for the ensuing year."

The meeting of the Red Sea and Indian Telegraph Company has been held, and from the report it appears that—

The Government, it appears, have guaranteed an unconditional grant of 4½ per cent. for 50 years on the capital of £800,000, to be extended to £1,000,000 if necessary. It is stipulated that of the surplus profits beyond the guarantee one-third shall be appropriated to the repayment of the interest advanced by the Treasury, another one-third to the establishment of a reserve fund of 10 per cent. on the capital, and the remainder to be applied to the increase of the shareholders' dividend up to a maximum of 10 per cent. The directors have already received from the shareholders the sum of £600,000, and they have recently made another call of £2 10s. per share. The completion of the line from Alexandria to Kurrachee was considered a gratifying fact, the wires extending over more than 3,000 miles of sea. The telegraph from Europe to Alexandria was not yet completed; it was, however, open to Candia, but two attempts to continue it to Alexandria had hitherto failed. It was, nevertheless, expected that the route would be completed direct from London to Calcutta in the course of two months. It was estimated that the returns of the two sections of the line would be £22,000 per annum, and the guarantee of the Government alone involving an annual payment of £36,000, it was clear that the authorities were on the whole on the safe side. In the course of a few years the line, it was stated, would be extended to the Australian colonies, and then the means of intercourse between the Antipodes and the mother-country would be of the most perfect character. During the discussion, it was stated that the 4½ per cent. interest would be paid, even supposing the cable were broken so as to be rendered irreparable. It was also, it was said, hoped that the Government would hereafter extend the concession, so as to enable the company to lay down a second line, as well as to provide for all possible accidents. The public were largely availing themselves of the line, even to the extent of American firms making arrangements for transmitting United States messages to India and China. It appeared to be the general feeling that the guarantee was perfectly safe, the Government being bound to pay, whether the line worked or not, up to £1,000,000. The Government of India has afforded substantial and important encouragement to the undertaking, by authorising a uniform rate of charge of 6s. a message from Kurrachee to every part of India (the districts to the east of Calcutta excepted), and also by allowing its telegraph officers at the various stations in India to receive payment for the messages they transmit through the company's cable, a privilege likewise conceded by the Governments of Ceylon and South Australia.

THE RETAIL TEA TRADE.—A numerous meeting of the retail tea-dealers and grocers of the metropolis was held at the London Tavern, in order to take into consideration the financial propositions of the Chancellor of the Exchequer with respect to that branch of trade. There were present, among other persons interested in the question, Mr. Cooper (Ridgway and Co.), Mr. Bartlett (Phillips and Co.), Mr. Fincham, Mr. Miller (Dakin and Co.), Mr. G. Law, jun. (W. and J. Law), Mr. Robert Jones, Mr. F. Strugnell, Mr. Marshall, Mr. Hawkins, Mr. Ellis, Mr. Newsom, &c. Mr. Alderman Abbiss occupied the chair. The chairman said the very large attendance was a proof that the occasion was considered important. He need not tell them that it was intended to impose a duty of 1s. on every chest of tea cleared out, and 7½d. to 8d. on every chest of tea, in addition to the Customs' duties now paid. It was a pernicious and unjustifiable tax. He had received a letter from Mr. Moffatt, which fully entered into the matter. The letter having been read, Mr. Bartlett, of the firm of Phillips and Co., said he believed that the tax was impolitic, iniquitous, and unjust; and that, if proper representations were made to the Chancellor of the Exchequer, he would not carry it out. He then moved,—"That it is alike unjust and inexpedient to charge revenue with the cost of its collection; that the proposed 1 per cent. on all Customs' duties will bear with particular hardship on the retail dealers, while the merchant and wholesale dealer, for whose benefit chiefly the expenses of the various operations and removals under bond are conducted, will escape free; that on tea, on which the war duty of 1s. 5d. per lb. is retained, the impost will amount to the serious tax of 7½d. to 8d. per chest; and that the meeting pledges itself to use every exertion to prevent the infliction of so grievous an injury." Mr. Cooper, of the firm of Ridgway and Co., seconded the resolution, which was supported by Mr. Newsom, Mr. Dyer, Mr. Snowden, and Mr. Tomlin, and carried unanimously. A committee was then appointed to carry out the resolution, and the proceedings terminated in the usual manner.

ARTICLES OF IMPORT.

TEA.—Good common Congou fit for shipping has become very scarce, and the price is firmly maintained at 1s. 5½d. to 1s. 5½d. per lb. Low qualities and broken leaf kinds have sold from 1s. 4d. to 1s. 5d. per lb. Sincune Kais and fair Kaisows have met but with little inquiry, and the few sales show a decline of ½d. per lb. Second-class Monings and Oopacks have sold, to a moderate extent at a decline of ½d. to 1d. per lb. Common to fair Ho Hows and Ning Chows are also rather easier. Some common to fair Tay-shans, via New York, have sold from 1s. 4d. to 1s. 4½d. per lb. In fancy teas there is but little subject for remark, business having been very limited. In scented teas the few sales from recent arrivals show a reduction of about ½d. per lb. A public sale commenced on the 21st inst., and concluded on the 23rd. 31,557 packages were offered, and 14,200 packages were sold, including 7,820 packages without reserve, and 4,720 packages Congou, per Annandale, on account of the concerned. These went at full prices. Fine Congous and medium Gunpowders rather lower. The total deliveries in London during the past fortnight were estimated at 1,267,917.

SILK.—Messrs. Arles, Dufour, and Co., of Lyons, state that transactions in the silk market during the past month have been checked by the uncertainty with regard to the result of the discussion on the commercial treaty in the English Parliament. The unsatisfactory advices from the United States have also contributed to create dulness in the French as well as in all other Continental silk markets. The average decline in prices during the month has been limited, however, to between 2 and 3 per cent., the comparative smallness of stocks preventing any serious depreciation. In the London market prices are rather firmer, and a good demand is maintained, but there is no alteration in the quotations.

SUGAR.—The market closed with a dull tone, and public sales went off irregularly, and in some cases at rather easier prices. The transactions in unclayed Manila had been 7,500 bags at 32s. 6d. to 33s. 6d.

COFFEE.—The market maintains its previous firmness, and that done, both for the home trade and export, has been at firm prices. 105 bags fine ordinary and superior bold native Ceylon, in auction, brought 62s. to 64s. 6d.; casks, 254 bags Courtallum.

TIN.—Fair business has been done in Straits within our quotations, but the demand has been very partial. Some contracts have been entered into for arrival. Of Banca we are almost without stock, hence the disproportion in prices. Banca, 138s. to 139s.; Straits, 131s. to 132s.

RICE.—The demand for soft grain descriptions has continued good, and the total transactions have again been rather extensive at further improved rates, and the market closed very firm. 6,349 mats from Penang, at auction, were withdrawn at 10s., as also 2,600 bags of old Maulmain at 9s. to 9s. 9d. About 20,000 bags have been sold privately at full prices.

SAGO.—Is in somewhat improved demand, and about 1,800 boxes have sold at auction at 16s. 6d. to 20s. for middling to fine small, and 15s. 6d. to 17s. 6d. for middling to fair large. Sago flour 15s. to 16s.

RYE.—Only a few puncheons of Penang have been sold at 1s. 6d.

PEPPER. has suffered a further slight decline. Of 5,439 bags Singapore, and 239 bags of Batavia at auction, three-fourths were sold at 4d. to 4½d. per lb., with a few bags at 4½d. to 4½d. for superior. Of 501 bags of Singapore brought to auction, one-fourth sold at 7½d. to 7½d. per lb. for fine, being rather dearer.

TOBACCO.—Manila tobacco is very much wanted, and is much inquired after. It would command a very high price, as there is not a bale of it in the market for sale. The large stock of East India that was in the market,

has been sold at from 1½d. to 2d. per lb., and any quantity might be disposed of at those prices, but it would be impossible to obtain higher rates.

JAPAN WAX.—The quotations remain unaltered, not a single sale having taken place since our last publication.

DRUGS AND SPICES.—Camphor, China, and Japan, 170s. to 180s.; Cassia lignea, in bond, 95s. to 103s.; do. in buds, 185s. to 190s.; do. oil, 14s. to 15s.; cinnamon, Ceylon, 9d. to 2s. 3d.; cloves, Amboyna and Penang, 4½d. to 1s. 5d.; Galangal root, 30s. to 35s.; ginger, Calicut and Cochin, £3 10s. to £6 10s.; gum Benjamin, first quality, £13 to £15; 2nd quality, £10 to £13; 3rd quality, £4 to £9; do. drossy, £1 to £3; damer, 28s. to 48s.; gamboge, picked, £7 to £8; do. in sorts, £4 10s. to £6; mace, first quality, 2s. 2d. to 3s.; do. 2nd quality, 1s. 2d. to 1s. 6d.; nutmegs, first quality, garbled, fine, bold, even, and heavy, 2s. 6d. to 3s. 9d.; do. ungarbled, 1s. 4d. to 2s. 4d.; oil, aniseed, 8s. 3d. to 8s. 6d. per lb.; Cajeputa, 1d. to 1½d. per oz.; cinnamon, 2s. to 4s. 3d. per oz.; mace and nutmegs, 2½d. to 3d. per oz.; rhubarb, Dutch, trimmed, sound heavy breaking, bright and fresh, 5s. to 6s.; common flat, not dark coated, spongy, or wormy, 1s. 4d. to 3s. 3d.; common sound, 1s. 2d. to 3s.; star aniseed, fresh, bright, bold, unbroken, not grey, 95s. to 100s.; sticklac, Siam, fine black, 50s. to 80s.; Terra Japonica, Cutch pegue, 27s. to 28s.; gambier, in squares, 16s. to 17s.; turmeric, sound, bright, and bold, 12s. to 17s.; vermilion, bright, deep colour, and pure, 3s. 3d. to 3s. 5d.

MISCELLANEOUS.—Gutta-percha, not adulterated or falsely packed, 1s. 3d. to 2s.; India-rubber, pure, not drossy, 2s. to 2s. 1d.; rattans, 2s. 3d. to 5s. 9d. per 100; sapan-wood, Bemah, £6 to £8 10s.; Siam, fine black, 50s. to 80s.; Singapore mother-o'-pearl shells, 125s. to 140s.; Manila, 105s. to 125s.; soy, thick and clear, dark red, good flavour, 4s. 3d. to 5s. per lb.

ARTICLES OF EXPORT.

There is but little alteration in the prices of exports.

IRON.—The demand for export continues restricted. Orders generally are of small amount, but the makers whose quality is in high repute are generally able to keep their works in full operation. Common Staffordshire bars are quoted at 150s. at the works; best bars, 170s.; sheets, 180s.; doubles, 210s.; nail sheets, 170s.; boiler plates, 180s.; best and best best in proportion. Common rods, 150s.; hoops, 170s.; gas strip, 160s.; and all other sorts in proportion. In pig iron, Staffordshire cold blast is quoted at 90s. Best native hydrate pigs 75s. to 82s. 6d.; good mine pigs, with a modicum of flue, cinder, 60s. to 65s., and superior makes of all mine melting iron, 70s. to 80s. according to make and quality. Favourite Shropshire and Forest of Dean brands at 90s.

COPPER.—Great dulness has been manifested in this article, and has been followed by a reduction of £5 per ton. Tough cake and tile £112, and the best selected £115 per ton.

TIN.—There is no alteration in the price of English tin. Common blocks 136s., and refined 138s.

TIN PLATES are quiet. Best charcoal I.C. a box, 32s. to 33s.; second quality, 30s. to 31s.; coke, 25s. to 28s. 6d.

LEAD.—There is a good inquiry, and prices are firm without change. Several parcels of German have, however, been offered at rather lower rates.

SPELTER.—There is no alteration to notice in spelter, the prices remaining steady at £20 17s. 6d. to £21.

MANCHESTER MARKETS.

The improvement in the tone of the market which showed itself at the end of last week has gradually become confirmed. There is now a fair amount of business passing for nearly all the export markets, and the downward movement in prices has been forcibly checked, even where no advance has taken place. In some cases there is a positive increase in the quotations. Shirtings for the Eastern trade have decidedly improved in value since the beginning of the week. In yarns there is a manifest accession of confidence in the prevailing feeling. There continues to be a fair demand for India and China, and a considerable trade is doing also for Germany and the Levant. The prices of yarns generally show a hardening tendency, and in many cases the rates demanded are ½d. per lb. higher than those of Tuesday last. The home trade remains comparatively inactive, but there is good ground for hoping that the market generally has entered on a period of more animation than has been witnessed for some weeks past.

An analysis of the new Bankruptcy Bill has been prepared by the Mercantile Law Amendment Society, and transmitted to their subscribers. As the bill occupies 150 pages, and comprises 529 clauses, the service thus rendered is considerable. The measure is to take effect on the 11th of October next. Upon a comprehensive review of its various provisions, the favourable impression created by its first general outline will be strengthened, and the probability is that a majority of such alterations as may be found necessary will be of a purely technical character. The more important points that appear to call for some modification are to be found in clauses 158, 174, 396, and 526. According to the first of these, on any seizure of goods under judgment, a debtor is to be deemed to have committed an act of bankruptcy.

JONKHEER, Mr. Vander Wall van Puttershoek, Am. to Ba., Jan. 15, 29 S., 32 W.

BULLFINCH, Singapore to London, Dec. 14, 7 S., 105 E.

HIPPOGRIF, Manila to London, Feb. 21, 18 N., 38 W.

CASUALTIES.

The *Wagoola*, Jardine, of and from London for Shanghai, went on shore at about 10.30 p.m., on the 10th March, a mile to the eastward of Folkestone, a portion of her cargo was discharged the following morning, and an anchor having been got out, two powerful steam-tugs attempted to tow her off at high water, but in vain, in consequence of the very strong wind and heavy swell. About 500 tons of her cargo have been landed quite dry. The *Wagoola* has since been assisted off and taken in tow into the Commercial Docks (London.)

The *Sea Serpent*, Whitmore, from London to Hong Kong, which put into Rio Janeiro, 9th Jan., leaky, had been ashore on a reef; she was discharging; her cargo was supposed to be damaged.

The *Graham*, Boyd, which left Clyde for Singapore 8th March, put back to Lamlash 16th inst., leaky, and crew refusing to proceed.

The *Von der Heydt*, Neumann, from Liverpool to Batavia, which put into Lisbon 9th Feb., with damage to rudder, &c., had, it appears, touched the ground near Nantes; her bottom has sustained some damage, and she will therefore have to discharge and be hove down.

The *Pallas*, Daban, arrived at Bordeaux from Samarang, reports having encountered heavy weather before reaching the Cape, during which she sprang a leak, and sustained damage to spars, rigging, &c.; she was in a leaky state when she put into Table Bay.

The *Rosina*, Ritchie, from Sunderland to Hong Kong, put into Falmouth, 12th March, leaky.

The Portuguese brig-of-war *Mondego*, which was lost in the Indian Ocean, on her passage from China, on the 22nd Jan., had on board forty-four souls, of whom sixteen were saved by the American ship *Ariel*, and landed at the Mauritius.

FREIGHTS AND CHARTERS.

The important advance in freights at Bombay and Calcutta continues to attract considerable attention throughout the shipping interest. By the most sanguine shipowners, the improvement is looked upon as permanent, and the utmost eagerness is evinced to obtain outward employment for India even for ships not yet arrived, the natural result of which is to depress outward freights, which have already exhibited much weakness. During the past week a further large amount of tonnage has been fixed for Aden, the rates obtained having been respectively 62s. 6d. cost, freight and insurance for two ships, and for the remainder 50s. freight only, and (the latest charter) 48s. from Birkenhead, or £55 from Sunderland for a ship "to arrive." For Bombay direct, the holder of the last contract offers 35s., ready ships being worth about 40s. A Government contract for 10,000 tons coals for China is advertised, but rates of freight in this direction have not improved. Home-wards, there is very little disposition to charter on this side; offers of tonnage at 45s. direct to London or Liverpool from Bombay having been refused since the news was received of £5 being current there. For Continental account there is an improved inquiry at 50s. from Bombay or a neighbouring port to United Kingdom or Continent; Manila, Singapore, or Java to United Kingdom or Continent 52s. 6d. to 55s.; Maulmain, 77s. 6d. to 80s. teak; Calcutta to London or Liverpool, 62s. 6d. to 65s. (1-3rd weight, 1-3rd seed, 1-3rd measurement); London or a coal port to Bangkok and back, 100s. on the round (small vessels); Sunderland to Aden, Maulmain, and back, £6 10s. teak on the round, &c. The Australian trade continues depressed, and in some cases very low rates have been accepted to complete cargoes—say 30s. to 35s. measurement, 1s. 1d. per dozen beer, &c. The demand for tonnage is limited, £3 15s. per ton N.N.M., being the current value for ordinary ships. For dead weight cargoes to Melbourne 50s. per ton is offered from the Thames, Tyne, or Wear.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila, 50s. to 60s.

At St. HELENA, Feb. 6: Otto, Ahlmann, from Hong Kong, and sailed for Rotterdam; City of Carlisle, Shiell, from Shanghai; Crouch Brothers, Crouch, from Java.

THE STEAMER *FAN-QUI*.—The *North British Daily Mail*, in noticing the departure of this vessel, says:—"The S. S. *Fan-Qui* left Greenock on Monday the 5th at noon, and landed her channel pilot at Dunmore on Tuesday evening at 8 o'clock, making the passage in thirty-two hours. In her deep state this was good work. She was drawing six inches more water than her depth of hold. Though so deep she did the light's from Clough to Cumbrae in 1 hour 22 minutes. The wind was fresh ahead the last 12 hours of her passage, and in the rolling westerly swell off Tuskar, Silver's patent marine governor, which is applied to the engines, was found to answer admirably. The vessel was lively and easy in a sea-way, steered well, and proved herself a most efficient sea-going craft. The engines worked most beautifully, the three cylinder motion being perfectly free from the knock so common on the low centre of direct acting double engines. The distance from Greenock to the Hook Tower is 288 nautical miles; time on passage, 32 hours; giving a speed of 9 knots on a consumption of 12 tons of coal per day, carrying only 8 lbs. steam. The boiler is loaded to 18 lbs., but the fire bars were shortened to save fuel on the long voyage to China. The following report has been received from Dunmore East, March 7:—"The pilot cutter *Scagull* took a channel pilot out of the *Fan-Qui* (S. S.), Baker, from Glasgow to China. The pilot was landed here at 9 o'clock on the night of the 6th inst., when the *Fan-Qui* proceeded on her voyage."

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,**MANUFACTURERS OF IMPROVED INDIAN LAMPS.**

"Messrs. TUCKER & SON.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

CARSON'S ORIGINAL ANTI-CORROSION PAINT,

PATRONIZED BY

The British Government,
The French Government,
The Russian Government,

H. R. H. The Prince Consort.
Hon. East India Company,
Most of the Nobility and Gentry,

Railway and Canal Companies,
The Principal Collieries,
Mill Owners, Iron Masters, &c., &c.

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK.

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES, PIERS, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is needed).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

WALTER CARSON AND SONS,

LEA AND PERRINS'

CELEBRATED

WORCESTERSHIRE SAUCE.

PRONOUNCED BY
CONNOISSEURS

TO BE THE
"ONLY GOOD SAUCE,"
AND APPLICABLE TO
EVERY VARIETY OF
DISH.

EXTRACT of a LETTER
from a MEDICAL
GENTLEMAN, at Madras,
to his Brother, at
WORCESTER, May, 1851.

"Tell LEA and PERRINS
that their Sauce is highly
esteemed in India, and is, in
my opinion, the most palatable
as well as the most
wholesome Sauce that is
made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Crosses and Blackwell, and other Oilmen and Merchants, London.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERROW**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

MUSIC for EXPORTATION.—No house can offer so extensive and varied a Catalogue of Works in every branch of Music, and so well adapted for safe investments, as that of **ROBERT COCKS and CO.** Catalogues of all classes of music gratis and postage free.

HAMILTON'S celebrated **DICTIONARY** of 3,500 musical terms, 59th edition, 1s. "We consider this the most useful book on musical matters extant. It ought to be in the hands of everybody, whether student, amateur, or professor."—*Leamington Magnet*.

HAMILTON'S **MODERN INSTRUCTIONS** for the **PIANOFORTE**, enlarged and fingered by Cerny, 242nd edition, 4s. "Every one beginning music must as necessarily have their Hamilton, as all school children must have their Murray."—*Devonshire Chronicle*. Also, **HAMILTON'S INSTRUCTIONS** for **SINGING**, 15th edition.

CLARKE'S **CATECHISM** of the **RUDIMENTS** of **MUSIC**, 59th edition, price 1s.

"To the learner of the Pianoforte this is a most invaluable contribution. It contains a most clear and lucid exposition of the rudiments of music, suited to the most juvenile capacity."—*Athenaeum*.

THE RIFLEMEN'S MARCH, for the Pianoforte, by the composer of the celebrated *Re-treat March*. Finely illustrated, 2s. 6d.

London: **ROBERT COCKS and CO.**, New Burlington-street, Regent-street, W., and of all Booksellers.

BROWN AND POLSON'S PATENT CORN FLOUR.

DIVING APPARATUS.
C. E. HEINKE,
Submarine Engineer
103, Great Portland-st.,
London,
Begg to call the attention
of Shipowners, Mer-
chants, Captains, &c. &c.,
to the important im-
provements made by him
in the
SUBMARINE HELMET
DRESS AND APPA-
RATUS,
which enables a diver to
remain any length of time
under water. For the recovery of Property from Wrecks,
Making and Repairing Foundations of Harbours and
Bridges, and also
FOR PEARL AND SPONGE DIVING.

BURROWS AND CO., WHOLESALE WINE MERCHANTS, LIVERPOOL.

Stores, Lime-street.—Offices, 54, Duke-street.
The proprietors beg most respectfully to call the atten-
tion of the Trade, Noblemen, Clergy, and the public in
general, to their extensive stock of CHOICE WINES of
rare vintages.

B and C are not disposed to comment upon the purity
of their wines, which is daily most laudably acknowledged
by the public and eminent medical men of all countries, as
the increasing patronage of the highest families of the land
is a sufficient guarantee.

They beg to call particular attention to their pure Tonic
Wines, as being so valuable to invalids and persons of weak
stomachs.

A sample case, containing 3 full-sized wine-bottles, will
be forwarded to any address on receipt of Post-office Order
for 6s. 6d., or a dozen for 21s.

It is a well-known fact that impure and adulterated wines
are the greatest foes to health, producing acidity in the
stomach and debilitating the digestive organs; while pure
wines will accelerate the digestive powers—invigorating,
strengthening, and bracing the nervous system.

Their Tonic Wine is admitted to be most essential to in-
valids, both old and young, and should never be absent
from the homes of the weak and sickly. Its properties are
duly acknowledged and appreciated by the leading men of
the faculty both at home and abroad. To prevent imposi-
tion, each bottle is sealed with the name of the Firm. All
orders to be made payable to Henry Burrows.

PUMPING MACHINERY.

GWYNNE AND CO., ENGINEERS,
LONDON, manufacture and supply the following ma-
chinery, of the most improved construction, and with all
the latest improvements:—Portable and Fixed Steam
Engines and Boilers of every description; Water-wheels,
Windmills, Horse and Hand-power Machines; Pumping
Machinery for the supply of towns, cities, and districts,
and for the irrigation of coffee, cotton, indigo, sugar-cane,
and rice estates, for pumping out coffer dams, canals, dry
docks, reservoirs, &c. They also manufacture and supply
the Pumping and other machinery for paper, pulp, and
fulling mills, breweries, distilleries, tanneries, starch
works, bleaching, dyeing, and calico-printing works,
chemical works, silk, cotton, and flax mills, and manufac-
tories in general.

Price Lists and further particulars obtained on applica-
tion to GWYNNE AND CO., Hydraulic and Mechanical
Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne
and Cos' Machinery stands unequalled.

GALVANISM.—PERSONS desirous of
availing themselves of the MODERN DISCOVER-
IES in ELECTRO-MAGNETISM and GALVANISM as
a curative agent in the treatment of various forms of
Paralysis, Muscular and Nervous Debility, Chronic Rheu-
matism, Spasmodic Asthma, &c., can have it applied by
properly-qualified medical men of experience at the Gal-
vanic Institution, No. 52, Euston-road, every day (except
Sunday), from 12 to 4 o'clock. Accommodation for
board and attendance of a first-class character for those
coming from a distance.

HOLLOWAY'S OINTMENT & PILLS—

Inflammations of sensitive parts, piles, fistulas, and
such like painful diseases, may, without consulting anyone,
be presently relieved, and ultimately cured, by the proper
and diligent use of this cooling and healing Ointment,
whose action should in such cases be assisted by judicious
doses of Holloway's Pills. Ere many days have elapsed
the anxious patient will experience a wonderful degree of
ease from this treatment. Doubts and fears soon disap-
pear, and the sufferer will bless the day on which he first
applied these remedies. They are equally suitable to both
sexes, all ages, and any climate; nor is their efficacy im-
paired by long keeping. Their action on the frame is
cooling, safe, and certain.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 9d. p. er box.
This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease at- tacking any vital part.
Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

PERSONS PROCEEDING TO CHINA can effect assurances on favourable terms with the COLONIAL LIFE ASSURANCE COMPANY.

For HONG KONG and CANTON, the celebrated clipper ship LORD OF THE ISLES, A 1, 691 tons register, William Jameson, Commander, lying in the East India Docks. This fine ship is not excelled in speed by any vessel in the China trade, and delivers her cargoes in perfect order. Has good accommodation for passengers.

For Freight or Passage, apply to PHILLIPS, SHAW, & LOWTHER, 2, Royal Exchange-buildings, E.C.

ELLIS, SON, and FICKLING will despatch the following high class, British-built, clipper vessels:—

Destination.	Ships.	Tons.	Class.	Docks.
Shanghai.	Anglo Saxon	693	A 1 13 years	St. Kath.
Bombay.	Caldera	731	A 1 13 years	London
Bombay.	South Belle	541	A 1 9 years	St. Kath.
Kurrachee	Victory	579	A 1	W. India
Calcutta	Dunmail	771	A 1 14 years	London
Cape of Good Hope	Francis Bannfield	355	A 1 10 years	St. Kath.
Cape of Good Hope	Salvador	350	A 1 12 years	St. Kath.
Algoa Bay	Packet	251	A 1	St. Kath.
Port Natal	Woodbine	263	A 1	St. Kath.

These fine vessels have most superior accommodation for passengers. 132, Leadenhall-street, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Tons.	Commander.	To Sail.
Hong Kong & Whampoa.	Foam	628	G. Innes	Few days
ditto.	Prior Tuck	662	Darlington	With dis.
Shanghai.	Beulah	587	Pickernell	March 31
Shanghai.	Soient	730	M. Brooks	April 10
Calcutta	Cherokee	700	W. Allan	March 27
Bombay	City of Quebec	663	H. Auld	March 31

London, St. Michael's House, St. Michael's-alley, Cornhill; or York-chambers, 55, King-street, Manchester.

TRIESTE ROUTE to INDIA.—The Steamers of the AUSTRIAN LLOYD'S STEAM NAVIGATION COMPANY leave TRIESTE for ALEXANDRIA on the 11th and 27th of every month, at 10 A.M., in correspondence with the P. and O. Company's steamers leaving Southampton on the 4th and 20th, and Suez on the 21st and 6th of each month. Passengers' baggage may be shipped at Southampton for Alexandria.

For further information apply at 127, Leadenhall-street, London; or Oriental-place, Southampton.—HICKIE, BORMAN, and Co., Agents.

FOR HONG KONG and WHAMPOA, the fast-sailing, Thames-built clipper ship LAUDERDALE, A 1 13 years, 850 tons register, ALEX. BOWERS, Commander, loading in the East India Docks. This magnificent vessel has lately arrived from Foo-Chow in 101 days—her first voyage—beating all her competitors, several of which were noted China clippers, thus proving her admirable sailing power. She is confidently recommended to shippers and passengers.

Apply to the owners, Messrs. John Willis and Son, East India Chambers, Leadenhall-street, E.C.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

WITH DISPATCH.

FOR SHANGHAI direct, the splendid American clipper ship, FLORENCE, A 1 New York register, 1,045 tons, E. D. WADSWORTH, Commander, lying in the London docks. This beautiful ship was built expressly for the China trade in 1856, and has just arrived from Whampoa in 99 days.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

CHARLES GRANT AND CO., GENERAL STOREKEEPERS, BANGKOK, SIAM.

HEDGE AND CO., GENERAL STOREKEEPERS, AUCTIONEERS, AND COMMISSION AGENTS, FOO-CHOW-FOO.

JOHN TANN'S PATENT RELIANCE LOCKS and FIREPROOF SAFES are the best and cheapest safeguard against Fire and Robbery.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

MITCHELL'S STEAM-SHIPPING JOURNAL.—A Weekly Newspaper devoted to the interests of steam navigation. (By the Editors and Staff of the *Shipping and Mercantile Gazette*), published every Friday morning. Price 3d., per post 4d. Office, 54, GRACECHURCH-STREET, London.

TO THOSE ABOUT TO PROCEED TO INDIA, CHINA, AUSTRALIA, &c.

Per P. and O. str., 4th May.—From Southampton to Shanghai: Mr. W. Howard. To Singapore: Dr. and Mrs. A. S. Naber and two children, Mrs. A. Swart. From Marseilles, 12th May, to Hong Kong: Mr. G. P. de Silver.

Per P. and O. str., 13th June.—From Marseilles to Penang: Mr. and Miss Matthieu.

Per P. and O. str., 12th July, from Marseilles to Singapore.—Mr. J. Ten Brink.

Per P. and O. str., 12th August.—From Marseilles to Singapore: Mr. and Mrs. Paddy; To Penang: Mr. H. Y. Paddy.

Per P. and O. str., 20th August, from Southampton to Singapore.—Mr. and Mrs. Mohr and child.

Summary of News from the Far East.

THE THIRD CHINA WAR.

Preparations have commenced at Hong Kong and Shanghai in good earnest. The four vessels from Shanghai which are announced as having sailed under sealed orders, comprise H.M.S. *Sampson*, *Acteon*, *Dove*, and gunboat *Algerine*; two of these vessels are well-known surveying vessels, and it is given on good authority that this small expedition is intended to reconnoitre in the Gulf of Pechili and the mouth of the Peiho, and to take possession of some convenient slip of land which will be serviceable to our troops. A statement is also current that they were despatched to capture some trading junks which had left Shanghai for the Peiho, and supposed to be loaded with arms and ammunition. It is also stated that the Chinese Government are casting heavy guns, and using large quantities of American anthracite coals for this purpose. Guns of the largest calibre have also been imported from the United States. H.M.S. *Imperieuse*, 51 guns, bearing the flag of Rear-Admiral Jones, C.B., second in command, left Hong Kong for Shanghai on the 22nd of February, she took up six boats, each capable of landing 100 men, a large number of tents, and a bridge or pier, which could be made available for landing troops over the mud. She also had on board field-carriages for mounting her 32-pounders, and a large quantity of ammunition and war stores. The British and French naval commanders are engaged at Hong Kong in chartering vessels and steamers, organising a Chinese coolie corps, and other necessary measures. General Montauban, the French military Commander-in-Chief, had also arrived from France, and the Quartermaster-General of the British Army. From these active operations it may be augured that it is intended to push the expedition north during the present month, in perfect readiness for the decision of Lord Elgin and his French colleague, Baron Gros. The delay in their departure will consequently be a source of great disappointment and anxiety. Nothing of a reliable nature

has been heard of the action or intentions of the Court of Peking, nor of our Ambassador, Mr. Bruce. It is rumoured that the Taku forts have been dismantled in order to strengthen those at Tien-tsin. There have been no further reinforcements from India. The detachment of the 44th Queen's Regiment, which was announced in our last as having arrived at Singapore, has left that place for Hong Kong, in H.M.S. *Pearl*, and transports *Cressy*. A portion of the 99th Regiment had arrived at Singapore from Calcutta in the *Octavia*, towed by the *Reynard*. The *Simoom*, with the troops as originally embarked at Portsmouth, had also arrived, and proceeded on to Hong Kong with the transports *Mars*, *Octavia*, and *Jessamine*. The *Ringdove*, *Magicienne*, *Hooghly*, and *Fury* were engaged in towing vessels from the Straits of Malacca up to Singapore.

Sir Hope and Lady Grant arrived at Singapore from Calcutta, and proceeded to Hong Kong in the steamer *Fiery Cross*, on the 6th of March.

JAPAN.

YEDO.

The reports from Japan are still of an unsatisfactory tenour. A servant of the British Minister has been murdered at Yedo while playing with some children, and serious significance is said to attach to this overt act of barbarism. The unfortunate man was, we believe, a born Japanese who had been to the United States, and subsequently become a registered British subject. Bearing in mind the peculiar position of the Japanese, it is perhaps to be regretted that a man in a position to them so anomalous was retained in so prominent a position. By law and custom a Japanese forfeits his life by leaving his own country, and the presence of a man who was a standing exception to the rule, could not but tend to provoke hostility.

Mr. Alcock, the Consul-General, under date Jan. 27, writes to Mr. Vise, the Acting-Consul at Kanagawa, as follows:—"Sir, —I have received your despatch of the 12th inst., giving cover to the minutes of a meeting of the foreign community at Yokuhama, and the statement, addressed to no one in particular, bearing the signature of twenty-eight residents, British and foreign, urging the advisability of making Yukohama, in preference to the location at Kanagawa, a permanent place for trade. In compliance with the wishes of these gentlemen, I have given the subject my best consideration, and regret that it is not in my power to concur with them as to the view they take of the preferability of Yokuhama over Kanagawa. Into the detailed reasons for this preference it is unnecessary to enter, because, were they less open to question, they have chiefly reference to transitory influences—advantages on the one side or impediments on the other, which would soon cease to exist if they were to adopt the site selected in Kanagawa instead of that which has hitherto been occupied in a temporary manner at Yokuhama. This discussion would indeed be equally superfluous were the reasons alleged much better founded than I conceive them to be, because there is one grave and insuperable objection to the site at Yokuhama which must override any minor considerations of temporary convenience to individuals, and that is the political scope and design of the Japanese authorities, who improvised a foreign settlement by anticipation against the strong remonstrances of the diplomatic representative of the United States—the only one on the spot when it was first proposed. The prevailing idea of the Japanese in taking this step was obviously retrogressive and inimical to all the interests it was the object of recent treaties to protect and advance—notably those of trade. The location at Yokuhama presented all the distinctive characters of Desima, prepared in like manner at great expense, and by anticipation, for the Portuguese more than two centuries ago, and to which the Dutch were soon after consigned, after it had been determined to expel the one and subject the other to every kind of indignity and restriction, both as regards their rights of residence and of trade. It only remains, therefore, under existing circumstances, for me to instruct you to abstain from any act which shall make the occupation of a location at Kanagawa compulsory on British subjects, and if the Japanese authorities choose to hold out to foreigners inducements for renting land or building houses at Yokuhama, you will afford the usual facilities for legalising any contracts or deeds, but you will take care that the Japanese authorities distinctly understand that the right of British subjects to buy or lease land within the limits of the foreign location already marked out at Kanagawa remains untouched

by any act of settlement at Yokuhama. At some future day merchants may see reason to prefer a less isolated site, and their right to a location at Kanagawa will thus be preserved."

CHINA.

PEKIN.

The commissioner Kwei-liang, who negotiated the treaty with Lord Elgin, had applied for release from public duties, but was refused. This minister is 73 years of age. Hwa-sha-na, whose death was announced in our last, appears to have been a theme of discussion among Chinese politicians. They say that Ho Kwei-ching addressed a confidential memorial to the throne last year, advising the faithful adoption of the terms of Lord Elgin's treaty. Hwa-sha-na concurred in this policy, and his disappointment on finding his Imperial master was slow to perceive the importance of an amicable settlement of matters, is said to have caused his death. He is described as a harsh, stern man, but possessing many good qualities, honesty among the number. He was employed by the late emperor to superintend the repairs of the grand canal. Under his administration the contractors and subordinate officers had but little opportunity of cheating the State. On three occasions he caught them tripping, and each time had the delinquents severely punished. His uncompromising honesty on this occasion made him many enemies, but the sternness of the man cowed his would-be assailants.

SHANGHAI.

Of news at this port there is positively none, if we may except that from Japan, which will be found elsewhere. In despair we give the following extracts:—"Upon the 15th February the first performance was given for the season of the Amateur Dramatic Corps. But a very few weeks indeed have elapsed since the present company has been embodied, and we feel assured that the earnest thanks of this community are due to them and to their indefatigable manager for the public spirit which, on such short notice, they have displayed, for the arrangement and decoration of their theatre, and for the style in which they have placed their pieces on the stage."

"We closed the last year with a notice of delightful winter weather. Scarcely was it gone when rain set in for ten consecutive days, and visited us occasionally during the month, with a little snow or sleet on one day. It was generally cold throughout—sharp and bracing when fine and clear, raw and disagreeable when wet. The thermometer ranged from 33 degs. to 56 degs. in the day, the average being 42 degs., and from 22 to 47 degs. at night with an average of 34 degs. Rain fell on 15 days."

The private steamers *Yang-tze* and *Chery Chase* brought the London mail of the 27th Dec. on the morning of the 15th Feb. The *Chery Chase* left Hong Kong on the 11th at 4.30 and *Yang-tze* at 5.30 p.m. A pilot at the White Dogs reported to the *Yang-tze* that the *Chery Chase* had passed there five hours before. The *Yang-tze* anchored at Woosung in the morning of the 15th at 7.30, and the *Chery Chase* at 10 o'clock.

H.M.S. *Cruiser* arrived from Nagasaki on the 16th Feb., having been relieved by H.M.S. *Camilla*. She brings no news.

HONG KONG.

The English mail of the 10th Jan. arrived on the evening of the 26th Feb. The events in connection with the coming war we notice elsewhere.

The fifteenth Hong Kong races came off with greater eclat than on any previous occasion, extending over three days. The sport consisted of the following races:—1st. The Wong-neichong stakes, for which four ponies started, the Doctor winning. 2nd. The Canton Cup; four horses started, and after a most excellent race Sir Michael came in the winner. 3rd. The Pony Welter; three started, Affghan winning easily. 4th. The Caledonian Cup; two horses started, Snowdon winning easily. 5th. The Hack Stakes; four horses started, Ten-per-Cent. coming in first. 6th. The Garraway Stakes; Saulton winning easily. This ended the first day's sport. The Pet took the Scurry on the second day, and left the spectators eager for the Challenge Cup trial, which, however, ended in an easy victory for Stockham, Snowdon being second, and a new and very promising horse, Robin Hood, making up the field. Negro asserted his right to the Valley Stakes, and Dervish took the Arab Stakes from Lightning and Midnight. Mystery made the Irish hacks safe for Aberdeenshire, and then a field of six came up for the Parsee Cup. A capital race was the result. The start

was quite on the time, save that Ivanhoe was scarcely up, and Huntsman rather late on his legs, Elfin and the Muff having the best of it. Templar was the successful horse, with Huntsman second, and The Muff third. Saltoun led for the Victoria Plate, but at the village turn, second round, Zampa came up, and eventually turned the tables on him, and avenged the defeat of the previous day. On the third day, Affghan, Pearl, and Wee Pet were handicapped for the Ladies' Purse, and May-day also accepted at catch weight. The Pearl won at 10st. 4lb., with Affghan, 11st., close behind, and Wee Pet third, carrying 10st. Miss Adams presented the purse to Captain Williams, the successful rider, and made a speech on the occasion, which, unfortunately, was scarcely heard, owing to the playing of the band. A first-rate race ensued for the Western Cup, which Snowdon took to East Point, Templar pressing him hard with a broken stirrup leather. The Muff ran well, but Sunrise and Ivanhoe did not distinguish themselves. Lady Emily pattered in ahead of Little Ella and Flash o' Lightning, and carried the important China Stakes, while the Souvenir Cup (a very elegant pair of claret jugs) fell an easy prize to the unconquerable Stockham. After this came two handicaps; the first for Arabs, won by Lightning; the second for all other horses, won by The Muff. The Native Race finished the long and excellent catalogue of sport.

The fourth representation of the Hong Kong garrison theatricals took place on Tuesday evening. The pieces performed were—"The Little Treasure," "A Fast Train! High Pressure!! Express!!!" and "Grimshaw, Bradshaw, and Bagshaw." The first piece, although it has been performed four times this season, and two last, has not in the least abated in public estimation. Every one is perfect in their parts; and the character of *Gertrude*, sustained by Mr. Pooley, is admirably done. The other pieces were also well performed, Capt. Twiss being the leading character in both. There was a very poor attendance, comparatively speaking, which may probably be explained by the various amusements connected with the races. The Circus has also been performing before large and gratified audiences.

A fire broke out in Messrs. Philips, Moore, and Co.'s godowns. The fire was fortunately kept from spreading beyond their premises. We have not heard the extent of their losses, but are happy to say they are insured. Some of the books have been destroyed. It is not known how the fire originated; the godown in which it commenced had not been opened for four days previously. An alarm of fire also occurred at Messrs. John Burd and Co.'s premises; but it was only confined to the chimney, and soon put out.

A new photographic establishment has been opened by Messrs. Howard and Weed, from California.

The Hong Kong Directory for 1860 has been issued, and is announced to be the best yet produced.

The *Government Gazette* gives the census of Hong Kong at the end of 1859, together with other statistical tables relating to this island, signed by Mr. Caldwell, the Registrar-General. In 1858 it numbered 1,109 in all, while 1859 gives only 1,034. Of these there were 714 males, and 189 females, in the former year; this time there are only 655 of the former, and 170 of the latter. The deficiency is to be accounted for by the removal of a great number of persons to Canton and Shanghai. The Chinese population is estimated to be 85,000. The naval and military residents have not been given.

The Chinese Custom-house case with the barge *Chin Chin* is set down for trial at the Supreme Court. Captain Saunders was committed to gaol for wilful murder and piracy, but has been bailed out on sureties of £2,000.

The case of Tam Achoy, Captain Baker, and a number of American and European sailors who had engaged in a raid against a Chinese village near Macao, came before the Supreme Court, and resulted in their pleading guilty of the misdemeanour with which they were charged. The court, on consideration of the circumstances, took a lenient view of their case, and only bound them over to appear for judgment should that be required by their again engaging in an undertaking of the same kind. The *China Mail* has the following comments on this case;—"It is difficult to say exactly how far the affidavits affected the Government, for unfortunately both for himself and for the Government, Mr. Adams, the Acting Chief Justice, departed so far from the usual ruling in such cases as to refuse copies of these affidavits when application was made to him, although they had been put in by the prisoners in mitigation of punishment, and had been read in open court! We feel assured that Tam Achoy's application was never referred to His Excellency

the [Governor, and also] that if it had been his Excellency would never have been so actuated by dread of doing anything in Hong Kong as to allow respectable men to fall into crimes rather than commit himself in any way, nor by such an insane desire to meddle with Chinese affairs as to give the slightest countenance to European interference in disputes on the mainland. To the best of our belief Sir Hercules Robinson has conducted himself in this matter in a manner worthy of his high position; and if, as these affidavits appeared to assert, certain officials have compromised the Government to some extent, and given encouragement to lawless and illegal acts, we can only trust that their official superiors will see exactly what their qualifications are, and how far their experience is to be relied on in this place. So far from having been quashed on legal points, the prosecution in this case has been carried through many difficulties to a successful, and, on the whole, a satisfactory issue. These affidavits leave the matter in a very dubious and suspicious light as regards Mr. Caldwell and one of his superiors, while the refusal of Judge Adams to give copies of the affidavits, even if there were good reasons for such a departure from ordinary rule, does not serve to enlighten the aspect of the scene; but these are matters of more importance to the Government service than to the public, which, we trust, has now seen the beginning of the end of ignorant and illegal raids upon Chinese villages."

Mr. Robinet, the Peruvian merchant, who has been confined for eighteen months in the debtors' gaol, was to be released on the 28th Feb., and it is said that he will be able to prove that his acts did not warrant the sentence of the court.

It is reported that the P. and O. Co.'s steamer *Shanghai* has been chartered by the French government, and would proceed to Turon.

An action has been brought against Mr. Mitchell, the acting postmaster, for 500 dols., by Mr. de Cunha. It appears that Mr. de Cunha was a clerk in the office, and absented himself without giving notice, upon which he was ordered to appear, under a magistrate's warrant, to answer Mr. Mitchell's complaint. This he thought proper to construe into an arrest. The judge decided that in the event of point of law being in his favour, the amount of damages awarded would be a quarter of a dollar.

Mr. Tarrant is still in gaol, but some uncertainty seems to exist as to the time of his release; rumours were current that he would be at liberty in a few days.

CANTON.

The *Messenger* (Am.), about which so much difficulty existed at Canton, as reported in previous issues, has at length cleared and sailed from Macao for Havana with 400 coolies. The *Kitty Simpson* (Am.) has also sailed with 350 coolies. Several others were loading, as announced in our shipping intelligence. The *Norwood* (Brit.) was loading under the free system, and would be despatched for Demerara. It appears the emigrants under this system receive only a trifling bonus, while those to Havana are bribed to the extent of 50 to 60 dols. This disgraceful traffic will soon cease to Havana; but it appears the French intend carrying it on to their colonies. The French authorities have, however, directed the seizure of all vessels under the French flag attempting to sail without clearing through the Chinese Government, and the Portuguese authorities at Macao have notified that no clearances will be granted to ships after the 1st inst. The proclamation issued by the allied commanders to the respective consuls on this subject has been replied to by them. They give full assurances of their aid in checking the late abuses which have existed, and have embodied the following resolutions:—

"1st. That it shall be carried on in localities pointed out by the Chinese Government; that the depots shall in all cases be under the full control and surveillance of the Chinese authorities, and such officers, European and native—belonging to the Custom-house, or especially designated to this duty—as they may appoint.

"2nd. That the emigration depots shall be open for the free egress and ingress of inquiring coolies, during regulated hours; that, on first presenting himself at any depot, the name of the cooly shall with the date be registered, and that he shall not be called on to sign any contract for a specified number of days thereafter, during which he shall be perfectly at liberty to leave the depot.

"3rd. That the contracts shall be submitted to and approved by the Chinese Government; that they shall not in any case extend over a term of more than eight years; that they shall not except the Chinese emigrants from the benefit of laws made by the sovereigns of the possessions to which they are to proceed, for the protection of immigrants; that the conclusion of the period of the contract shall at once restore to the emigrant the full right to the free disposal of his own labour, any debt which he may have incurred

to the indorsee or holder of the original contract remaining as an ordinary civil obligation.

"4th. That whereas the system of collecting emigrants by payment of head-money is in itself the origin of most of the evils signalised, the same shall be strictly prohibited by the Chinese authorities; and that the salaried servants of the depots shall, under the protection of the local authorities, be permitted to publish in the villages, and throughout the country, the various prospectuses which the emigration agents may issue; and that the local authorities shall, when necessary, give protection to *bona fide* intending emigrants, whom it may be attempted to prevent from reaching the depot.

"5th. That the terms of each particular scheme of emigration shall be fully published in Chinese, and that each intending or inquiring emigrant, while still unbound, shall have ample facilities, after the registry of his name, for acquainting himself with the terms offered.

"6th. That particular days shall be appointed in each depot for the signature of contracts, which shall in no case take place in the absence of the Chinese officers; that the terms of the contract shall then be read over and explained, after which the intending emigrant will be called on to determine definitively as to the signature of the contract.

"7th. That having once signed the contract and received an advance, it shall be competent to the foreign emigration agent to transfer the labourer, now bound to him, to the ship by which he is to be conveyed to his destination.

"8th. That in event of emigrants being shipped in a vessel belonging to a country which shall not have enacted definite laws for the conveyance of passengers, it shall be competent to the Chinese authorities to require such ship to conform to the conditions of the British, French, or United States' passenger regulations, at the option of the master.

"9th. That it shall be competent to the Chinese authorities, with the view of providing for the necessary expense of an efficient control, to charge a moderate fee on each contract, which shall be sealed by the emigration officers, to be by them appointed, and that copies of all rules which may be issued with respect to emigration, shall be communicated by the Chinese Government to the masters of emigrant vessels.

"10th. That charges of fraud shall be examined into by the Chinese officers, and that, wherever the evidence shall support the same, punishment shall be inflicted on the Chinese delinquents."

PHILIPPINES.

MANILA.

The *Spitfire* has arrived from London with a number of gunboats for this government. The remainder of the crew of the late ship *Volta*, wrecked at Balabac, on her way from Liverpool to this port, were forwarded to Hong Kong in the steamer *Rajah*.

JAVA.

BATAVIA.

The news from Boni shows that matters there are fast returning to a state of peace. On the 20th January the crown jewels of Boni were delivered up to the commissioners for the affairs of Boni; and on the 30th, Aru Palakka, in conformity with the choice of the chiefs and princes of that state, was acknowledged and appointed rajah of Boni, and on the following day he was formally installed at the head-quarters at Palakka, the crown jewels being made over to him. A treaty was about to be entered into between the newly-elected king of Boni and the Dutch government, and a treaty had been concluded with Soping, while those with Wajo and Luwu were on the point of being signed. There had been no recent intelligence from Bangermassing. An expedition was about to start for the scene of the disaster to the *Onrust*, where the rebels were said to have entrenched themselves. It is thought that any very extensive operations against the insurgents must be postponed until the month of April, when the dry season sets in. On Java there have been numerous accidents from the heavy rains and stormy weather prevailing. The price of provisions, especially rice, is very high at some places in the interior, and fears are entertained that the crop will be deficient.

MALACCA STRAITS.

SINGAPORE.

The steamer *Carthage* arrived from Calcutta on the 2nd March, having towed the Indian navy river steamers *Mhor* and *Tonze*, which vessels are intended for service in China. H.M.S. *Scout* left for Hong Kong on the 6th March.

The telegraphic communication with Batavia has continued without interruption since the last mail.

A correspondent writes:—"The Malay Chief, a Hadju, who was at the head of the plot to murder all the Europeans at Sarawak, who was banished for life in consequence, and had taken up his residence here, disappeared suddenly. Upon inquiry it was found that he had gone to Pontianatz, doubtless with felonious intentions; in fact, probably, to join a pretender who visited that part of Borneo, and, representing himself as the Sultan of Borneo, had commenced a revolutionary movement against the Dutch. The Resident of Pontianatz, acting with coolness and resolution, arrested the individual, and sent

him to Batavia; it is to be hoped he will be equally firm and fortunate with the other scoundrel. It appears to be quite certain that the Dutch have been successful at Boni, notwithstanding native reports; so much the better for them. Bangermassing is still in a sad state of confusion, and the report of the cutting off of a second steamer appears to be confirmed, though not allowed by the Dutch. Great dissatisfaction has been expressed by the mercantile community at the conduct of one of the banks here, who have summarily dismissed their manager, and in the most undignified manner. The consequence is, that most of the accounts have been closed, and a letter of condolence, numerously signed, has been handed to the victim. Our batteries were tried the other day, and repeated salvos fired. They stood the test admirably. I regret to say that Captain Collyer, M.E., the chief engineer, a very able and talented officer, is obliged to leave for Europe on sick certificate."

A public meeting was held on the 23rd Feb. for the separation of this settlement from the Indian Government, at which the following petition was adopted:—"That in October, 1857, the European inhabitants of Singapore addressed a humble petition to your honourable house, setting forth the grievances under which they laboured from the manner in which the settlement of Prince of Wales' Island, Singapore, and Malacca, commonly called the Straits Settlement, was governed by the East India Company. They complained of the evils which resulted the said settlement from its being subordinate to the Supreme Government of India, which took little or no interest in its welfare, and of its laws being framed by the Legislative Council of India in which it was not represented. The European inhabitants of Singapore, therefore, prayed that the Straits Settlement might be constituted a separate government, directly under the Crown, and not, as then, under a delegated authority in India. That the Government of British India was thereafter, by an Act of Parliament, withdrawn from the East India Company, and placed directly under her Most Gracious Majesty the Queen, but the Straits Settlement has continued to form a part of the territories under the administration of the Supreme Government of India, and it still experiences the inconveniences and evils resulting from the neglect and indifference to its welfare on the part of the governing power, formerly complained of. That your petitioners believe that the welfare of the Straits Settlement would be materially promoted by its being disjoined from the Government of Continental India, and constituted a separate colony or settlement, placed directly under the management of the Secretary of State for India, and by the local administration being intrusted with power to frame laws and ordinances for the government of the inhabitants. Your petitioners, therefore, humbly pray that your honourable House will be pleased to take this petition into your most favourable consideration, and to adopt measures for constituting the settlement of Prince of Wales' Island, Singapore, and Malacca, commonly called the Straits Settlement, into a separate government or colony, under the management of the Secretary of State for India, and with power to make laws and regulations for the government of the inhabitants thereof."

Mr. M. F. Davidson occupied the chair, and the following propositions were carried unanimously:—

Proposed by Joaquim d'Almeida, Esq., and seconded by W. Ormiston, Esq.—"1. That the petition as read be adopted by this meeting, and that it be forthwith engrossed, circulated for signature, and forwarded to England with the least possible delay."

Proposed by W. H. Read, Esq., and seconded by J. J. Green-shields, Esq.—"2. That the petition be forwarded to James Guthrie, Esq., with the request that he take such steps as he may deem best to secure the objects in view."

Proposed by Wm. Mactaggart, Esq., and seconded by A. Wilson, Esq.—"3. That copies of this and the former petitions be forwarded to the Hon. the Governor, the East India and China Association, and the Chambers of Commerce at Liverpool, Manchester, and Glasgow, requesting their co-operation."

Proposed by W. Ormiston, Esq., and seconded by F. G. Schmidt, Esq.—"4. That a committee of the following gentlemen be appointed to forward the petition and carry out the resolutions passed, viz., Messrs. Davidson, Read, Greenshields, Mactaggart, and Joaquim d'Almeida."

It is understood that Captain Commerell, C.B., of H.M. ship *Magicienne*, has been appointed second naval officer in command in the Straits of Malacca, to be stationed at Penang.

The *Straits Times* announces that Tan Kim Sing, a Chinese merchant, has been elected mayor of Saigon by the Chinese population of the place, and that his appointment has been confirmed by Admiral Page.

A portion of the last mails from London, 26th January, were left behind, owing to their division at Suez between the steamers *Bombay* and *Bentinck*. On arrival of the former at Gulle, the *Cadiz* started for Singapore and China, and unfortunately the *London and China Express* was on board the *Bentinck*. The fault lies rather with the P. and O. Company, or the mail master. It is much needed that the irregularities of the Post-office should be looked into.

PENANG.

According to the census of the province Wellesley and Penang, it appears the population is:—Penang, George town, 29,009; country districts, 30,947. Province Wellesley: north division, 50,158; south ditto, 12,496; Butterworth, 2,164: making a total of 124,772.

The last census of Penang, taken in the course of 1857, gave 56,371, so that there is an increase of 3,585 souls in two years, being at the rate of nearly 3 per cent. a year. Of Province Wellesley we have no recent census. The area of square miles as yet under cultivation in Penang and Province Wellesley may be estimated at about 90,000 acres, giving to each man little more than half an acre. The returns ethnologically give the following result:—Europeans, 2,071; Malays, 71,723; Klings, 13,033; Chinese, 36,222; Siamese, 624; Bengalis, 1,099; total, 124,772. The proportion of the sexes varies with every race:—Europeans, 1,130 males, 941 females; Malays, 36,791 males, 34,932 females; Chinese, 27,050 males, 9,172 females; Klings, 10,366 males, and 2,668 females; Bengalis, 596 males, 503 females; Siamese, 407 males, 217 females; total, 76,339 males, 48,433 females. On the whole the males are about 60 per cent., and the females 40. Among the Malays the proportion is nearly equal, and the fact of there being slight deficiency of the females where they might be expected to preponderate, the race being the native one, is explained by a considerable number being married to Chinese and entered in the Chinese column. The Chinese males are to the females as 3 to 1, and this must be considered as showing a satisfactory increase of females. Among the Klings the ratio is about 4 to 1. The number of European houses is 932, of which 892 are in Penang and 40 in Province Wellesley. The Malay houses and huts amount to 14,737, the Klings to 3,106, the Bengalis to 246, the Chinese to 5,066, and the Siamese to 135. There are 46 Government opium shops, 61 spirit, 27 toddy, and 13 pawn-brokers'. The Mosques are 105 in number, and the schools 141. There are 540 boats for passengers, 1,588 fishing boats, 250 hack palankeens, and 538 carts.

The *Penang Gazette* has the following announcement:—"The Honourable the Governor has visited Ayer Itam, and went halfway to Bali Pulo. In the afternoon, attended by the resident councillor, Captains Burn and Hilliard, and the deputy commissioner of police, he drove through the town, and inspected the Prangin and the convict lines. He found the convict buildings not sufficiently ventilated, and ordered several alterations. At the Prangin he remarked that the sluice-gate was carelessly screwed down, and the sea, which it was intended to shut out, rushing in with great force. We understand that on Tuesday next Colonel Cavenagh will commence a tour in the province. Personal visits of the Governor to the districts will serve to convince the natives that their interests and welfare are attended to by him, and will put him in possession of information which he could not obtain from quires of official correspondence. He will have an opportunity of judging, from personal observation and conference, how far the various conservancy improvements that are awaiting his sanction or aid, or have been postponed for want of means, are really required and can be executed.

COMMERCIAL REPORT.

LONDON, 13th April.

The mails delivered this morning have been forty-four days en route from Hong Kong. The London mails of the 10th of January arrived out on the 26th of February, being forty-seven days en route.

There are some appearances in China of the traders being somewhat alarmed at the preparations now moving to and fro for the coming war, and there is no doubt that business in imports, at least, will be affected for the next few months. In exports of tea and silk the check will not be so soon felt; but if war is decided on, we anticipate the stoppage will be to a greater extent than during the last war. There is, however, nothing to indicate a hostile feeling towards foreigners at any of the open ports. At Japan business continues to be almost at a stand, and it is the current opinion that matters will not improve until a severe lesson has been administered.

EXPORTS.

TEA.—The exports for the present season still show a considerable excess over the last, being to Great Britain about twenty millions, to the United States two millions, to the Continent one and three-quarter millions, to Australia three millions. At Shanghai the settlements have been at higher rates owing to the favourable advices from this side, and are announced to be 20,000 chests of Congou, at 26 to 30½ taels for Oopacks and Ningchows. Unsold stock about 20,000 chests. In greens the settlements have been 17,000 half-chests and 7,000 boxes, at 18 to 21 taels for Imperial Taiping, and 27 to 40 for Pingsuey. At Foo-chow-Foo the transactions have been 21,000 chests and 7,000 half-chests, at 18 to 23 taels for middling to good. But very few chops remain in the market, and the arrivals from the country have almost ceased. At Canton the settlements have been 5 chops of Congou, at 26 to 32 taels for Oopacks, 5,000 boxes of Orange Pekoe at 20 to 27 taels, 4,000 boxes Caper, at 16 to 21 taels, and 1,000 boxes Gunpowder at 20 taels. Stock about 20 chops of Congou.

SILK.—At Shanghai the settlements have been 2,000 bales. The arrivals from the country are on a limited scale, and the settlements for the season are about 13,000 bales less than the last. The last quotations are fully maintained, which has tended to restrict operations. At Canton re-reeled Kum-Chook has fetched 460 dols. for the United States.

DRUGS, &c.—At Canton—Cassia Lignea: 500 piculs have been settled at 16.90 to 17.20 dols. Stock 4,000 piculs. Cassia buds: 30 piculs have been taken at 34 to 36 dols. Cassia oil: 10 piculs have been taken at 300 dols. Star aniseed: no stock, last quotations 18 dols. Aniseed oil is quoted at 185 to 200 dols. Galls: no transactions, quoted at 15 to 15.50 dols. per picul. Rhubarb: none of first quality at market. Camphor, 23½ dols.; small stock.

IMPORTS.

SHIRTINGS.—The stock at all ports is rather large, and sales have been made to a small extent only during the week previous to the departure of the mail. At Hong Kong, greys, 7½ to 10 lbs, are quoted at 2 dols. 25c. to 2 dols. 85c. At Shanghai £1 9s. 4d. to £2 5s. White 52 to 64 reeds, £1 9s. to £2 4s., and at Hong Kong 2 dols. 25c. to 2 dols. 65c.

COTTON YARN.—Stock large. Sales at Hong Kong at 29 dols. to 31 dols. for Nos. 16 to 26.

AMERICAN DRILLS have been sold at Canton at 3 dols. 80c. to 4 dols. per piece of 40 yards.

WOOLLENS.—Fair demand exists for long ells, Spanish stripes, camlets, &c.

METALS.—Shanghai—Iron in full supply and difficult of sale. Lead in good demand. Tin dull. Canton, the sales of Iron have been large—say 2,000 piculs nail rod, 500 piculs bolt and bar, and 100 piculs wire. Of lead only 200 piculs have been placed. Tin plates are dull, 100 boxes only having been sold, and so is tin. Sales of quicksilver are reported to the extent of 200 flasks. Hong Kong.—A steady business is always being transacted, but sales are not usually reported.

COALS.—English steam 17 dols. per ton, notwithstanding large arrivals.

MANILA.—The market for imports had been in a very dull state, although the stock of shirtings and long-cloths was very light. In exports: Sugar is arriving but slowly, and sales of unclayed are readily made at 3 dols. 18c. Hemp settlements reported 13,500 piculs, at 4 dols. 50c. to 4 dols. 56c. for current. Coffee 14 dols. 40c.

SINGAPORE.—The demand for European imports generally has been dull during the past fortnight, with the exception of grey and white manufactured goods, and the amount of transactions very moderate. For exports there is an active inquiry, and prices of most articles maintained.

EXPORTS OF SUNDRIES FROM CHINA.

Per Sophie, from Hong Kong to London: sugar, 2,200 piculs; cassia lignea, 330 piculs; cassia buds, 70 piculs; cassia oil, 22 boxes; aniseed oil, 154 boxes; canes, 5½ mls; sundries, 130 packages.

FROM MANILA.

Per Torre del Oro, for Falmouth: sugar, 4,424 piculs; sapan wood, 160 piculs.

Per Superior, for New York: hemp, 14,358 piculs; indigo, 294 piculs; sapan wood, 200 piculs; cigars, 170 mil.

EXPORTS FROM SINGAPORE.

Per Potosi, to Falmouth for orders: gambier, 1,527 bales, 3,511 piculs; sago flour, 3,882 bags, 4,386 piculs; sugar, 1,600 bags, 1,567 piculs; pearl sago, 645 bags and 150 boxes, 887 piculs; black pepper, 653 bags, 418 piculs; white pepper, 395 bags, 399 piculs; 408 buffalo hides, 117 piculs; 4,725 pieces sapanwood, 262 piculs; 3,020 bundles rattans, 109 piculs.

Per Athelstan, to Liverpool: gambier, 1,271 bales, 3,325 piculs; sago flour, 3,763 bags, 4,367 piculs; sugar, 2,349 bags, 2,399 piculs; coffee, 812 bags, 776 piculs; white pepper, 543 bags, 458 piculs; black pepper, 358 bags, 239 piculs; 1,064 buffalo hides, 307 piculs; 1,480 bundles rattans, 61 piculs; 178 boxes gum dammar, 192 piculs; a quantity of sapanwood, 895 piculs; 1 box preserved ginger; 1 box chutney and curry powder.

Per Azzan, to New York: Gambier, 1,797 bales, 4,202 piculs; sago flour, 1,000 bags, 1,096 piculs; sugar, 559 bags, 543 piculs; black pepper, 1,535 bags, 1,070 piculs; rattans, 8,086 bundles, 3,420 piculs; gum dammar, 70 boxes, 66 piculs; mace, 33 boxes, 16 piculs; mace, 28 boxes; nutmegs, 27 boxes; 2,286 slabs tin, 1,502 piculs; 6,712 boxes tea; silk, 1 box; private effects, 12; silver ware, 1.

Per Timandra to London: 1,175 bags white pepper, 1,160 piculs; 398 bags black pepper, 283 piculs; 108 bags coffee, 100 piculs; 35 baskets, 1 case, india-rubber, 61 piculs; 408 baskets, 15 bags, 8,234 blocks, gutta percha, 1,331 piculs; 8,148 buffalo horns, 161 piculs; 3,251 buffalo hides, 794 piculs; 1,775 cow hides, 184 piculs; 23,945 pieces sapan wood, 2,059 piculs; 10,135 bundles rattans, 501 piculs; 35 cases nutmegs and mace, 53 piculs; 100 cases gum dammar, 95 piculs; 10 cases gum benjamin; 10 packages elephant tusks, 4 piculs; 9 bags merchandise, 4 piculs; 5 cases merchandise; 103,053 Malacca canes, 2,550 bamboos, 13 bales tobacco, 1 case succades, 82 cases shells, 1 case containing a piano, 1 case China ornaments, 3 cases cigars, 1 case glassware.

EXPORTS FROM SARAWAK.

Per Timandra, to London: 1,195 boxes pearl sago, 1,289 piculs; 517 bags sago flour, 493 piculs; antimony ore, 510 tons; 11 beams, 4 logs kranjee wood, 20 tons; 958 bundles mangrove bark, 3,420 treenails, 8 tons; 10 junk masts.

The picul is 13½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: Feb. 7, Sir W. F. Williams; 8, Kamehameha IV. From New York: 7, Red Gauntlet; 18, Home.
At HONG KONG, MACAO, and CANTON.—From London: Feb. 27, Glen-dower. From Hamburg: 25, Richard.
At SINGAPORE.—From Liverpool: Feb. 23, Endymion; March 2, Hippolyta. From Glasgow: Feb. 23, Mayola. From Hamburg: 26, Harburg. From Sunderland: 29, Freia.

SAILED.

From SHANGHAI.—For London: Feb. 19, John Robinson.
From Foo-chow-Foo.—For London: Feb. 12, Aalborg; 20, Laurence Brown. For New York: 14, Sarah H. Snow.
From HONG KONG, MACAO, and CANTON.—For London: Feb. 19, Sophie; 23, Dominion; 24, Norman Morrison. For Liverpool: Feb. 12, Abeona. For Havana: Kitty Simpson; 23, Messenger.
From SINGAPORE.—For London: March 2, Timandra. For Liverpool: 3, Athelstan. For Falmouth: Feb. 29, Potosi. For New York: March 3, Heagan.

LOADING.

At SHANGHAI.—For London: Brobio, Cornubia, Maori, Vanguard, Westburn. For New York: Edwin Forrest, Golden Rule.
At Foo-chow-Foo.—For London: Albion, Yaratilda.
At AMOY.—For Havana: Ann, Neptune.
At HONG KONG, MACAO, and CANTON.—For London: Saxonville, Banian, Daniel Elliot, Marchioness of Londonderry (troops), Osprey. For Falmouth: Cid. For New York: Intrepid. For Havana: Francois L, J. Wakefield, Live Yankee, Maria Elizabeth, Governor Morton, Pioneer, Santa Lucia. For Demerara: Norwood. For Sydney and Melbourne: Continent, Eagle, Helios, Justyn, Minnehaha, Solide. For San Francisco: Alfred Hil, Aurifera, Black Warrior, Eliza and Ella, Isabella, Lotus, Robert Passenger.
At SINGAPORE.—For London: Caroline Agnes. For Liverpool: Caldonia, Crisis, Endymion, Glengarriff, Oceanica. For Marseilles: Gertrude. For Boston: Andes.

PASSED STRAITS OF SUNDA.

From China to England and Continent: Feb. 7, Bride of the Seas; 13, Myrtle. To New York: 12, Canvas Back. To Havana: 5, Emilie Periera. To Australia: Bonnie Doon. From England and Continent to Singapore: 8, Mayola; 11, Borneo; 15, H.B.M. St. Ringdove, Hippolyta. From Melbourne: 19, George Lee. From Singapore to England: 9, West. From Manila to New York: 15, Aurora. To Boston: 18, Southern Cross. From Batavia to Sydney: 17, Zwaluw. From Melbourne to Batavia: 18, T. W. Scars.

CASUALTIES.

The steamer Armenian, on her passage from Hong Kong to Singapore, was in contact on the 15th of February with the Spanish war steamer D. J. Juan, but little damage occurred to either vessel. The Dutch ship Helene Constance struck on a reef in the Gillolo passage, and subsequently went down—crew saved by the steamer Shamrock and conveyed to Hong Kong.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: £1 10s. to £2 for teas, and £3 10s. for silks. To New York: 5 dols. for tea, and 15 dols. for silks. The ships in port are still on the decrease, and the coast charters are doing a good business on improved terms.

At HONG KONG, MACAO, and CANTON.—To London: £2 to £2 10s. To New York: 8 dols. to 8.50 dols. For Australia: the rate for passengers is 15 dols. net, and £1 10s. freight. The Marchioness of Londonderry has been engaged to convey invalids to the Cape at £17 10s., and to England at £20 per head. The Cid has been fixed to load sugar for Europe at £4. Business has been good during the past fortnight. The number of vessels expected being unusually large, and the spring the duller part of the year, the supply of shipping in a few months hence is looked upon as being excessive, and unless some employment should spring up unexpectedly, rates will be low.

At MANILA.—For Europe, nothing has been done since last mail. For New York: the Sweepstakes is loading at 6½ dols. per 4 bales hemp, and 5 dols. per cwt. for sugar. All the ships in port are engaged, and rates are improving.

At SINGAPORE.—The shipping during the past fortnight has been dull, and the rates to Europe for the rice trade are lower. There are but few seeking ships in port. The Caroline Agnes has been engaged for London. The Endymion for Liverpool at £2 per ton for dead weight, and £2 10s. for light freight.

Continental Intelligence.

FRANCE.

PARIS, April 10th, 1860.

As intelligence respecting Chinese affairs will be the first topic of interest to most of your readers, I may inform you that as the departure of Lord Elgin for China has been delayed by the death of his mother, the Dowager Countess of Elgin, Baron Gros, who represents the Emperor in the forthcoming expedition, has postponed his departure until Lord Elgin shall be ready to accompany him.

FRENCH EXPEDITION TO CHINA.

Of the fourteen frigates and transports which left France for China on the 22nd Nov. and 17th Dec., twelve had arrived at the Cape on the 13th February, namely, the *Vengeance*, on the 21st January; the *Andromaque*, on the 30th January; the *Entreprenante*, on the 31st; the *Forte*, on the 2nd February; the *Calvados*, the *Dryad*, and the *Garonne*, on the 7th; the *Perseverante*, on the 8th; the *Rhone*, on the 9th; the *Rhin*, on the 12th; and the *Loire* and *Nievre*, on the 13th of February; the *Jura* and *Isère* had not arrived on the 21st of that month. The *Vengeance* left the Cape for China on the 1st of February; the *Andromaque* on the 14th; the *Entreprenante* on the 15th; and the *Forte* on the 18th. The *Calvados* was to leave on the 22nd, and to be followed by the others as soon as possible. The number of troops with crews is reported to amount to 9,080;—this is the first time any account has been given of the strength of the expedition. The health of all is said to have been excellent. Private letters from the Cape say that the French forces received great attention from Lieut.-Gen. Wynyard, the Lieut.-Governor. There were at one time eleven frigates in port together. The Lieut.-Governor placed thirty-four beds in the hospital at the disposal of General Jauain, who was with the 101st Regiment of the Line in the *Entreprenante*, but the good health of the men made the number of beds more than was required. No French regiments had been seen in the colony since 1788, when an expedition went to Cochin China. A grand banquet of fifty covers was given by General Jaurin on the 8th Feb., at which were present all the chief authorities of the colony, the officers of the 59th Regiment of the English army, and the French naval and military officers; on the following day the Lieutenant-Governor gave a grand dinner and a splendid ball to his host of the previous day. The French soldiers and sailors were allowed to land at the rate of 200 a day.

A later letter, just come to hand, states that the *Jura* and *Isère*, the two remaining ships of the expedition, reached the Cape on the 2nd of March, and left for China shortly afterwards.

Government have granted to the French authorities the Island of Robben for the use of their troops proceeding to or from China.

A letter from Toulon announces the departure thence for China of the war steam transport *Weser*; she carried with her three gun-boats and likewise a large quantity of military stores, with several passengers. She is only to touch at the Cape of Good Hope and at the island of Bourbon. The *Weser* is to be followed by the *European*, and in a few days after by the *Japon*. The steam-frigate *Impératrice Eugénie*, which is likewise under orders for China, is in dock, and cannot leave for a month.

A detachment of five companies of artillery artificers left here on the 5th inst., for Toulon, to embark with other detachments of the same corps for China.

The Abbé Huc, formerly a missionary in China and Thibet, and well known for his excellent work on the last named country, died after a short illness.

It is said, but scarcely believed, that as soon as the bull excommunicating the King of Piedmont is published Cardinal Morlot, Archbishop of Paris, means to resign his offices at court, all of them highly lucrative. The grand almonership alone is said to bring in £4,000 a year, and as a senator the right rev. prelate enjoys £1,200 per annum.

The French Emperor has struck another blow at the authority of the Holy Father. The *Moniteur* of yesterday contains an announcement to the effect that the Government, under existing

circumstances, considers it to be its duty to recall attention to the following article of the Concordat, viz., "That no bull, brief, rescript, mandate, provision, or other document from the Court of Rome, even regarding private persons, can be received, published, printed, or otherwise put into execution without the authorisation of the Government." The Emperor is quite serious about it too, for on Sunday last, on the arrival of M. Veuillot in Paris from Rome by the Lyons railway he was surrounded by several policemen in plain clothes, who requested him to accompany them with his luggage to the Prefecture de Police. Arrived there, all his trunks were opened in his presence, all the papers taken out, the trunks were then returned to him, and he was told he was at liberty to go. Among the papers seized were several copies of the bull of excommunication, and private despatches for the Pope's nuncio, Monseigneur Sacconi. No sooner was Veuillot out of the hands of the police than he drove to the nuncio's, and told him what had happened. Sacconi waited on the Secretary for Foreign Affairs, and intimated that if his despatches were not restored within an hour he would apply for his passport. The threat was effectual. But the despatches had been opened, and copies taken of them.

French troops have already taken possession of the barracks at Nice, and Colonel Osmont, of the staff, has been appointed military governor (*commandant de place*).

The announcement as to the probability of the meeting of a Congress is confirmed by the *Independence Belge*. According to a despatch from Bern, published by that paper, Switzerland is to have a seat in the Congress which is convened by France. Meanwhile, from what I hear of what is going on here, the French Government is making preparations which are utterly incomprehensible if negotiation, but perfectly intelligible if fighting, is the object in view. Preparations are making for the campaigning outfit of an army of 250,000 men, and all the officers and men on furlough have been ordered to join their corps. The regiments of the Imperial Guard are to be reinforced by 800 men, and the report as to certain regiments being reduced by two companies each has been officially contradicted. It is, moreover, noticed, not without dismay, that troops are being collected in large numbers close to the Prussian frontier, so that for some time yet Europe is likely to be kept most unpleasantly on the *qui vive*. The most mysterious part of the business (at all events to the uninitiated) is that the French Rentes keep rising, while on every other exchange in Europe they are falling. The common rumour, of course, is that the public funds are being sustained by immense private purchases on the Government's account, made for the purpose of bamboozling other nations into the belief that immense confidence is felt in the Emperor's pacific policy by those who ought to know most about it.

There appears in the *Moniteur* of Friday, for the first time since 1852, a full report of the proceedings in the Senate. A debate took place on Thursday respecting the petitions praying for the use of force for the restoration of the Papal authorities in the Romagnas. The cardinals and bishops supported the prayer of the petitioners, which was opposed by the Government, and especially by M. Dupin, *ainé*, in a masterly speech, which reminded one of his efforts when his voice used to be raised against tyranny and oppression, in favour of liberty and persecuted right. The tendency of his argument, however, was to entirely absolve the Emperor from what had taken place in the Romagna.

In commenting upon the effects of the commercial treaty with England, the *Moniteur* makes some very remarkable observations as to the benefits already derived by France from Mr. Cobden's activity on behalf of the French manufacturers and the Manchester school:—

"The treaty of commerce concluded between France and England is scarcely two months old, especially if the date of the exchange of ratifications be taken into account, and yet already, we are happy to state, it begins to exercise a favourable influence on the export trade of France. It is known that the resolutions of the House of Commons are generally carried into effect after a first vote, before being drawn up in acts. Most of the exemptions and reductions of duties which interest us were consequently on the other side of the Channel made applicable in the course of February and March; and immediately commercial men prepared to reap the advantages caused by them."

The *Presse* contradicts, in the most positive manner, and on authority, the statement which has recently been made with respect to the illness of the Shah of Persia. It declares that his Majesty has not had a single day's indisposition.

In the budget of the Marine Department of France, now before the Council of State, a credit of 130,000 fr. for maritime

pisciculture—that is, the artificial breeding of fish on the coasts—has for the first time been introduced.

Private letters have been received from several vessels of the French expedition, and, amongst others, one from a party on board the *Rhone*, in which there is nothing particular to quote, except one passage referring to the crossing of the line, which shows the ceremony observed on that occasion by French sailors.

"On the 11th January the equator was attained, when all those who had not previously crossed the line received the traditional baptism. The ceremony consists in being well dashed with water, having the face dusted with flour, and the feet blackened with blacking—a milder coating for the epidermis than tar—rather! On the eve of the day of crossing the line, the 'Father of the Line' hails the ship, when the following dialogue takes place. 'Ship ahoy!' 'Holloa!' 'What is the name of the ship that arrives in our empire?' 'The *Rhone*.' 'Name of the commander?' 'M. Picard.' 'Ah! we know him well. Have you passengers?' 'Yes.' 'Any sick?' 'Every soul on board is uncommonly well.' 'Glad to hear it.' 'And I am glad to say so.' 'Have they paid the passage of the line?' 'No.' 'Very well,' replies the Father of the Line, 'I shall send my postilion.' Then descends from the top of the mainmast a sailor dressed as a postilion, who meets aft a miller and his ass; he seizes the donkey, not without settling the price. Mounted on the donkey, equipped simply in drawers, having his face and breast smutted, and ringing a bell, he arrives, preceded by a sailor quite naked, before the captain, to whom he delivers a letter, announcing the arrival of the Father of the Line. The captain, after glancing at the letter, presents wine to the postilion and his escort, the donkey included, who does not allow himself to be begged this time, although he has refused water all along. The next day, at an hour agreed upon, the father, accompanied by his wife, by Neptune, a priest, an astrologer, by several blacks representing different per onages, and by four gendarmes charged to seize the body of those who refuse the baptism, arrives in a small car, and takes his place by the spot where the ceremony is to take place. The more important passengers, provided with a piece of money which they deposit in a platter held by a cabin-boy disguised as a chorister, take their seats upon a plank placed across a tub filled with salt-water, and they are quits for a slight sprinkling of water in the face. As to the other passengers they find themselves upset in the tub by the sudden withdrawal of the plank, and receive in addition two or three douches of water delivered from a height of three or four yards. A barber arrives who shaves them with flour and water, and a shoe-black who smears their bare feet and the leg of their trousers with water. The crowd is then baptised *en masse* with the ship's pumps and pailfuls of water dashed from above."

RUSSIA.

ST. PETERSBURG, April 5.

An article in the *Wiedomosti* on the affair of the Peiho last year, has made a great sensation here, as it is generally ascribed to the pen of Captain Romanoff, attached to the suite of Count Murawieff-Amoorsky, in the capacity of courier and orderly officer. The writer states that he arrived in the Gulf of Petchili a fortnight after the disaster at the mouth of the Peiho. The first excitement in the minds of the Chinese at their signal success had cooled down, and it was therefore possible to obtain more trustworthy and impartial accounts of the transaction. The Chinese official reports agree generally with those published by England and France as to the causes that led to the unfortunate affair, and their reasons for fortifying the mouth of the river. The writer appears to have very decided views on the subject, and criticises very severely the conduct of Mr. Bruce, adding that the British had no right whatever, according to the laws of nations, to decide on the road the embassy should take in proceeding to Peking, much less to endeavour to force it *vi et armis*. The mouths of the Peiho were, by analogy, to China what the Dardanelles are to Constantinople, and they were therefore justified in not opening it to the passage of foreign ships of war even for a pacific purpose, but still less for cramming down the throats of the Chinese the ratification of a treaty that nobody wanted, and into which they had been terrified. But by insisting on taking this road to the capital the English displayed a lamentable ignorance of the geography of China, for Peking is not situated on the banks of the Peiho, but at a distance of twenty wersts from that river, so that, even if the British squadron had been successful in the attack of the Taku forts, Mr. Bruce would have been obliged, after all, to make his entry into the capital by land. "But," continues the writer, "more ignominious than the defeat they suffered from the unjustifiable demands made by Mr. Bruce, is the state of inactivity in which the naval forces of Great Britain have shrouded themselves ever since their disaster. The British knew very well that those same forts which so signally repulsed their endeavours to force the passage of the river were perfectly open and undefended on the land side;—they knew it, for they have themselves published plans and sketches of the locality. Therefore, with this knowledge, it was certainly an extraordinary piece of conduct to retreat altogether from the mouths of the Peiho, without making an attempt to take the forts in the rear which could

easily and successfully have been accomplished by landing five hundred sailors and marines beyond the range of the Chinese guns, two or three miles to the south, and marching across the country. And even if they were not disposed to make another attempt, but had contented themselves with observing on the following day the extreme fear of the consequences with which the Chinese were inspired from the success of their own spirited defence and well-directed fire, they would have convinced themselves that the Chinese, completely panic-struck, had totally abandoned the forts, so that they could have been taken and occupied, or else blown up and destroyed by the English without any risk of further loss." Finally the writer inquires why Mr. Bruce had not, before the employment of force, sent somebody to the Bei-tan as proposed by the Chinese. He would then have convinced himself that that river is connected with the Peiho by a navigable canal, and that at the mouth of the Bei-tan are only a couple of small and very imperfectly armed batteries which could have offered no serious opposition, but whose guns would have been silenced by a few well-directed shells; in addition to which it is well known that the Bei-tan has ever been notified to foreign nations as the spot where the Chinese authorities are always ready to receive them with courtesy and enter into friendly relations with their ships of war. This also shows a gross ignorance and culpable negligence of the interests of his country on the part of the British Plenipotentiary.

At the last meeting of the Russian Geographical Society an interesting paper was read by Captain Beniukoff, who has lately returned from a scientific and exploring journey in Eastern Siberia, on the valley of the River Ussuri, and the cultivation of the celebrated Chinese plant *Jen-shen*. It is wonderful to see what care and assiduity is expended by the natives on the cultivation of this rare plant, to the extraordinary medicinal qualities of which such healing properties are attributed. Its preparation has hitherto been kept religiously secret, but the captain ascertained that the roots, after being carefully separated from the stem and leaves, are boiled down and then wrapped in blotting-paper and dried. The inhabitants of the upper part of the valley of the Ussuri always carry some of this root with them when performing journeys, and use it in the shape of a decoction, which cures them immediately of fever and other maladies. Other tribes, such as the Ghoids and the nomadic Arotchones, set no value on the plant, and when they find any they sell it to the Chinese, who are always willing purchasers of the same for a high price. Captain Beniukoff exhibited to the society a very perfect specimen of the root and plant he had dried and brought with him from Siberia.

The Ussuri has its source in the southern part of the Sichota-Alin Mountains, and flows in a direction nearly north, with a trifling easterly deviation, so that its source and its mouth lie nearly in the same meridian of longitude (132 deg. 30 min. east of Paris). The whole length of the river, from Sandagu to its confluence with the Amoor, is 770 wersts, whilst the distance in a straight line is only 450 wersts. As a means of water communication between the Amoor and the north-western coast of the Sea of Japan, Captain Beniukoff considers the Ussuri of not much value at present, owing to its numerous rapids, sandbanks, and snags; but it contains, on the other hand, all the elements required for a successful colonisation, being one of the most fertile districts in Eastern Asia. It lies between the 44th and 47th degrees of north latitude, the hills are covered with forests, and the valleys contain magnificent pastures; the climate is mild and salubrious, but the swarms of insects are a great nuisance. The population is but thin, Captain B. having found not more than 102 hamlets during the whole distance, many of these having but two or three houses, seldom more than a dozen, so that he calculates the whole number of inhabitants not to exceed 1,500.

The entire attention of this country is directed towards London, Paris, and Turin. The population appear to have forgotten their dearest interests, to look for news from Great Britain and France. Telegraphic despatches received from these quarters are eagerly read, both by military men and civilians. Commercial affairs are in a state of stagnation; there is no money current, and the attacks of the journalists against the directors of joint-stock companies are not calculated to restore credit. To add to the distress, we are suffering from the severest winter experienced by the oldest inhabitant. The railways are in some places covered with snow to the depth of ten feet. The consequence is, that the trains are frequently stopped, and the engineers think themselves happy when they can return to the point from which they started. The extraordinary number of robberies at present noticed is attributed to the prevailing poverty. A few evenings since the Grand Duke Michael quitted the Winter Palace on foot, to visit a military establishment on the other side of the Neva, and while crossing the river

on the ice he was stopped by two men, enveloped in the caftan, who deliberately stripped him of his pelisse, and told him with the greatest effrontery to hasten his pace, or he might suffer from the cold.

The number of births in St. Petersburg in 1858 amounted to 17,685 (9,174 boys, 8,511 girls), while the deaths were 19,077. This fact, which occurs every year, demonstrates that, as the deaths exceed the births, the population of that city is only kept up by immigration. The number of illegitimate births increases, while marriages are diminishing. At Moscow, the number of births was 11,267 (5,822 boys and 5,445 girls), and that of deaths, 11,703.

HOLLAND.

AMSTERDAM, April 8.

In order to neutralise the pernicious dissemination of false intelligence relating to the affairs of the East Indies for stock-jobbing purposes, such as the news circulated not long ago, purporting to be a telegram from Batavia and representing the fears of a rising of the natives to be so general that the Europeans went about armed to the teeth in the expectation of a general massacre, the merchants of Batavia have formed an association for the purpose of sending a telegram with authentic information to the Amsterdam Exchange and that of Rotterdam by each overland mail. A declaration to this effect has been published in the newspapers here, and posted on the Exchange and at the reading and news-rooms in this city. It is dated Batavia, 7th February, 1860, and bears the signatures of the following firms:—Adam and Co.; Busing, Schroeder, and Co.; Cassalette and Co.; Cezard and Co.; W. Cores de Vries; Dummmler and Co.; Engelhard and Co.; Gumprich and Strauss; Haager and Schuurman; B. Kopersmit and Co.; Landberg, Bezoet, De Bie, and Co.; B. van Leeuwen and Co.; MacLaine, Watson, and Co.; Metzendorff, Wilmans, Ruys, and Co.; E. Moormann and Co.; Van Ommeren, Rueb, and Co.; Paine, Stricker, and Co.; Pandel and Stiehaus; Reynst and Vinju; Van Riet and ter Gouw; Roselje Brothers and Co.; Schimmelpenninck and Co.; G. Suermundt; Tiedeman and van Kerchem; Wilson and Co.; Winsser, de Lange, and Co.

The Amsterdam *Handelsblad* having stated a few days ago that Lieutenant-General van Swieten had been appointed Governor-General of the Dutch Colonies in the Indian Archipelago, the *Rotterdam Courant* is authorised to contradict the report as one without the smallest foundation.

A pamphlet has just appeared at the Hague which has caused a vast sensation from the assertions it contains on the affairs of the Indian possessions. It is written by Mr. Vitalis, and is entitled "Remarks on the Impression made in Holland by the News of Unexpected Events in the Indian Archipelago." The object of the publication seems to be to prove that the Colonial Minister ought to be allowed to devote his whole time and attention to the administration of the colonies, which he is unable to do, from being pestered every day with Parliamentary interpellations. Secondly, that both the Colonial Minister and the Governor-General ought to be solely responsible for their conduct to the king, in order to counteract the more effectually the yearly increasing religious fanaticism of the Mohammedans, and avoid a repetition of the horrors committed in British India; and finally that the States-General, in requiring the Colonial Minister to act in accordance with the principles of a constitutional government, are playing with the fire and paving the way for the loss of these possessions.

At an auction held this week of 330 chests of Japanese vegetable wax imported by the *Carolina* from Batavia, the quality marked A fetched 43 florins, B 41 florins, GD 40 florins, and 30 chests AB 42 florins.

According to the official statistics received from the East, the population of Java and Madura amounts to 20,331 Europeans, 138,356 Chinese, 24,615 Arabians and other foreign orientals, 11,405,596 free natives, and 5,260 native serfs, making together a total of 11,594,158. The increase of the year was 303,708, being something under 3 per cent. The number of native chieftains or princes is 106,105, and that of the native priests is stated to be 56,993. The population of the other Dutch possessions in the Eastern Archipelago is 5,477,540, making a grand total of more than 17,000,000 under Dutch laws and the Dutch flag.

UNITED STATES.

A special despatch of the 22nd ult. from Washington has the following in reference to the United States' relations with Japan:

"Consul-General Harris, writing from Yeddo to the Secretary of State, says that American affairs there are in an unsatisfactory condition. The Japanese evade the faithful observation of the most important of the treaty stipulations or meet them with a passive resistance. He adds that he is unwearied in his efforts to convince the Government of the dangerous course

it is pursuing, and until its eyes are opened to the perils it incurs by its present course no change for the better can be looked for. The documents sent to the Senate to-day mention the fact that Lord Elgin has requested the Japanese to send an ambassador direct to England, but they evaded the application, giving this country the preference. Orders were sent out by the Secretary of the Navy to land the Embassy to this country at New York, but our Consul-General urges that they be brought directly to Washington. They will be entertained at the public expense. The high dignitaries and servants number 73."

The ship *Norway* arrived at Havana, and delivered to the contractors 937 coolies, 1,035 having been taken on board at Macao, of which 98 were lost overboard and by disease during the voyage. This vessel has been visited by a good many people who are curious in such matters. The Consul-General of the United States, his family, and several friends dined on board.

We regret to add that a mutiny occurred on board this vessel shortly after leaving China, the coolies setting fire to the ship in two places. The crew from aloft, and those below, tried to seize the boats and leave the ship, when the surgeon, an English gentleman, drew his pistol and threatened to shoot the first man who dared to make that attempt. The crew then rallied, and went to the assistance of the officers, and a fight ensued, which continued from six in the evening until after daylight next morning. Thirty of the coolies were killed, and more than ninety were wounded, before the mutiny was quelled. Mrs. Johnston and child, who were passengers, died from the effects of fright.

Another massacre is reported to have been perpetrated, by a Chinaman, on board the *Spray*, called in New York John Low.

Parliamentary Intelligence.

HOUSE OF LORDS.

INDIAN FINANCE.—(26.) The Earl of ELLENBOROUGH wished to ask the noble duke opposite a question with respect to the statements which appeared recently in the newspapers in regard to the financial plans arranged for India. He wished to know whether her Majesty's Government were now enabled to lay the details of those plans before the House, and whether those plans had received their previous sanction. He was the more anxious on this question, for he thought there must be some mistake as to the details. If those details were correct, then by those plans an income-tax would be imposed in India on every private soldier in her Majesty's cavalry and artillery, upon every non-commissioned officer in her Majesty's infantry, and he was not sure but it would strike every private in the infantry; at any rate the difference would be only that of a few shillings. It would also affect every commissioned officer in the native army and every private in the irregular cavalry; thus combining the interests of the whole army with the interests of the people in opposition to the plan. And he might add, what everyone knew, the difficulty, if not the impossibility, of obtaining trustworthy commissioners to hear and decide appeals from over assessments.—The Duke of ARGYLL said he had received no notice of this question, and therefore was not prepared to give an answer. If his right hon. friend the Secretary of State for Indian Affairs had received the financial plans referred to it must have been since he (the duke) last saw him. He hoped his noble friend would abstain from any comments on the scheme till it was fully stated and explained in Parliament, because it was natural to suppose that there must be many mistakes in the details of the plan as it was now given. He might add, it was physically impossible that the plan could have received the previous sanction of her Majesty's Government.

CHINA.—(March 30.) Earl GREY, after presenting a petition from Leeds, condemning the late proceedings in China, rose to move for an estimate, as nearly as the same could be made out, of the probable cost of the expedition to China up to the close of the financial year 1860-61—the said estimate to include the pay and supplies for her Majesty's naval and land forces (whether of the regular or Indian army), if they should continue in China to the above date, together with all charges for transport and freight, military stores and coals. The noble Earl said, the object of his motion was to obtain some information as to the probable cost of the expedition to China. The information they now possessed on the subject was very scanty and meagre. All they knew was, that in another place the Chancellor of the Exchequer had stated that the expense incurred in the present financial year—that was the year which closed to-morrow—was somewhere about a million. That, he must remind their Lordships, was an expense incurred by her Majesty's Government, as the result of measures they took three or four months before Parliament assembled, and without having the slightest authority from Parliament for incurring that expense. Their lordships had not yet thought proper to institute any discussion in reference to this matter, and the other House of Parliament, which was more especially the guardian of the public money, had taken no notice whatever of the expenditure. But he was old-fashioned enough to feel that this large expenditure ought not to have been incurred on the sole authority of her Majesty's Government, without Parliament having had any opportunity of expressing its opinion. The Secretary of State for War had also stated that her Majesty's Government, in the estimates before Parliament for the coming year, had made provision to the extent of two and a half millions as the cost of the expedition; but added that he would not speculate as to what the cost of these operations would eventually prove. He (Earl Grey) thought it was highly prudent in the Secretary of State to decline any such speculation, for he would be indeed a bold man who would venture to predict what the cost of these operations would prove. They only knew that there must be enormous expense attending the conduct of military operations carried on at such a distance from our resources, and where such uncertainty existed as to how long they might continue. Even if these operations were brought to as early and successful

a close as it was possible to hope for, still considerable expense would be incurred, and of that expense they ought to have some estimate. He knew it was impossible that anything like an accurate estimate could be made, nor was that at all necessary or desirable. But their lordships ought to be informed what it was anticipated the services already determined on would cost in round numbers, and supposing no unforeseen contingencies should arise. Her Majesty's Government ought at least to lay before Parliament the cost of conveying to China and maintaining there till the close of the financial year the large naval and land forces which had already been ordered there. That estimate he proposed their lordships should call for. He proposed to take it to the close of the next financial year, because he must be sanguine indeed who could expect the return of the expedition before that period; and if it should, the cost of the return voyage would more than absorb the reduction of expenses. It was highly necessary that this estimate should be given, that their lordships and the country might have the opportunity of clearly understanding what they were going to do, and the probable burdens which they were about to undertake. It was the more necessary because if it were not done the result would be that her Majesty's Government would be allowed to adopt measures, to undertake a great expedition, and to commence a long war, without consulting Parliament on the subject. The ancient practice of Parliament was, that when war, involving probably a large expenditure of money, was imminent, it was the duty of ministers, at the earliest period in their power, to call on Parliament to give their best advice to the Crown, and to share in the responsibility of ministers. That rule, which he ventured to think was a wise and wholesome one, had not been followed in the present instance. It was true that the other House of Parliament had been asked for £850,000 for the expenses already incurred; but no formal judgment of Parliament had been asked on the question, and their lordships had had no opportunity of expressing an opinion on it. That would be a convenient course for a Government to follow; but he did not believe it was consistent with the principles of the constitution, nor did he think it was just to the members of either House of Parliament or to the nation at large. It would be a convenient course for the Government to throw the papers on the table, as thereby they rendered a vote of censure against them more difficult of attainment, for it was much more easy to avoid a vote of censure than to obtain a vote of approval for the course they had adopted. It was a difficult and invidious thing for members of either House of Parliament to propose a vote of censure; but this he would say, it was by no means just to throw upon Parliament the responsibility of a silent acquiescence, although the measures which the Government had taken might, in the opinion of Parliament, be erroneous. Still less was it just to the nation, because it was not to be expected that private members would come forward in the character of accusers. It was not just that the nation should have to bear the burden of costly military and naval preparations and the dangers of a protracted war, without having the question in the first place submitted to the consideration of Parliament. But though he thought, for these reasons, the course taken by Government was one that he could not approve, he was not surprised that they had followed it. It showed impliedly that they had little confidence in the strength of the case which they would have had to submit to Parliament had they come forward to ask its support. Had they ventured to do so, they would have been called on to prove that the quarrel with China was a just one; to show that the Chinese were not entitled by the law of nations to resist by force an attempt to break down the barriers erected for the protection of the river which gave access by water to their capital; how it was that the precedents which had been followed in the wars with other nations, and especially in the last war with Russia, had been neglected in this instance; how it was, in short, that a convention had not been signed with France, defining clearly the object of the war. In conducting combined operations with an allied and independent power, there were always difficulties to be overcome in order to maintain cordiality with each other, and to prevent jealousies and animosities from arising. But in order to guard against these dangers it had been customary at the very earliest possible period, before anything was done, that the terms should be clearly defined, so that there should be left no room for doubt or dispute as to the real objects for which they were combined, and what each of the allied Powers would expect from the other. Nothing should be left to a vague understanding; nothing to conversations, of which there might be an imperfect and jarring recollection. Whatever was settled in passing conversation ought to be recorded in writing in due diplomatic form. The precedent of the Crimean war showed that such precautions were not needlessly observed; and still more recent events showed that one, at least, of the stipulations included in the convention of the Russian war, would not have been superfluous in this instance—that neither of the contracting parties should seek for themselves territorial acquisitions in consequence of the war. Would such a precaution have been needless now, after what we had seen during the last month? (Hear, hear.) Had the question been submitted to Parliament the question would have been asked of ministers, "What advantages are to be derived from the war? What are the anticipated ends of all this costly preparation? And are the cost and risk and the end commensurate one to the other?" They had been told that this great expedition had been sent out to enforce the performance of the treaty of Tien-tsin, and to obtain an apology from the Emperor of China for the occurrences which had taken place at the mouths of the Peiho River. But there was not a particle of evidence that, without any expedition, there would be any obstacle to the fulfilment of the treaty, and he must add that if an apology was all that was wanted, we should have to pay very dearly for it—for an apology from a semi-barbarous sovereign we should have to pay £5,000,000 or £6,000,000 of money. If it were proposed to obtain from the Chinese by force concessions which they would not yield except to force, then it appeared to him that those concessions would be of very little value; for what guarantee was there that as soon as this force should be withdrawn, the concessions would not also cease to operate? It should not be forgotten that a large land force was to be sent, the difficulty of transporting which was very great. Then there were the dangers of climate, the difficulties of obtaining supplies, and the uncertainties which must exist as to the measures proper to be adopted. In short, it appeared to him to be an act of great rashness to send, under such circumstances, so large a land force to China. But suppose the operation to be as successful as desired—what would be the result? What interest had we in China beyond the extension of our trade? Were we to burn the Chinese towns, slaughter the people, devastate the country, and bring upon it all the inevi-

table calamities of war? Every blow which struck at China more or less recoiled on ourselves; and supposing the success of our arms so great as would overthrow the existing government of China, why then we should be in a worse position than ever. The results would be to China most disastrous, to ourselves anything but beneficial. He assured their lordships that, from the best information he could gather, such a shock as it was proposed to give the Chinese Government was not at all unlikely to overturn it; and that which it might be very easy to overthrow it might be very difficult to provide a substitute for. How were peace and order to be maintained in that immense empire if the machinery by which they had hitherto been preserved were now destroyed? We had had some experience of former doings at Canton, where our proceedings had brought upon that portion of the Chinese empire a state of anarchy. Hitherto our trade with China had been flourishing. That prosperity had depended on the manner in which the Chinese Government had maintained order and security, so that the people were able to carry on the operations of agriculture, and produce tea and the other articles which formed the basis of their commerce with England. But should there ensue a state of anarchy, not only would a vast trade between China and England be hazarded, but also the very important trade between China and India. He believed that in such an event not less than between £7,000,000 and £8,000,000 of revenue would be sacrificed. He feared there was too much reason for believing that the rebellion in the Chinese empire was the consequence of our former war with China in 1840. He had enjoyed the advantage of a conversation with Dr. Wilson, who told him that it was to that war, and the large pecuniary indemnity which England enforced from China at its termination, that the rebellion was owing; that by it her finances and her Government were crippled and paralysed, her Government officers were left unpaid, and in every instance there was greater suffering than there ever had been before; that by the war the maintenance of order and security was destroyed; and Dr. Wilson described in most moving terms the ruin and misery which arose from that insecurity, and from the disorganisation of Government ending in the rebellion. In consequence of that rebellion many of the productions of China had fallen off, and with production of course trade likewise. He did not ask their lordships to pronounce any judgment on the policy of her Majesty's Government on this subject, nor on the justice of the ground they had taken up. In moving for those returns he had abstained from going into details. In the position in which he stood, connected with no party in the House, having no right to look for any support, he certainly felt he could not ask their lordships to pronounce a judgment on so great a question. Therefore it was that he avoided entering more fully on this wide field. He had touched the mere surface of it for the purpose of showing their lordships that there were large questions that ought to be considered, and that it was the duty of Government themselves to invite to them the attention and judgment of Parliament. The noble earl concluded by moving for the returns.—The Duke of Somerset said the noble earl had asked for the probable cost of the Chinese expedition, and yet had himself observed that he would be a bold man who would speculate on its cost. The noble earl then had answered himself; he had asked for that which he admitted neither Parliament nor the Government could supply. He wished to call their lordships' attention to the position in which they stood as regarded the events which took place at the mouths of the Peiho River last year. Those occurrences had taken place before he came into office, and, therefore, he (the Duke of Somerset) no more considered himself responsible for them than was the noble earl. To pretend to any responsibility for such transactions would be going quite beyond all Parliamentary precedent. But it ought not to be forgotten that when the news of those occurrences reached England the public mind was thrown into a state of very great alarm, for it was feared from the reports that neither British life nor property were safe at Amoy, Shanghai, or Canton. Under such circumstances he asked, was it not the duty of the Admiralty to take immediate steps for the sending out of a force sufficient to protect the lives and properties of British subjects? (Hear.) The noble earl, indeed, said that Parliament ought to have been summoned; but such was not the opinion of Lord Derby, and it was plain that no advantage could result from summoning Parliament, but that, on the contrary, it would greatly increase the alarm which already prevailed. What the people of England required was, that immediate steps should be taken to redress the wrong, and retaliate on the Chinese for the outrage they had committed. Parliament were perfectly aware of the course which the Government took. The papers and instructions to Mr. Bruce had been laid upon the table; and they had shown sufficiently the mild and moderate course which had been adopted by her Majesty's Government. He could not, then, understand what course the noble earl would have desired. He did not know what the noble earl thought they ought to have done. The noble earl had expressed his opinion that there was no outrage on the part of the Chinese. He (the Duke of Somerset) thought that there had throughout been duplicity and deception. Had there been on the part of the Chinese commissioners a distinct announcement that the ambassadors could not come up the Peiho, that would have been open and honest conduct; but they said that they might come, and when they attempted to do so, they found the barricades. If that was not evasive conduct, he (the Duke of Somerset) did not know what was. The noble earl told their lordships that this Chinese expedition was a new policy. He (the Duke of Somerset) could not concur in that view of the matter. A treaty had been made with the Chinese by his noble friend near him (Lord Egin), which was to have been ratified. The Chinese, instead of ratifying it, came to resist the progress of the ambassador, who was proceeding up their country to have it ratified. The present state of affairs could therefore only be considered as a return to that which had existed before those events. From 1839 to the present time, our relations with China had been very unsatisfactory. Within that time there had been several wars with China. The noble earl said that the great increase in the year's war estimates was to be attributed to this expedition. Four or five times since 1840 we had had a large force in China. In 1843 we had more men there than at present. The reason why our relations with China had been so very unsatisfactory was, that we had never been able to communicate directly with the principal government. We had been obliged to communicate with the Chinese viceroys, one of whom would take one view, and another another view. It was true that the Imperial Government of China in some cases disavowed the acts of their viceroys. Some of them had their heads cut off, while others were advised to commit suicide, for that was the way they got rid of ministers in China—(laughter)—but we

wanted to have our relations placed on a satisfactory footing, and to have direct communication with the court of Peking. He could not see what milder course could have been adopted than that which had been pursued. In his capacity as First Lord of the Admiralty, he could not censure Admiral Hope, who, as well as the officers and crew, had displayed very great gallantry and bravery. The noble earl had said that the Government were destroying our trade with China by these expeditions. That would be unfortunate, but the same thing had been said many times during the last twenty years, notwithstanding which that trade had gone on increasing. The value of the products exported from this country to China in the period from 1834 to 1842 was £926,000; from 1843 to 1850, £1,700,000; and from 1851 to 1859, £2,299,000. (Hear, hear.) It would be impossible at that moment to give the cost of the expedition, because it was clear that the expenditure must depend on the occurrences which might hereafter take place. What the Government wished was to send a large force to China, and tell the Chinese that if they agreed to our demands there would be peace, but at the same time show them that we must have redress for what had occurred, and that in future we must have direct relations with the principal court. We had a much greater force in China in the beginning of 1858 than we should have when this expedition arrived. We had had constantly, within the last twenty years, a fluctuating but considerable force in China. He put down the additional force being sent to China at about 5,000 men. The great cost of a war in China was occasioned by the transport of the troops. He put down the item for that at £200,000, which he thought would be required to bring the additional force out and home. For coals he put down £50,000. The whole navy estimates for next year on account of this expedition he put down at £680,000. He would not, however, pledge himself to the accuracy of this estimate, but it was as near as he could bring the figures from his present information. He could not conceive that the Government could have taken a more moderate course, except they sent an apology to the Chinese. (Laughter.) It had been predicted by some persons that the trade of Canton would be entirely destroyed by the occupation of it by foreigners. He was, however, informed that this was not the case, and that an officer could give an order to a tradesman in Canton with the same certainty of having it executed and the goods sent home to him as if he were dealing with a shopkeeper in Regent-street. He hoped, however, that we might soon be able to give up Canton, as its retention was expensive. It had been said that a joint expedition on the part of this country and France was inconvenient, but seeing that the French and English officers stood side by side at the Peiho, and that the insult offered to them was offered to them jointly, he did not see how the expedition could have been anything but a joint one. After his statement of the probable expenses of the naval forces and of the transport of troops, and cost of coals, he hoped his noble friend would not press his motion for the return, which it would be difficult to furnish in the way proposed by the noble earl. (Hear.)—The Earl of MALMESBURY: "It is not my intention to trespass on your lordships' time at any length. I think the noble earl who brought this subject under your lordships' notice was quite right when he deprecated any debate on what may be called the China question, but my noble friend the noble duke opposite has entered largely on that question, and I think I should hardly be doing justice to the Government of which I had the honour to be a member if I did not make some observations on what has been stated by the noble duke. (Hear, hear.) I have been particularly anxious not to make any comments on what passed on the Peiho, lest I might be thought to be in some degree criticising the actions and the conduct of Mr. Bruce, who was placed, most undoubtedly, in one of the most difficult situations ever occupied by any public servant. (Hear, hear.) But I cannot submit to have it supposed—much as I appreciate Mr. Bruce's ability, and sensible though I am of the difficulty of his position—that I give that entire approbation to his proceedings on that occasion which my silence might be taken to imply, and, therefore, after what my noble friend (the Duke of Somerset) has stated, I felt obliged to state my opinions with respect to what passed. (Hear.) Undoubtedly Mr. Bruce followed his instructions most faithfully in many respects; but those instructions did not foresee the events which subsequently took place. I confess I had foreseen that all that *finesse* which had been said to characterise their former proceedings would be again had recourse to by these barbarians, but I did not expect that hostilities or the application of force would result from what was proposed to be done. Those instructions to Mr. Bruce were therefore forwarded on the supposition that matters would be carried out without any fighting on any side. (Hear.) The spirit of those instructions—which I am sorry I have not before me, because it is difficult to recollect phrases—was, that Mr. Bruce should insist that the treaty should be ratified. Many of the noble lords present are very conversant with the terms of diplomatic correspondence, and they will hardly say that the word "insist" in such correspondence bears any other meaning than that there should, in case of necessity, be a pressure of argument and a positive determination verbally expressed that such and such an event should take place. (Hear, hear.) Certainly the word "insist" would not imply that any further steps were considered necessary. (Hear, hear.) I do not blame Mr. Bruce for what took place beyond this—that having a very wide latitude for action, I think he exhibited too much precipitancy. (Hear, hear.) That is the only fault I have to find with him, and in saying that I think I ought to explain myself. It appears from the papers furnished to Parliament that the original commissioners who had negotiated the treaty entered into a correspondence with Mr. Bruce. He insisted on the treaty being carried out. They said they must communicate with the court of Peking on the matter, and on the 12th of June, I think it was, they informed Mr. Bruce that they had sent a courier to Peking who must take eleven or twelve days to reach that city, though he rode at the rate of 200 miles a day. This courier carried to Peking the proposals and determinations of Mr. Bruce, and was to bring back the reply of the Imperial court to those propositions. He could not have reached the Imperial city before the 22nd or 23rd June, and then three or four days ought reasonably to have been allowed the Government to consider the proposals and what answer it should return to them. (Hear, hear.) But, my lords, if I understand those papers accurately, it was on the 20th of the same month Mr. Bruce and the English and French admirals determined to attack the mouth of the Peiho. I believe it was on the 24th, or within a day or two of that date, the battle was fought. It appears to me, therefore, that it was physically impossible for the reply to Mr. Bruce's ultimatum, sent by the original commissioners to Peking, to have come from that city to the mouth of the

Peiho. In my opinion, then, Mr. Bruce's fault, and his only one, was his not waiting for the arrival of the reply to the despatch of the commissioners who had forwarded his ultimatum to Peking. It may have been purely an error in the Chinese commissioner, who offered him another way up, which, perhaps, he was quite right in refusing to accept; but that official had no connection with the correspondence which was at that time going on with the capital. (Hear, hear.) I can only judge from what I see in the papers, for though Mr. Bruce's despatch is directed to me, and was sent over to me, I received no private letter from him, or anything that would elucidate his reasons for acting as he did further than his statements in the public despatch. He may have had other reasons than those therein stated, and I should like to know how that is; but, judging from what I have before me, I think his fault was precipitation in hurrying forward before he could reasonably have had an answer from the Chinese government. (Hear.) The noble duke says that we should not be afraid of our trade with China suffering from those transactions, because that trade has continued to go on, though we have had from time to time during a period of many years several wars with the Chinese. Now, I think this is a *post hoc propter hoc* argument of my noble friend, and that it is not logical. The fact of our trade with the Chinese surviving our previous hostilities with them does not prove that if those hostilities had not taken place that trade would not have been much better. (Hear, hear.) I am not one who would consent to see the honour of this country not maintained. It is necessary to have the treaty ratified, and therefore, I cannot find fault with the Government for this expedition; but I must express my opinion on a point which I consider to be very important. We are apt to talk of the Chinese nation as a barbarian nation, and of its government as a barbarian government. We may call them so if we please, but the Chinese government is anything but a barbarian government. They are a very clever people and a very well-educated people, and I believe that they have very nearly as much knowledge of what is going on as we have ourselves. But supposing this so-called barbarian government to be really barbarous, I do not think the way to civilise them is by treating them as barbarians. (Hear, hear.) At one moment we treat the Chinese as a barbarous, and at another as a civilised people. When the Government send out an ambassador to China they usually send out a gentleman connected with one of the first families in this country, appointed and gazetted with all the regular forms of diplomatic appointment, such as those by which Lord Cowley or any other ambassador is appointed; he is presented by the Foreign Secretary to kiss the Queen's hand; all the titles and powers of an ambassador are conferred upon him; he goes out with the usual retinue and staff, and more than that, on the occasion of sending an ambassador to China, he went out with letters from the Sovereign. Then the question arises, why was not international law observed, and a declaration of war made? The noble lord the Secretary for the Colonies, when speaking on this question the other night, said that we had always been in a state of war, and that we were in a state of war although the treaty was made and ratified, but I will remind the House that that was not the original state of things. The original state was a state of peace, because war had not been declared at all. If the Chinese are to be treated as any other European state or sovereign by sending out an ambassador, the same forms and ceremonies ought to be observed with respect to peace and declarations of war. The noble duke has said that no other course can be followed. I think this course might have been followed. I think that Mr. Bruce might have taken upon himself the responsibility of negotiating the matter with the Chinese Government, and have said that if the demands of our Government were not acceded to war would be declared by England against China; and I do not think that the Chinese are so thoroughly benighted and stupid as not to understand the menaces of war. Even now I say that, having treated the Emperor of China as other sovereigns, and placed him on the same footing as you do our Queen, you ought not to carry this war out without a legitimate declaration of war. I know that objections may be raised against it, and that objections may be raised as regards our trade and commerce, but that is no reason why you should keep up the anomaly that exists, that the usual course of action on such occasions should be violated, and that, although the Chinese have been designated a barbarous people, that is no reason why they should not adopt the system of international law. By not doing so you will expose yourselves to the cruel chance of having your prisoners ill-treated, because there was no declaration of war. Another difficulty would arise in connection with blockades. The last time that hostilities took place in China it was the greatest good fortune that there were none but British ships engaged, because there was no doubt that if our ships had stopped the vessels of other countries without having declared blockade they would have violated or evaded the law of nations. I cannot help thinking that even for our own credit, and allied as we are with such a great empire as France, our operations will be made legal by a declaration of war. I agree with the noble duke that we cannot be expected to make anything like a near estimate of the expenses incurred, and that it would be deceiving the House and the country to attempt to do so, and I think all that we can do is to ask for money on account. I hope noble lords will believe what I have said with reference to the conduct of Mr. Bruce, and I think that under the circumstances the noble earl need not press his request.—The Earl of ELGIN said.—With the prospect before me of being required to proceed from this country to China, in the hope of interposing the friendly offices of this country in connection with the unfortunate hostilities that have broken out in that country, I cannot but feel that I should not be taking a course conducive to public interest if, by any premature expression of opinion in this House, I were to fetter the discretion which it is absolutely necessary that I should possess if I may hope to achieve any beneficial result by my mission. Connected as I have recently been with the diplomatic proceedings that have taken place in China, personally connected and deeply interested as I must be, because of my connection with an individual who represents her Majesty's Government in China, I cannot but feel that I might, perhaps, be chargeable with want of respect to your lordships if I were altogether to maintain silence on this occasion, more particularly as it is impossible for me to pass over what fell from the noble earl who spoke last. The noble earl has confined his reproof and reflection on Mr. Bruce to one particular topic, and considered that he acted precipitately in not giving sufficient time for the transmission of the communication he made to the Imperial commissioners at Shanghai, as to the return of the expedition at the mouth of the Peiho.

LONDON, FRIDAY, APRIL 13, 1866.

LORD ELGIN'S SECOND MISSION.

It is to be regretted that any event should have interfered to delay the departure of Lord Elgin on his second mission to China. The Chinese, being eminently a practical people, will assume that the cause which will be assigned, viz., the death of his respected mother, is only a convenient excuse prevalent among themselves. The whole of the English and French expedition will have reached China in the present month, and must be located at Canton until further orders. The various reports as to the French proceeding direct to Shanghai will all prove to be incorrect. By the present mail we have advices of the arrival at Hong Kong of the French General Montauban, and he will find himself in a very tedious position waiting the decision of the Ambassadors; and if Lord Elgin can succeed in establishing pacific councils with his allies, we shall consider him fortunate. It is not however to be expected that the French will turn round and come back without striking a blow. If his lordship were left to act without the encumbrance of alliance, we feel confident he would bring our present difficulties to a successful issue. The French alliance in this expedition will prove his greatest trouble. It will no doubt be attempted to procure from the court of Peking some sort of reply to our demands through Mr. Bruce, so as it were for the affair to be in such a state on the arrival of Lord Elgin, that he will have nothing to do but to decide on at once proceeding to Tientsin by force, or otherwise. If his lordship or the allied commanders have any idea of entering on the campaign this year, not a moment must be lost. Allowing that he proceeds by next mail, it will be about the 6th of June on arrival at Hong Kong, where, to shorten matters, Mr. Bruce may meet him and be able to inform him of the result of any correspondence or demands made on the Court of Peking. If his lordship should find them to be of a nature calculated to inspire him with confidence, that a desire exists to carry out the treaty in all its bearings, he will doubtless proceed to Tientsin and from thence to Peking; but if, on the other hand, the attitude of the court is decidedly hostile, we doubt if the allied commanders will be prepared to at once proceed, knowing they must either be out of those waters by the end of October, or winter round Peking. From the speech made by Lord Elgin in the House of Lords, we observe that he is fully impressed with the necessity of our ambassador holding the right to visit Peking when circumstances may require it. His lordship quoted an instance from the experience of Mr. Alcock in the following terms:—

"A very excellent gentleman, who is now in Japan, and who in one of the blue books has written a paper indicating a warm and kindly feeling towards the Chinese—a few years ago—Mr. Alcock—found it necessary to go and stop the whole junk trade proceeding to Peking, and to threaten the capital with starvation. Some inquire why do you want to go to Peking? No one ever thought that we had any other object in going to Peking, except the interests of trade; but that we cannot accomplish unless you establish security for merchants and property, which, under the existing state of things, does not exist. Had not Mr. Alcock so acted, he would have had to refer to the governor of Hong Kong, 800 miles off, and the governor of Hong Kong would have had to make his communication in turn to the Viceroy at Canton, and if the latter wanted instructions, he would have to communicate with the capital at a delay of two or three months. In consequence of this, by the summary, but, in point of international law, unjustifiable course taken by Mr. Alcock, the matter was settled in the course of a week that might otherwise have taken six months."

In our summary of news it will be seen that already the pioneer vessels have left for the scene of operations at the North, but the following extract from the *Times* correspon-

dent's letter from Calcutta, received this day, indicates that the further despatch of troops is arrested from India. This was indicated as most probable in our last, and it increases the urgency for the presence of Lord Elgin on the field.

"Sir Hope Grant left Calcutta for Singapore on the 26th of February, but the stores have scarcely begun to be sent. There is no chance of operations before July, and nobody on this side of the water believes there is any chance at all. General Mansfield has gone to Bombay to await final orders. He did not decline to go to China, as reported, but simply pointed out certain inconveniences which his selection as second in command might occasion. If the Commander-in-Chief, or rather in this case the Cabinet, adhere to the original plan, he will join his command in excellent time."

THE CHINA EXPEDITION.—The French gunboats for China, it is now announced, are going, and a small number of artillery artificers. Reinforcements for the various Queen's regiments will proceed in May and June, but at present nothing is doing.

THE NEW ROUTE TO CHINA.—Arrangements are in progress to form a company to open the road from Pegu to Esmok, on the south-western frontier.

THE COOLIE TRADE.—The press has ventilated the atrocities connected with this trade, but has overlooked the fact of the importation into Havana being stopped.

PEKIN via ST. PETERSBURG.—The *St. Petersburg Gazette* contains the following communication:—

"The Peking mail of the 21st January has come to hand. Our missions, both religious and diplomatic, are in a satisfactory state, and all the persons connected with them are in good health. There is no political news of any importance. The insurgents continue their operations with various success. Songobing Sen, who commanded at the victory over the Europeans at Peiho, is now at Peking, having been summoned thither to give advice respecting the fortification of the coast against the Europeans. Besides the Gulf of Petchili, they are also fortifying Sham-Khi-Houang, to which place Mongol troops have been sent."

The *Arcona*, Prussian screw frigate, Commodore Sundswall, sailed from Spithead, for China and Japan, at 11 A.M. yesterday, the 12th.

The *Whirlwind* had arrived at Demerara with 377 free emigrants of whom 56 were women from China, after a quick passage. She was despatched by Mr. Austin. Her passage was only 78 days, of which six were spent at the Cape. His Excellency the Governor, Mrs. Wodehouse, the Hon. William Walker, Mrs. Walker, and other ladies and gentlemen went on board to look at the new-comers, the arrival of Chinese women being quite an epoch in the history of the colony. The people were all in excellent health, and appeared quite cheerful and contented. Not a death occurred on the passage.

Seventeen of the crew of the hired transport *Havering*, stranded at Ply mouth, were brought before the Stonehouse magistrates on the 3rd inst., on a charge of insubordination and refusal to do duty, and were sentenced to two months' imprisonment at Exeter.

The P. and O. Co.'s new steamer *Massilia*, Captain Black, ran the measured mile at Stokes Bay, at an average speed of fourteen knots per hour.

At the last meeting of the Manchester Literary and Philosophical Society, two large pans of cast iron were exhibited, procured by Mr. Worthington from China, where they are used for boiling rice.

Mr. Reuter, the head of the great telegraphic establishment in the city, was presented at the last levee by Lord Palmerston, which is considered to be rather significant as being a German; he should have been presented by his consul.

Mr. Robinson Clerk, late army chaplain with the forces in China, has been cast, and £300 damages in an action for breach of promise brought by Miss Paxton, a niece of Sir Joseph Paxton.

Mr. Laurence Oliphant, late secretary to Lord Elgin's mission, has been lately in Switzerland, and given his experiences in letters to the *Times*.

The Persian steamer *Persian* is ordered to proceed to the Red Sea, and is to be engaged in the conveyance of passengers and goods between the ports in the Red Sea and Suez.

The correspondence between the Home Government and Mr. Alcock, her Majesty's Envoy Extraordinary and Minister Plenipotentiary, has just been published. The correspondence dates from June 16, 1859, to January 7th of the present year. Altogether there are forty-five despatches, which occupy a space of one hundred and one small folio pages.

The notifications issued in November by Capt. Vyse, Acting Consul at Kanagawa, have been published in the *Times*, and their composition rather severely handled. It will be remembered that his appointment was challenged, before he left this country, in the House of Commons.

LOLA FERNANDEZ THE PASSENGER TO HONG KONG.—Our readers will remember that this clever impostor succeeded, about the middle of January last, in obtaining a cabin passage to Hong Kong in the ship *Sir William Peel*, at the expense of the Government transport authorities, after imposing upon, and obtaining money from, Sir Robert Carden, at the Mansion House, Mr. Richards, comptroller of the transport service, and many other persons in London and elsewhere. "Lola Fernandez" has written to England in her own name—Mary Margaret Hughes. She had the impudence to write to the detective inspector who had charge of her in London, thanking him "for past favours," and promising that if she "should ever come his way again, she will give him another turn." She dates from Santa Cruz, where the *Sir Robert Peel* had put in to coal and water. The postage of the letter 2s., she forgot to pay; but the letter encloses one for her aunt, a very poor woman in Manchester, and it may reasonably be supposed that the letter to the inspector was merely a ruse to save her aunt the postage.

Naval and Military.

THE CHINA EXPEDITION.

The present mail conveys three sergeants and fifty men of the new Army Hospital Corps to Hong Kong, under charge of Lieut. Morrah and Staff-Surgeon D. F. Rennie, M.D. The men composing this detachment have undergone a course of training at Aldershot. It has been decided to establish a sanatorium at the Cape for invalids to be conveyed from China. No other troops or vessels have left, but it is reported that drafts from the following regiments will proceed to India and China in May and June:—

First battalion 1st Royals, 1 sergeant, 3 drummers, and 60 rank and file; 1st battalion 6th Regiment, 4 sergeants and 59 rank and file; 54th, 80 rank and file; 56th, 1 drummer and 139 rank and file; 66th, 4 sergeants and 35 rank and file; 88th, 1 sergeant, 1 drummer, and 188 rank and file; 1st battalion 5th Regiment, 129 rank and file; 34th, 75 rank and file; 37th, 1 sergeant, 1 drummer, and 120 rank and file; 38th, 1 sergeant, 2 drummers, and 65 rank and file; 44th, 90 rank and file; and 97th, 80 rank and file; making a grand total of 12 sergeants, 8 drummers, and 1,119 rank and file. The draft of 90 rank and file from the 44th, together with three officers, are actually under orders for China, and instructions for them to leave Colchester are expected daily. The strength of the force at present in the camp is as follows:—9th battalion, 2 field officers, 9 captains, 16 subalterns, 7 staff sergeants, 40 sergeants, 20 drummers, and 1,127 rank and file; 10th battalion, 2 field officers, 10 captains, 23 subalterns, 6 staff sergeants, 52 sergeants, 17 drummers, and 1,505 rank and file; in all, 2,836 officers and men. Some 17 men of the 44th, 22 of the 66th, and 33 of the 1st Royals, who have served 10 years in India, are about to receive their discharge after joining their depots in the camp.

The 31st (Huntingdonshire) Regiment having been despatched from Poona to China, orders have been received at the depot, Chatham garrison, for 102 non-commissioned officers and men to be held in readiness to embark for China to reinforce the service companies. The subalterns ordered to embark with the reinforcements are—Ensign I. Parsons and Ensign G. M. Lambert. The 31st depot at Chatham is upwards of 300 strong, and recruits are still joining. The service companies have been in India since 1853.

The *Melbourne* transport for China has put into Rio with her machinery out of order. She was to leave there on 4th March, for Hong Kong, under canvas.

The Russian frigate *Askold*, from Japan, in Plymouth Sound, saluted the flag of Sir C. Fremantle, K.C.B., on the arrival of the Admiral from Lisbon. The compliment was duly acknowledged by the *Royal Albert*, 121.

The Prussian store-ship *Elbe*, which we noticed in our last, [has left Southampton for China and Japan, calling at Ten-riffe, Monte Video, Batavia, and Singapore, *en route*. The frigate *Arcona* is now taking in her powder, &c., at Portsmouth, and will leave in a few days.

In consequence of the great increase which has recently taken place in the detachments of Royal Engineers at head-quarters, Chatham—which, exclusive of the usual companies, now number 500 men—orders have been given for the formation of three divisions, or depot companies, each of which will be under the sole charge of separate officers. One of these divisions has been already formed and placed under the command of Captain G. Langley, the depot company consisting of 100 men. A second company will be formed on the 15th inst., and placed under the charge of Captain E. O. Hewett, who will join head-quarters on that date for that purpose. The remaining portion of the detachment will still be under the charge of the adjutant of Royal Engineers. Nearly the whole of the recruits who have recently joined this branch of the service are skilled mechanics and handicraftsmen, including draughtsmen, photographers, surveyors, and engravers.

The military authorities have determined to increase the age at which candidates shall be eligible for appointment to commissions in the army from 17 to 18 years.

We have heard it rumoured that the successor to Rear-Admiral Baynes, whose period of service as Commander-in-Chief of the Pacific squadron expires in July, will probably be Rear-Admiral Lord Edward Russell, C.B.

Lieutenant R. P. Jenkins, R.N., has been appointed Admiralty agent on the Southampton station. This officer was first lieutenant of her Majesty's ship *Cormorant*, which was sunk by the Chinese during the attack on the Peiho forts.

There is no foundation whatever for the statements given in a military papers that the remainder of the Militia is to be called out into active service. On the contrary, those battalions which are now out are ordered to be sent immediately to their respective counties, where they are to be discharged without delay. The quarters now occupied by the Militia are required for the regiments coming home from India, where it is found that a much greater force can be spared than was supposed some time back. In fact, it is expected that 60,000 European troops will be found amply sufficient for India. It is satisfactory to know that the battalions on home service and the depots of the regiments serving abroad are nearly up to their full strength complement, and the regular army has never been in a more efficient state.

The crew of the new screw steam-frigate *Forte*, 51 guns, bearing the flag of Rear-Admiral of the White the Hon. Sir Henry Keppel, K.C.B., for the Cape, have been paid their advance at Sheerness.

The *Wrangler*, 4, screw gun-vessel, of 160 horse-power, at Seeriness, is to be commissioned immediately, with a complement of sixty-five officers and men. Commander Anthony Hiley Hosens was appointed to the command of the *Staney* gun-boat in April, 1857, and served in China until promoted to commander, Feb. 26, 1858.

His Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, directs that the bounty for recruits, both of the royal artillery and the line, be reduced to £2 and a free kit, which is to be appropriated in the following manner, until further

notice—viz., to the recruit, on being attested, in cash, 2s. 6d.; on final approval by the inspecting field officer, in cash, 7s. 6d.; on joining his corps, in cash, without deductions, £1 10s.; amount of bounty and a free kit of necessaries, £2.

The following appointments have been made at the Admiralty:—Lieut. C. G. Stanley, to the *Trafalgar*; Lieut. P. J. Perry, to the *Cambridge*; James W. Husbands, chief engineer, to the *Wellington*, for charge of the machinery of the *Royal William*; Richard Harris, promoted to the rank of first-class assistant engineer, and appointed to the *Adventure*; George Barnes, paymaster additional to the *Wellesley*; Charles W. Sturgess, paymaster additional to the *Cornwallis*; F. M. Wright, assistant paymaster in charge to the *Wrangler*; and W. E. Chown, assistant paymaster of the *Implacable*.

HOUSE OF LORDS.

(Continued from page 227.)

Now, I would remind the noble lord that Mr. Bruce had extended the period of his delay at the mouth of the Peiho, and that he did not proceed to move up the river at the time specified in the treaty, previously to which the time for the ratification of the treaty had passed over. It is true that, if the Chinese had been acting with good faith throughout this delay, had there been no bad intentions, it would not have mattered, and I am ready to admit that it would have been better to have run the risk. It was explained that it was out of consideration for the Chinese Government that we allowed the period fixed for the ratification of the treaty to pass over, and that we faced the inconvenience of the delay, and I am quite ready to make the admission; but I will remind the noble earl that that is not exactly the state of the case, because, acting under the instructions of the noble earl himself, I communicated to the Chinese commissioners that Mr. Bruce was on his way for the purpose of proceeding to Peking, there to exchange ratifications of the treaty, and in order to conciliate the Chinese authorities to the utmost extent. I have been reproached very often, when things were more bright and hopeful than now, with having made concessions to the Chinese, but I made these concessions to the Chinese finding how unwilling they were to tolerate the presence of a permanent minister at Peking, although I still believe and hold most firmly to the opinion, that unless, in some shape or in some form or other, we have direct relations with the court of Peking, I feel confident that we never shall have permanent peace with that country. Notwithstanding that feeling, and in order to meet the objections of the Chinese commissioners, I stated—and in doing so I believe I obtained the full approval of the noble earl—to the commissioners that if they received with all due honour her Majesty's representative when he came out to exchange ratifications of the treaty, and if they carried out in perfect fidelity every other clause of it, I would submit it to her Majesty's Government that it would be desirable that her Majesty should exercise the option conferred on her under the treaty of Tien-tsin not to establish a minister permanently at the capital, but to send him from time to time to the capital, as circumstances might arise and render it desirable. Consequently, the Chinese commissioners not only knew that Mr. Bruce was coming up in order to exchange ratifications of the treaty, but I had, as I thought, laid before them the strongest possible inducements I could devise to induce them to receive him properly and at the proper time; and if, on indications of bad faith, Mr. Bruce had allowed the period for the ratification of the treaty to pass, and if in consequence of that circumstance difficulties were raised to the ratification of the treaty, and if it had further been known that the naval authorities had informed him some days before that there was no difficulty in removing these obstructions, I feel confident that a very heavy responsibility would rest on Mr. Bruce, and the non-ratification of the treaty and all the consequent evils that might have followed would have to be thrown upon him. The noble duke has explained the difficulty that there is in meeting the specific motion made by the noble earl, and I sincerely hope—nay more, entertain the most confident expectation—that the result will prove that my noble friend has taken a most exaggerated view of the liability which these unfortunate affairs in China will entail on this country. This, to a certain extent, is a speculative question, but there is another question of a most momentous and important character. What are the measures by the adoption of which we may best hope to bring this unfortunate state of affairs to a close, and establish peace with China upon a footing that will relieve us for the future of the heavy expenses they incur, and the heavy annual expenditure for the protection of our trade? That is a practical question which has necessarily occupied the attention of practical men interested in China, whether as merchants, philanthropists, or statesmen. It has occurred to some of them, and the opinion is shared by her Majesty's Government, that as I negotiated the treaty of Tien-tsin, acting with my distinguished and able colleague, Baron Gros, the representative of the French Emperor, and whose honour and loyalty I cannot speak of too strongly, or in terms too warm—it is possible that our return to the field of action at the present time might give the Chinese Emperor an opportunity of proposing terms of accommodation and of intimating that it really is his intention to carry out faithfully and honourably the stipulations of the treaty of Tien-tsin. As regards my proceeding to China on this errand and the communication as to which first reached me in Paris. I can only say that, as a public servant, I am by no means insensible of the honour of a seat in her Majesty's council, or indifferent to other advantages I might forego by proceeding on this mission, but I felt that no considerations of this description should militate against my doing a public duty. There was only one difficulty, and although a personal matter, I appeal to the sympathies of your lordships. I could not have undertaken this mission if I felt that its proposal implied on the part of her Majesty's Government any slight or reflection on my relative who represents the Government in that country. I have been assured that that is not the case, and that there is no want of confidence in my relative, but the reason of its being supposed that I might have some advantages in dealing with this question arises, in the first place, from the circumstances to which I have alluded; and in the second place, from the fact that I have naturally, proceeding from this country, greater means than he can possibly have of knowing what are the sentiments of her Majesty's Government; and I think I may add in consequence of what took place during the recent visit I paid to the French capital—knowing, also, what are the sentiments of the French Government on the subject. I can only say that my object in proceeding to that country is to defeat, by all the means I can, the calculations made by

the noble lord behind me, as to the cost and evils that will attend this question. As regards the question of trade and commerce, it might be very well if we could go back to the state of things that existed during the time of the Indian monopoly, when the trade between this country and China was conducted at one port, and by a primitive body of merchants. That was a condition of things not very favourable to the extension of commercial intercourse; and although it had certain advantages, it is impossible for us to revert to such a state of things. Even if we were willing to return, still it would be impossible to induce other nations to do so, who had also obtained treaties with the Chinese. Therefore, what we have to do is to put our commercial and other relations on the best and safest footing. The Emperor of China had entered into a treaty of obligations, but owing to the arrangements under which our commercial intercourse has been conducted since the treaty of Nankin, it has been utterly impossible ever to solve any difficulty that has occurred between the countries, except either by war or by acts of war; and I am prepared to show, if we were to go into that question, that not one single year has passed since the ratification of the treaty of Nankin during which individual consuls at ports have not taken on themselves acts of war. It is true they had not been followed up, but if they had been they would have had either to have supported their own consul, or have abandoned their own representative. These acts of war have been committed by consuls having the highest reputation for consideration and kindness towards the Chinese. A very excellent gentleman, who is now in Japan, and who in one of the blue books has written a paper indicating a warm and kindly feeling towards the Chinese—a few years ago—Mr. Alcock—found it necessary to go and stop the whole junk trade proceeding to Peking, and to threaten the capital with starvation. Some inquire why do you want to go to Peking? No one ever thought that we had any other object in going to Peking, except the interests of trade; but that we cannot accomplish unless you establish security for merchants and property, which, under the existing state of things, does not exist. Had not Mr. Alcock so acted, he would have had to refer to the governor of Hong Kong, 800 miles off, and the governor of Hong Kong would have had to make his communication in turn to the Viceroy at Canton, and if the latter wanted instructions, he would have to communicate with the capital at a delay of two or three months. In consequence of this, by the summary, but, in point of international law, unjustifiable course taken by Mr. Alcock, the matter was settled in the course of a week that might otherwise have taken six months. I maintain, therefore, that it is desirable to put an end to that state of things; and although there is a certain amount of reluctance on the part of the Chinese Government, I am confident it is the greatest kindness that you can possibly confer upon the Chinese Emperor; because most of the difficulties into which the Chinese get, arise from their entire ignorance of foreigners, of their power, and of the principles by which they are guided; and no doubt if we had a resident in that country, and an establishment where they had communications with the capital—if we had an intelligent minister representing this and other countries, no doubt they would be able to advise the Chinese government, and keep them out of the many scrapes and difficulties into which they fall. Proceeding to that country, my object will be to carry out my instructions, and bring these proceedings to a close. I am not so wedded to any particular opinions of my own as to have the slightest intention of pressing them on others; but with respect to the necessity of a declaration of war, it is really a very serious business. The noble earl may, perhaps, not have considered all the consequences that would follow if we resorted to this mode of carrying on communications with China. It would compromise, to a very large amount, the revenues both of India and England. The Chinese do not want to make any declaration of war that would carry destruction and devastation among the people, and that would also entail ruin and distress on large bodies of British and other merchants in the China trade, besides inflicting a most unnecessary and enormous amount of misery on a portion of the population of China with whom we never had a quarrel, and who were always desirous of maintaining the best of terms and the most amicable relations with us. If affairs in the north of China are conducted as I hope they will be—and I have perfect confidence in the gallantry and prudence of both the military and naval authorities out there—and if they have the issue I confidently believe they will have, any acts of war which are committed there will take place chiefly between our troops and the troops of the Emperor of China. I do not undervalue the loss of human life even under these circumstances, but that is, comparatively speaking, a lesser evil than the consequences that we should entail on the great population of the rest of China if we resorted to a general war.—The Earl of MALMESBURY wished to explain that he did not mean to express a desire that any further pressure should be placed upon the population of China; but if we were going to undertake a war which would employ 20,000 men, he thought that such a war should be preceded by a declaration of war against the Emperor of China. He would remind the noble earl that the arguments which, on this subject, he had applied to China would equally apply to any other nation.—The Earl of ELLENBOROUGH: My lords, I cannot refuse myself the gratification of stating publicly that I think no public man was ever called on to make greater sacrifices than those which the noble earl is asked to make when he is requested to return to the scene of his former labours in China; and I think that, for his public spirit in accepting the duty, he deserves the highest gratitude on the part of his country. I have no doubt at all that it is impossible to find anywhere any person to whom the conduct of the negotiations with the Chinese government can be intrusted with so much hope of success, through the means of peace, as to the noble earl. He has hitherto conducted, as far as I can understand, all the negotiations with great ability—I might say, perhaps, with fortunate audacity—but at the same time with a degree of ability which we rarely find in the exercise of public functions—(cheers); and it is particularly fortunate that he should again be associated with the same ambassador on the part of France, with whom his relations have always been those of personal amity and friendship. Under these circumstances I entertain a better hope than under any other circumstances I could entertain of a pacific result; but I do think he has great difficulties to encounter in this, that, in conducting his negotiations with the view of peace, he will be compelled to co-operate with a power which has not the same interest or the same views. We desire nothing but peace, the desire of France is honour without peace: we desire to shake hands and be on good terms with the Emperor of China, whilst the French have declared that their desire is to “chastise.” That is a

word that never ought to be admitted into the intercourse of civilised states, and I do hope that no feeling of that description can ever affect the noble earl. It is a sad thing to be compelled to go on with a war in which it is almost equally to be regretted that we should attain success or endure failure. Failure would bring to us not only great material loss, but also great misgivings; and success, such as may be obtained by military operations, would produce one of the greatest, most appalling, and most extensive calamities with which the human race has ever been afflicted. Unfortunately we have one example of this in the dreadful war in 1842; and it cannot be doubted that in any advance of hostile arms to the city of Peking, the prospect which would appear to the inhabitants would lead to the sacrifice of every woman and every child by their fathers and their relations. This is the dreadful effect which our success would produce. Nor can it be doubted that the occupation of the city even for a short period would destroy altogether the authority of the Chinese Government from one end of the empire to the other, and give general triumph and victory to that horrible collection of men—hardly to be classed, indeed, as human beings—who, as rebels, have for many years been desolating that land. The noble earl saw with his own eyes the dreadful sufferings of an entire population, and I am sure his sentiments of humanity will induce him to do all he can to preserve the power of that Government, the existence of which is the only means of re-establishing that prosperity which once existed in China. I have the greatest confidence in the opinion of the noble earl, and, indeed, no one has entitled himself so fully to respect when he gives an opinion in reference to China, but I confess I never have been able to comprehend the importance that has always been attached to the presence of a British minister at Peking. If the British minister were admitted into Peking willingly and with the desire on the part of the Chinese Government to have him there for the purpose of communication and advice, and for the purpose of preventing these calamities, then, no doubt, the presence of such a minister would be of the greatest value to the Chinese Government; but if the British minister is forced into Peking, and if he remains there, a constant humiliation to the Chinese Government, I cannot understand how we can expect that his presence will be productive of that benefit which has been expected. The noble earl has referred to a most interesting and valuable paper in the blue book—a paper by Mr. Alcock—and I do entreat noble lords to read and ponder over what is stated by him. Your lordships will see from that paper that unless our own merchants are controlled there is no hope of permanent peace with China. (Hear.) I feel confident that it is to this, more than to any other circumstance, that we may trace our difficulties in China. During that period when the merchants trading in China were under the strict control of the East India Company there was no war, and a single ship occasionally visiting Canton was perfectly sufficient to preserve the respect which ought to be entertained towards us; but since that time there has been a continual succession of wars, and I know not one of them which cannot directly or indirectly be traced to the reckless avarice of our own people, or to which such conduct has not materially contributed. As to this war I hold it in utter horror. It is unjust; it was so from the beginning. It is not lawful to make war for the purpose of making money; it is a crime. We have received one great rebuke during the progress of our operations since this war began, and I hope we may not receive another and a greater one; but we are now in a position in which it is, perhaps, impossible to arrest our course. It is a position, however, which we have brought on ourselves; it is founded on wrong, and wrong will not be continually protected by Providence. I will not, on this occasion, say more on this distressing subject; distressing to me because I am acquainted more than most other persons with the real nature of a war in China, for I had a considerable share on a former occasion in directing the operations. My lords, there were statements in the despatches which I then received giving an account of the sufferings of the people in connection with the war which I durst not publish; I would not publicly make known the horrors that came under my notice in connection with that war. I fear it is difficult for us at any time so to conduct the war as to avoid a repetition of similar things; but I feel convinced that the noble earl, seeing the importance of his mission, how deeply it affects the honour and interests of his country, and the much higher objects of humanity, will endeavour, to the utmost of his power, to bring these sad hostilities to a pacific termination. (Hear, hear.)—Earl GREY, in reply, said he was persuaded that there would not be much difficulty in affording the information which he asked for, for all he wanted was an approximate calculation; but if the Government told him that they would not, or could not, give the information, it was not for him to press the matter further. He quite agreed with the noble duke that it was most proper to send reinforcements to protect the lives and properties of Englishmen, but he wanted to know whether 18,000 or 20,000 men were to be sent out in the approaching summer for the protection simply of our interests. He complained that we were making preparations for an offensive war. He thought that their lordships ought to have been invited to express their opinion when the whole question could have been carefully considered. He still hoped that though late this question would still be brought before them; for if it were he was persuaded that those communications which the noble earl who last spoke had referred to would require to be laid before the House, and that the memorandum of Mr. Alcock would require especial attention. In his opinion it was impossible to read that memorandum without blushing for the character of Englishmen in those parts of the world. He should not press his motion.—The Earl of ELLENBOROUGH said that having on one occasion been compelled to make an estimate of this kind he could say that it was perfectly possible to do so, for it was done in a very short time, and he believed turned out to be perfectly correct.—The subject then dropped.

THE INDIAN LICENSING SYSTEM.—(30.) Lord OVERSTONE said he had a petition to present from a meeting of the merchants and inhabitants of Bombay, unconnected with the Government, to arrest the Government Licences Bill. The meeting was a public one, called by the sheriff, and attended by almost all the influential inhabitants, by the merchants, lawyers, and commercial men of Bombay. After a full discussion the meeting agreed to the petition which he was now about to present, condemning the Government measure as unjust and unequal, and praying that the House of Lords would prevent its becoming law. He could not pretend to be possessed of so much local information or to have studied the question so deeply as to give any opinion of his own on the subject, but he had no hesitation in calling their lordships' attention to the matter, both on account of the importance of

the subject and on account of the large number of influential signatures appended to it. On these grounds he was confident the petition would receive from their lordships that respectful consideration to which it was so justly entitled. In the course of the discussion which took place at the meeting, he observed it was stated that a former petition which had been sent from Bombay had been received by their lordships with silent contempt. Now, he felt certain that nothing of the kind could have occurred in their lordships' house, and that this feeling must have arisen from some misapprehension; but he alluded to this matter now because he felt certain that this petition would receive from their lordships' hands all attention, and that their lordships would not proceed to discuss the question without giving to the statements contained in this petition all the consideration which they so well deserved.—The Duke of ARGYLL said he could not recollect that any petition representing the opinions of any portion of the inhabitants of India was received either by the Government or by their lordships with silent contempt. He recollected in the course of last session, and during the former government of Lord Palmerston, that several petitions were presented from various parts of India by noble friends near him, but they were uniformly introduced by the noble lords who presented them with observations stating the purport of the petitions, and calling the attention of the House to the importance of their representations, and these were met by such respectful observations from the Government and other noble lords as the subject required. As regarded the petition which his noble friend presented, it was too late, in the best sense of the word, for it referred to the licensing system which Mr. Wilson distinctly stated in his address was abandoned by the Government because it was based on unequal and unsound principles.—The Marquis of CLANRICARDE was understood to confirm the statement of the noble duke, that no petition, either from Bombay or any other part of India, had been treated with contempt.

HOUSE OF COMMONS.

CHINA.—(March 26). In the course of one of those ill-directed and well-understood attacks which Mr. Horsman has been incessantly making against the Government of late, the hon. gentleman said—In respect to the joint expedition of the British and French forces to China, it was known that some serious differences existed between the Governments of the two countries. It had been stated that the French Government had come to the determination not to assist England in her movements towards China, unless the latter agreed to assist France out of her difficulties in Italy. That matter having been subsequently arranged the joint expedition to China went forward, and the results were now generally known. But as to the correspondence that took place between the two Governments in relation to the Chinese expedition, not a line of it had ever been laid on the table of the House, nor had a question been asked on the subject. (Hear, hear.)—[N.B. Mr. Horsman's constituents at Stroud have held a meeting at which he has been unanimously denounced as having altogether betrayed the trust reposed in him by the liberal majority which returned him to Parliament.]—To which Lord JOHN RUSSELL immediately alluded in his reply as follows:—Then, with regard to China, the right hon. gentleman told them that they asked for the assistance of the French in China, and that the Government received for reply that the French would only give us that assistance if we assisted the French policy in Italy, and that a bargain was thereupon made. That was another imagination of the right hon. gentleman's, but whether it was his own, or whether he had picked it up from some of those telegraphs which fly about the world and have little authority, he (Lord J. Russell) knew not, but, at all events, the House should not be misled by taking everything for certain that the right hon. gentleman said. (Hear.)

MR. TARRANT AND THE "FRIEND OF CHINA."—(3.) In answer to a question from Mr. B. JAMES, Mr. PORTER said, that immediately on the receipt of the despatch forwarded from this country to the Governor of Hong Kong, relative to the imprisonment of Mr. Tarrant, the editor of the *Friend of China*, that gentleman was liberated. (Hear.)

Spirit of the Press.

DEBATES IN THE HOUSE OF LORDS ON CHINA.

From time to time those quiet, gentlemanlike conversations which are held in the House of Lords touch China in their range of topics. On Friday night Lord Grey, not unseasonably, turned the current of their lordships' speculations in this direction. The First Lord of the Admiralty, the Secretary for Foreign Affairs under Lord Derby's Government, the Plenipotentiary Elect to China, and the late Governor-General of India, who had himself in past years directed operations against China, all applied themselves to keep the ball flying, and to give liveliness and vividness to the discussion. We distant listeners, who are admitted to all these gentle, uneventful conversations, by the agency of an almost unseen machinery, might expect to learn from the words of such eminent men all that we could wish to know. Surely such men as these must all have sharp and well-defined ideas as to the causes that have produced past events, and which must accupon the future? Such men would draw from their large philosophy a well-poised comparison between the stagnant civilisation of the East and the energetic movement of the West, and would tell us how the ordinary principles of action which guide European nations in their conduct towards each other must be modified when we attempt to arrive at just ends in our intercourse with the great semi-barbaric power. These expectations are not, however, altogether fulfilled when we read what these illustrious statesmen said. Lord Grey was curious only as to the expense of the military and naval operations; Lord Malmesbury was scandalised only that we had not applied our Western principles of international law with a sufficiently pedantic minuteness when dealing with an empire to which these principles are unknown. Lord Ellenborough was shocked that either we or our ally should think of "chastising" an act so unimportant as the destruction of some hundreds of our soldiers and sailors. Lord Elgin was explanatory of what was passed, but by no means communicative as to the course of action which he proposed to himself in his new embassy. There was not in the conversation of any of these noblemen, except only in that of Lord Elgin, the evidences of reading and inquiry upon the matter in debate which we might look for in personages of such prominent position seeking to direct a national policy. When Lord Ellenborough tells us that "the advance of a

hostile army on Peking, with the prospect of its being captured, would be sufficient to cause every woman and every child within its walls to be sacrificed by their relatives," we think of the very recent capture of Canton, and we wonder that an eminent nobleman should tell us such an old wife's tale. When Lord Grey tells us, upon the authority of a random remark by that poor old Gutzlaff, who was ridiculous even in his own day, that the Chinese indemnity had produced the Chinese rebellion, we wonder that so earnest a speaker should never have looked into these standard histories compiled from received Chinese authorities which relate a constant succession of Chinese rebellions, rising to dates beyond the vista of our most ancient histories. Lord Grey might with equal justice have said that the military character of the French nation had its origin in the battle of Waterloo. But amid the "points" which were made in this House of Lords' discussion there is one of such great practical importance that it ought not to be allowed to pass without some further ventilation. Lord Malmesbury was most pertinacious in his reiterated demand that before any warlike operations were undertaken against the forces of the Emperor of China war should be declared. "Why," he asks, "were not the principles of international law observed, and a declaration of war made in due form?" Again, in the same speech he says:—"As the Chinese were treated as a European State, in sending out an ambassador, so he would employ the same forms and ceremonies with respect to war and peace." Once more reverting to this subject, he complains that "it was an anomaly that a civilised nation should conduct hostilities without a declaration of war." Now, this is counsel from a high authority to commit a very disastrous blunder. What we call a declaration of war, whether in the shape of a proclamation by heralds, or an advertisement in the *London Gazette*, or an order in Council, is a thing as unknown in China as a Christmas dinner of plum-pudding and roast beef. The Chinese would never hear of the pageant at the Royal Exchange, and would never read the advertisement. If they were informed of both they would not understand them, and it would be impossible to explain them. The thing is outside the orbit of their ideas. As they would not understand what a declaration of war means, it follows that the fact could not influence their conduct. It would impose no new obligations upon them, but it would impose very great obligations upon us. We should have, by force of our own Western laws, to withdraw our consuls, and to stop our trade along the old seaboard of China. We should be compelled to place British subjects under the protection of United States' Consuls, and to carry on what trade we could carry on by the intervention of American merchants. It would be our duty, if we adhered strictly to the laws which we are urged to obey, to proclaim all intercourse with China to be high treason in British subjects; and it would be highly irregular to allow the importation of tea or to permit the export of opium. Even among ourselves, these ancient rules of international hostility are become rusty and unused. They are found to come back like the boomerang, and do most damage to those who use them. To apply them to China would cost us ten millions of revenue and would ruin all our merchants. It would also, no doubt, punish the Chinese tregarrows, and disappoint the opium smokers. But, as Lord Elgin very sensibly observed, "pressure on individuals never yet brought a war to a close," and if there be any country in the world where pressure on individuals would have less weight than in all others, that country is China. The authorities at Peking hear with marvellous unconcern not only of the taking of Canton or of the destruction of a flotilla, but even of the sack of vast cities, where, after the carnage was done, the rebel leader calmly reports that "we slew them utterly, even to the children at the breast." These locusts have now for eight years preyed upon the fairest valleys of China, yet no real efforts have been made to quell them, except when they approached Peking. Then the Imperial strength was put forth in earnest, and proved sufficient to destroy two of these swarms of homicides. As to a declaration of war, we might as well translate the American declaration of independence into Chinese and send it to the Peking Mandarins. As to withdrawing our consuls and interdicting trade, we might as well practise the salutes of the fencing-school in front of a savage who is fitting an arrow to his bow. It is impossible to paint in its full strength the contempt which a Chinese statesman would feel for a Western barbarian who should decline to trade at Amoy because he was determined to fight at Taku; and we are by no means certain that whatever language he might use would deserve translation. Lord Elgin goes forth with many difficulties before him, but perhaps he leaves his greatest difficulties behind him. Nobody knows better what it is necessary that he should do, but no one is more thoroughly aware what a squadron of heavy hobbyhorse-riders will bear down upon him if he should dare to do it. The country will endorse Lord Ellenborough's compliment to the "fortunate audacity" of the Earl, but we are not sure that we have observed in him the same adventurous spirit in dealing with English as with Chinese Mandarins. These facts, however, cannot have escaped his penetration. If he should fail in the least degree, he will have every hobbyhorse-man in the Lords, the Commons, and Exeter-hall down upon him at full gallop. If he should succeed, he will still have them prancing and kicking around him, but they will not be able to do him harm; but if he should fail by trying to conciliate these gentlemen, and by trying to weld their crotchets into his own policy, he must not expect to find in them either the will or the power to defend him from the opprobrium which the country always fixes upon weakness. Lord Elgin is not the minister of the merchants now trading with China, nor of their enemies in the House of Peers, nor of the platform spouters. It is very well for irresponsible gentlemen to indulge in pretty sentimentalities, and for special classes to try to retain special advantages, but the nation sends out Lord Elgin to do the nation's work,—to open up China to our general commerce,—to obtain such wise and firm stipulations that when the Muscovite comes to take the place of the Mongol our interests may still be secure,—and lastly, to complete his work so thoroughly that we may have no more China wars.—*Times*.

THE CHINA COOLIE TRADE.

The *Times*, in a leading article on the circular issued by the commissioners at Canton on this subject, which it quotes as published in the *China Chronicle*, has the following comments:—

"We do not suppose that it was the intention of the persons who established this system of Chinese contract labour, as a corrective of the African slave trade, to introduce another system which was just the slave trade over again in another latitude, and in another quarter of the globe. In many re-

spects, indeed, it is worse that a Chinaman should be kidnapped than an African negro, inasmuch as it can scarcely be pretended that a Chinaman is even indirectly the gainer by being removed from a condition of comparative civilization to one of absolute barbarism. He is worse off as a bondsman in Cuba than when following his ordinary occupation in his native town. From other sources we know of the frightful mortality which prevails among the coolie immigrants who are employed upon the sugar plantations in Cuba. It would be difficult indeed to place a human being in a more desperate position, for the Spanish planter does not feel even that moderate degree of interest in his captive which he would in a slave, from the fact that the slave was his own property. Nor is it a fair argument that the Chinese themselves are the chief agents in kidnapping their countrymen. It is the foreign trader who pays the premium on their perfidy and cruelty. It must also be added, that the Chinese authorities at Canton, who have made formal protests against the system, have a just and reasonable cause of complaint against the European Powers and the United States, under whose flags it is carried out. Indeed, as we may gather from the letter of the Commanders-in-Chief, the Chinese authorities, independently of their remonstrances against this atrocious system of manstealing, have addressed a circular to the foreign consuls, in which they call the attention of the consular body to the fact that they have organized a regular system of free emigration, and request that the consuls will require their respective countrymen to conform to the rules upon which that system is based. We are rejoiced to see that not one of the four vessels which have been involved in this vile trade bore the English flag. Three of them hoisted the stars and stripes, the other the Oldenburg colours, whatever those may be. It is far indeed from our wish to suggest any interference with the action of the United States, but, as Canton is in the military possession of French and English soldiers, sailors, and marines, we are at least bound to give all the support in our power to the Chinese authorities in their reasonable endeavour to prevent the kidnapping of their countrymen. There is, indeed, hope that the public opinion of the United States may be opposed to this process of kidnapping Chinese for the benefit of Spaniards, when the matter is placed before them in its proper light. Besides the positive and certain evil inflicted upon so many wretched creatures, another and a sufficient reason for interfering on behalf of the coolies is, that if the kidnapping is persevered in it will soon put an end to the system of free emigration altogether. If we would set in motion an effective stream of labour from China to our own or to the Spanish possessions, or elsewhere, the result can only be brought about by fair dealing. The Chinese are willing emigrants; proof of the fact is forthcoming at Singapore, in Australia, in California. There is, indeed, no reason why, with common sense and fair dealing, China should not become the great labour-market of the tropical world. All nations, however, must be content to deal with the Chinaman fairly, to involve him in none but voluntary engagements, to pay him a reasonable hire, and so to deal with him in all things that he may bear favourable report to his countrymen of the treatment which he has received. The man-stealing process now going on at Canton, if it is not checked, will give the deathblow to the system of free emigration from China, and to all the hopes which might reasonably be founded upon it."

JAPAN.—A correspondence has been published on the affairs of this country in which the following has been deduced:—The government, it is said, keep up all the outward appearances of a desire to give execution to the treaties, while their acts leave no doubt whatever of a hostile *animus*. On the other hand, the disposition of the people in general remains most amicable. They are so fettered, however, by municipal and other regulations of a severe character that it is almost impossible to establish communication with them. No respectable persons of education are allowed to hold intercourse with foreigners unless specially employed by the government for that purpose. In Jeddo the diplomatic representatives themselves are liable to insult from officers of the State; in Kanagawa foreigners are murdered, and in Hakodadi and Nagsaki their houses are broken into, and the property of the merchants, even in shipment and landing, is daringly pilfered, the authorities taking no measures either for prevention or punishment. Incendiary fires also are of constant occurrence, and in the last instance £50,000 of British and American property was consumed or plundered, the police present being themselves engaged in stealing. "With a perpetual menace of assassination on the one hand, and incendiarism on the other, while earthquakes almost every week shake the houses to their foundations," the post of diplomatic agent at Jeddo is described to be a serious trial even for those of the most bold and sanguine temperament. The understanding that a powerful European expedition is about to visit China to compel good faith in that quarter is believed to have produced some effect in exciting the fears of the government; but if this expedition is not vigorously conducted the result in Japan will, of course, be to increase the determination to get rid of us. Mr. Rutherford Alcock, the British Consul-General, seems from the first to have pursued a course of great, but not undignified forbearance, and occasionally to have produced by this means a disposition to good conduct on the part of the officials. All such manifestations, however, are temporary, and on a recent occasion, in laying before the government a recapitulation of their misdeeds and disregard of the treaty stipulations, he was led to hint that force might ultimately have to be employed. The home government, while approving his general proceedings, dissented from this. In a despatch, dated the 28th of February last, Lord John Russell regretted that any threat of war had been resorted to, his reasons being that if the grievances are not redressed, and war is not made, the character of the British Government is in some degree impaired, while, on the other hand, if war is made to enforce the observance of a commercial treaty, we run the risk of engaging in protracted hostilities, "and of earning a reputation for quarrelling with every nation in the East." Whether it is wise either to enter into treaties, if we mean to announce afterwards that we may be cheated with impunity, or to regulate our actions not by the distinct merits of a question, but by the fear of being called quarrelsome, are points which may admit of discussion. On the whole, however, there is reason to hope, with his lordship, that "time and patience may remove many of the evils now complained of," and to admit that "the Japanese, on their side, may well be jealous of Europeans, who insult their usages and carry away their gold."

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

1st Regiment of Dragoon Guards—Lieut. Leonard Wilson Atkinson, from the 16th Light Dragoons, to be lieutenant, vice Webster, who exchanges; March 30.

1st Dragoons—Edmund Bacon Hutton, Gent., to be cornet, by purchase, vice Hall, promoted; March 30.

6th Dragoons—Surgeon Gavin Ainslie Turnbull, from the 12th Light Dragoons, to be surgeon, vice Baxter, who exchanges; Jan. 14.

10th Light Dragoons—Lieutenant Colonel John Lewes, from half pay Unattached, to be lieutenant colonel, vice Brevet Colonel John Wilkie, who exchanges, receiving the difference between infantry and cavalry; Major Valentine Baker to be lieutenant colonel, by purchase, vice Lewes, who retires; Captain Richard Playne Smith to be major, by purchase, vice Baker; Lieutenant Edward Picton Baumgarten to be captain, by purchase, vice Smith; Cornet William Morgan Maunder to be lieutenant, by purchase, vice Baumgarten; Herbert Davies Evans, Gent., to be cornet, by purchase, vice Wood, promoted; March 30.

12th Light Dragoons—Surgeon Francis Hastings Baxter, M.D., from the 6th Dragoons, to be surgeon, vice Turnbull, who exchanges; Jan. 14.

13th Light Dragoons—Lieutenant Richard William Renshaw to be captain, by purchase, vice Dearden, who retires; Cornet Thomas George Johnson to be lieutenant, by purchase, vice Lethbridge, who retires; Cornet Henry Smithson Lee Wilson to be lieutenant, by purchase, vice Renshaw; Ensign William Harle, from the 81st foot, to be Cornet, vice Willes, appointed to the 3rd Light Dragoons; March 30.

16th Light Dragoons—Lieutenant Guy Webster, from the 1st Dragoon Guards, to be lieutenant, vice Atkinson, who exchanges; Lieutenant Henry Clement Wilkinson, from the 17th Foot, to be lieutenant, vice Corballis, who exchanges; March 30.

Royal Artillery—Brevet Major Arthur Vandeleur to be captain, vice Bent, placed on the supernumerary list; Lieutenant Thomas Lloyd Still to be second captain, vice Vandeleur; March 12; Lieutenant Joseph Hanwell to be second captain, vice Haig, placed on the supernumerary list; March 16.

Military Train—Charles Stewart Campbell, Gent., to be ensign, without purchase, vice Davies, appointed quartermaster of the 76th Foot; March 30.

1st Regiment of Foot—Luke Norman, Gent., to be ensign, by purchase, vice Stansfield, promoted; March 30.

6th Foot—Robert Grame, Gent., to be ensign, by purchase, vice Howley, promoted; March 30.

17th Foot—Lieutenant William Richard Corballis, from the 16th Light Dragoons, to be lieutenant, receiving the difference between cavalry and infantry, vice Wilkinson, who exchanges; March 30.

18th Foot—Major and Brevet Colonel George Jackson Carey from the Cape Mounted Riflemen, to be major, vice D'Arcey, who exchanges; March 30.

21st Foot—John Jacob Warner, Gent., to be ensign by purchase, vice Coke, appointed to the 25th Foot; March 30.

22nd Foot—Ralph Drake Backhouse, Gent., to be ensign, by purchase, vice Powys, promoted; March 30.

24th Foot—Ensign Francis Massey Pearson to be lieutenant, without purchase, vice Crutchley, promoted; March 9.

25th Foot—Ensign Richard Webster, from the 3rd West India Regiment, to be ensign; Westropp Thomas Morgan, Gent., to be ensign, by purchase; March 30; William Grogan Knox, Gent., to be ensign, by purchase; March 31; George Dixon, Gent., to be ensign, by purchase; April 1.

28th Foot—Stephen Joseph McKenna, Gent., to be ensign, without purchase, vice Brett, promoted; March 30.

31st Foot—Thomas Stanier, Gent., to be ensign, by purchase, vice Maynard, promoted; March 30.

48th Foot—Ensign Edward Cecil Brown to be lieutenant, without purchase, vice Horne, promoted in the 25th Foot; Lieutenant John Rawlins to be adjutant, vice Horne, promoted in the 25th Foot; March 30.

57th Foot—Philip Edward Powys, Gent., to be ensign, by purchase, vice Waller, promoted; March 30.

59th Foot—The second Christian name of Major and Brevet Lieutenant Colonel Burmester is "Edward."

60th Foot—Lieutenant Anthony Carlisle to be captain, without purchase, vice Baynes, deceased; March 9.

61st Foot—Ensign James Graham Hamilton to be lieutenant, without purchase, vice Young, promoted in the 25th Foot; March 30.

70th Foot—Lieutenant William Henry Ralston to be captain, by purchase, vice James, who retires; Ensign John Frederick Augustus Grierson to be lieutenant, by purchase, vice Ralston; March 30.

73rd Foot—John Parnell Clarke, Gent., to be ensign, by purchase, vice McGill, appointed to the Royal Canadian Rifle Regiment; March 30.

77th Foot—John Potts, Gent., to be ensign, by purchase, vice Hoskins, promoted; March 30.

79th Foot—John Busfield, Gent., to be ensign, by purchase, vice McCausland, promoted; March 30.

80th Foot—The commission of Captain James John Dudgeon to be ante-dated to the 26th March, 1858.

97th Foot—Madoc Davies, Gent., to be ensign, by purchase, vice Thompson, promoted; March 30.

3rd West India Regiment—Cornet Richard George Collins, from half pay of the late Land Transport Corp., to be ensign, vice Webster, appointed to the 25th Foot; March 30.

Royal Artillery—Second Captain Andrew Orr, on the Supernumerary List, to be Captain; Second Captain Charles Rowland Hill to be Captain,

vice Brevet Major Henry, placed upon the Supernumerary List; Second Captain Patrick John Campbell to be captain, vice Vandeleur, placed upon the Supernumerary List; Lieut. Joshua Frederick Betty to be second captain, vice Hill; Lieut. John Kelly Holdsworth to be second captain, vice Campbell.

BREVET.—General the Right Hon. John Lord Seaton, G.C.B., G.C.M.G., Colonel of the 2nd Regiment of Life Guards, to be field marshal; April 1.

Lieutenant Colonel and Brevet Colonel John Lawrenson, half-pay 6th Foot, to have the temporary rank of major general, while holding the appointment of inspector general of cavalry in the United Kingdom; April 1.

Lieutenant Colonel and Brevet Colonel Lord George Augustus Frederick Paget, C.B., half-pay Unattached, to have the temporary rank of brigadier general while in command of a brigade; March 12.

Colonel Sir Robert Napier, K.C.B., of the Bengal Engineers, to have the local rank of major general in China; March 30.

Brevet Major Richard Parke, Royal Marines, to be lieutenant colonel in the Army; March 30.

Captain Mowbray Thompson, 53rd Regiment Bengal Native Infantry, to be major in the Army; Feb. 1.

Captain William Godfrey Rayson Masters, Royal Marines, to be major in the Army; March 30.

The undermentioned promotions to take place consequent on the promotion of Colonel Francis Ward, Royal Artillery, to be major general, in succession to Major General Henry Charles Russel, Royal Artillery, who died on the 7th of March:—

Lieutenant Colonel William Charles Forrest, 7th Dragoon Guards, to be colonel; March 8.

Brevet Major Walter Warde, half-pay Unattached, Staff Officer of Pensioners, to be lieutenant colonel; March 8.

Captain Samuel Hood Stovin Inglefield, Royal Artillery, to be major; March 8.

The second Christian name of Major-Gen. Harrison on retired full pay of the Royal Artillery, is "Robinson," not "Richard," as stated in the *Gazette* 23rd ult.

Lieut.-Col. and Brevet-Col. Brook Taylor, unattached, to have the temporary rank of brigadier general while in command of a brigade.

MEMORANDUM.—Lieut. A. W. Bailey, of the Fermanagh Militia, having received a first-class certificate at the School of Musketry at Hythe, has been appointed by the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, to be instructor of musketry to the regiment.

STAFF.—Major General the Hon. Sir James Yorke Scarlett, K.C.B., to be adjutant general to the forces, vice Lieutenant General Sir George Augustus Wetherill, K.C.B., whose term of Staff Service has expired; April 1.

Captain and Brevet Colonel John Jarvis Bissett, of the Cape Mounted Riflemen, to be deputy quartermaster general to the forces serving at the Cape of Good Hope, vice Captain and Brevet Colonel Edward Selby Smyth, 2nd Foot, whose term of Staff Service has expired; April 1.

PURVEYORS' DEPARTMENT.—Purveyor's Clerk of the First Class John Macfarlane to be purveyor to the forces, vice George Pratt, placed on the retired list; March 30.

The Purveyor whose services have been dispensed with is T. A. Corlett and not T. A. Corbett, as stated in the *Gazette* of the 2nd March, 1860.

The undermentioned promotions to take place under the provisions of the Royal Warrant of the 27th January, 1860:—

To have the Honorary Rank of MAJOR.

Capt. George Thorne George, paymaster 4th Light Dragoons.	Paymaster John Stephenson, Cavalry Depot.
Paymaster Henry Duberley, 8th Light Dragoons.	Paymaster Edwin Griffiths, Depot Battalion.
Paymaster Richard John Elrington, 10th Light Dragoons.	Paymaster Hugh Somerville S. Burney, Depot Battalion.
Paymaster James Gustavus Hamilton Holmes, 12th Light Dragoons.	Paymaster John Wheatley, Depot Battalion.
Paymaster Edmund Beasley Frith, 13th Light Dragoons.	Paymaster Julius Brockham Travers, Depot Battalion.
Paymaster William Featherstonhaugh, 14th Light Dragoons.	Paymaster Charles Boyse Roche, Depot Battalion.
Paymaster Blayne Townly Walshe, 15th Light Dragoons.	Paymaster Thomas Miller Creagh, Depot Battalion.
Paymaster George Frederick Rosser, 16th Light Dragoons.	Paymaster George Thomas Benson, Depot Battalion.
Paymaster William John Bampfield, 1st F.	Paymaster George Pott Erskine, Depot Battalion.
Paymaster Oliver Nicholls, 2nd Foot.	Paymaster Stephen Lawson, Depot Battn.
Paymaster John Cornes, 18th Foot.	Paymaster Ernest Augustus Hawkes, Depot Battalion.
Paymaster William Brunell, 25th Foot.	Paymaster Morris R. Campbell, Depot Battalion.
Paymaster John Mills Hewson, 35th Foot.	Paymaster Robert Thomas Brown Boyd, Depot Battalion.
Paymaster Henry Seymour Mitchell, 49th Foot.	Paymaster Alexis Corcoran, detachments, at Portsmouth.
Paymaster Mark Matthews, 57th Foot.	Capt. Charles Searlin Naylor, Paymaster Convolescent Establishment, Yarmouth.
Paymaster Francis Levee Bennett, 59th F.	Paymaster John Henry Matthews, Invalid Depot, Chatham.
Paymaster James Howes, 64th Foot.	Paymaster John Mackenzie Kennedy, Invalid Depot, Chatham.
Paymaster John Williams Marshall, 65th Foot.	Capt. Henry Balthazar Adams, Paymaster, Recruiting District.
Paymaster Rowland Webster, 72nd Foot.	Paymaster Charles Henry Peirce, Recruiting District.
Paymaster David Francis Chambers, 75th Foot.	Paymaster Charles John Furlong, Recruiting District.
Paymaster William Frederick Nixon, 81st Foot.	Paymaster James Robinson, Recruiting District.
Paymaster John Dennis, Swinburne, 83rd Foot.	Paymaster Robert Collins Craigie, Recruiting District.
Paymaster Charles Fide Heintly, 86th Foot.	
Paymaster Stephen Blake, 93rd Foot.	
Paymaster Luke Fitzgerald Bernard, Royal Canadian Rifle Regiment.	
Paymaster Vincenzo Rizzo, Royal Malta Fencible Regiment.	
Paymaster Edward George Cubitt, Cavalry Depot.	

To have the Honorary Rank of CAPTAIN.

Paymaster John Biggs, 4th Drag. Guards.	Paymaster Francis Fitzpatrick, 60th Foot.
Paymaster Chas. Scwell, 6th Dragoon Grds.	Paymaster John Andrew Pope, 67th Foot.
Paymaster Henry Dixon, 1st Dragoons.	Paymaster Robert Smyth, 96th Foot.
Paymaster William Archibald Kidd, Royal Artillery.	Paymaster Michael Thompson, 74th Foot.
Paymaster Francis Edwin Maunsell, 4th Foot.	Paymaster Joseph Cartmell, 71st Foot.
Paymaster Frederick Blanco Forster, 5th Foot.	Paymaster Robert Thomas Hearn, 76th Foot.
Paymaster Graham Egerton Huddleston, 8th Foot.	Paymaster William Fortescue Scott, 77th Foot.
Paymaster Andrew Sievwright, 9th Foot.	Paymaster Joseph Webster, 78th Foot.
Paymaster William Macdonnell, 14th Foot.	Paymaster Robert Scott, 89th Foot.
Paymaster Richard Milbank Tilghman, 15th Foot.	Paymaster Henry Leigh, 98th Foot.
Paymaster John Matthew Gibbs, 20th Foot.	Paymaster John Edward Large, Rifle Brig.
Paymaster Thomas Smith, 25th Foot.	Paymaster Michael William Lade, Coast Rifle Brigade.
Paymaster James Twibill, 38th Foot.	Paymaster Henry Dudley, Ceylon Rifles.
Paymaster Samuel Benison, 39th Foot.	Paymaster John Gregory Gurney, Cape Mounted Riflemen.
Paymaster John David Blythe, 48th Foot.	Paymaster Daniel Bartlett, Recruiting District.
Paymaster Henry William Sibley, 46th Foot.	Paymaster Edward McMullin, Recruiting District.
Paymaster John Nolan, 50th Foot.	Paymaster Samuel Williams, Depot Battalion.
Paymaster Francis William Fellowes, 52nd Foot.	Paymaster George Bodle, Depot Battalion.
Paymaster William Marriott, 54th Foot.	Paymaster Alexander Fair, Depot Battalion.

* The promotion of Paymaster James Twibill, 38th Foot, to the honorary rank of captain, with the date of March 2nd, 1860, has been cancelled.

MEMORANDUM.

In the "Gazette" of the 27th inst., the letters "M.D." were erroneously inserted after Deputy Inspector-General Longmore's name.

NOTICE.

From and after the 1st of July next the minimum age of candidates to be examined for direct commissions in the army will be fixed at eighteen years.

NAVY.

PROMOTIONS.

ENGINEERS.—C. Wright confirmed to the rank of chief engineer, and appointed additional in the Cumberland for service in the Phoenix; assistant-engineer G. Trevis to the rank of chief engineer, and appointed to the Fisgard, for charge of the machinery of the Barossa; second-class assistant T. J. Sweny for the Fisgard, as supernumerary, and William Roas for gunboats coming forward; S. Harrison for the London, W. Smith for the Grappler, E. Aitken for the Melpomene, W. Inglis for the Hydra, and J. Jessop for the Magicienne; W. H. Croxall as acting second-class assistant to the Asia, for charge of machinery of the Philomel, and James Broddie to the Terror, for service in the Nettle; Richard Harris, as first-class assistant engineer, to the Adventurer.

APPOINTMENTS.

COMMANDERS.—A. H. Hoskins, to the Wrangler, commissioned; S. H. Henderson, to the Megara; E. Scott, to the Centurion.

CAPTAIN.—F. A. B. Craufurd, to the Archer, vice Courtenay, invalided.

LIEUTENANTS.—C. E. S. Woodman, to the Centurion; G. H. Barnard, to the Nile; C. G. Fegan, to be additional to the Ajax; James G. Meade, to the Excellent; Henry L. C. Robinson, to the Megara; Thomas W. Oliver, to the Megara; Henry N. Knox, to the Edinburgh (additional), for service in the Louisa tender; Charles G. F. Knowles, to the Royal Adelaide; Thos. Hooper, to the Marlborough (additional), per disposal; St. V. D. Lake, to the Excellent; and J. A. Vanrenen, to be additional to the Forte, for disposal on the Cape of Good Hope Station; E. H. Seymour, to the Chesapeake, additional for disposal; H. M'Hardy to the Forte.

STAFF-SURGEON.—Dr. D. G. Miller, to the Orient.

SURGEON.—J. H. Carruthers, to the Orion.

PAYMASTERS.—W. H. Dutton, to the Formidable; W. Pinhorn, to the Britannia; D. F. Clow, to the Cambridge; G. Hickman and J. Whittall, to the Pearl; A. H. Martin, to the Falcon.

ASSISTANT-SURGEONS.—William S. Fisher (confirmed), to the James Watt; Charles A. Lees, to the Plymouth Hospital; Jacob E. Dyves, to the Impregnable; L. H. J. Hayne, to the Formidable; J. W. S. Meiklejohn, to Greenwich Hospital; J. L. Whitney, to the Chesapeake.

MASTER.—J. H. Ryan, to the Wellington, for service in the Orlando.

ASSISTANT-PAYMASTER IN CHARGE.—G. M. Blyth, to the Crocodile.

ASSISTANT PAYMASTERS.—Frederick Burne, to the Trafalgar; T. O. Joynson, to the Wellington.

ACTING ASSISTANT-SURGEONS.—J. G. Fitzgerald, to the Royal Albert; J. C. Grieg, to the Hydra; James F. Fitzgerald (additional), to the Impregnable.

MASTERS' ASSISTANTS.—R. W. Stevens and A. C. Bellamy, to the Conqueror; A. G. St. G. Ponsonby, to the Nile; H. Smith, to the Forte; F. Darbishire, to the Royal Albert; R. F. Bellis, to the Edgar; T. C. Forte, to the Marlborough; H. A. Easther and J. Browne, to the Megara; H. F. Woods, to the Rhadamanthus.

CHIEF ENGINEERS.—P. Wood, to the Asia, for charge of machinery of the Sutlej; T. L. Walker, to the Asia, for charge of machinery of the Frederick William; E. J. Burnley, to the Cornwallis; C. Wright, to the Fisgard, for charge of machinery of the Devastation.

ASSISTANT-ENGINEERS.—First class: Charles B. Turner, to the Asia, for charge of the machinery of the Rinaldo. Second class: T. J. Sweeney, to the Rhadamanthus.

ACTING ASSISTANT-ENGINEERS. Second class: Joseph Hughesdon, for temporary service in the Hawke; H. Benbow, to the Intrepid. Third class: T. Wilmott, to the Fisgard, for service in Widgeon; A. Wilkins, J. Gill, and E. Wimshurst, to the Asia, as supernumeraries.

MIDSHIPMEN.—W. E. Fitzgerald, to the Trafalgar; J. C. Best, to the Marlborough.

Births, Marriages, and Deaths.**BIRTHS.**

- D'ALMEIDA.**—At Mount Victoria, Singapore, on the 6th March, the wife of Jose d'Almeida, Esq., of a son.
- ELLIS.**—At Singapore, on the 18th Feb., the wife of Captain Ellis, of the barque *Couragee Family*, of a daughter.
- FARQUHAR.**—On the 27th ult., at Mount-row, Guernsey, the wife of (Captain A. B. Farquhar, commanding the P. and O. Company's steamship *Nubia*, of a son.
- FLEMING.**—At Ningpo, on the 10th Feb., the wife of the Rev. T. S. Fleming of a son.
- GANNO.**—On the 16th Feb., Mrs. J. W. Ganno, of a son.
- GROSVENOR.**—On the 6th of April (Good Friday), at Downs, Park-road, Lower Clapton, the wife of A. W. Grosvenor, Esq., of a daughter.
- HINNERKINDT.**—At Singapore, on the 23rd Feb., the wife of Mr. H. Hinnerkindt, of a son.
- SNOW.**—On the 15th ult., at South Camp, Aldershot, the wife of W. R. Snow, Esq., Commissariat Staff Corps, of a son.
- STUART.**—On the 27th ult., at Alderney, the wife of Captain James Stuart, Royal Engineers, of a son.
- SWINTON.**—On the 3rd inst., at No. 6, Atholl-crescent, Edinburgh, the wife of Lieutenant R. Hepburne Swinton, R.N., of a son.

MARRIAGES.

- ADAMS—WILD.**—On the 21st Feb., at the Cathedral, Hong Kong, Henry Adams to Annie Selina Wild, both of Mr. Lewis's Australian Hippodrome.
- MOORE—HOGG.**—On the 29th ult., at South Hackney Church, William J. Moore, Esq., of Old Kent-road, to Miss Georgina E. Hogg, youngest daughter of Stratford G. Hogg, Esq., of 28, Glengall-grove, Old Kent-road.
- VANDERSPAR—BOWER.**—On the 16th ult., at the parish church, Marylebone, by the Rev. R. S. Bower, assisted by the Rev. Warwick Hunt, John Matthew Vanderspar, Esq., of Point de Galle, Ceylon, Belgian Consul, fourth son of the late J. J. Vanderspar, Esq., Netherlands Consul, to Mary Elizabeth Drury, only daughter of Harold Elyott Bower, Esq.

DEATHS.

- ARNAUDTIZON.**—At Sual, Philippine Islands, on the 8th Feb., M. Marc Arnaudtizon, of Rouen, aged 45 years.
- BELL.**—On the 27th ult., at 18, Harrington-square, Esther Alicia, the beloved wife of Alexander Bell, Esq.
- CUNNINGHAM.**—At Singapore, on the 22nd Feb., Mr. M. P. Cunningham.
- GARDNER.**—Drowned, whilst proceeding on board the ship *Amkerst*, Mr. Edward Robert Gardner, late cashier of the East India Railway Company, Rajmahal, aged 27, leaving a wife and four children.
- HOUGHTON.**—On the 31st ult., Catherine Mary, wife of Charles James Houghton, Esq., of Junction-road, Holloway, and of Jeffreys-square, City.
- KAY.**—On the 29th ult., at her residence, No. 15, York-terrace, Regent's-park, Helen, relict of William Kay, Esq., formerly of Tring-park, Herts.
- MUKLE.**—At New Harbour, on the 1st March, R. W. R. Mukle, belonging to the *Sir Robert Seppings*, by drowning.
- TORRANCE.**—At Tanahabang, Batavia, on 17th Feb., James Felt Torrance.
- URMSON.**—On the 23rd of February, on board the *Cadiz*, on his passage from Hong Kong to England, between Singapore and Penang, George Urmson, Esq., of Hong Kong, and of Frodsham, Cheshire, aged 37.
- VANSITTART.**—On the 25th ult., Henrietta Vansittart, youngest daughter of the late George Vansittart, Esq., of Bisham Abbey, Berks, aged 74.

DEATH OF THE COUNTESS (DOWAGER) OF ELGIN.—The Countess (Dowager) of Elgin died on the 1st inst. at Paris, after a protracted illness. The deceased countess was second wife of Thomas, sixth Earl of Elgin, and was mother of the present peer. The late countess, who was youngest daughter of Mr. James Townsend Oswald, married the late earl on the 21st of September, 1810, by whom, who died in November, 1841, her ladyship leaves surviving issue—the Earl of Elgin, Colonel the Hon. Robert Bruce, C.B., the Hon. Frederick A. Bruce, Envoy in China, &c.

COMMERCIAL POSTSCRIPT.**FRIDAY AFTERNOON.**

ARRIVALS NOT INCLUDED IN TABLE.—At Deal, 8th April, from Shanghai, Naomi. From Whampoa, 9, Hercules; from Batavia, Nemesis; from Maulmain, Kate. At Falmouth, 7, from Maulmain, Sophie. At Boston, March 26, from Penang, Versailles. At Cuxhaven, April 6, from Batavia, Superior. At Falmouth, 9, from Maulmain, Countess of Yarborough; from Singapore, Mystery. At Queenstown, from Java, Horizon. At Liverpool, from Manila, Eglantine; from Singapore, Amethyst. In Downs, 10, from Shanghai, Solent. Off Beechy Head, 5, from Batavia, Hedvig. At Texel, 6, from Tjilatjap, Stad Leyden. At Santander, 3, from Manila, Nueva Engracia. At Boston, March 26, from Singapore, Volant. At Portsmouth, April 10, from Batavia, Adele. Off Queenstown, April 9, from Maulmain, Prince Arthur; from Shanghai, Conbeath.

DEPARTURES.—April 8, from Gravesend for Shanghai, Anglo Saxon. From Deal, 9, for Batavia, Batavia. From off Dover, 6, for Batavia, Whampoa; from Penzance, Hebe. From Cardiff, 5, for Shanghai, Sultan. For Woosung, 6, Gauntlet; from Liverpool for Woosung, Elizabeth; from Sunderland for Shanghai, Standard. From Deal, 4, for Hong Kong, Catharine. From off Dungeness, 7, for Batavia, Henriette Gertrude. From Newport, 9, for Singapore, Portland, Dione. From Cardiff, 5, for Woosung, Isaac Bell. For Hong Kong, 7, Zwerver. From Newport, 9, for Penang, Benclough. For China, 10, Josabella. From Lamlash, 6, for Singapore, Graham.

Monetary and Commercial.

There has been no further movement in connection with the proposed new Bank of India noticed in our last, but it is looked upon with considerable jealousy by the banks now existing in India, the Straits, and China, and with good cause, for notwithstanding the number established the business and profits are still very large, and the amount of accommodation afforded to the mercantile communities in the way of discount is still too limited.

The *Times*, in its City article on the 11th inst., has the following. It is of course quite possible that it will suit their informant for shippers to believe in the statement:—

"It is alleged by experienced merchants in London that, according to their latest advices, cotton manufactures from England cannot be sold except at a loss of 15 per cent. at Bombay, 10 per cent. at Calcutta, and 7 or 8 per cent. in China, and, moreover, that there has been no real profit on any such goods shipped hence during the last six months. Although the buyer of Manchester goods for exportation to India and China may expose himself to the losses in question, it does not follow that the Manchester manufacturers who ship on their own account may not still be operating at a profit, since a sacrifice of from 7 to 15 per cent. may fail to absorb the entire gain between the current price of their goods and the cost at which they are actually turned out. The speculative shipper, therefore, who buys the goods at a quotation including the manufacturer's profit, is mainly the person whose transactions are to be contemplated with anxiety. It will be shared, perhaps, partly by such of the manufacturers as may have sold their goods to speculative merchants on six months' acceptances, partly on such banks as may now be congratulating themselves upon the extraordinary revival in the discount business of the country, and partly on the general public, who may as yet see no reason to distrust any of the new and dashing gentlemen who are rapidly rising up into the position of great promoters of Eastern commerce.

The meeting of the Chartered Bank of India, Australia, and China, was held on the 29th ult. A full extract from the report was given in our last, and we now append the statement of liabilities and assets at 31st Dec., 1859:—

Dr.		£	s.	d.
To capital amount paid up on the bank's subscribed capital of 32,200 shares		640,230	18	4
(Note.—£3,769 1s. 8d. has since been received, completing the bank's capital of £644,000.)				
To amount due by the bank on bills drawn by the agencies, money deposited, &c.		1,292,150	11	5
To profit and loss, net balance of profit, after paying all current charges, directors' allowance, &c., and providing for bad or doubtful debts		29,517	12	2
		£1,962,199	1	11

Dec. 31.—By balance at this date, brought from last account		15,190	1	0
1859.				
Dec. 31.—By net profit for the year, ending this day		37,211	7	5
		£52,401	8	5

At the meeting of the Atlantic Telegraph Company the directors were authorised to borrow the sum of £25,000, in 6 per cent. debentures, so as to allow the commencement of operations for the repair of the Atlantic cable. These debentures are in the form of mortgages upon the property of the undertaking, including any portion of the old cable that may be recovered. The directors subscribe £4,000. Captain Kell and an experienced electrician will sail in about a fortnight for Newfoundland, and on their arrival there will at once commence operations. It is proposed to shorten the cable at the Atlantic side by about forty-six miles (making fifty-six miles, inclusive of ten previously taken up), and it is presumed that the "fault" there will be found to be included in this portion. It is also intended to land the Newfoundland end of the cable at New Perlican (Trinity Bay), a much more favourable spot than that at present used. Should the operations be carried out successfully, attention will next be turned to the "fault."

at our side of the Atlantic. [The substance of this was given in a previous issue.]

A further reduction of $\frac{1}{4}$ d. has taken place in the value of bar silver. A number of the dollars recently received from Mexico via New York are spurious. The execution is remarkably good. The last arrival of dollars sold at 62 $\frac{1}{4}$ d.

The advices from India continue to express general approbation of Mr. Wilson's budget. The main point to which exception is still earnestly taken is the doubling of the import duty on cotton twist. A considerable decrease is apprehended in the trade in this article, the remarkable growth of which is shown in the fact that the quantity of twists imported into Bombay in the year 1859 was no less than 14,372,508lbs., against 8,013,159lbs. in 1858, and 3,899,153lbs. in 1857.

The present mail takes only £122,458. The particulars are as follows:—For Calcutta, £52,840; Hong Kong, £38,505; Madras, £16,154; Shanghai, £13,560; Foo-chow-Foo, £1,080; and for Ceylon, £319.

We understand that arrangements are being made by the projector of the route from Pegu to Esmok, in China, which we noticed in a previous issue, to organise a company for the purpose of making a railroad and electric cable over the distance, which is only 500 miles. From Esmok the line of telegraph could be carried along the valley of the Pearl River to Canton.

ARTICLES OF IMPORT.

TEA.—The market during the past fortnight has been much depressed. The arrivals into the United Kingdom since the 1st March have amounted to 18,500,000 lbs., which would of itself have been sufficient to try a strong market, and being freely offered at a time when the trade have been unwilling buyers, the result has been to establish a considerable decline in nearly all kinds. The arrivals of low tea have been large, and having been freely offered both privately and at public auction, the prices have ranged from 1s. 1d. to 1s. 4 $\frac{1}{2}$ d. per lb.; late sales show a fall of 1d. to 2d. per lb. Good common continues scarce, and is difficult to buy under 1s. 5d. per lb., the quotation being 1s. 4 $\frac{1}{2}$ d. to 1s. 5d. per lb. Sinchune Kai kinds, of fair to good quality, show a decline of 1d. per lb. Common to fair Ho-Hows and Ning-Chows have sold $\frac{1}{4}$ d. to 1d. per lb. lower; in good of this class, as also second class Monings and Wopaks, the reduction is 1d. to 1 $\frac{1}{2}$ d. per lb. Good and fine Kaisows nearly maintain former prices, but fine Monings and Wopaks must be quoted 1d. per lb. lower. Tayshans have latterly sold at a decline of 1d. to 1 $\frac{1}{2}$ d. per lb.; some large quantities of these have been received from New York. Fair to good Oolongs have sold rather easier; other descriptions show no material change. In Souchongs business has been limited. Flowery Pekoes have sold to a moderate extent at rather lower prices for medium kinds; fine have been in request at full prices. Scented Teas have met with partial inquiry from time to time, but the arrivals have been large, and prices must be quoted $\frac{1}{4}$ d. to 1d. per lb. lower. Common Scented Capers have been difficult of sale at from 1s. 2d. to 1s. 2 $\frac{1}{2}$ d. per lb.; good and fine have been more in demand, but latterly have become difficult of sale. Orange Pekoes up to 1s. 6d. per lb. have been wanted; the good and fine kinds have been less saleable, and prices show $\frac{1}{4}$ d. to 1d. per lb. reduction; a few of finest quality have sold from 2s. 4d. to 2s. 6d. per lb. In Green Teas business has been moderate, and in most instances former prices have been maintained. There has been some inquiry for Hysons for export. Taiping Gunpowders, via New York, were realised at public sale at rather lower prices. Fair to good Young Hysons have been maintained at former prices. Ping Suey Gunpowders are only in limited demand, and are difficult of sale at previous rates. There has been some inquiry for Canton Gunpowders and Young Hysons, and the former have realised higher prices.

SILK.—We have to report a heavy business. In China silk the arrivals have been very large, and the stock shows an increase notwithstanding the large deliveries. Prices upon the whole are fairly supported—high cost in China, and the continued belief in short shipments, inducing importers generally to abstain from pressing sales. Chinese thrown silk continues utterly neglected. Japan silk, of the finer sizes, continues to find eager buyers at full rates, but the coarser sizes do not meet with equal favour.

SUGAR.—The market has been unsettled and somewhat fluctuating; the rumour of a proposed reduction in the duties on this article in France, together with rumours of alterations in a similar direction in Belgium, created at first a rather active speculative demand, and also induced the home trade to purchase more freely, but arrivals coming forward more liberally and a rather large supply being offered by auction, the buoyancy shortly subsided, and a return of heaviness followed. Manila has been in good demand. Transactions in Siam have been confined to common brown qualities at fair prices, but 3,000 bags of white were offered at public sale, and realised a fair price. The grocery qualities of Penang have likewise met free buyers. The prices have been from 38s. 6d. to 39s. 9d. for clayed Manila; Siam, 30s. 9d. to 31s. 9d.

COFFEE.—The market has acquired more general firmness, and preserved a strong upward tendency throughout the past month. There has been a steady demand from the home trade, as well as a rather active export inquiry. Singapore good green and yellowish has been sold from 69s. 6d. to 63s.; Ceylon, 59s. 6d. to 65s. for good ordinary to fine.

TIN.—There have been heavy arrivals of Straits in London, but a large quantity is of inferior quality, and the prices have been from 131s. to 131s. 6d.; Banca, 138s. to 139s.; regulas of antimony, £50 to £52.

RICE.—A further increased demand has been experienced, and general activity has prevailed. Several lots of Maulmain went at 8s. 4 $\frac{1}{2}$ d. to 9s. 9d.; old Neoragie, 8s. 6d. to 9s. 9d.

Sago has not undergone any material change, and of 1,541 boxes at auction, two-thirds sold at 16s. 6d. to 18s. 6d. per cwt. for middling to good small, and 16s. 4 $\frac{1}{2}$ d. to 17s. fair large. Sago flour has been in fair request, and 1,800 bags have been sold, common to good 15s. 6d. to 16s.

RUM.—Sales of Penang reported at 1s. 6d., but this description has since met with more demand at 1s. 7d.

PEPPER.—Has again suffered a slight decline. Of 2,760 bags of Penang and 297 bags of Singapore at auction, nearly all sold at 8 $\frac{1}{2}$ d. to 4d. per lb.

TOBACCO.—Manila is much sought for, but none in the market.

JAPAN WAX.—At a sale 100 cases offered were bought in at 68s. per cwt.; and 200 cases Japan cake were bought in at 71s. per cwt.

DRUGS AND SPICES.—Camphor, China, and Japan, 160s. to 170s.; Cassia lignea, in bond, 95s. to 100s.; do. in buds, 185s. to 190s.; do. oil, 14s. to 15s.; cinnamon, Ceylon, 9d. to 2s. 3d.; cloves, Amboyna and Penang, 4 $\frac{1}{2}$ d. to 1s. 5d.; Galangal root, 28s. to 32s.; ginger, Calicut and Cochin, £3 10s. to £6 10s.; gum benjamin, first quality, £13 to £15; 2nd quality, £10 to £13; 3rd quality, £4 to £9; do. drossy, £1 to £3; damer, 26s. to 48s.; gamboge, picked, £7 to £8; do. in sorts, £4 10s. to £6; mace, first quality, 2s. 2d. to 2s. 9d.; do. 2nd quality, 1s. 0d. to 1s. 4d.; nutmegs, first quality, garbled, fine, bold, even, and heavy, 2s. 6d. to 3s. 9d.; do. ungarbled, 1s. 4d. to 2s. 4d.; oil, aniseed, 8s. 0d. to 8s. 3d. per lb.; Cajeputa, 1d. to 1 $\frac{1}{2}$ d. per oz.; cinnamon, 2s. to 4s. 3d. per oz.; mace and nutmegs, 2 $\frac{1}{2}$ d. to 3d. per oz.; rhubarb, Dutch, trimmed, sound heavy breaking, bright and fresh, 5s. to 6s.; common flat, not dark coated, spongy, or wormy, 1s. 4d. to 3s. 3d.; common sound, 1s. 2d. to 3s.; star aniseed, fresh, bright, bold, unbroken, not grey, 95s. to 100s.; sticklac, Siam, fine black, 55s. to 82s. 6d.; Terra Japonica, Cutch pegue, 26s. to 27s.; gambier, in squares, 16s. to 17s.; turmeric, sound, bright, and bold, 13s. to 16s. 6d.; vermillion, bright, deep colour, and pure, 3s. 0d. to 3s. 3d.

MISCELLANEOUS.—Gutta percha, not adulterated or closely packed, 1s. 3d. to 2s.; india-rubber, pure, not drossy, 2s. to 2s. 1d.; rattans, 2s. 3d. to 5s. 9d. per 100; sapan-wood, Bemah, £6 to £8 10s.; Siam, £8 to £9 10s.; Singapore mother-o'-pearl shells, 125s. to 140s.; Manila, 10s. to 125s.; soy, thick and clear, dark red, good flavour, 4s. 3d. to 5s. per lb.

Penang . . .	—	11,910

ARTICLES OF EXPORT.

IRON.—In pig iron the market is flat. There appears a disposition to effect sales, but this is only done by a sacrifice in price. Common Staffordshire bars are quoted £7 10s. at the works; best bars, £8 10s.; sheets, £9; doubles, £10 10.; nail sheets, £8 10s.; boiler plates, £9; common rods, £7 10s.; hoops, £8 10s.; and all other sorts in proportion.

TIN.—There has been only a moderate demand for English tin at last rates.

TIN PLATES.—No change in the market.

LEAD.—Market is quiet, and prices remain unaltered.

SPEKTER.—Prices are a shade easier. Some sales have been effected for forward delivery at £20 10s. 6d.

MANCHESTER MARKETS.—There has been a very quiet market in yarns, and spinners who are coming out of contract are inclined to take rather lower prices. These remarks apply to yarns suited to all markets—those of India, China, Germany, the Mediterranean, and home trade. As a rule, however, manufacturers are well engaged, and adhere firmly to the highest rates lately current. Within the last ten days, however, there has been an active demand for India and China, and for goods adapted to those markets quotations are now on a par with those at the beginning of the month. The total shipments of cotton piece goods and yarns for the month have been 95,146 packages, against 100,683 for the same time last year. To Calcutta they amount to 24,414, against 20,716 same time last year; and to Bombay 3,187, against 9,240. The average for the previous twelve months is 19,297 and 13,379 respectively. To China shipments are continued on a large scale—5,765 packages to Hong Kong and 3,921 to Shanghai.

 EGLANTINE, Manila to Liverpool, 133 days out, 44 N., 30 W.
 ST. JEAN, Batavia to St. Nazaire, March 15.

CASUALTIES.

The Daniel Jeffries (ship), of Glasgow, for Manila, which had been lying at the Tail of the Bank at Greenock for several days, has been brought into harbour, having become leaky; she is making three inches of water per hour, and will have to discharge a portion of her cargo to be examined.

The Queen of the Ocean, Elison, from Sunderland to Hong Kong, put back to Brixham March 24, having fouled the D. B. Sexton, from Newcastle to Galatz, March 22, in leaving Torbay, and carried away the latter's jib-boom, &c., but sailed again March 26.

The Rosina, from Sunderland to Hong Kong, which put into Falmouth March 12, leaky, has discharged and sold part of her cargo, and is being caulked where necessary. The master, mate, and part of her crew have left her.

The Sarah March (ship), of Bangor, U.S., Stowers, from Newcastle, for China, was towed into Lowestoffe March 25, leaky, and thrown part of cargo (coals) overboard. She is discharging. She became leaky in consequence of having struck on the Inner Garboard sand.

The Mary Lee (late Lister), which sailed from Liverpool March 26, for Hong Kong, was reported from Holyhead on the 30th, with master killed.

The Charles Brownell, from Singapore to Liverpool, which was stranded on Bernard sand Jan. 22, and sold, has arrived at Liverpool.

In elligence from Bordeaux of March 27 states that the Louisiane de Beausejour, from that port to Shanghai, with coals, had sunk at sea, in consequence of a collision with an English vessel: crew landed.

The Bullfinch, Wood, which arrived at St. Helena Feb. 19, from Singapore, for London, had damaged sails, bulwarks, &c., in a severe hurricane, Jan. 15, 200 miles S.E. of Mauritius; also in another severe hurricane, Jan. 22, 70 miles N. of Cape St. Mary's (Madagascar), when she received considerable damage to sails, spars, &c.

The Magna Bona, from Swansea for Shanghai, had put into Rio Janeiro, with loss of mainmast.

The Havering, Rickaby, from London to Hong Kong, which put into Plymouth with a mutinous crew, parted her cables, and was driven ashore on Batten Reef, where she bilged; she had twelve feet water in her hold. Her cargo is being discharged into lighters, and a portion has been landed in a damaged condition. Efforts will be made to-day to get her off.

The Nabob, Baxter, from Manila to New York, put into St. Helena 26th Feb., having lost mainmast, &c., during very heavy gales 21st Jan., in lat. 21 S., lon. 70 E., but was surveyed and recommended to proceed without repairing, and she sailed on the 27th.

The Mentor, from Sourabaya, was spoken 16th March in lat. 40 N., lon. 31 W., and reported having on board the crew of an English vessel burnt at sea.

The J. D. Cooper arrived off Falmouth 4th April from Batavia in a very leaky state; the pilot cutter was sent in for pumps.

The Manzanilla, Martineau, which arrived at Havre 5th April from Manila, had encountered a cyclone during the night of 13th Dec., in lat. 29, lon. 49.

FREIGHTS AND CHARTERS.

There is a fair inquiry for tonnage at 50s. from Bombay to United Kingdom or Continent, 75s. teak from Maulmain, or £6 10s. on the round, taking coals out to a port on the way freight free; Java to United Kingdom, 60s.; Calcutta, 65s.; Bangkok and back, 100s.; Singapore, Sarawak, and back, 100s., &c. &c. Outward freights to India continue very weak, especially for coals. For Aden quotations are almost nominal; and for Bombay, 40s. to 41s.; Galle, 42s. 6d.; Kurrachee, 40s.; Hong Kong or Shanghai, 55s. are the nominal quotations. The Government continue shipping stores in large quantities for China, about 600 tons being offered this week.

In the Australian trade engagements of tonnage have been made this week for Adelaide at £4 per ton N.N.M. for small high-classed vessels, but for Melbourne 50s. on dead weight capacity is the utmost obtainable. The Emigration Commissioners will receive tenders next Thursday for a ship for Melbourne and another for Algoa Bay.

The following is from Messrs. W. S. Lindsay and Co.'s Circular:—"The demand for tonnage outward does not keep pace with the supply, and we have accordingly much weakness in rates both for coals and general cargoes. For Madras, Kurrachee, Bombay, and Calcutta, the only shipments of importance are for account of the railway companies, tonnage being readily obtained at 40s. to 45s. per ton dead weight, or 60s. to 65s. per register ton N.N.M. Two contracts for coals were taken last month—one for 6,000 tons for Bombay, on account of the Indian Council, and the other for 10,000 tons for Hong Kong and Shanghai, for account of the Admiralty. The rates for coal charters are so unsteady that quotations are made with great caution. For Aden there is no demand, and tonnage would be fixed with difficulty; the nominal quotations are 45s. from Birkenhead; £52 from the East Coast; Galle, 42s. 6d. from Cardiff, £48 to £49 from Sunderland; Bombay, 40s. from Birkenhead or Cardiff, £42 10s. from Tyne or Wear; Kurrachee, 40s. from Cardiff, £44 Sunderland; Hong Kong or Shanghai, 55s. to 57s. 6d., &c. For French Government the last rate paid was 79 francs Woosung or Chusan. From Java (two ports) 60s. is offered for U. K.; Tuticorin or Colombo to U. K. or Continent, 50s.; Manila, Singapore, or Java to U. K. or Continent, 55s.; Bangkok, out and home, 100s. for small vessels; Glasgow to Singapore and (or) Sarawak and back, 100s., &c. &c.

It is believed that the French Government has taken into consideration the proposition for a treaty of navigation with Great Britain.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila, 50s. to 60s.

At St. Helena.—Feb. 9, Pieter Cornelis Zoon Hooft, Koens, from Java, and sailed 10th for Schiedam; 10th, Prins Mauritz, Bast, from Batavia; 11th, Nueva Engracia, Cunella, from Manila, and sailed for Santander; 12th, Diana, McNeilage, from Manila; Planet, Tullock, from Singapore; Elizabeth, Harris, from Batavia; 13th, Catharina Maria, Schuchard, from Batavia; Sol, Bonifacia, from Manila, and Noord Star, from Batavia, for Amsterdam; 19th, Bullfinch, Wood, from Singapore, and sailed 21st for London; 20th, Vier Gezusters, Bek, from Java, and sailed 23rd for Rotterdam; 22nd, Gil Blas, Bizet, from Macassar, and sailed 24th for Havre; 23rd, Dirk Arnold, Veer, from Batavia, and sailed for Amsterdam; 24th, Elshout, Bonjer, from Java, and sailed 25th for Rotterdam; 25th, Sarah Alida Maria, Staepert, and Tonia, Zeeman, from Batavia, and both sailed 26th for Amsterdam; Japan, Muller, from Batavia, and sailed for Rotterdam; 26th, Fernand, Blanchet, from Batavia; Maleyer, Bok from Java, and sailed 28th for Amsterdam; Land o' Cakes, Bell, from Singapore, and sailed for London; 28th, Ferdinand en Louis, de Weerd, from Java; 13th, Goede Verwachting, Verchard, from Java, and sailed 16th for Amsterdam; 16th, Johanna en Gertruida, Flins, from Batavia, and sailed 17th for Rotterdam; 17th, General Churra, Viletta, from Manila, and sailed 19th for Alicante; 18 h, Rosita, Aldamiz, from Manila, and sailed 19th for Havana.

At TABLE BAY.—Jan. 31, H.I.F.M.S. Entreprenant, from Toulon, for Hong Kong, and H.I.F.M.S. Vengeance, for China; 22, Robin Gray, Dick, from Hong Kong; 23, North Star, Walters, from Cardiff, for Hong Kong, to stop a leak; 25, Alexander Ralli, De Berque, from Toulon, and sailed Feb. 1st for Shanghai; Fortuna, De Ligny, from Rotterdam, for Padang, with mainmast damaged; 30, H.I.F.M.S. Andromede, from L'Orient, and sailed Feb. 14th for Hong Kong; Feb. 2, H.I.F.M.S. Forte, from Cherbourg, and sailed 17th for China; 4, Whirlwind, Edgell, from Hong Kong, and sailed 8th for De era; Berkshire, Wilson, from Maulmain, and sailed 7th for Queenstown; 11, Esbern Snare, Barner, from Singapore, and sailed 12th for Falmouth; 19, Leonidas, Andrew, from Foo-chow-Foo. Sailed—23, for Batavia, Emile Petersen; 24, for China, H.M.St. Cockchafer; 3, for Batavia, Triton, Kra ft; 15, for China, H.I.F.M.St. Entreprenant; 17, for Hong Kong, North Star, Boyde.

At SIMON'S BAY.—Jan. 23, H.M. steamer Centaur, from Table Bay, and sailed 4th Feb. for China; 24, H.M. steamer Cockchafer, from Table Bay, and sailed 4th Feb. for China; Feb. 8, H.M. steamer Vulcan, from Portsmouth, and sailed 19th for China; 13, H.M. steamer Sphinx, from Rio Janeiro, and sailed 19th for China; 14, H.M. gunboats Havock and Hardy, from Rio Janeiro, and both sailed 19th for China; Jan. 19, H.M. gunboat Snake sailed for China; 29th, H.M. transport Thunder sailed for China.

At MAURITIUS.—Feb. 16, Mona Cassy, from Singapore; Radnagore, Manning, from Singapore; March 4, Jo eph Bushby, Justice, from Singapore.

At ASCENSION.—Feb. 18, Planet (ship), from Singapore; March 2, Do 1 phin (Dutch brig), from Batavia.

TOULMIN AND GALE

MAKERS OF

PATENT INDIAN DESPATCH BOXES, WRITING DESKS,
DRESSING CASES, TRAVELLING AND TOILETTE BAGS,

7, NEW BOND STREET,

Manufactory—SISE LANE and BUCKLESBURY, CITY, LONDON.

DIVING APPARATUS.
C. E. HEINKE,
Submarine Engineer
103, Great Portland-st., London,

Begs to call the attention of Shipowners, Merchants, Captains, &c. &c., to the important improvements made by him in the

SUBMARINE HELMET DRESS and APPARATUS,

which enables a diver to remain any length of time under water. For the Recovery of Property from Wrecks, Making and Repairing Foundations of Harbours and Bridges, and also

FOR PEARL AND SPONGE DIVING.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERROW**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, by DR. HASSALL. "I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) **ARTHUR HILL HASSALL, M.D.**"

Directions and testimonials with each packet, which bears the signature of **A. S. PLUMBE**, 3, Abchurch-lane, London, E.

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-street; Medes, Camberwell.

AGENTS WANTED.

RIMMEL'S TOILET VINEGAR super-sedes **EAU DE COLOGNE**, as a **TONIC and BRACING LOTION**, a reviving scent, and a powerful disinfectant. 1s., 2s. 6d., and 5s. Sold by all perfumers and chemists.

E. RIMMEL, Perfumer, 96, Strand, and 24, Cornhill London, and 17, Boulevard des Italiens, Paris.

MEDICINES FOR EXPORTATION.

Edinburgh—(Head Office), 5, George-street.

Dublin—65, Upper Sackville-street.

Glasgow—58, St. Vincent-street.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL in CAIRO**, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

GALVANISM.—PERSONS desirous of availing themselves of the **MODERN DISCOVERIES in ELECTRO-MAGNETISM and GALVANISM** as a curative agent in the treatment of various forms of Paralysis, Muscular and Nervous Debility, Chronic Rheumatism, Spasmodic Asthma, &c., can have it applied by properly-qualified medical men of experience at the Galvanic Institution, No. 52, Euston-road, every day (except Sunday), from 12 to 4 o'clock. Accommodation for board and attendance of a first-class character for those coming from a distance.

HOLLOWAY'S PILLS & OINTMENT.

—INFLUENZA, BRONCHITIS.—At the beginning of spring chest complaints are continually produced by the east wind and variable temperature. In all such cases early attention and effective treatment are demanded to prevent them degenerating into more serious and often fatal maladies. The invalid may rest assured that **Holloway's Pills**, without worrying the weakest constitution, will remove all formidable symptoms. The Ointment should be rubbed on the chest, back, and sides, every night and morning, for at least ten minutes, and the parts then encased in flannel. This course of treatment will lessen fever, rectify incipient congestion, relieve the oppressed lungs, and remove restlessness, hoarseness, and cough. Thorough restoration will reward diligence and attention in following this advice.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1½d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to be demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

LECTURE ON JAPAN.—The Lecture on Japan, which **Dr. MACGOWAN** (from China and Japan) has delivered in various parts of Scotland, he is now prepared to repeat in England. The Lecturer is assisted in exhibiting specimens of Japanese Art by one of the literati of China, the son of an ex-Mandarin. **Dr. M.** may be addressed, 17, Regent-square, London, W.C.

TERRA ALBA.—PLASTER OF PARIS.

MARTIN'S PATENT CEMENT.—The best Cement for use in Hot Climates, for which the Prize Medal was awarded at the Great Exhibition of 1851. **J. CUMBERLAND PART** (successor to Messrs. Stevens and Son) is prepared to supply Exporters with any quantity of the above-named Articles F.O.B.

CEMENT AND PLASTER WORKS.

PUMPING MACHINERY.

GWYNNE AND CO., ENGINEERS,

LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out coffer dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and fulling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufactories in general.

Price Lists and further particulars obtained on application to **GWYNNE and CO.**, Hydraulic and Mechanical Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulence, are advised to wear **NELSON'S MEDICATED BELT**, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, fitting easily, and supporting the back."

"MARK PERCIVAL."

Lower Parade, Leamington, August 3, 1858.

These Belts are sold by Mr. **WHITBURN**, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, **WM. ELSTON**, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to **WM. ELSTON**, at Cavendish-street.

These belts can be had of any tailor in the kingdom.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via EGYPT.—THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, Ceylon, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.

For further particulars apply at the Company's Offices, 123, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

A Regular Trader, with quick Despatch. For SHANGHAI direct, the celebrated Thames-built Clipper, WYNAUD, A 13 Years, 516 tons Register, DAVID REID, Commander; loading in the West India Docks.

This beautiful vessel offers a first-rate opportunity to Shippers, being well known alike for her rapid sailing qualities, and the good order in which she invariably delivers her cargoes.

W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

WITH DISPATCH.

FOR SHANGHAI, direct, the splendid American clipper ship, FLORENCE, A 1 New York register, 1,045 tons. E. D. WADSWORTH, Commander, lying in the London docks. This beautiful ship was built expressly for the China trade in 1856, and has just arrived from Whampoa in 99 days.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

FOR HONG KONG AND WHAMPOA, the fast-sailing, Thames-built clipper ship LAUDERDALE, A 13 years, 850 tons register, ALEX. BOWERS, Commander, loading in the East India Docks. This magnificent vessel has lately arrived from Foo-Chow in 101 days—her first voyage—beating all her competitors, several of which were noted China clippers, thus proving her admirable sailing power. She is confidently recommended to shippers and passengers.

Apply to the owners, Messrs. John Willis and Son, East India Chambers, Leadenhall-street, E.C.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP. To sail on the 20th of April. Last Shipping Day the 18th. For HONG KONG and CANTON, the celebrated clipper ship LORD OF THE ISLES, A 1, 691 tons register, William Jameson, Commander, lying in the East India Docks. This fine ship is not excelled in speed by any vessel in the China trade, and delivers her cargoes in perfect order. Has good accommodation for passengers.

For Freight or Passage, apply to PHILLIPS, SHAW, & LOWTHER, 2, Royal Exchange-buildings, E.C.

WITH IMMEDIATE DISPATCH.—FOR SINGAPORE, the fine fast-sailing barque ELIZA THORNTON, A 1, 13 years, 471 tons per register, coppered and copper fastened throughout. THOMAS MAXWELL, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGEL, WOLLETT & Co, 1, Lime-street-square.

ELLIS, SON, and FICKLING will despatch the following high class, British-built, clipper vessels:—

Destination.	Ships.	Tons.	Class.	Docks.
Bombay	South Belle	541	A 1 9 years	St. Kath.
Kurrachee	Victory	579	A 1	W. India

PASSENGERS ARRIVED OUTWARD.

Per Sportsman, from New York: John Cody, Chester Averill, Herman Alisch, and John C. Gettings. Per Early Bird, from San Francisco.—Messrs. Dolan, Williams, Rayner, Danas, Kitteridge, Speiden, and Captain Williams. Per Malabar, mail steamer, from England, &c.—For Hong Kong: Messrs. Loch, Latimer, McNair, Soetmans, Barnes, Latven, Daly, Uthagon, and Clarke, Col. de la Hor, Dons Barratores, and Gali, Command. Rebeul. For Shanghai: Messrs. Brand, Waller, and Chapromarie, Mrs. Lamont, Mr. and Mrs. Fajard. Per Fiery Cross, from Calcutta.—H. E. Sir Hope Grant, K.C.B., and Staff.

Summary of News from the Far East.

ALEXANDRIA.

(RECEIVED LAST NIGHT VIA MARSEILLES.)

A despatch has arrived at the Dutch Consulate confirming the precarious situation of foreigners in Japan.

The Chinese are making great preparations for the defence of the country, and are endeavouring to enlist European artillerymen.

It is asserted that two English frigates, the *Dove* and the *Algerine*, have been sunk by the guns of the forts on the Peiho river.

The *Sampson*, which accompanied them, has returned to Hong Kong the bearer of important despatches.

The *Dove* and *Algerine* are gunboats, not frigates, as reported in the above. We can find no confirmation of the report in the despatches delivered by the present mail, and as this intelligence must have come by the same route, it will be found to be mere rumour, except that a report to that effect was made by the Chinese at Canton. The *Sampson* arrived at Hong Kong, left the *Dove*, *Algerine*, and *Acteon* on the 4th March, safely anchored at a port in the entrance to the Gulf of Petcheleo. These vessels went first to Ta-Lien Bay, near, we think, to the port of Tang-Chau, that was to be opened by the new treaty. The inhabitants, who had never seen a European ship before, were alarmed at their appearance, but showed no hostility. The country round was found to be extensively cultivated, and growing much grain. Fresh provisions could not be obtained, and fruit and vegetables must be scarce. There are salmon and oysters in the Bay, and the thermometer was so low as 18, the shore being lined with ice. It would, however, be possible for the news to come from the Gulf of Pecheleo in ten days.

A correspondent has favoured us with the following intelligence, dated April 16, 7 P.M.:—"The P. & O. Company's steamer *Pera* with the mails of the 4th April, from Southampton, arrived at Alexandria on the 16th April, at 4 P.M. She had on board for transit to China, *via* Egypt, Lieutenant Morrah and one sergeant musketry instructor, of the 2nd battalion 60th Rifles, Staff-Surgeon Rennie, M.D., Dispenser Rowell, three sergeants and fifty privates of the Army Hospital

Corps. The troops were landed the same evening, under the superintendence of Brevet-Major Clerk, Deputy-Assistant-Quartermaster-General at Alexandria, and transmitted forthwith by railroad to Cairo, from whence they will be sent by rail to Suez, and in the event of the P. and O. steamer *Candia* (which is to take them to Hong Kong along with the mails and passengers) not having arrived, the officers and men will be embarked on board the Company's store-ship *Precursor* at Suez until such time as the *Candia* is ready for their reception. The Armstrong battery which has been detained so long in Egypt was only fairly started off for China about fourteen days ago, the officers and gunners having been quartered on board the *Precursor*, at Suez, since their removal from the *Alexandria* some seven weeks ago, where they were also detained some time. The battery was ultimately sent on to Hong Kong in the *L'Emperatrice*, a steamer belonging to Messrs. Newall and Co. of Newcastle, and which had been employed in the Red Sea laying down the electric cable. 7 P.M.—The *Candia* is just announced at Suez."

JAPAN.

YEDO.

But little improvement can be found in the state of our relations with this country. It appears, as in China, to arise from the policy of the Government; the people are anxious to trade with us, and are friendly. The prices of necessaries, such as silk, tea, oil, &c., have risen on the autocrats, and they don't like the foreign element affecting their pockets. The members of the legation do not move far from their residences, and the following is stated to be true:—"One of the ministers having during the heat of discussion grasped the hilt of his sword and exclaimed, 'Let us rid ourselves of these treaties or fight for freedom,' is not an idle story. Muskets and rifles are now equally well made in Japan as in Europe, and the Daimios' retainers are daily taught their use. Much will depend on the coming campaign in China. If the demands of the allied Governments are granted without further recourse to hostilities the difficulties of the ministers at Yedo will be fearfully increased, and it will require all the diplomacy they are masters of to prevent matters drifting into war. Happily the bad feeling decreases as we leave the capital. At Kanagawa fire-arms are forbidden to be discharged by an old law which prohibits shooting within a certain distance of the Tycoon's residence; but money is exchanged in larger proportion than at any other port; and the most serious feuds are amongst the European community itself."

On the 23rd February two Dutch captains, Captain De Vos of the brig *Christien Louis*, and Captain Dekker of the schooner *Henrietta Louise*, were murdered in Yokohama. They were walking through the streets, and, it is said, had given no offence, being respectable quiet men, when they were attacked by some Japanese with swords. Captain De Vos was killed almost immediately, and Captain Dekker was pursued a short way before he was despatched. No cause is assigned for this act, but it is probable that the unfortunate men in some way insulted the perpetrators.

The burial of Mr. Alcock's servant was conducted according to Japanese rights; three of the Tycoon's ministers followed the body to the grave.

NAGASAKI.

The site of the European settlement is progressing; about four dollars a day are exchanged, and there is a dull inactive government which does little but refer paltry matters to Yedo.

Copper, iron, tin, and coal abound in the island of Yezo, and ores possess from 75 to 85 per cent. of pure metal.

There is a Russian settlement at Kamida. There are always two Russian men-of-war in the bay. There are extensive and elaborately built consular mansions. There is a staff of officers and one engineer.

The mission to the coal mines seems to have failed; many interesting experiments have been made, however, on Hirado coal. We are glad to learn that, mixed with an equal portion of Welch coal, it may be advantageously used by all steamers.

CHINA.

PEKIN.

The last batch of *Pekin Gazette* contains several interesting items, from which we make the following extracts:—

On the 15th January Sangkolinsin came to Peking (from Tien-tsin) to pay his respects. Kweiliang also was at court,

having recovered from his indisposition. A day or two after he returns thanks for his appointment to the superintendence or speakership of the classical feasts. Shingy'an has also recovered, and is at court. All three reappear on the last day of the year.

The rebels in Ngan Hwui have been unusually active. They have taken the city of Kwang-teh Chau, which subprefecture the map will show is conterminous with Hu-chau Fu in this province. The commissariat of the Imperialist forces had its head-quarters in Kwang-teh; this is of course broken up, and people are fast flying to the country from Hu-chau, where the rebels are expected shortly. Tsing-kiang-pu, on the canal a short way south of its point of intersection by the Yellow River's old channel, has also been taken by a body of Nien Fei moving southward, it is supposed intending to effect a junction with the T'ai-p'ing insurgents by following the line of the canal. In Sz' Ch'uen, it is rumoured, several *fu* cities have been taken, whether by the Miau Tsz' aborigines, or by stray Taipings, or both, is not stated. The rebels continue very active, also, in Kwei Chau, the governor of which province, Tsiang Wei-yuen, already degraded, though kept at his post, describes himself as utterly exhausted by climate and fatigue. He has been eight years in Kwei Chau, which disagreed with him from the first. He was getting somewhat better in 1854, when the rebel Yang appeared. This involved a winter campaign, and Yang's insurrection was followed up by the Miau Tsz' aborigines and the Kiau-fei sectarians (probably of the T'ai-p'ing party). In addition to the anxiety of mind occasioned by these events, he has been suffering from liver complaint and blindness, and, although well supported by his staff, is no longer equal to the government of his province, "in every part of which there is war, with the responsibilities of commissariat, provision of money to pay troops, and the levy of troops themselves." So he asks for two months' leave.

In Yun Nan, the Mahomedans recently in revolt seem to have quieted down, and the Governor-General Chang Lian-ki, and the Governor, Su Chi-ming, implore the Emperor not to remove Wang Chi-hu, an intendant who has been twenty years in the country, but who has been summoned on promotion to Peking. The copper and lead supply contributed by Yun Nan towards the coinage of the empire is 32,000 piculs in arrear, and merchants have been invited to advance money to enable Government to purchase the necessary material. Wang is well acquainted with the mining districts recently disturbed by the feud between the Chinese and the Mahomedans, which latter people have also confidence in Wang. Indeed he, Wang, is at present engaged in "soothing" the Mahomedans. Notwithstanding all these arguments for his retention, the Emperor insists on his appearance at Peking at once.

On the 18th January is published a decree, wherein the Emperor declares that he is filled with anxiety because "the ground has not been saturated with the fecundating influence of the snow this winter." An officer of the household is accordingly to carry ten rods of Tibetan incense (joss-stick) to the Governor of Shan Tung, who will instruct the Commissioner of Finance to proceed with these to the top of the T'ai Shan, in Shan Tung, there to put up an earnest prayer on behalf of his Majesty to entreat the spirits, that seasonable weather may be thereby invited.

Canton is gradually clearing off its arrears to the privy purse. In autumn last the late Hoppo, Hangki, remitted some 66,000 taels, namely, 55,000 plus a meltage fee of 825, being on account of the year 1854; a new meltage fee of 13,875 taels to be carried to the account of furs sold for the household in 1857; and 200 to the rice transport account of another department in the same office. There is now ready for transmission on account of the year 1855, another quota of 67,600 taels.

SHANGHAI.

The London mail of Jan. 10 arrived on March 2. There is no news of a political or general character. The future movements of the English and French remain a matter of conjecture. Preliminary steps are being taken, in reconnaissances and surveys of the coast and islands upon which it may be desirable to operate when the necessity arises. Means of land transport are also being provided by the purchase of horses, principally in Japan.

We extract the following from the *North China Herald*:—"The Manchus conquered China speedily, and have ruled it long, and the secret of their success consists in the crafty use of Chinese agents. They made use of Chinese to conquer

China, and they have made use of Chinese to govern China. In both respects their policy resembles that of the English in India, but it differs in an essential feature. The English brought with them into India a higher type of civilisation; and railroads, telegraphs, steamboats, colleges, and sundry benevolent institutions, together with important reforms in civil law and social customs, testify to their influence in elevating the conquered races. The Manchus entered China savages, and adopted the civilisation of their subjects. Having no superiority themselves except in energy of character, their object could not be to elevate and improve the subjugated nation. The sole end of their policy has been the preservation of their power, and its twofold influence on themselves and the Chinese is ably indicated by Abbe Huc in his interesting work on the Chinese Empire. 'It is,' says that acute observer writing in 1849, 'because the magistracy is no longer confided to persons who are friends of justice, that this empire, once so flourishing and so well governed, is sinking rapidly to decay, and advancing towards certain, perhaps speedy, destruction.' Many Mandarins have declared to us that the real Chinese never repulsed foreigners, and that all the severe measures taken against them date only from the commencement of the present dynasty. For fear that foreigners would snatch their prey from them, they have carefully closed the ports of China against them, thinking thus to secure themselves from ambitious attempts from without; and in the interior of the empire they have sought to keep their enemies divided by their system of rapid and constant change of officers."

THE PORT OF TIEN-TSIN.

In 1858 this important seaport was in the hands of the allies, and a strong squadron of gunboats lay for more than a month at the terminus of the grand canal. Why was it relinquished, and not included among the open ports? Simply because, commercially, it was likely to prove of small value on account of its situation within a shallow bar, and towards the head of a narrow, tortuous river. But is a diplomatist to view things solely according to a commercial estimate? In this case the error of doing so is already obvious. The commercial capabilities of Tien-tsin are of course untried; but they are no doubt greater, from proximity to the capital, than those of either of the other northern ports named in the treaty. But, independently of this probable advantage, it would have been wise for the allies to retain it, not in possession, but as an open port, on account of its military importance. It commands Peking, and would constitute the best possible guarantee for the fulfilment of treaty stipulations. Had Lord Elgin and Baron Gros perceived this in 1858, they would have spared the tragedy of 1859. But they retired immediately on the signature of their treaties, without leaving a single gunboat to secure their ratification. Free scope was thus given for the emperor to fortify the approaches to his capital, and prepare for repudiating those disagreeable compacts. The lamentable defeat at Taku last year was one of the fruits of that ill-judged moderation, and another bloody and expensive campaign in the North is its promised harvest for the present year. When Tien-tsin shall again be in the hands of the allies, let them mend the errors of the past, make it an open port, and leave no possibility for the mouth of the Peiho again to become a battle-ground.

A correspondent of the *China Mail* writes:—"The French officers, or their agents, are collecting Chinese horses here for their troopers, to the great amazement of the Chinese. These, it is believed, are to be brought into action, if need be, on the plains of the Peiho. It is quite a new figure in the opening drama, farce, or, more likely, tragedy. But the chief matter of anxiety, among the more considerate residents, is an apprehension that ere long the coolie trade will be again opened at the ports of Ningpo and Shanghai; if it be so, the masses of the people, million upon million, multiplied many tens of times, will be driven to desperation. Multitudes of Chinese, high and low, will rather die on their own soil, than go slaves, or coolies, to labour on a foreign soil and in a distant climate. The English and American consuls are aware, at least to some extent, of this state of public sentiment among the Chinese; yet, even backed by H.M.'s Plenipotentiary, they may be unable to prevent the determined purposes of the French Government."

FOO-CHOW-FOO.

For a few weeks we have had rumours, indistinct and uncertain of being turned out of Foo-chow-foo, having houses burnt over our heads, and our throats cut, &c.; but there is

little fear of either. Six weeks ago was the date given for a concerted movement amongst the Chinese; but not a finger, not a foot, has been moved to bring about the plot.

AMOY.

Advices from this place report that kidnapping of coolies for the Havana is being carried on to a shocking extent. The Spanish brig *Seraphine* has left with a cargo. The *Neptune* was waiting outside, and the American ship *Ann* was on the berth for the same port. The Chinese authorities have tortured and crucified several of the brokers. They seized a small schooner, under Portuguese colours, that was engaged in the trade, and burnt her.

SWATOW.

Rumours are current that a disturbance would soon arise between the officials of the new Customs' service and those of the old. The Swatow Chinese were expected to side with the old service. The gunboat *Opossum* left Swatow for Amoy on the last day of February, having been relieved by the *Kestrel*. Messrs. Haffenden, Major, and Co. have established their hotel on Double Island, for the convenience of captains and other persons visiting the place.

HONG KONG.

The mail of 26th Jan. arrived on 11th March, being forty-five days from London. Sir Hope Grant, the Commander-in-Chief of the British forces, arrived on the 13th, in Messrs. Jardine, Matheson, and Co.'s steamer *Fiery Cross*, from Calcutta. No other movements have taken place in connection with the coming expedition.

The *China Mail* has the following, which we trust, however, may not be verified:—"Mr. Tarrant is to be released in a few days, but the heavy costs of his trial will probably confine him in the debtors' gaol for some time longer. The gaol authorities condemned him lately to solitary imprisonment for a short time on bread and water, because the end of a cigar was discovered in his cell. Such a fact scarcely requires comment, and shows that, whatever may have been the faults of some of the papers in Hong Kong, no small share of the obloquy should fall upon the officials who thus demonstrate their incapacity for comprehending the age in which we live, and so wantonly embitter the state of matters."

The case of Captain Sanders and the Customs authorities has not yet been tried.

Mr. Alexander, who has been for twelve years in the Supreme Court, is appointed acting chief magistrate in the place of Mr. Mitchell, who proceeds to England on sick leave.

Lieutenant Harris, of the *Cambrian*, has assumed charge of the harbour master's office, which has been rendered vacant by the death of Mr. Newman. Mr. Inglis, the able harbour master, is now at home on sick leave. The office has usually been conferred on naval men, though Mr. Inglis was an exception to the rule. What influence can be at work against Mr. Gunthorpe, so many years chief clerk?

His Excellency the Governor has reduced the police rate for this year to 7½ per cent. for houses in the city; the lighting rate remains at 1½.

The officers of the garrison gave their fifth representation on Wednesday night. "I've written to Brown," was the first piece, and was a capital one; the female characters were well sustained, and the "ingenious and inventive *Brown*" capitally done. "A Fast Train," was the next, and was gone through with Captain Twiss's usual tact. "Sarah Gamp's Tea and Turn Out" was the last, and was splendidly done, and excited one's risibilities.

The plans for supplying the town with water have been laid before a committee consisting of Colonel Mann, Mr. Mackenzie, of Messrs. Dent and Co., and Mr. Cleverley, the surveyor-general.

The new road up to the top of Victoria-peak is now all but completed, by the use of that free labour which is so generously provided for her Majesty by the juries of Hong Kong. It is easy of ascent, and at present quite smooth, though after the rains of summer it may present a very different aspect, for in some places it has not been cut in sufficiently deep to give it a safe basis. The land round the Sanatorium has been levelled, and the walls of that building are commencing to rise from the ground. It is not to be a large place; but should the experiment succeed, doubtless it will be enlarged, or other buildings will be erected.

The Crown lands known as Pedder's-hill, Morrison's-hill, and Hospital-hill (north end), with the bungalows on them, were to be sold by public auction on April 16.

On the subject of the murder of two Dutch captains at Japan, noticed elsewhere, the *Daily Press* has the following:—"We have been favoured with the perusal of advices from Kanagawa to the 27th ult., which reached Shanghai per *Azoff*, and were brought thence per *Formosa*. They are of a most unsatisfactory nature, and record the murder of two masters of Dutch vessels whilst on shore. One was Capt de Vos, of the *Christian Louis*, and the other Capt. Decker, of the *Helena Louise*. They were suddenly attacked on the evening of the 26th February, whilst traversing the native portion of Yokohama, by men with a sword in each hand, which is the badge of office or nobility. One was cut down at once; the other ran and was dreadfully mangled ere he fell. One of these unfortunate men had only arrived the previous evening, so that it is out of the question that he could have given any just cause of offence. It is supposed that the assassins were employed by some of the nobles and mistook their men. The murder was witnessed by a Japanese in the employ of a foreigner, from whom the particulars are derived. The only man-of-war in port was a Russian, which had sent a guard on shore and had evinced every sympathy. There were no British men-of-war in the neighbourhood. A Dutch war steamer was at Nagasaki, which had proceeded to the scene of the atrocity. This is viewed as a further indication of the animosity of the Japanese nobles to foreigners, and trouble is anticipated."

The *China Mail* has the following, on the mode adopted in selecting special and common juries:—"It is of importance that some intelligible principle should be followed in making the division, and it is difficult to see what rule has been followed this year. It cannot be that position in business is the ground on which special jurors are selected; for we find that Mr. Costerton, the manager of the Mercantile Bank, is a common juror, while Mr. Reid, the sub-manager, is a special, and so also is the accountant of another bank. Mr. Leslie, a partner in one of the first houses in China, that of Dent and Co., is also a common juror, while Mr. Lemann, Mr. Maclean, and other 'mercantile assistants' in houses of much less note, are specials. If respectability is to settle it, why should Mr. Kup, the respected Consul for the Netherlands (who ought not to be on the list at all), be a common juror, while Mr. Gassett and Mr. Coutts are made specials? Influence has evidently not been closely followed. We presume that those are made special jurors who apply for being so and are judged worthy. If that is the case there will be some reason for applying in future. Editors of newspapers should be taken off the jury list altogether, not merely because that is usual in other places, where they are exempted, like clergymen and doctors, but because they so often are mixed up with cases before they come to trial as to be unfit to sit on the jury. Thus, for instance, the editor of the *Chronicle* has been labouring so hard to prejudge the case of Captain Sanders, that he could not be allowed to sit in a jury on the case."

The following passengers have left, per *Baniam*, for London: Mr. Remedios' two children, Messrs. J. Fitzpatrick, G. A. Roesing, and J. Lapraik. Per *Flying Mist*, to San Francisco: Mrs. Woodruff and child, Mr. P. L. Everett; and, per *Eliza and Ella*, also for San Francisco, Dr. S. W. Williams, and the Rev. Mr. Ashmore. Per *Auriefra*, for San Francisco: Messrs. Morrison, Barriso, and Herera.

CANTON.

The allied troops are all in good health, and on the *qui vive* for the coming engagements at the north. Business at Canton is in anything but a satisfactory state. The country through which the lines of communication with the interior pass, is in a most disturbed state. Rebels commonly, but robbers properly called, infest all the highways of commerce, and render communication dangerous and expensive, if not impossible.

MACAO.

We extract the following from the *Daily Press*:—"We hear that the coolie slave dealers of Macao met the other day in a solemn conclave, and formed themselves into a sort of guild. They elected the celebrated Vargas of Whampoa notoriety as their president, and resolved that he alone should engage coolies. This it was hoped would destroy the competition at present existing amongst the members of the trade, and, tending to depress the price of slaves, of course make the traffic more lucrative. It was resolved, we hear, that not more than twenty dollars should be given for a full-grown adult coolie, and that after a certain number had been barracooned, a defined division of the victims should be made. Our reporter unfortunately was not present, but we understand nothing was said

about the quality of the coolies in making this division. This was a sad oversight, as Mr. Vargas will be sure to select all the best for himself, and elevate his name in Havana as the importer of a superior article.

It is rumoured that Messrs. Lyall, Still, and Co. offered Mr. Vargas most liberal terms to take charge of a depot at Canton, which he refused, owing to his lack of confidence in Messrs. Parkes and Perry.

COCHIN CHINA.

Intimation has been given of the opening of the port of Saigon in Cochin China to trade, under the protection of the French authorities. A harbour due of two dollars per ton is charged on all vessels, which exempts from duty on imports or exports with exception of opium, which is charged at 20 per cent. *ad valorem*. The blockade of the rest of the coast is still rigorously maintained.

JAVA.

Heavy rains accompanied by storms had latterly prevailed, and caused considerable damage.

The scarcity of silver currency was increasing, and the *Handelsblad* states that experienced financiers and merchants agreed with that paper in thinking that this could only be remedied by the following means:—A *mint on Java*, authorised circulation of foreign money, and in the meanwhile a duty of five per cent. on the export of Netherlands India silver money.

The Supreme Court of Netherlands India has concurred in the reasons for which the Court of Justice at Batavia sentenced Mr. H. J. Lion to imprisonment for 18 months, on account of a libel on the Governor-General in the *Batavia Handelsblad*. Mr. Lion was prepared to present himself at the prison at Weltevreden on Sunday, the 4th of March, when sixteen inhabitants of Batavia, heads of mercantile houses, and other private persons, waited upon the Governor-General and requested him to remit the sentence of imprisonment. The execution of the arrest is therefore suspended.

The net amount of import and export duties collected in Java and Madura during 1859 amounted to 7,440,579 francs.

THE EXPEDITION TO BONI, ETC.

The second expedition to Boni is now returning to Java, a battalion and half battalion, besides the artillery, having already reached Samarang and Sourabaya. H.M.'s steamer *Merapie* had gone from Banjermassing to Makassar to bring over the commander-in-chief of the army. As the treaty with the small state of Waju had not been completed, the departure of the commander-in-chief from Boni was uncertain, and would probably not take place until the end of March. The 11th battalion still remains in Celebes, and will probably not return to Java until all the arrangements with the Celebes princes are definitively settled.

The latest news from Banjermassing are contained in telegrams received from Sourabaya, reaching to the 3rd March. On the 19th February the fortification at Amonthai was captured with great loss to the enemy, and trifling loss on the side of the Dutch. In consequence of this, the whole Benua Lima had come under submission. Hidayat, who, by proclamation on the 5th February, had been declared to have forfeited his office of *manku-bumi*, or regent, and was summoned to place himself at the orders of the Government commissioner, had in connection with the expedition against Amonthai entered into correspondence with the commissioner. Some bands from the Upper Dusan attacked Marabahu on the night of the 8th February, but were driven off with great loss. Rajah Muning was attacked by Captain Schiff at Chambi on the 5th February, and was found dead on the field. On this occasion Lieut. Blondeau lost his life. A column of seventy-five men had an encounter with an overwhelming number of the enemy on the 10th February at Taal, without any decisive result. On the 11th February the first meeting with the bands of Surapati in the Upper Dusan took place. The *Suriname* received two shots from the 30-pounder taken by the rebels from the *Onrust*, one in the boiler, causing a loss of one man killed, and seventeen wounded. The *Suriname* being reinforced by the *Montrado* and *Celebes*, the entrenched post of the rebels was attacked on the 22nd February, and being assailed in the rear by the land forces under Captain Ravestein, while the steamers operated in front, it was taken, and the *Onrust's* gun recovered. During the course of the operations the *Montrado* received a shot from this gun, but with little damage to the vessel.

MALACCA STRAITS.

SINGAPORE.

The following vessels from England and France have arrived in connection with the China expedition:—The store-ship Thunder, on the 8th March; H.M.S. Snake, on the 16th, and the La Renommée, on the 7th; and from India H.M.S.'s Prince Arthur, Assaye, Coromandel, Dalhousie, Victoria, and the P. and O. Company's steamers Oriental and Hindostan. Sailing vessels with troops, Earl of Clare, Rajah of Cochin, J. Jeejeebhoy, Adelaide, Athleta, Euxine, York; and the following vessels have left for Hong Kong, on the 11th March, Prince Arthur, Assaye, towing the Earl of Clare. Thunder, 15; Dalhousie, towing the J. Jeejeebhoy, 16; La Renommée, 17; Fury, towing the Athleta, and Rajah of Cochin, 20; Hindostan, towing the York. The French steamer La Place left for Anjer, to tow the frigate La Vengeance; H.M.S. Magicienne, Capt. Commerrell, remains in the Straits as Commodore. The Ringdove is detained for the purpose of towing vessels up to Singapore and China.

The Singapore *Straits Times* has the following remarks on the transfer of the settlement from the Government of India:—"If it be correct—which there is no reason to doubt—that the Home Government have determined to separate the Straits Settlements entirely from the Government of India, now is the time for the European inhabitants of Singapore to offer such suggestions as may probably be received as fitting by the Secretary of State for India, in the formation of the plan of the Straits Government. Singapore, Penang, and Malacca cannot be looked upon in the light of an ordinary colony, and therefore nothing analogous to the constitution of new colonies ought to be followed in that provided for us. There ought to be no Crown nominees to the Legislative Council. The European inhabitants of the settlement are all of the more educated class, and as a body can exercise the elective franchise with as much intelligence as any British community. The Secretary of State for India may very safely take this fact into consideration, and leave at any rate thus far the power of self-control to our citizens themselves. It would altogether defeat the beneficial objects of the new state of things, to have persons appointed to make laws in whom the people had no dependence, either for their zeal or intelligence. There are many other points in drawing up a 'draft plan' of government for the Straits settlements which it might be necessary to bring under the observation of the Secretary of State for India, but inasmuch as, perhaps, it might be premature to bring them forward, we refrain at present from making any observation with respect to them."

PENANG.

The drought continues, and the soil is now drier than it has hitherto been this season. Nutmegs are suffering much, and weakly and diseased plants and trees perishing branch by branch, or at once. Coffee in the open air begins to be thrown back and lose its rich green colour, but, unless where the ground is thin and stony, it does not droop like the nutmeg. Young natives of the soil, such as rambutans and rambais, appear to be unconscious of the heat, as they throw out shoots and retain their natural verdure. The young durian is the most sensitive to drought among the indigenous fruit trees. It soon receives a check and begins to show a paler green. Betlenut stands the drought well till it becomes very severe, and then in peculiarly arid tracts trees are apt to die off suddenly.

His Honour the Governor has, during his short stay at this station, won golden opinions from all sorts of men, by the trouble he has taken in travelling over different parts of the island and province Wellesley, and personally inspecting the various public institutions, the Government and municipal works and public roads, by the improvements he has ordered or projected, and by his attention to representations made to him, whether official or non-official. It is to be hoped that he will be able to prolong his stay here for a little, that he may be able to carry out these reforms.

The captain and officers of her Majesty's steam frigate *Magicienne* gave a ball on board to the community of Penang.

COMMERCIAL REPORT.

Business at all ports in China continues without interruption, although on a restricted scale, in consequence of the attention of the people being drawn off to the military movements.

The rebels are said to have threatened the silk districts, which was rather disturbed the markets for that commodity.

At Japan business remains in a suspensory state.

The following announcements have been made:—Mr. J. J. Dow has, through his attorney, opened a house at Shanghai, under the firm of Dow and Company. Messrs. George and Henry Davis have opened a firm at Canton, under the style of Davis Brothers and Company. The firm of Alvord and Co. has been dissolved.

EXPORTS.

TEA.—Notwithstanding the heavy exports, the utmost desire is manifested by foreigners to invest in the article, although the paucity of stock and the advancing rates in London, not only cause the teamen to be difficult to be dealt with, but the assortment to select from very restricted in quantity and indifferent in quality. The posture of political events since the departure of last mail tends to strengthen the general feeling in favour of investing in tea. The overwhelming Anglo-French force on the one hand, the haughty repellence and utter impotence of the Emperor of China on the other, make a conflict certain, and an overthrow of the Government imminent. The state of anarchy into which the country has of late years fallen, will necessarily be greatly aggravated in any event, and the communication with the tea districts interrupted by marauders to a greater extent than ever. In fact, these prognostications have been partially verified, as will be observed in the general remarks to this report. In addition to these circumstances, there has been for some time a very prevalent though ill-defined idea, that the Chinese Government would stop the export of tea. This has operated to deter capitalists and tea dealers from sending funds into the tea districts, and the late increased prevalence of marauders will certainly cause them to congratulate themselves on their prudence. It being certain that both the culture and manipulation of the leaf for the foreign demand in the producing districts, must be greatly curtailed by the usual pecuniary facilities being thus withheld, it follows that as the period for making these monetary arrangements has long since passed, the effect of the want of confidence on the part of the capitalists has actually been realised, and that even if prospects should brighten instead of becoming more gloomy as they have done, the coming season's yield of tea must necessarily be small. These are the considerations which induce shippers of tea to pay less regard to the heavy export than would be evinced on ordinary occasions. The stocks at all the ports, it will be observed, are flickering in the socket, firmness of the teamen and the small supplies from the country, being a sufficient guarantee that this season's yield is all but exhausted. The total export to Great Britain, therefore, may probably still fall short of the consumption. Shanghai.—Black.—There has been a spirited demand throughout the fortnight, and prices have advanced from one to two taels on those last quoted, being equal to four taels for the month. The settlements since last mail are reported at 16,000 chests Congou, namely, 8,500 chests Ningchow at 26 to 33 taels, 2,000 chests Lcsan and Hokows at 22½ to 25 taels, and 5,500 chests Shanghai packed at 15 to 20 taels. The only other description of black tea on the market is Flowery Pekoe, in which no business has been done. The unsold stock upon the market is reduced to 10,000 chests Congou (6,000 Ningchow and Oopack, and 4,000 chests Shanghai packed) and 2,000 chests Flowery Pekoe. A few thousand chests more may be expected, which will complete the season's supply. Green Teas.—Settlements continue to be freely made at previous quotations. At Foo-chow prices have again advanced in consequence of the small stocks. At Canton the teamen continue firm holders, and the settlements reported exhibit an advance. The following are the transactions reported for the fortnight. Congous, 12 chops Oonams and Oopacks, at 24 to 33½ taels, and 5,000 half chests Canton made at 20 to 23 taels.

RAW SILK.—Shanghai: The season is drawing rapidly to a close. The supplies from the country have been trifling, and the small stock that remains unsold contains little of the kinds usually exported to Europe. The shipments to date, although they include 3,500 bales Japan, are still 12,000 bales short of last season's export at corresponding period. The settlements of the fortnight are reported at 2,500 bales, leaving in stock 3,000 to 4,000 bales. The silkmens have latterly evinced more disposition to realise, and prices may perhaps be quoted 5 taels lower. The following are the current quotations:—Tsatlee, No. 1, none; No. 2, taels, 430 to 400 per pl.; No. 3, taels, 405 to 420 per pl.

SINGAPORE.—The import market has been quiet during the past fortnight, but the recent arrival of the *Borneo* and *Leich-*

hardt with supplies will no doubt cause considerable animation. In the absence of supplies of exports required for Europe the amount of operations has been small; there is an active demand, however, for the principle articles, and rates continue high.

EXPORTS FROM SINGAPORE.

Per Nathalie, to Belle Isle for orders: white pepper, 162 bags, 145 piculs; black pepper, 280 bags, 292 piculs; coffee, 3,912 bags, 4,026 piculs; cutch, 845 lbs., 967 piculs; cassia, 100 cases, 59 piculs; pearl sago, 105 cases, 112 piculs; gambier, 61 baskets, 71 piculs; tin, 1,867 slabs, 674 piculs; buffalo hides, 7 790 slabs, 168 piculs; sapanwood, 1,303 pieces, 100 piculs; tortoiseshell, 20 cases, 10 piculs; rattan, 671 bundles, 26 piculs; malacca canes, 65 bundles, 8,800 piculs.

Per Oceanica, to Liverpool.—Gambier, 1,490 bales, 3,143 piculs; black pepper, 1,028 bags, 700 piculs; white pepper, 274 bags, 301 piculs; sago flour, 500 bags, 497 piculs; buffalo hides, 909, 179 piculs; rattans, 2,600 bundles, 79 piculs; gutta, 30 baskets, 50 piculs; tin, 395 slabs, 282 piculs; sapanwood, 5,465 pieces, 290 piculs.

Per Edmond Wulfram, to Bordeaux.—Gambier, 573 bales, 1,503 piculs; black pepper, 1,928 bags, 1,321 piculs; white pepper, 50 bags, 52 piculs; coffee, 1,792 bags, 1,972 piculs; buffalo hides, 13,400 piculs; rattans, 1,300 bundles, 47 piculs; tin, 938 slabs, 672 piculs; India rubber, 17 baskets, 43 piculs; cassia, 10 cases, 50 piculs; 72,500 canes.

Per Crisis, to Liverpool.—Gambier, 1,886 bales, 2,534 piculs; white pepper, 597 bags, 541 piculs; black pepper, 236 bags, 169 piculs; sugar, 563 bags, 553 piculs; sago flour, 4,190 bags, 4,261 piculs; pearl sago, 400 boxes, 443 piculs; sapanwood, 4,968 pieces, 239 piculs.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	6 months sight.	Bank.	Private.
At Shanghai (per tael)	6 months sight.	6s 4½d.	6s 5d. to 6s 5½d.
At Canton	3 ditto	..	..
At Foo-chow-Foo (per dol.)	6 ditto	..	..
At Hong Kong	6 ditto	4 9	4 9½
At Macao	6 ditto	..	..
At Singapore	3 ditto	4 5½	4 10
At Manila	3 ditto	4 3	4 3½
At Batavia	3 ditto	..	..
(Guineas.)	6 ditto	..	..

In consequence of the requirements of Government it was expected that exchange would rise, but as considerable remittances have been made from here, the market will not be much influenced.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN. SEASON 1859-60.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong	Total lbs.	SILK. Total Bales.
From July 1 to Feb. 29, 1860	25,869,300	13,295,466	21,044,480	60,209,246	49,588
Comparative period last season	11,767,864	11,478,800	21,575,761	44,822,425	57,329

Sailed since.—From Foo-chow-Foo: March 3, Yaratilda, 909,100 lbs.; From Canton: 4, Norman Morrison, 492,400 lbs.; Dominion, 557,100 lbs.; 6, Osprey, 506,000 lbs.; 9, Banian, 713,500 lbs.; 15, per mail steamer, 2,026 bales silk.

TO UNITED STATES.

	From July 1 to Feb. 29, 1860	From July 1 to Feb. 29, 1859	From July 1 to Feb. 29, 1858
Comparative period last season	28,985,113	1,558	24,537,138
	1,558	1,319	1,319

TO THE CONTINENT.

	From July 1 to Feb. 29, 1860	From July 1 to Feb. 29, 1859	From July 1 to Feb. 29, 1858
Comparative period last season	2,391,331	...	801,311

Sailed since.—From Hong Kong: March 15, per mail steamer, 120 bales silk; and 20 bales for Malta.

TO SAN FRANCISCO. Packages.

	From July 1 to Feb. 29, 1860	From July 1 to Feb. 29, 1859	From July 1 to Feb. 29, 1858
Comparative period last season	21,018	...	17,374

Sailed since.—From Hong Kong: March 3, Flying Mist, 2,505 pkgs.; 7, Eliza & Ellen, 402; 8, Amifua, 823.

TO AUSTRALIA.

	From July 1 to Jan. 31, 1860	From July 1 to Jan. 31, 1859	From July 1 to Jan. 31, 1858
Comparative period last season	9,793,881	...	6,832,896

Sailed since.—From Foo-chow-Foo: March 5, Eagle, 270,000 lbs. From Hong Kong, 4, Juverna, 150,000 lbs.

TO GREAT BRITAIN.

	From 1843 to 1844	From 1845 to 1846	From 1847 to 1848	From 1849 to 1850	From 1851 to 1852	From 1853 to 1854	From 1855 to 1856	From 1857 to 1858	From 1859 to 1860

SHIPPING INTELLIGENCE.

ARRIVED.

At Hong Kong, MACAO, and CANTON.—From Liverpool: Feb. 29, Queensberry. From New York: 29, Howqua; Mar. 2, Sportsman.

At SINGAPORE.—From England: March 16, H.M. St. Snake. From Liverpool: 14, Cosmopolite; 18, Leichardt. From Deal: 8, St. Thundia. From Glasgow: 18, Borneo. From Hamburg: 18, Philip I.

At PENANG.—From Sunderland: Feb. 27, Ernst.

SAILED.

From SHANGHAI.—For London: Feb. 22, Naori, Vanguard; 23, Cornubia; 29, Westburn, Biobio. For New York: 24, Edwin Forrest; 28, Golden Rule.

From HONG KONG, MACAO, and CANTON.—For London: March 4, Norman Morrison; 5, Saxonville; 9, Banian. For Falmouth: 13, Cid.

From MANILA.—For London: March 8, Eweretta. For Falmouth: Feb. 20, Torre de Oro; 26, Carmen. For Cork: March 2, Sappho. For New York: 5, Sweepstakes.

From SINGAPORE.—For Liverpool: March 19, Calcedonia; 21, Crisis; 7, Athelstan.

From PENANG.—For London: March 9, Agnes.

LOADING.

At SHANGHAI.—For London: Countess of Seafeld, Kamehameha, IV., Sir W. F. Williams. For New York: Beaver.

At Foo-chow-Foo.—For London: Antigone. For Melbourne: Collingwood.

At AMOY.—For Havana: Neptune.

At Hong Kong, MACAO, and CANTON.—For London: Corea, Sir R. Abercrombie. For Portsmouth: Runnymede, Marchioness of Londonderry. For Hamburg: Felix. For New York: Intrepid. For Havana: J. Wakefield, Live Yankee, Maria Elizabeth, Sigisbert, Casard, Albers, Alexander Delphine, Governor Morton, Guadeloupe, Pioneer, Santa Lucia. For Sydney and Melbourne: Minnehaha. For San Francisco: Alfred Hill, Bellona, Black Warrior, Intrepid, Lotus, Renown, Robert Passenger, Viking.

At MANILA.—For Liverpool: City of Boston. For Havana: Carmencita. For Sydney: Margarita. For Melbourne: Olympia.

At SINGAPORE.—For London: Caroline, Agnes, Hiawatha. For Liverpool: Calcedonia, Crisis, Endymion, Glengarriff, Oceanica. For Boston: Andes, Rocket. For New York: Raven.

PASSED STRAITS OF SUNDA.

From Portsmouth to China: Feb. 6, H.B.M. str. Reynard. From China to England and Continent: Feb. 21, Melanethon; 25, Abeona. To New York: 21, Flying Childers; March 2, S. H. Snow. To Sydney: Feb. 19, Agnes; 24, Algernon; 25, Alfred the Great; Mar. 1, Asa Parker; 4, S. P. Sage. From Singapore to England and Continent: Feb. 26, Carrobert. To Boston: 22, R. B. Forbes; 25, Cyclone. To Sydney: March 3, Alma. From Manila to Boston: Feb. 26, Winged Arrow. To New York: 28, Superior. To Sydney: 22, Talbot. From Melbourne to Batavia: 21, Rosette.

JAPAN.—Medina from Kanagawa, sailed finally Feb. 22nd. Left on the 16th, and on the 17th encountered a severe gale of wind at south, which drove her back to the entrance of Yedo bay, and forced them to run back to an anchorage, or be driven on shore. Lost jibboom in wearing off the shore. Remained at Kanagawa to refit, and sailed finally on the 22nd. The Excelsior in the same gale had the greatest difficulty in keeping off shore, and was only saved (as in the case of the Medina) by the weather clearing at the last moment.

HONG KONG.—The American ship Esther May is on the South Bank, and will most likely become a total wreck, as she is reported to be a mile and a half further up than the Vancouver, which was lost there about nine months ago. Later advices state that the Esther May was afloat, the cargo having been taken out by a steamer.

SINGAPORE.—H. M's. I. N. steamer Hooghly was lying at anchor in Penang, and would be obliged to remain there for a considerable period, to make good the injury done to her machinery, and we believe she will not return hence until the end of the month.

FREIGHTS AND CHARTERS.

At SHANGHAI.—The rates to London are the same as last quoted. To United States, 8 dols. There is still a decrease of tonnage in port, and rates to all ports except London are improved.

At HONG KONG, MACAO, and CANTON.—In the rates to London and the United States, there is no alteration since our last. For Sydney, freights are 20 dols. nett for passengers. In consequence of the tenders invited by Government, tonnage has become somewhat scarce. Settlements have been made by them at 21s. and 22s. per register ton. The Runnymede has been chartered to England with invalids, at £21 5s., and the Renown has been taken up for San Francisco at 12 dols. 50c.

At MANILA.—To London, £2 17s. 6d. for hemp and dry sugar. To New York, 7 dols. for 4 bales hemp. The business during the past fortnight has greatly improved, the Joaquina Victoria being chartered for London at the above rate, and the Belle of the West for Boston, at 7 dols. per 40 bales hemp, and 8 dols. for 20 cwt. Virginia.

At SINGAPORE.—There has been a brisk demand for shipping, nearly all the vessels in harbour having been taken up. The Hiawatha is reported for London at £2 10s. for dead and £3 for light weight. The C. Dow will take the berth on her arrival from Siam for New York at 8 to 9 dols. per ton, great part of her cargo being already engaged.

Continental Intelligence.

FRANCE.

PARIS, April 24th, 1860.

It is a very remarkable fact that while the Emperor and his Government are constantly proclaiming to the world that they have no desire to increase the French territory, there are very few of the Emperor's little transactions that do not somehow end in his getting (no doubt very much against his will, and in spite of his most strenuous efforts) a bit more of somebody else's "slopes," as he playfully terms the sides of the Alps. The last instance of that kind, and by which his magnanimous feelings must be deeply lacerated, is recorded in a despatch from Cochinchina announcing that Saigon would likely be the French capital of a large colony. The Cochinchina expedition was commenced with a very clearly expressed determination of the French Government not to make any territorial acquisition in that country.

The Suez Canal scheme has not yet been exploded, but the severe puffing system lately adopted leads to a suspicion that the views long ago expressed by the most eminent English engineers are not far out, and that the undertaking must end in the ruin of all those who have embarked their whole fortunes in it. The following reminds one very forcibly of the Earl of Aldborough's renowned testimonial to the pills and ointment of a well-known "professor." It is a translation of a letter said to have been sent to M. de Lesseps by the Emperor of Abyssinia, on the 14th of the month Jahsas, 1852, after the birth of our Saviour, according to Ethiopian computation—that is, 10th December, 1859:—"I, Niguse, King of Ethiopia, reigning by the will of Jesus Christ, from Miziva to Gondar, that is, over Tigro and Simen, Wagara, Walgayt, Tagade, Dambya, Balasa, Kinfar, Sahla, Agaw, Lasta, and Salawa; I salute Ferdinand de Lesseps, who belongs to the tribe of the enlightened, and who is performing a wonderful work for our age. From the commencement to the present time my mind has been attentive to the work you have in hand, and which will be a great joy for all the world; and now that it is a settled thing, in the name of my country which I love, and in my own name, I offer you my thanks. In piercing the land of Suez, you are making a mutual union between our country and Europe. And so your name will not perish with you. Your work will make our country the granary of the West. And because it is so believe that I and my country love you. I desire to assist your work by cattle or other means. I pray the Saviour to assist you." The letter is said to have been translated from the Ethiopian by M. Abbadie.

Some excitement has been caused by the appearance within the last few [days of another political pamphlet, entitled *La Coalition*. Whoever the anonymous writer may be, there is little doubt he is inspired from the same source as the anonymous authors of *Le Pape et le Congrès* and *Napoleon III. et l'Italie*. The object of the work is to show that a coalition against France is henceforth impossible, but blind indeed must be the European powers if the arguments employed do not open their eyes, and reunite the *disjecta membra* of the coalition against French aggression. The writer begins by laying down that England, which formed the last coalition, is accused of trying to get up another; but within the last few days it has been discovered that the course taken in the pamphlet was on the wrong tack, so the official organs have been within the last day or two trying to back out of the paternity. Lord John Russell's last speech, however, upon French politics, a fortnight since, was quite sufficient answer to it. The following paragraph is taken from the pamphlet:—

"England only prevails by her navy. There are in Europe three or four maritime powers which, if they know how to combine, can hold in check every English fleet. Let France ally herself with Russia and Denmark, and the North Sea is shut against the English. They are excluded from the Black Sea. Let her summon to this alliance Spain and Portugal, and there is no longer an ocean or Mediterranean for the English. Their Malta and their Gibraltar will soon be but the dream of baffled ambition, the ruined memory of a proud domination."

Once more there is a talk of a conference about the annexation question. A circular of M. Thouvenel intimates that after the French Government has taken possession of Savoy, Nice, Chablais, and Faucigny, France will graciously consent to a meeting of the great powers, provided they do not inquire into the little transaction between the Emperor and the King of Piedmont. The conference, or congress, would be merely allowed to try (*chercher les moyens*) to reconcile the occupation of Savoy and Nice by France with the guarantees stipulated by the

treaties of 1815, in favour of the neutrality of Switzerland! It is so very late in the day and so extremely ludicrous to hear the Emperor talking about the "Treaty of 1815," that it is plain the whole affair will just be a laughable formality and nothing more. What is more probable still is, that it will never come off at all. The following is the result of the voting in the district of Nice:—Total number of votes inscribed on the electoral lists, 29,142. For annexation, 24,148; against, 160.

In the face of such results, of course the Emperor will consent to a conference, or anything else—even to referring the matter to a select committee of the House of Lords, were he Emperor of Great Britain, and everybody knows that would "settle" the question some way. Possession is more than nine points in this case.

The *Moniteur* announces that the legislative body has agreed to the contingent of 100,000 men for the present year, by 238 against 6 votes. It seems that the Emperor has, therefore, what is called a "good working majority" in the French Chamber.

The *Nord* foolishly re asserts that "the hand of England" is at the bottom of the insurrections in Sicily, Switzerland, and Spain—as though England had nothing better to do than get up such washing-tub squabbles as those!

The latest intelligence respecting the neutralised districts of Faucigny and Chablais is, that the great powers are to agree to the following combination:—They are to come to an understanding, in the ordinary diplomatic course, as to the elaboration of a protocol destined to reserve the guarantees claimed in favour of Switzerland, after which the representatives of the powers accredited at the Court of the Tuileries are to receive the authorisation to sign this protocol, according to which France would make ulterior arrangements directly with Switzerland. The conference would, therefore, hold one sitting only, in which the basis of the direct arrangement between France and Switzerland would solely be sanctioned by Europe.

The *Patrie* publishes the following paragraph communicated by Government:—

"The *Constitutionnel*, in a letter from Turin, dated the 11th, publishes the following fact:—'Sir James Hudson, the English ambassador, gives a dinner to-day to General Garibaldi and the most influential among the Neapolitan refugees.' The importance of the step taken by Sir James Hudson, after the position which Garibaldi has just taken up on the Savoy and Nice question, will not escape the notice of any one."

This little paragraph, though it will probably only provoke a hearty laugh in England, is very significant. The paragraph will be read in every café and beer-shop in Paris to-night, as meaning that the English Government is acting in an underhand way against France or Piedmont, and endeavouring to stir up rebellion at Naples. The French Government are able to make a good deal of capital out of the smallest trifle.

The Governments of England and France have, I am told issued almost uniform instructions to Lord Elgin and Baron Gros, the envoys to China.

The following (says the *Século*) is the formula adopted in excommunicating those against whom the papal maledictions are launched:—

"In the name of Almighty God, the Father, the Son, and the Holy Ghost, of the Holy Canons, of the Blessed Virgin Mary, Mother of God, and of all the celestial virtues, of the angels, archangels, thrones, dominions, powers, of cherubim and seraphim, of the holy patriarchs and prophets, of all the apostles and evangelists, of the holy innocents, who alone were found worthy to sing the new canticle in presence of the Eternal, of the holy martyrs and blessed confessors of all holy virgins, and all the saints chosen by God,

"We excommunicate and anathematise this robber and malefactor, and sequester him from the paths of the Holy Church of God, in order that, condemned to everlasting torment, he should be engulfed with Korah, Dathan, and Abiram, and with those who dare to tell the God of might, 'Withdraw thyself from us, for we will not know thy way.' And in the same manner that fire is quenched by water, thus be his soul quenched throughout the eternity of time, unless he amends and comes to repentance."

"Be he accursed by God the Father, creator of mankind! Be he accursed by God the Son, who has suffered for mankind! Be he accursed by the Holy Ghost, which has descended upon him by baptism! May the holy cross upon which Christ triumphantly ascended for our salvation, accurse him! May the Holy Mother of God, Mary, ever virgin, accurse him! May St. Michael, the guardian and protector of sacred souls, accurse him; and may he also be accursed by all the angels, archangels, princes, and powers, and all the heavenly host!

"May the numerous patriarchs and prophets accurse him; may he likewise be accursed by St. John Precursor, who poured the water of baptism over Christ! May he be accursed by St. Peter, St. Paul, St. Andrew, and all the apostles and other disciples of Christ, and by the Four Evangelists, whose word has converted the world!

"Be he accursed by the marvellous troop of martyrs and confessors, who have been acceptable by their good works; be he accursed by the chorus of the sacred virgins, who have despised the goods of this world for the sake of Christ! Be he accursed by all the saints who have been acceptable in the eyes

of God, from the beginning of the world to the end of centuries! May he be accursed by heaven, and earth, and everything holy that dwells therein!

"Be he accursed wherever he may be, whether in his house or in the field, on the high road or the bye-path, in the forest, in the water, or in church!

"Be he accursed in his life and in his death, eating or drinking, eating his hunger or slaking his thirst, fasting, sleeping, watching, standing, working, or riding, *miuendo, caendo, et bolomando!*

"Be he accursed in every part of his body, both inside and outside, in his hair, and in his brain . . . May not one single part of his body be sound, from the apex of his head to the sole of his feet!

"May Christ, son of the living God, curse him with all the might of his Majesty; may heaven rise up against him with all the virtues that dwell therein, and may he be doomed to eternal damnation, unless he amend and repent! Amen. Let this be done, let this be done. Amen!"

Parliamentary Intelligence.

HOUSE OF COMMONS.

STATE OF THE NAVY.—(20.) Sir C. NAPIER again called attention to the unsatisfactory state of the Channel fleet and the naval reserve.—Lord C. PAGER, with regard to the latter, said it increased by about 100 men a week; and, with regard to the former, asserted that the gallant admiral's complaints were entirely unfounded, and deprecated a continuance of such discussions, as being calculated to produce discontent among the men.—Mr. H. D. SEYMOUR urged the propriety of employing a large number of boys in the navy and the establishment of school ships.—Sir J. ELPHINSTONE joined in this recommendation.—Mr. T. G. BARING having said a few words, the House went into committee of supply on Navy Estimates, and passed several additional votes, after considerable discussion.

CHINA.—THE ARMSTRONG GUN BATTERIES.—(24.) Mr. PAPILLON asked the Secretary of State for War what were the respective dates of the embarkation of the two Armstrong batteries of the Royal Artillery for China of their arrival at Alexandria; of their disembarkation there; and of their re-embarkation at Suez; whether there was any truth in the statement that the ammunition was seriously damaged, if not entirely spoiled, owing to the defective arrangements on board the *Himalaya*; and whether any steps had been taken in consequence to ensure a sufficient supply of serviceable powder by the time that the batteries could be required for action.—Mr. S. HERBERT said he thought upon a previous occasion he had stated to the House what was the cause of the failure of the vessels intended to convey the troops to China who had been despatched to Alexandria. Lord Elphinstone had telegraphed a message proposing to send a ship to Suez to meet the *Himalaya*, so as to take the 14th Dragoons; but the reply of the Government unfortunately, from an accidental circumstance, did not reach him until he had despatched the 14th Dragoons. Lord Elphinstone then undertook to send another vessel, the *Auckland*, but he (Mr. S. Herbert) believed that that vessel broke down at Aden, and it returned to Bombay. The Peninsular and Oriental Company were unable at the time to provide other vessels. Those were accidents likely to occur on routes upon which it was necessary to have notice before any intended operations could be undertaken. He would now read the dates for which the hon. gentleman asked. The two batteries of artillery were embarked on board the *Himalaya*, at Southampton, on the 15th of January, and they reached Alexandria on the 29th January. The No. 1 battery disembarked on the 11th and 12th February. The above battery, with three-fourths of her stores, left Suez on the 15th February, in the *Berenice*, which vessel arrived at Ceylon on the 15th March, in perfect security. The remaining stores of this battery were despatched in the *Simla*, on the 20th February. The second battery was disembarked from the *Himalaya* on the 9th and 10th March, and was afterwards placed on board the *Chersonese*, at Suez, to be forwarded to its destination. The *Chersonese* sailed with it on the 15th April. The detention of the second battery, it would be observed, was considerable. With respect to the powder, Captain Milward, who commanded the second battery, said that on opening the timber boxes he found that the damp had penetrated them, and had damaged the powder, but the fuses, which had been stowed in another part of the ship, were uninjured. The total amount of ammunition sent out was 112 rounds per gun. A portion of this might be so damaged as to be useless, but a sufficient provision had been sent out to make up the deficiency, including what had been sent out from Calcutta, independent of the ammunition already in China, which would probably amount altogether to 924 rounds for each gun of those batteries.

JAPAN.—(24.) Mr. B. COCHRANE gave notice of his intention, on the motion for the adjournment of the House on Friday, to ask the noble lord the Secretary for Foreign Affairs what steps had been taken by her Majesty's Government to protect our commercial interests in Japan.

Mr. BUXTON has given notice for an enquiry into stopping the Coolie trade in British ships from China to Cuba.

Spirit of the Press.

THE COMING WAR IN CHINA.

We appear to be threatened with disaster in China from pretty much the same causes which led to our misfortunes in the Crimea,—the ignorance or recklessness of those whose duty it is to select the proper times and seasons necessary for the success of our expeditions. We will just state the admitted facts of the case, and leave our readers to draw their own conclusions. The *Times*' Correspondent, writing from Hong Kong on the 25th February, states that General Montauban had arrived there some days before, and had gone on to Shanghai; another Own Correspondent of the same journal writes from Calcutta on the 8th March, and states that Sir Hope Grant had sailed from thence on the 26th of February. So that the French Commander-in-Chief had reached his post at Shanghai about the same time as that at which the English General left Calcutta, and will therefore have to wait for his coadjutor at least three weeks, or more probably a month. How long both the Generals will have to wait for the Plenipotentiary, Lord Elgin, who, although

his appointment was announced two months ago, has not, that we have heard of, as yet left England, time will show. The whole gist of Lord Elgin's tack on Sir Michael Seymour was, that by delaying the gunboats far beyond the time at which they were ordered to be in the Gulf of Pechelée the Admiral had prevented the expedition from commencing operations early in April; and, in fact, Lord Elgin considered the whole affair *mangy* because they had not been able to take the Taku forts at the mouth of the Peiho until the 3rd of May. And had it not been for a concurrence of fortunate events his lordship would have been perfectly correct in that opinion. But let us see further. The same *Times*' Correspondent, writing from Calcutta on the 8th of March, states "that the stores were only then being shipped for China, and that no man who understood anything of the subject expected that it would be possible to commence operations before July." Now let us consider what Mr. Lawrence Oliphant, whose most able work was compiled under the eye and by the directions of Lord Elgin (to whom he was private secretary), says as to the possibility of carrying on warlike operations in the North of China in July. In writing his diary at Tien Sing, in June and July, 1858, he distinctly says, that for all purposes of aggression or action, the season at which it would be possible for troops to move must be considered as closed with the month of June, if even it were possible that they could resist the heat so long. He tells us that at that time "the thermometer stood at from 90 degs. to 96 degs. in the coolest part of the yamun" (house), which we may calculate would be about 130 degs. in the sun; that all the meetings between Lord Elgin and the Chinese Commissioners which were held during the month of June necessarily took place late in the evening, as it was impossible to move during the day; and that the Treaty, which was signed on the 26th of June, in a large airy temple, dedicated to "the oceanic influences," was necessarily executed after dark by the aid of paper lanterns, "on account of the overpowering heat of the sun." From all this we are led to suppose, and most devoutly to hope, that it forms no part of the plans of our Ministry to operate (this year at least) on Pekin; and when we consider that the winter climate of that great capital is thoroughly Siberian, it will be evident that, with the exception of a very short period in autumn, the season at which we are now writing is the *only one* during which operations in Northern China could be carried on with any hope of success. We will then charitably anticipate that the intention is to wait until the summer heats are over, and then perhaps to seize Chusan (which we never should have abandoned), or to proceed up the Yang-tse-Kiang as far as Nankin, or probably (as that great city has long been in the hands of the rebels) even as far as Han-Kow, which forms, with its adjoining cities Haug-yang and Wochang, the largest emporium of commerce in Central China. But if, contrary to every reasonable expectation, all this valuable time has been lost, the intention still being to act on Pekin, and so expose our troops to all the additional suffering and destruction which a deadly season will necessarily produce—then we deliberately say that no punishment, no amount of public obloquy will be too great for those men who, for the second time, expose England to a catastrophe such as that at which horrified Europe stood aghast in 1855, and which produced unutterable misery in every hamlet and almost in every family in the kingdom.—[The writer of this article appears to overlook the fact that General Montauban must wait the arrival of Baron Gros.—Ed. L. & C. E.]—*Morning Advertiser*.

THE CHINA COOLIE TRADE.

Another leader has appeared in the *Thunderer* on this subject, in which the writer taxes the slave emancipators with negligence in not bringing the matter to the notice of the Government, and thus instigating instructions to Lord Elgin to stop the traffic. After describing the operations of the dealers, with which our readers are familiar, it goes on to say:—"The American captains were bad enough, but the conduct of a certain Von Carlovitz, who represents the potent maritime State of Oldenburg, which may or may not have a seaport, but which has, it seems, a flag to disgrace, is related to us in terms which we dare not repeat without very ample verification. It seems certain, however, that he resisted the proceedings of the mandarins, and that some of the captives, in despair, cast themselves overboard and were drowned, when they believed that they were remitted to the hands of their Oldenburg masters. At length he was driven off by the coolies themselves, who, directly they found they had any one to sympathise with them, threatened to cut the throat of this 'nobleman of the third class' of, we suppose, the nobility of Oldenburg. Enough of these horrors. Slavery and slave-ships are the same in all latitudes, and we all know what must happen wherever the trade is carried on. The only question is, 'What shall we do to stop it?' It cannot be pursued on the coast of China. If America chooses to become a pirate State, and to make the stars and stripes in the Pearl River and in the Yang-tse what the black flag has been on the coast of Africa, she is a first-class Power, who has her responsibilities, and we must be content, perhaps, to make clear to the Chinese the difference between her flag and that of the civilized nations of Europe. But if England and France are united in the determination to keep pure the character of Europe in those seas there can be no difficulty about the matter. The necessity has been pointed out long ago of establishing some authority over the ruffians and pirates who hoist these Oldenburg and Portuguese flags. When the Portuguese pirates were massacred three years since at Ningpo all the world agreed that they were rightly served. Similar terrible occurrences will happen again, and with equal approbation, if these slaves are not brought under the jurisdiction of the consular body of every port. We may depend upon it that we shall neither trade nor treat with the Chinese while we are supposed by them to protect the slave-dealers who are kidnapping their sons."

THE ADVANCE ON PEKIN.

This day Lord Elgin sets forth once again for the scenes of his former labours in the far East. With a more imposing force than that which accompanied him in his first essay, and with a more intimate knowledge of the difficulties that are to be overcome, we may hope that he departs with sanguine anticipations of a more complete and enduring success than that he before achieved. If force should become necessary, the English and French Plenipotentiaries have sufficient fighting men at their backs to escort them through China, or to make nominal conquest of the Empire. The superiority which the new weapon of European warfare must have over the rude arms of an Asiatic rabble may, perhaps, here find its first illustration upon a grand scale and in an open field. On the hundred and twenty miles

of flat fighting ground which intervene between the shores of the Pecheli Gulf and the suburbs of Pekin, and upon the old-fashioned walls which enclose the Imperial City, will be found a most favourable opportunity for demonstrating to the most ancient civilisation in the world how far it has been outstripped in the science of slaughter. It is, we fear, a necessity that this truth should be cut deep into the minds of those who rule at Pekin. We have no difficulty with the people and very little difficulty with the merchants; whenever it shall have been made clear to the Mandarins at Pekin that our arm is long enough to reach them, we shall have no more difficulty with the Government. If it should be necessary for Lord Elgin and Baron Gros to go to Pekin, they will go there only to show that they can go, and, having demonstrated this, they will never have occasion to go there again. As a military operation it ought to be a mere promenade. It is the fashion to do everything now in a cumbrous, costly manner, and to make difficulties about the lightest and most easy operations; but it has been the common achievement of a small body of Europeans, from the time of Xenophon to that of Sir Hugh Rose, to march over great tracts of Asiatic territory, and to scatter before them any given numbers of Asiatic soldiery. So far from there being any difficulty in marching these 120 miles, and dispersing these Tartars with their bows and arrows, and gings and bamboo spears, the matter ought to be as easy as a march to Hounslow. Lord Elgin, therefore, has abundant force to do all that he may wisely determine to do. We hope that he will have the moral courage to use that force so far as it may be necessary to obtain the object of a lasting peace and the enjoyment of this nation's rights; and we are sure that he will, as a merciful man and a Christian gentleman, stay the operation of this great force at the earliest point where true mercy may be shown—that is, when the necessary impression has been made, and peace has been secured. Will the Chinese fight? This is the question which all who take an interest in this expedition are now asking. It is by no means impossible that Lord Elgin may be relieved from the responsibility of testing this probability, and may find hostilities going on upon his arrival. The French are not likely to send eighty pennons round the Cape to execute a public Imperial menace, and to welcome them back again with their mission unaccomplished. It is scarcely to be conceived that the English and French can be so thoroughly restrained, and that the Chinese can be so successfully taught to dissemble their triumph, as that nothing shall be done to wipe out the effect of the disaster at Taku. But, so far as the Chinese Government is concerned, there will certainly be no fighting if words can be made to do the work of blows. That the Chinese will send down commissioners from Pekin who will entirely disavow all that has been done since Lord Elgin was last in the China waters, that the Tartar victory at Taku will be deplored as an untoward event, and that offers will be made to renew the treaty, we do not for a moment doubt. Every promise and every procrastination that can be used to stave off coercion until the force is at last of necessity withdrawn will be used. If Lord Elgin is only instructed to demand an apology for the ambuscade at the Peiho, there will be no difficulty about the matter. For this purpose no high officer and no very expensive expedition was required. The Emperor of China would give a hundred apologies, and at such a cost would order a dozen more ambuscades. But, if Lord Elgin should be prepared to insist that all the stipulations of his treaty shall be carried out under his own eyes, it is by no means certain that this expedition may not be able to report to us practically as to the effect of the Armstrong gun. There has always been a strong old Tory party in Pekin, which have been determined that they never would yield; and since the Taku victory they have advanced to the belief that they never can be made to yield. It is highly probable that, rather than yield anything but words, this party will block up the river and defend Tien-tsin. In that case there will be a sharp short fight at Tien-tsin, and the old Chinese Tory will again disappear for a little interval, while the old Chinese whig—not a very progressive creature—takes up the difficulty. There are the probabilities of the case; and although it is commonly said that in China everything happens in direct contradiction to all antecedent probabilities, yet we feel very much inclined to predict that if Lord Elgin shall insist upon anything more than words, he will have to fight at Tien-tsin. Of course we can have no knowledge of what Lord Elgin's instructions may be, except so far as Lord John Russell has told us in Parliament what policy he proposed to indicate to his ambassador. If Lord Elgin is going out only to bring back an apology and a ratified treaty, we are very sorry that so able a man should be sent upon such a sleeveless errand. But if Lord Elgin is going out to do what he himself must well know is necessary to be done, then he has a great mission before him. It is vain to attempt to disguise plain truths in fine phrases. All we want of China is cheap tea in exchange for cheap calicoes, and, if it should so please them, silks in exchange for opium. But our great desire is cheap tea and a market for calicoes. Now, the Egin treaty gives us in an imperfect manner a road to both these objects. Whenever we can establish our trade at Hankow, up the great China river, we can there buy our teas at fourpence a pound, and can dispense our produce all over the empire. There is no reason why, duty apart, the commoner teas should not be sold in our London shops at ninepence a pound. To try and ship our teas where they grow and to carry up our calicoes to where they can be sold are the only rational objects of a Chinese mission. If it should so happen that Lord Elgin should find himself upon the walls of Pekin—and we shall not think much of the stability of a treaty ratified elsewhere—he will then have something to give up. The resident ambassador at Pekin will then no longer be a point of honour. The entire and immediate freedom of the great watery highway of China, with perhaps Chusan to prote t the privilege, would be worth a hundred ambassadors at Pekin. We wish Lord Elgin goodspeed upon his journey, and we tell him frankly that we have more fear of his failing from dread of those he will leave behind him than from the opposition of those he has before him. He heard Lord Cowley two nights ago called home to endure a ridiculous assault, and he doubtless recollects similar attacks in his own case, and perhaps anticipates others. But such things are the conditions of serving a free nation. A public man in England is not worth his salt if he has not manhood enough to stick by his friends and strike hard at his foes, and if he has no resolution enough to carry out his own convictions of what is right and expedient, in defiance of any clamour that can be got up against him. I Lord Elgin does this matter well, he can afford to be well abused for his success.—*Times*.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

4th Regiment of Dragoon Guards—Ensign Arthur Ashton, from the 7th Foot, to be cornet, vice B. Idges, promoted; April 10.
6th Dragoons—Ensign William Ward Lennitt, from the 2nd Foot, to be cornet, vice Garnett, promoted; Hew Stevenson, Gent., to be cornet, by purchase, vice Hardy, promoted; April 10. Captain R. W. Renshaw, from the 13th Light Dragoons, to be captain, vice Clements, who exchanges.
9th Light Dragoons—Captain H. Marshall, from the 17th Light Dragoons, to be captain, vice Goldie, who exchanges; W. H. Lawrence, Gent., to be cornet, by purchase, vice Bury, promoted.
10th Light Dragoons—A. W. Edgell, Gent., to be cornet, by purchase, vice Maunder, promoted.
13th Light Dragoons—John Arthur Carthew, Gent., to be cornet, by purchase, vice James White, who has retired; April 10. Captain H. T. Clements, from the 6th Dragoons, to be captain, vice Renshaw, who exchanges.
17th Light Dragoons—Captain J. Goldie, from the 9th Light Dragoons, to be captain, vice Marshall, who exchanges; T. E. Houghton, Gent., to be cornet, by purchase, vice Scott, promoted.
18th Light Dragoons—Assistant Surgeon F. Collins, M.D., from the Staff, to be assistant-surgeon, vice Grant, who exchanges.
Royal Regiment of Artillery—Lieut.-General W. Cator, C.B., to be colonel commandant.
2nd Regiment of Life Guards—Lieut. E. S. F. Berkeley to be captain, without purchase, vice Brevet Major the Earl of Longford, deceased.
Military Train—Captain D. A. Baby, from the 23rd Foot, to be captain, vice Hutton, who exchanges.
Coldstream Regiment of Foot Guards—Lieut. and Captain and Brevet Major William Henry, Viscount Dangan, to be captain and lieutenant-colonel, by purchase, vice Cock, who retires; Ensign and Lieut. R. H. Thursby, to be lieutenant and captain, by purchase, vice Viscount Dangan; Sir E. A. Hamilton, Bart., to be ensign and lieutenant, by purchase, vice Thursby.
Royal Artillery—To be Colonels: Brevet Colonels F. M. Eardley-Wilmot, J. W. Fitzmayer, C.B. To be Lieutenant Colonels: Brevet Majors A. R. Wragg, vice Eardley-Wilmot; F. W. Haultain, vice Fitzmayer; F. J. Travers, E. H. Fisher; Brevet Lieutenant Colonels M. C. Dixon, J. Turner, C.B. To be Captains: Brevet Lieutenant Colonel F. C. Maude, C.B., vice Wragg; Brevet Majors R. Curtis, vice Travers; P. Dixon; Second Captains A. W. Twiss, vice Haultain; A. Sievwright, vice Dixon; J. De Luttrell Saunderson, vice Fisher; F. S. Seale, vice Turner; E. J. Bruce; Brevet Majors W. P. Richards, J. E. Hope, A. Brendon, J. De Havilland, W. W. A. Lukin, C. E. Walcott, G. Davis, E. G. Bredin; Second Captain G. A. Wilkinson. To be Second Captains: Lieutenants M. H. Fitzmaurice, vice Maude; W. D. Milman, vice Twiss; H. R. Martin, vice Curtis; W. A. P. Wyllie, vice Sievwright; C. J. Johnson, vice Seale; H. Cardew, vice Saunderson; H. Percival, vice Dickson; H. T. Arbutnot, vice Bruce; R. Biddulph, vice Richards; W. Stirling, vice Hope; P. E. Hill, vice Brendon; C. L'Estrange, vice De Havilland; A. K. Rideout, vice Wilkinson; W. H. Watson, vice Lukin; E. C. Bolton, vice Walcott; O. H. A. Nicholls, vice Davis; J. Barton, vice Bredin; C. J. H. Johnstone, B. G. Humfrey, C. W. Wilson, L. D. Broughton, G. A. A. Walker, F. W. De Winton, A. H. C. Hamilton, E. C. Cuthbert, P. Jackson, J. Tucker, B. P. Schreiber.
Coast Brigade of Artillery—To be Lieutenants: Sergeants Major H. Marshall, J. Taylor, J. L. McCullum, W. McKown, G. Montgomery, W. Robinson, J. Blades; Sergeants J. Ramsay, W. Crawford, Master Gunner G. Leeds. To be Paymaster: Major C. S. Smith, from half-pay, Paymaster 20th Foot. To be Quartermasters: Sergeant Major H. Behenna, Quartermaster Sergeant T. Hoge.
1st Regiment of Foot—Ernest Alexander Morant, Gent., to be ensign by purchase, vice Rooke, promoted; April 10.
6th Foot—Thomas Armstrong Gough, Gent., to be ensign, without purchase, vice Poulton, who resigns; April 10.
7th Foot—Captain William Langford Lewes, from the 98th Foot, to be captain, vice Payn, who exchanges; Feb. 11.
11th Foot—Alexander Henry Vaughan, Gent., to be ensign, without purchase, vice Gilbert, who resigns; April 10.
14th Foot—Lieutenant James Franklin, from the 45th Foot, to be lieutenant, vice Atkinson, who exchanges; April 10.
20th Foot—Sergeant Major James Wybrow to be ensign, without purchase, vice Bilger, promoted; April 10. A. H. Hall, Gent., to be ensign, by purchase, vice Humphrys, appointed to the 15th Light Dragoons.
22nd Foot—Lieutenant Stephen Winthrop to be captain, by purchase, vice Hickman, who retires; April 10.
25th Foot—Ensign Samuel Roden Handy, from the 90th Foot, to be lieutenant, without purchase, vice Lock, whose appointment from the 82nd Foot has been cancelled; James Pender, Gent., to be ensign, by purchase; April 10. Ensign E. H. P. Vivian to be lieutenant, by purchase, vice O'Malley, who retires; Lieutenant G. A. Elliot to be adjutant.
28th Foot—Captain C. F. Hutton, from the Military Train, to be captain, vice Baby, who exchanges; Lieutenant C. G. Mackenzie to be captain, by purchase, vice Brevet Major Godley, who retires; Ensign and Adjutant F. Rance to have the rank of lieutenant; Ensign J. O'Brien to be lieutenant, by purchase, vice Mackenzie.
30th Foot—O. W. Brain, Gent., to be ensign, by purchase, vice Glascock, promoted; C. H. Garnett, Gent., to be ensign, by purchase, vice the Hon. L. W. H. Powys, promoted.
33rd Foot—Major and Brevet Lieutenant Colonel E. W. Donovan to be lieutenant colonel, without purchase, vice Brevet Colonel J. D. Johnstone, C.B., who retires upon full pay; Captain and Brevet Major T. Wickham to be major, without purchase, vice Donovan; Lieutenant A. E. A. Ellis to be captain, without purchase, vice Wickham; Ensign M. D. V. T. Grant to be lieutenant, without purchase, vice Ellis.
45th Foot—Lieutenant Francis Forbes Atkinson, from the 14th Foot, to be lieutenant, vice Franklin, who exchanges; April 10.
52nd Foot—Quartermaster Sergeant H. Stokes, to be quartermaster, vice Knott, who retires upon half pay.

57th Foot—Captain C. J. Clark, from the 100th Foot, to be captain, vice Slale, who exchanges.

61st Foot—Francis John Wakeman Pigott Long, Gent., to be ensign, by purchase, vice Hamilton, promoted; April 10.

70th Foot—H. E. Whidborne, Gent., to be ensign, by purchase, vice Grierson, promoted.

81st Foot—W. A. C. Stuart-Menteth, Gent., to be ensign, by purchase, vice Harle, appointed to the 13th Light Dragoons.

87th Foot—Ensign Anderson James Ashmore, from the 73rd Foot, to be ensign, vice Anderson, appointed paymaster; April 10.

98th Foot—Captain Thomas George Dupré Payn, from the 7th Foot, to be captain, vice Lewes, who exchanges; Feb. 11.

100th Foot—Captain A. F. A. Sade, from the 57th Foot, to be captain, vice Clarke, who exchanges.

Rifle Brigade—H. A. Lascelles, Gent., to be ensign, by purchase, vice Fremantle, appointed to the 10th Light Dragoons.

1st West India Regiment—Major Augustus William Murray to be lieutenant-colonel, without purchase, vice Brevet Colonel Henry Dunn O'Halloran, who retires upon full pay, under the 37th clause of the Royal Warrant of 14th October, 1858. Brevet Lieutenant Colonel James Travers, from the 2nd West India Regiment, to be major, without purchase, vice Murray; March 16.

3rd West India Regiment—Lieutenant Parr William King-mil to be captain, without purchase, vice Travers, promoted in the 1st West India Regiment; Ensign Duncan Forbes Murray, to be lieutenant, without purchase, vice Kingsmill; March 16.

3rd Regiment of Dragoon Guards—Ensign George Francis Robertson, from the 91st Foot, to be cornet, vice Van Corlandt, promoted.

Military Train—The appointment of Captain Henry Miller, from half-pay late Land Transport Corps, which appeared in the *Gazette* of the 20th Dec., 1859, to be antedated to the 4th Nov., 1859, such antedate to give no claim to back pay.

Colistream Regiment of Foot Guards—Lieut. and Captain Arthur James Fremantle to be captain and lieutenant-colonel, by purchase, vice Brevet-Colonel F. W. H. the Earl of Westmoreland, C.B., who retires; Ensign and Lieut. Norman Burnand to be lieutenant and captain, by purchase, vice Fremantle; Ensign George John Fitzhugh Smyth, from the Rifle Brigade, to be ensign and lieutenant, by purchase, vice Burnand; Lieut. and Captain William Frederick Ernest Seymour to be adjutant, vice Fremantle, promoted.

7th Regiment of Foot—Ensign Arthur John Harrison to be lieutenant, by purchase, vice Courtenay, who retires.

21st Foot—Ensign William Thorburn to be lieutenant, by purchase, vice Donald, who retires.

81st Foot—Richard Horatio Townsend, Gent., to be ensign, by purchase, vice Wood, promoted.

44th Foot—Lieut. Elliott Arthur Raymond to be captain, by purchase, vice Brevet-Major Fletcher, who retires; Ensign Charles Elphinstone Rennie to be lieutenant, by purchase, vice Raymond; Ensign Thomas Thompson Irvine, from the 97th Foot, to be ensign, vice Rennie.

45th Foot—Captain Stephen Bilton Gordon to be major, by purchase, vice Brevet-Colonel Henry Anderson, who retires; Lieut. Henry Safe Willoughby to be captain, by purchase, vice Gordon; Ensign William Kershaw to be lieutenant, by purchase, vice Willoughby.

52nd Foot—Major William Harry, Earl of Errol, from half-pay Unattached, to be major, vice Corbett, who exchanges; Captain James Johnes Bouchier to be major, by purchase, vice the Earl of Errol, who retires; Lieut. George Cruden Fraser to be captain, by purchase, vice Bouchier; Ensign Edmund Pakenham to be lieutenant, by purchase, vice Fraser; William Barwell Browne Darwell, Gent., to be ensign, by purchase, vice Pakenham.

60th Foot—Ensign Henry Richard Treeve to be lieutenant, without purchase, vice Carlisle, promoted; Clifford Fortescue Borrer, Gent., to be ensign, by purchase, vice Treeve.

7th Foot—Ensign Henry O'Brien to be lieutenant, without purchase, vice Le Pelly, promoted; Lieut. Frederick Cornwall to be instructor of musketry, vice Lieut. Thomas Carlisle, who has resigned that appointment.

83rd Foot—Captain William Surtees Cook, from half-pay Unattached, to be captain, vice Molony, appointed to the command of the detachment of troops in the Falkland Islands; Lieut. Charles Clitherow Gore to be captain, by purchase, vice Cook, who retires.

Rifle Brigade—Ensign Archdale Robert Palmer to be lieutenant, by purchase, vice Pester, who retires.

3rd West India Regiment—St. John Clarke, Gent., to be ensign, without purchase, vice Murray, promoted.

STAFF.—Captain and Lieut.-Colonel F. C. A. Stephenson, C.B., of the Scots Fusilier Guards, to be deputy adjutant general to her Majesty's Forces serving in China.

Major and Brevet Lieut.-Colonel K. D. Mackenzie, 92nd Foot, to be deputy quartermaster general to her Majesty's Forces serving in China.

CHAPLAIN'S DEPARTMENT.—The commission of the Rev. J. Hamilton, Chaplain Fourth Class, to bear date 1st April, 1853, instead of 1st April, 1859, as stated in the *Gazette* of the latter date.

HOSPITAL STAFF.—Assistant Surgeon M. Grant, M.D., from the 16th Light Dragoons, to be assistant-surgeon, vice Collins, who exchanges.

BREVET.—Brevet Colonel J. D. Johnstone, C.B., retired full pay, 33rd Foot, to be major-general, the rank being honorary only.

Major C. G. Walsh, of the 14th Bengal Native Infantry, to be lieutenant-colonel in the army.

Major J. Hennessey, of the 70th Bengal Native Infantry, to be lieutenant-colonel in the army.

Captain J. Cartmail, Paymaster on half-pay, 71st Foot, to have the honorary rank of major.

Quartermaster W. Knott, retired on half-pay, 52nd Foot, to have the honorary rank of captain, under the Royal Warrant of 17th Dec., 1855.

The Commission of Brevet Lieut.-Colonel J. A. Ballard, of the Bombay Engineers, as brevet lieutenant-colonel, to be antedated to the 7th Dec., 1858.

To be Majors.—Captain William Surtees Cook, 83rd Foot; Captain W. David Aitken, Bombay Artillery; Captain Sir John Hill, Bart., 1st Bengal Cavalry; Captain J. H. B. Dennis, 1st Bombay Light Infantry; Captain Charles R. Baugh, 9th Bombay Native Infantry; Captain Henry

O. Mayne, 6th Madras Cavalry; Captain Alexander Carnegie, 31st Bombay Native Infantry; Captain George Smith, 2nd Bombay Light Cavalry; Captain W. G. G. Cumming, 17th Bombay Native Infantry; Captain W. F. Gordon, 1st Bombay European Regiment.

The undermentioned Paymasters to have the honorary rank of major, under the provisions of the Royal Warrant of the 27th of Jan., 1860:—Paymaster William Henry Fitzgerald, of a recruiting district; Paymaster Thomas Hanson Ratcliff, of the Royal Artillery.

DEPOT BATTALION.—Quartermaster Matthew Slattery, from the 58th Foot, to be quartermaster, vice Thomas Moore, deceased.

FALKLAND ISLANDS.—Captain John Sharman Molony, from the 83rd Foot, to be commanding officer of detachments of troops, vice Abbott, who resigns that appointment and retires upon half-pay unattached.

HOSPITAL STAFF.—Deputy Inspector-General James Edward Thomas Parratt, retired on half-pay, to have the honorary rank of Inspector-General, in accordance with the Royal Warrant of Oct. 1, 1858.

NOTICES.—The next examination of candidates for admission to the Royal Military College, at Sandhurst, will be held at the Royal Hospital, Chelsea, on Monday, June 4, and following days.

The next examination of candidates for direct commissions in the Army will be held at the Royal Hospital, Chelsea, on Wednesday, June 20, and following days.

The next examination of candidates for admission to the Royal Military Academy, at Woolwich, will be held at the Royal Hospital, Chelsea, on Saturday, June 30, and following days.

UNATTACHED.—Lieut. William Henry Urquhart, from the 75th Foot, to be captain, without purchase; April 10.

NAVY.

PROMOTIONS AND APPOINTMENTS.

CAPTAIN.—D. M. Leod Mackenzie, to the Bacchante.

COMMANDERS.—H. R. Wratishaw, to the Ranger; C. Sterling, to the Wasp, commissioned.

LIEUTENANTS.—J. H. Hatchard, to the Implacable; H. T. Gammell, to the Impregnable; I. P. J. Parry, to the Cambridge; C. G. S. Stanley, to the Tridaigar; A. W. Gillett and St. Vincent D. Lake, to the Wasp; R. W. D. Abercromby, to the Wrangler; H. F. Campbell, to the Hannibal.

MASTERS.—W. J. Olive and F. W. Bateman (additional), to the Fiskard; G. B. F. Savin and T. Bowen (additional), to the Chesapeake; S. J. W. Moriarty, to the Donegal; A. M. P. Mackay, to the Wellington, for the St. George; W. Thomas, to the Wasp.

SURGEONS.—W. M. Ogilvie, to the Wasp; J. J. Martin, to the Impregnable; J. L. Palmer, to the Chesapeake; K. Atkinson, to the Jackal; A. Brown, to the Bacchante.

PAYMASTERS.—H. Campion (additional), to the Fiskard; G. Barnes (additional), to the Wellesley; C. W. Sturgess, to the Cornwallis; J. H. Jackson, to the Wasp; J. Retallick, to the Meander; W. H. Thompson, to the Jackal; E. Faulkner (additional), to the Asia; J. M. Lowry, to the Bacchante.

SECOND MASTERS.—W. S. Holbrook, to the Bacchante; J. R. Warren, to the Ranger.

MASTERS' ASSISTANTS.—J. E. Gage, to the Russell; W. P. Haynes, to the Euryalus; T. Robertson, to the Wrangler; S. G. Tattersail to the Aboukir.

ASSISTANT SURGEONS.—P. Cowrie, to the Impregnable; A. M'Dug, to the Bacchante; C. F. Williams, to the Wrangler.

ASSISTANT PAYMASTERS.—G. W. Muir and F. A. Keogh (additional), to the Victory; F. M. Wright, to the Wrangler; W. E. Chown, to the Implacable; H. W. Molesworth, to the Castor; D. L. Rhind, to the Meander; W. Merritt (additional), to the Impregnable.

ACTING ASSISTANT-SURGEONS.—W. L. Powell to the Megæra; A. B. John, to the Cornwallis; N. O. D. Parks, to the Bacchante.

ASSISTANT-PAYMASTER IN CHARGE.—H. Smerville, to the Ranger.

CHIEF ENGINEERS.—F. J. Fewton, to the Bacchante; J. W. Husbands, to the Wellington, for charge of the machinery of the Royal William.

ASSISTANT-ENGINEERS.—First class: W. Sanley, to the Wrangler; D. W. King, for charge of the machinery of the Euryalus; W. Hall, to the Asia, as supernumerary; T. A. Lewis, to the Ranger. Second class: P. Greetnam, to the Fiskard, for charge of the machinery of the Dart; F. H. Hermann, to the Opossum; E. T. Read, to the Wellington, for charge of machinery of the Charon; S. Windley, to the Ranger; N. Farrant, to the Wrangler; J. Osborn, to the Mercury; T. Hurard, to the Wasp; T. W. Sanders, to the Royal Albert, for the Partridge; E. Brown, to the Bacchante. Third class: B. M. K. L. y, to the Wasp; D. Dunn, and G. A. C. Benche, to the Bacchante; N. Steam, to the Asia, for service in the Osborne.

ACTING ASSISTANT-ENGINEERS.—Third class: G. Park (b), to the Ranger; M. Baird, to the Fiskard, for service in the Shumrock; T. Spence, to the Supply; H. H. Small, to the Cumberland, as supernumerary; A. F. McIntyre, to the Wrangler; T. Hatton, to the Fiskard, or service in the Bustler; D. Wishart, to the Wasp; R. W. Drummond, to the Asia, as supernumerary.

MIDSHIPMEN.—L. N. Moncreiff, to the Mars; the Hon. A. C. L. Cadogan, to the Bacchante; H. D. Macaulay, and R. B. Trollope, to the Euryalus; N. A. R. Spicer, and J. C. Burnell, to the Royal Albert; W. M. Mager, to the Algiers; F. J. Easter, to the Mercury; H. C. Kane, to the Melpomene; R. G. Baker, and W. G. Cocq, to the Bacchante; H. D. Macorlay, to the Ariadne; R. B. Trollope, to the Aboukir.

THE "TIMES" ON OUR ARMY.

Our army is the only one of any size consisting wholly of volunteers in the world. Other nations may have pet services, regiments recruited by volunteers from the rest of the army, or mere guards of honour. But in our army, as well as our navy, every man is a volunteer, and there is not one who has not enlisted from preference, from a sense of fitness, or other reason of his own. This army, the freest in the world, does also much more work, for its numbers, than any other army in the world; is in the face of more foes, encounters more risks, and has more actual experience of war, than any other army. It is spread through either hemisphere and in every zone; it fringes every continent and is scattered through a hundred isles; it is always on the ocean; it is ever traversing some of the greatest rivers in the world; its hosts ascend some of the most famous mountain ranges. Though the entire British army could be reviewed in the Champ de Mars, yet, like a drop of some brilliant and powerful dye in a large vase of water, it largely contributes to the aspect of all human affairs. Everywhere in a few days' sail you may reach the British flag; everywhere its protection is within a month's call, and in a few months more its substantial succour, or overwhelming vengeance, may be obtained. The British sentry confronts tribes of savages and civilised empires. Thriftily meted out, as its efficacy permits and its paucity requires, it is here a solitary post, there a garrison of 5,000 men. Its want of numbers is supplied by perpetual motion. *Stare loco nescit*. It is here, there, and everywhere. As it cannot be always at hand, it must ever be in reach, and by double diligence make one man do the work of two. Taking in the mass, and considering the service done, ours presents the largest front, and does most work, of all the armies that are now, or ever were. The Austrian army has not a soldier out of Europe; France is choked with her own army at home, but has no other work for it except the defence of her unprofitable position in Algeria and one or two small colonies. She is obliged to make work for her men at the expense of her neighbours. The British Volunteer Army and Navy encircle the globe. It is only by turning a terrestrial globe round and round and up and down that one can fully realise the extent of its position and the vastness of its ordinary work.

SUPPLEMENTARY APPOINTMENTS—Lieutenants: C. G. Fane, to the *Sanspareil*; C. R. Scott, to the *Wellington*.—Secretaries: R. Munday, to Rear-Admiral Sir William Codrington; G. P. Martin, to Vice-Admiral W. F. Martin; F. Cleeve, C.B., to Rear-Admiral Talbot.—Assistant-Paymaster: H. P. Brennan, supernumerary to the *Victory*.—Assistant-Surgeons: A. B. Johnson (confirmed), to the *Cornwallis*; C. S. Rickland (confirmed), to the *Doris*; C. Keenan, to the *Ranger*.—Acting Assistant-Surgeons: G. Dunstan, to the *Cressy*; G. H. Mansell, to the *Cumberland*; R. T. Rodley, to the *Wasp*.—Chief Engineer: C. Robertson, to the *Archer*.—Assistant-Engineer, First Class: M. Murray (confirmed), to the *Asia*, as supernumerary. John Moysey, as second class for the *Rainbow*. Third Class: Richard Oliver, to the *Cumberland*, for service in the *Cochin*. Acting Assistant Engineers, Third Class: John Watson, Leopold N. Green, and Peter Murray, to the *Arrogant*, as supernumeraries for discipline; John King, to the *Cornwallis*.

APPOINTMENTS, &c., IN THE DUTCH E. I. SERVICE.—Mr. W. H. du Cloux to be director of imposts and domains at Java; H. W. du Perron to be ordinary member of the Supreme Court of Justice in India; W. J. Pahud (son of the Governor-General) to be secretary to the resident of the Preanger Regencies. Two years' leave of absence is granted to the following officers of the civil service:—S. de Vries, J. R. Couperus, and N. Kerkhoff. Sick leave granted to Lieut.-Colonel A. Netscher of the artillery, Captains A. van der Boon and W. Visser of the infantry; 1st Lieut. W. Mickler, Dr. Bayer, and Dr. S. Roo, staff-surgeon and director of the Royal Military Hospital at Weltevreden, near Batavia.

LONDON, FRIDAY, APRIL 27, 1860.

THE HONG KONG PARLIAMENTARY PAPERS.

After a vexatious and purposed delay, the papers relating to the now famous case of Mr. Caldwell, still Registrar-General of Hong Kong, have been laid before Parliament. Of the charges against this person, and of the evidence in support of them, we learn little more than we know already from Mr. Anstey's pamphlets, and the report of the trial of the Queen v. Tarrant, in which a jury, by their acquittal of Mr. Tarrant for libel, convicted the administration of Sir John Bowring of the wilful destruction of evidence, for the purpose of concealing Mr. Caldwell's guilt. What, however, we do learn from these papers are the grounds on which Sir John Bowring vindicates his conduct in supporting Dr. Bridges for supporting Mr. Caldwell, and on which the late Colonial Secretary relied for supporting Sir John Bowring. We can see each link of the chain by which the convict pirate Machow-Wong, in his dungeon at Labuan, is connected with the occupants of Downing-street.

On the 9th August, 1858, Sir John Bowring writes to Sir Bulwer-Lytton a despatch of sixteen pages, announcing his suspension of Mr. Anstey from the office of Attorney-General, and requesting that this suspension may be confirmed. He says of Mr. Anstey:—"No one can be more sensible than I am of his unparalleled activity, his intellectual resources, his readiness and acuteness, and his varied knowledge of history and laws; but when these great gifts are applied, as they have been, to fomenting discord in a small community, the mischief becomes intolerable, and must be abated." The ex-Governor of Hong Kong makes every possible accusation against Mr. Anstey, but with strange fatuity, he appears careful to rest his case against Mr. Anstey upon his proceedings in exposure of Mr. Caldwell. And that part of Mr. Anstey's proceedings in this matter which he selects for his greatest display of indignation is—his venturing to find fault with the destruction of Machow-Wong's papers. But we must allow Sir John to speak for himself, from the 48th page of the Blue Book:—

"Mr. Mongan's chief Chinese teacher, finding these books an encumbrance to a not very large office, suggested to him either their removal, or, if they were not further wanted, their destruction; Mr. Mongan therefore came to me, and I sent him to the Acting Colonial Secretary, to receive any instructions. He accordingly proceeded to the Acting Colonial Secretary, and very few words appear to have passed between them, upon what could at that time have been considered by either of them the mode of dealing with a great mass of Chinese papers, which had lost all importance, and were destitute of even any interest, Machow-Wong being in gaol, and no other party at this time mentioned in connection with them. Mr. Mongan did not report to me the result of his conversation with the Acting Colonial Secretary, but acted by his advice and burnt the books forthwith. I heard nothing further whatsoever from any one on the subject until after the Caldwell commission had commenced its sittings, and then, to my surprise and regret, I learnt what had taken place. In thus expressing myself, I do not attribute blame either to Mr. Bridges or Mr. Mongan, for it was impossible that they or any one else could, in the month of March, have supposed that the Attorney-General would, in the following May, bring long-dormant charges against the Registrar-General, and so ten upon the destruction of these books as a means for further extending his incriminations, but if consulted, I should have desired all the documents to be restored to the custody of those who had the ordinary charge of such documents. I have only to add to this long episode, that up to the time of the destruction in March, it was never hinted to me or the Acting Colonial Secretary that Mr. Caldwell's name was in any way implicated with these books, and no one has ever even suggested that Mr. Caldwell was consulted about, or knew, that they had been burnt. Upon this state of facts I leave you to form your own opinion as to the conduct of an Attorney-General, appearing only as a witness, who ventures to advise the commission to apply against Mr. Caldwell the maxim, "*Omnia presumuntur contra spoliatores*," and most unjustifiably insinuates that these books (now inaccessible for condemnation or defence) contained damning proofs of Mr. Caldwell's guilt, there not being a tittle of evidence to support such a presumption; and then, because other

gentlemen, without Mr. Caldwell's knowledge, had put these books out of the reach of the commission, that body who naturally would respect the law laid down by the law adviser of the Crown, are to find, as proved against Mr. Caldwell, anything which the malice or ingenuity of his enemies can invent or suggest. This portion of the case alone convinces me, and must I think be equally full of conviction to you, sir, that her Majesty's service cannot be honourably served by a law officer who can think and speak as Mr. Anstey has done in this instance."

One might as well attempt to write a description of every one of the contending animalculæ discoverable by the microscope in a drop of putrid water, as to analyse thoroughly this single passage from Sir John Bowring's despatch. Our space limits our observations. He tells us that the destruction of the books having been suggested to Mr. Mongan, Mr. Mongan came to him, and he sent him to Dr. Bridges to receive instructions. Twelve lines further down he declares that if he had been consulted he should have desired "*all the documents to be restored to the custody of those who had the ordinary charge of such documents.*" Why, he was consulted and declined to give any instructions, except to obey the orders of Dr. Bridges; and after telling this, he goes on to say what he would have done if he had been consulted. This, however, is a trifle; the main gist of his statement is the impossibility of any one supposing that the books of the pirate could contain evidence affecting Mr. Caldwell. They were burnt in March, the Attorney-General brought long-dormant charges against the Registrar-General in May. How could such a contingency have possibly been foreseen? Sir John Bowring, however, invariably betrays himself in his speech. "Long-dormant charges!" Then there were such charges known to exist long before the evidence was destroyed, although supposed to be in a somnolent condition. Did Sir John really believe that Mr. Anstey had gone to sleep? for this is what his words imply. We are afraid he never enjoyed the comfort of this reflection for a single moment. This adjective, "long-dormant," is introduced to protect himself against a charge of falsehood in asserting the impossibility of supposing that the contents of the books of Machow-Wong could affect the character of Mr. Caldwell. He could not deny there were such charges, but then they were asleep; who, in the name of official peace and quiet, could suppose that they would ever wake up? Setting aside Sir John Bowring's metaphors, the fact he states is that he knew of such charges. We will now see what he knew of them, and also what Dr. Bridges knew. The papers were burnt in March, 1858. On the 8th July, 1857, Mr. Anstey requested that certain officers of the Government should be called upon to state in writing what they knew of Machow-Wong. Mr. Caldwell was asked among the rest. He stated that "with regard to the connection of Machow-Wong with pirates, I am totally ignorant, nor do I believe, that any such intercourse ever existed." Again: "In nearly every case of information against pirates which I have had anything to do with, *he has been my secret informer.*" But Mr. May, the Superintendent of Police, deposed as follows:— (See pages 71 and 72.)

"I have had a knowledge of Wong Akee for at least ten years, and on numerous occasions during that time have discovered the influence which he exercised upon the cases of piracy especially, but also on cases of local crime coming under the interference of police. This influence was not openly exhibited, because then it might have been met and combated; but there was nevertheless sufficient to show from what quarter the adverse interest came; and this led me to have a strong and openly-expressed dislike to Wong Akee, which I made known to his patron Mr. Caldwell."

And again:—

"He engaged deeply in emigration to California and purchased two English ships; the *Potomac* was one; this latter vessel was confiscated at San Francisco for excess of passengers, and this notwithstanding that between 100 and 200 passengers were landed after payment of passage, at one of the islands outside the harbour. In 1853 he fitted out an expedition against a district city of Nam-tow, in which, however, he was defeated, the Chinese authorities discovering it before the 'braves' assembled; in consequence of this, he cannot visit his native place. Wong Akee is stated to have a close interest in the pirate chiefs known as Luk-i, Po-pak-shing, Shang-tong-wai, Tai-fai-oot, Mo-mee-ma, and others. Of those named, the first, Luk-i, was captured by one of her Majesty's ships near Shanghai, at the end of the year 1856, and was with his crew handed over to the Chinese authorities. In reference to the second named, Po-pak-shing, in January 1857, two large heavily-armed boats were pointed out to the police by some of the inhabitants; they were lying off the central part of the town; and it was said by, I think, Mr. Scarth, that he had seen some signals by lights during the night from these boats; the boats were seized, and by direction of Mr. Mercer, Mr. Grandpré referred to Mr. Caldwell for the characters of the boats. Mr. Caldwell went on board, made inquiry, and in consequence of his expressed report that they were honest traders, the boats were released. Afterwards a charge was made by a Portuguese, whose vessel had been taken by pirates, that the said two vessels were two of the pirates; they were again seized. Po-pak-shing, celebrated as a pirate chief, was apprehended on board, and he and his crew and boats positively identified; ultimately the complainant disappeared, having been bought off; this latter I obtained reliable evidence of at the time."

And again :—

"A peculiarity about all the cases so mentioned, and numerous others, is that Mr. Stace, who is Wong Akee's attorney, has appeared for the prisoners, and that Mr. Caldwell has exhibited an interest in the matter by appearing at the court."

And again :—

"Wong Akee has been apprehended, and his house searched, the books and papers being seized; amongst the latter are some papers in Mr. Caldwell's writing, showing that he has taken a direct interest in the business of Wong Akee. There are also entries in Chinese of monies received from or for Mr. Caldwell, amounting, in one account, to 600 dollars."

Mr. May's letter is dated July, 1857, and was addressed to Dr. Bridges, who in March, 1859, ordered Machow-Wong's papers to be burnt. Dr. Bridges attached a memorandum at the time to Mr. May's letter, to the effect that it did "not contain one syllable of reliable information," but showed "a very strong prejudice on Mr. May's part against Mr. Caldwell." Yet Sir John Bowring states, in the extract above given from his despatch to Sir Bulwer Lytton, that "up to the time of the destruction of the documents in March [1858] it was never hinted to me or the Acting Colonial Secretary that Mr. Caldwell's name was in any way implicated in these books." We will not soil our pages with the only word that can adequately describe such conduct. We have sacrificed much space in order to place before our readers irrefutable proof of its true nature. It was not necessary to convince ourselves of the character of Sir John Bowring's statements, for he also tells Sir Bulwer Lytton that the papers had lost all importance, "no other party being at this time mentioned in connection with them." But besides the statement of Mr. May, there is that of Mr. Inglis, July 14, 1857, who states, "With respect to the character of Matso-Wong I can safely say it is the most notorious in the colony; a parallel to that of Jonathan Wild as nearly as circumstances will permit." Dr. Bridges again has a memorandum on this report; he finds fault with its "poetical colouring," and says he cannot advise "his Excellency to attach any credit to it."

The documents we have quoted, together with the Report of the Caldwell Commission, of which more presently, and the report of the trial of the Queen v. Tarrant, were in the possession of Sir E. Bulwer Lytton when, on March 17, 1859, he replied to Sir John Bowring's despatch of August 9, 1858, and, as requested, confirmed the suspension of Mr. Anstey. We shall extract but one line from the ex-colonial-Secretary's despatch:—"The (Caldwell) Commission reported that some portion of the charges (*comparatively unimportant*) was proved." These "*comparatively unimportant*" charges are as follows:—(See Report of Caldwell Commission, p. 37.)

"That with regard to charge 6, a long and intimate connection between Mr. Caldwell and Ma-chow-wong has been proved, but that there is no proof of any connection by affinity, according to Chinese law or custom. That with regard to charge 7, it is proved that Mr. Caldwell has been in the habit, on Ma-chow-wong's unsupported information, of arresting persons, but that there is no evidence as to his confiscating or restoring property. That as regards charge 8, there is no evidence of any connivances or procurements of Mr. Caldwell; but that it is manifest that the Chinese are very apt to give evidence against him. That as to charge 9, it has been proved that Mr. Caldwell aided in the acceptance of Sze-kai, his former servant, as bail for Ma-chow-wong, and that Sze-kai had been imprisoned for debt for a few days a short time previously. That with reference to charge 11, a partnership with Ma-chow-wong, in a lorch, is proved, and, in fact, admitted by Mr. Caldwell, but that there is no evidence as to payments to Mr. Caldwell out of the produce of plunder made at sea. That of the facts stated in charge 13, of the release of the men upon Mr. Caldwell's representation as to their character, there is no doubt whatever; and that it appears incomprehensible how any person, with Mr. Caldwell's knowledge of the Chinese language, and holding the appointment he did, could have been ignorant of the character of the boats in which the men were seized, and that one at least of these men was a notorious pirate, particularly as it is in evidence that Ma-chow-wong was connected with the boats."

The expression, "*comparatively unimportant*," applied to such conduct on the part of a justice of the peace, testifies to the hollowness of the now forfeited pledge of the Colonial-office that the appointment of a new Governor of Hong Kong should be the occasion for a searching inquiry into abuses which had at length been spoken of in Parliament, after having become a public scandal in the land. What, indeed, could any new Governor do with these words before his eyes? It is now palpable that the pretence of inquiry at Hong Kong was resorted to in order to stop that demand for inquiry in England which was beginning to make itself heard, and which, we rejoice to hear, will make itself heard again in connection with the presentation of these papers to Parliament. One word to those intending to act in this matter. The evil in Hong Kong is but a ramification of the evil, the root of which is in Downing-street. Mr. Caldwell protects Machow-Wong,

Dr. Bridges protects Mr. Caldwell, Sir John Bowring protects Dr. Bridges, Sir E. B. Lytton protects Sir John Bowring, and the Government of which Sir E. B. Lytton was a member was afraid of Lord Palmerston. We know, upon the very best authority, that a consideration which weighed with the Government of Lord Derby in deciding upon the course which they should take in reference to the unutterably infamous administration of Hong Kong by Sir John Bowring, was a dread of being charged with taking the pretext of the Caldwell case to punish him for the bombardment of Canton! Considerations such as these open a field for reflection too vast for us to enter upon at present. We have only to repeat, let every effort be made to bring before Parliament and the Crown that conduct of Secretaries of State by which impunity is granted to the confederacy of British magistrates with pirates, and punishment awarded to the denouncers of these monstrous practices, on such charges as "fomenting discord in a small community."

We urge this for the sake of England, but we also urge prompt action on account of pressing circumstances at Hong Kong. The last mail brought news of proceedings against a Chinese, Tam Achoy, and a British subject, Captain Baker, for piracy, of their having pleaded guilty, but not having been punished, because they were able to plead the connivance of the authorities, the *China Mail* stating that "the affidavits leave the matter in a very dubious and suspicious light as regards Mr. Caldwell." When these Parliamentary papers reach Hong Kong, detailing, as they do, the obstinate denial of the most necessary justice, by successive colonial secretaries, the next batch of pirates who are brought to trial will be able to plead the connivance not only of Mr. Caldwell, but of Sir Bulwer Lytton and the Duke of Newcastle.

THE OPENING OF THE WESTERN FRONTIER OF CHINA.

The project which we have noticed in previous issues, to open up a communication on the western frontier of China, increases in interest, and several leading articles have been devoted to the subject by the London and provincial press. The *Illustrated London News* has engraved a map from an original, in possession of Captain Sprye, who has been many years in Pegue and Burmah in the Company's service, and first called the attention of our Government to the subject, but the attention he has received has been conducted in the usual mode of circumlocution, one office referring to another, &c. It is seldom that British merchants have to thank Government for affording the means of opening up new channels of trade, but, on the contrary, it is often found to be the great and only stumbling-block in the way. If the intended market is at a distance like China, the chance, of course, becomes considerably lessened, and so long as our Secretaries of State shall have the nominal charge of the whole of our foreign relations, it is not to be expected that any improvement will take place, the intricate questions which constantly arise in connection with countries with which we have relations being at all times calculated to exclude attention to any new opening which may present, and in this manner many of the best interests of this country are shamefully neglected. We wish the scheme of Captain Sprye all success, but the only practical way to procure it is by forming a company ready to carry out the object; and when Government sees that plans are put in train, they are likely to grant the necessary protection, and instruct our ambassador on the spot to give effect to the same. An opportunity now presents itself in the second mission of Lord Elgin, which should on no account be lost, for it becomes every day more apparent that we cannot be confined to the coasting ports of China, especially as there are good grounds for believing that the French occupation of Cochin China is intended as the basis of operations for intriguing with the King of Burmah, which may lead to an opening into China.

The city of Tong-ho, in British Pegue, is already in telegraphic connection with Rangoon and Calcutta; the distance from thence to Esmok is only about 300 miles. From Esmok the line can be carried down the valley of the Pearl river to Canton, along which it is stated good roads are in existence. Considerable difficulties would, no doubt, exist in devising means for protecting the line; but the plan once entered upon through Lord Elgin and the Chinese Government, the remainder would be a mere matter of detail. First impressions, of course, would suggest that the natives would be continually robbing the wire.

The *New York Herald* has the following on late events in China:—

"Lord Palmerston recently declared in the House of Commons that if the English Minister to China, Mr. Bruce, had submitted to half the indignities which were put upon the American Commissioner in his visit to Peking, he would have deserved to have been disgraced and removed from his post. The London journals have been talking for some time past in the same strain of all our proceedings in the East. The truth is, that the English are jealous of the footing that Americans have obtained in China and Japan. Instead of being grateful for the good offices that our representatives render them, they repay them by misrepresenting their conduct. Mr. Ward submitted to no indignities in his visit to Peking. He went in the fashion, and according to the forms, understood by the Chinese to be suitable to the dignity of an Ambassador. He showed his good sense by a compliance with their usages as far as was consistent with his own notions of propriety. If, instead of making this unwarrantable attack on Mr. Ward, Lord Palmerston had acknowledged the obligations which British diplomacy was under to our Minister in Japan—obligations personally acknowledged by Queen Victoria by a present of a gold snuff-box to that gentleman—he would have been setting an example which might have further beneficial effects on British interests in countries in which British arrogance has evoked hostility and hatred."

LORD ELGIN'S SECOND MISSION.—The Earl of Elgin proceeded by the last mail, accompanied by the following gentlemen, who form part of the mission:—Lieut.-Col. H. H. Crealock, military secretary; Mr. H. B. Loch, private secretary; the Hon. J. P. Stuart Wortley, first attaché; the Hon. J. T. Howell Thurlow, second attaché. Baron Gros, the French ambassador, accompanied by Count de Bastard, also proceeds by this mail. Colonel Crealock served in the 90th Regiment in the Crimea from December, 1854, to February, 1855, and again from 28th March, 1855, till the end of the siege, including the assault on the 8th September, when he was inside the Redan with General Windham. He was placed upon the staff at Constantinople; and on the last Chinese war breaking out, he went out as one of the *Etat-Major*, and at its close he proceeded to India, and arrived after the fall of Lucknow, but served with Lord Clyde in the subsequent campaign in the capacity of Assistant Adjutant-General to Sir W. R. Mansfield. Colonel Crealock possesses the peculiar qualifications of a military secretary, and his reputation as a charming draughtsman and an accomplished officer is established in the army. We believe that this is the first diplomatic appointment of Mr. H. B. Loch, as also of the Hon. J. P. Stuart Wortley, a son of the late Solicitor-General, and formerly Recorder of the City of London.

LIEUT.-COLONEL CAINE.—In the *Illustrated London News* of the 14th we find a notice of this gentleman, and an engraving of the mirror presented him by some of his Chinese acquaintances in Hong Kong, whom, no doubt, he had done many a good turn to. We are rather surprised to find that any journal possessing advantages for ascertaining the true current of Colonel Caine's life should be so far misled as to pass such a fulsome panegyric on a man so well known to have been an associate of that notorious swindler Sheriff Hordern, and to have committed other similar acts in every day life, "too numerous and too tedious to mention."—"If," says the illustrious *News*, "there be a position which more than any other tests the administrative capacity of a man, it is when, invested with consular charges he holds on the confines of barbarism the 'marches' of civilisation. Whilst the European administrator, surrounded with the appliances of an organised system, and a ting through the agency of recognised laws, directs with ease the economy of the State, confident always that should moments of emergency demand from his hands the responsibility of initiative acts, a public opinion, at once just and perspicuous, will interpret with fairness the integrity of his aims, colonial rulers must frequently with the debris of a decayed society erect the edifice of a new system, which neither shocks Eastern prejudices nor Western civilisation. Without a precedent to guide, or a public opinion to which to appeal, every act is an additional responsibility, every decision a ground of contest, where truth must vindicate herself against blind bigotry or suspicious dread. The offices of chief magistrate and lieutenant-governor, held by Lieut.-Colonel Caine in Hong Kong, were functions peculiarly demanding that judgment, decision, and fertility of resource essential in the successful administration of colonial rule."

SUPPRESSION OF THE COOLIE TRADE IN AMERICAN SHIPS.—Mr. Eliot, of Massachusetts, has been instructed by the committee on commerce to report a bill prohibiting the Chinese coolie trade by American citizens in American vessels. The bill is accompanied by a report. The substance of the bill is as follows:—Section 1 provides that no citizen of the United States or resident shall, as master, factor, owner, or otherwise, build, fit, equip, load, or prepare any ship or vessel for the purpose of procuring from China or elsewhere the inhabitants or subjects of China known as coolies, to be transported to any foreign country to be disposed of against their wills for any term of years as servants or apprentices, to be held to labour or service, on penalty of forfeiture of the vessel, apparel, &c. Section 2 provides penalties for so building, &c., or manufacturing, as owner, master, factor, agent, or otherwise, and also provides penalties for so building, &c., or navigating, as owner, master, factor, agent, or otherwise, any vessel belonging in whole or in part to citizens of the United States, or represented or enrolled in the United States, knowing or intending that the said ship shall be employed in such trade. The penalties are fine and imprisonment. Section 3 provides penalties for taking on board or transporting coolies. Section 4 excludes from the operation of the Act voluntary emigration, but provides for consular certificates to be given for emigrants. Section 5 extends the Acts of February, 1847, and March, 1849, concerning carriage of passengers in merchant vessels, to any passenger vessels from one foreign port to another foreign port. Section 6 authorises the President to order American vessels to be examined, upon cause of suspicion, by the ships of the United States, and, on proof of the violation of the law, to be carried into port for adjudication. Section 7 provides that the Act shall take effect on the day of its passage.

WHAT RAJAH BROOKE DID IN BORNEO.—We extract the following from *Once a Week*:—Brooke did everything possible for the protection and encouragement of industry; and there he stopped. He did not want the people to enrich him; and he left them free to choose whether to enrich themselves. He classed their piratical enemies, and made their rivers safe, and promoted trading; but, as the Dyaks are not fond of labour, he acquiesced in their tastes, and countenanced the native arrangement by which the Chinese immigrants did the hard work, and the Dyaks enjoyed their ease and dignity. "My Dyaks are gentlemen," was in his mind amidst the provisions of his government, as well as in conversation with Europeans. In like manner he encouraged these gentlemen clients of his to discuss the rules and methods of justice, law, and executive government. They decided on the institution of courts of justice; they held counsel on new laws; and they distributed the offices of government, under his sanction. His advice and information were always at their disposal; but they had to ask for one and the other. In the coolness of the morning, he was always to be found on a public walk by the river side, where he could be consulted by all comers; and many a time did midnight overtake some group of which Brooke was the centre, gravely discussing the affairs of the commonwealth, or speculating on the great questions which interest men of all races in all ages, or narrating the facts of European or Eastern life.

THE JAPANESE IN CALIFORNIA.—The *New York Herald* announces the arrival at San Francisco of the Japanese steamer *Caudimarruh*. Their correspondent, writing from San Francisco on the 20th ult., says:—"We visited the ship yesterday, on her arrival, and were there introduced to Captain Brooke and Mr. Kern, from whom we obtained many interesting details of the passage. This is one of the several steamers composing the Japanese navy. She is the first one that has left the country for a foreign port, and perhaps would not have been allowed to come except that the two above-mentioned officers happened to be in Yokohama to attend them. The express object is to await the arrival here of the *Ponhattan*, when she will at once return to report the safe arrival of the Ambassadors and suite. The Japanese sailors are *au fait* in all the usual work pertaining to the duties of seafaring life. The science of navigation is thoroughly understood among the officers, who learned it from the Dutch, at the school at Nagasaki. The instruments are of Dutch and English manufacture. They had two chronometers of English make. The ship is worked, in all respects, like those of the Dutch." At the date on which the correspondent writes from San Francisco the Japanese Embassy had not arrived in the *Ponhattan*.

HAMBURG CORRESPONDENCE.—There is an old adage that Scotchmen and rats are to be found all over the globe. In this city we are accustomed to add, "and Hamburgers," for wherever a new branch of trade or a new field for mercantile enterprise is opened, there are always energetic young merchants of this city to be found ready to establish themselves there with a view of opening direct mercantile relations with Hamburg. And this is one of the principal explanations of the fact that Hamburg is enabled to carry on such an extensive commerce with every country on the face of the globe. It is only a few months since I told you that a house in this city had sent two of their young men to establish a filial on the Amoor, and now I have to record the arrival of two young Hamburgers of the name of G—, belonging to one of our patrician families, at Nagasaki, in Japan, with the intention of establishing a house of business in that port, and opening a direct trade between Japan and Hamburg. The *Cesarovitch*, Capt. Jorjan, and the *San Francisco*, Capt. Stortebecker, both from this port to the Amoor, have arrived safely, the former at Valparaiso, the latter at Talcahuano, in Chili, and were about to proceed to their destination according to letters received here by the last mail from South America.

THE OVERLAND PASSENGERS IN EGYPT.—On the principle that the English have the largest share of the good things in the East, it falls to their lot to bear the brunt of all offences committed by foreigners, as we recently had occasion to note in connection with the outrageous conduct on the part of the mercantile community in Japan. A statement has appeared from a correspondent of the *Times*, detailing some disgraceful proceedings on the part of some of the passengers from Bombay and Australia; the statement is dated from Cairo, 8th April, and is as follows:—"On the night of the 4th a most disgraceful scene occurred in the Great Mosque, in the citadel, which has led to the closing of the Mosque of Cairo against Europeans. The Indian and Australian travellers, on their way through Cairo to Suez, took the opportunity of visiting the Great Mosque, but by the late Viceroy Mohammed Aale. During the Ramadan it is illuminated, and being the anniversary of the death of the founder, who lies interred there, his son, the now Viceroy, was present in state. Some of our countrymen, having previously indulged in 'poisonous pottle deep,' perceived themselves at the door of the mosque in anything but a state of sobriety, and having been admitted with every possible courtesy, repaid it, first by abusing themselves in the viceregal circle, where they amused themselves by mimicking the dervishes and others who were performing the rites of their religion around the tomb of the founder, and then proceeding to demonstrate, by all means in their power, their contempt for Moslem religious observances. This naturally incensed the congregation, and that to such an extent as to attract the attention of the viceroy, who sent his equerry, Mohammed Beg, to exhortate, and request them to remember they were in a place dedicated to the service of God, and that they ought either to behave with becoming decency and propriety, or withdraw, as the viceroy could not otherwise be answerable for the excited fanaticism of his subjects. His recommendation was insolently disregarded, and the irritation assuming a threatening aspect, Mohammed Beg was obliged to surround the party by cavales, in order at once to protect and get them out of the mosque. We forbear, for obvious reasons, to mention the names of these travellers who thus outraged public opinion, and insulted in the presence of the viceroy the memory of his father and the religion which he professes. We regret to add that an English lady (!) was foremost in this disgraceful affair. We may take this opportunity of observing that the conduct of the Indian cadets cannot be otherwise designated than as systematically disgraceful in their passage through Egypt, and has become a matter of serious complaint and representation to the British authorities in Egypt. From the moment they land they commence a system of outrage from the railway station in Alexandria to their arrival in Cairo, where they issue forth armed with sticks in gangs to commit disturbances, which they continue until their embarkation at Suez. It is sincerely to be trusted, for the maintenance of the reputation of the British character, that

'the Indian authorities in London will insist on decorous conduct in future, and enforce it under the penalty of forfeiture of the commission which they disgrace, in the first case of misbehaviour that may be represented home by the British authority here.' A letter appears in this day's *Times* denying that the passengers were for Australia.

CHINESE THEATRICALS IN CALIFORNIA.—The *New York Weekly Times* gives an amusing account of some Chinese operatic and dramatic performances at the Union Theatre, San Francisco, which appear to have afforded unbounded delight to the numerous Chinese residents.

THE LEVEE.—Her Majesty held a Levee on Tuesday, the 24th inst., at St. James's Palace, when the following gentlemen in connection with China had the honour of being presented to her Majesty. Captain G. P. Mends, R.N., on promotion and return from China, by the Duke of Somerset. Col. Holloway, R.M., Aide-de-Camp to the Queen, on being made a C.B., and on return from China, by the Duke of Somerset.

It will be remembered that during the last session of the Council of State (*Riksdag*) a sum of money was voted for the expedition to Japan that the Government intended to send out in conjunction with Norway and Sweden, who were invited to take part in it, and accepted the proposal provisionally. But now, it appears, they think differently of it, for a communication has been received by the Danish cabinet to the effect that unforeseen difficulties will prevent Sweden and Norway from taking part in the joint expedition as proposed. Under these circumstances the ministers are as yet undecided whether to send out a mission by themselves, or to give up the plan also for the present.

A graphic account was published by one of our contemporaries a few days ago of the disgusting practice of "snuff-dipping," so extensively in vogue among women of all classes in the southern States. People from the North, travelling through Virginia, the Carolinas, Georgia, and Alabama, have been astonished at beholding the open and matter-of-fact method of indulging in it—at seeing pretty young girls, lovely ladies, married women and single, sitting in circles, formed expressly for this purpose. Each snuff-dipper has her bottle and swab-stick, or box and mop, from and by which she conveys the filthy dust to her lip; and then, withdrawing the mop, perhaps passes it along to her neighbour as an act of delicate attention.

The new steam corvette *Patience*, now in course of completion at the Philadelphia navy yard, is nearly ready for sea, and will make her first trial trip about the 20th inst. Great interest is felt in this vessel, which is of novel construction.

[In most of the London papers the death of the Shah of Persia is recorded—on the authority of the *Homeward Mail*. We have the best authority for contradicting the statement, and for saying that, at the date of the latest intelligence received at the Persian legation, his Majesty was in excellent health.]

The Post-office has published a notice to the effect, that all letters registered addressed to China, or any other country in or beyond the torrid zone, should be sealed with gum or wafer, to avoid the inconvenience occasioned by the melting of the wax.

Dr. Macgowan continues to lecture at various parts of the country on Japan, by request,—his next engagements being at Manchester, Liverpool, Bath, and Southampton.

As Mr. Anstey is now in Calcutta, and his principal counsellor—Mr. Westmacott—in the action against Sir John Powning has passed from all earthly strife, we may conclude that the action will not come to trial.

Among the announcements of publications in New York we observe "Five Years in China," by the Rev. Charles Taylor, and "A Voyage down the Amoor, with a Land Journey through Siberia, and Incidental Notes of Manchouria, Kamshatka, and Japan," by Mr. Perry McDonough Collins.

Advices from St. Petersburg state that Russia has ordered her diplomatic agents to quit Peking during the approaching hostilities. The reason given is, that she desires to avoid being accused either by England or France of aiding or counselling the Chinese.

The *Times* has sent a special correspondent to China, Mr. T. W. Bowly.

Naval and Military.

THE CHINA EXPEDITION.

It has been generally supposed that the official negligence in connection with the despatch of the Armstrong guns and artillerymen by the *Himalaya* was attributable to the Indian Government; it appears, however, that they did not receive the intelligence in time to make it possible for them to provide the means of transport. After a considerable delay, Messrs. Newall & Co.'s steamer *Imperatriz* was chartered to convey the guns and ammunition, and artillerymen, but owing to her decks having been taken up, and the vessel otherwise fitted for laying the Red Sea Telegraph—and consequently unfitted for carrying troops—she would be a considerable time preparing, as no efficient workmen could be found at Suez. By private advices we learn that she would not leave that place until the 10th inst. An extract appeared in the *Times*, stating that the powder and other stores had been damaged from salt water on board the *Himalaya*; this has been contradicted, however, but as there may be some truth in it, we give the statement:—

"A letter dated 'P. and O. ship *Precursor*, Suez, March 20th,' contains the following paragraph:—'You will be sorry to hear that the whole of our limber and waggon body boxes proved on inspection to have been completely saturated with water in the hold of the *Himalaya*. The wet lay

like thick dew on the shot and metal inside them; all the leather straps, &c., which were stowed in the boxes, were green and mouldy; and, worst of all, the whole of the powder was seriously damaged, if not entirely spoilt. I only hope that they will send out some more Armstrong powder (a perfectly distinct kind) to China, or we shall be done. If they had but taken out the cartouches, and stowed them in the *Himalaya's* magazine, as we wished them, all would have been right. The *Adraas* was perfectly ready to take us on the 16th, and was offered to the consul-general by the P. and O. agent for that purpose, but he refused her, and says we are to wait for the *Imperatriz*, China troop ship."

By a reference to the Parliamentary columns, it will be seen that Mr. Herbert admits the statement in part to be true.

The following appointments are announced in connection with the expedition:—

Colonel T. Pattil, King's Dragoon Guards, to command the cavalry brigade, with the rank of brigadier-general. Lieut.-colonel C. P. B. Walker, 2nd Dragoon Guards, assistant-quartermaster-general to the cavalry division. Captain H. F. Brooke, 48th regiment, Aide-de-Camp to Sir Robert Napier, K.C.B.

After a great deal of premature writing on the want of discipline shown by General Mansfield—a fact never established—the following statement is made in the *Army and Navy Gazette*, which may be intended for the *amende honorable*:—

"By the mail from India just arrived we learn that General Mansfield went to Bombay to await final orders, and that 'he did not decline to go to China, as reported, but simply pointed out certain inconveniences which his selection on as second in command might occasion. If the Commander-in-Chief, or rather in this case the Cabinet, adhere to the original plan, he will join his command in excellent time.'"

Nothing has transpired since our last in reference to the regiments from India, and no further movements in this country have to be announced. The ship *Clara* is loading military stores, and will shortly sail for Hong Kong.

It is understood that when the *Euryalus* is completed she will proceed on a cruise to the Brazils, and perhaps to China, to afford the young Prince Alfred an opportunity of visiting distant regions.

We are sorry to learn (says the *Times*) that the rumours are well founded which have been for some in circulation, to the effect that the examination papers proposed to candidates for military appointments have been surreptitiously obtained by some of the candidates in anticipation of the examination. The result has been that the whole examination has been vitiated by this discovery, that the exercises of the candidates have been cancelled, and that a new examination will at once begin.

The office of principal medical officer at Fort Pitt Hospital, Chatham, rendered vacant by the appointment of Inspector-General J. R. Taylor, C.B., to the head of the invalid establishment and sanatorium formed at the Cape of Good Hope for the troops from China, has been conferred upon Deputy Inspector-General T. D. Hume, M.D., late the head of the medical staff at Cork.

The *Forte*, 51, screw, Captain E. Turnour, flag ship of Admiral Keppel, has been placed in No. 7 Dock, at Portsmouth, and a portion of her copper stripped off for the purpose of discovering and remedying the leak in her stern. Her crew have been berthed on board a hulk in the harbour while she is in dock.

Deputy Inspector-General T. D. Hume, M.D., who has been appointed principal medical officer at Chatham, in succession to Inspector-General J. R. Taylor, C.B., who is under orders to proceed to the Cape of Good Hope, commenced his duties at Fort Pitt Hospital this week.

The screw steamer *Surprise*, 4, Captain Lord Edward Cecil, now stripping in the basin at the Devonport dockyard, arrived from China on the 12th inst., at Plymouth.

The Lords of the Admiralty have ordered the *Tricomalee*, 24, to be brought up from the reserve in ordinary at Chatham, and taken into dock, in order to be fitted as a training ship for the Naval Coast Volunteers at Newcastle and Sunderland. As soon as the *Tricomalee* is completed she will be sent round to the Tyne, where she will be stationed.

The *Arctusa*, 50, was on Tuesday brought up from Chatham harbour, to be taken in to the dock vacated on the previous day by the line-of-battle screw steamer *Rodney*, 91. The *Arctusa* is to be considerably lengthened, in order to be converted into a 51-gun screw frigate.

The *Allatross*, 12, one of the old class of sailing sloops, will go into the dock at Chatham vacated by the *Plorer* gunboat, where she will be broken up.

A case of open mutiny has occurred on board Her Majesty's ship *Edgar*, in consequence of the crew not obtaining leave, which they considered had been unreasonably delayed, but it appears to have been in consequence of the non-return of a portion of their company then on shore. Several of the delinquents have been sentenced to twelve months' imprisonment in Winchester gaol, and the court is now engaged in the investigation of charges against other offenders.

On the 22nd inst., while operations were in progress for removing the boilers from her Majesty's ship *Royal Albert*, the tackle broke and deposited one of the boilers weighing twenty-eight tons on the deck, smashing the planks, one of the beams, and several of the carlings. It was fortunately jammed, however, in the hatchway, and thus saved the lives of some twenty shipwrights who were at work below. Another accident of a similar nature took place in hoisting the new boilers.

The *Haering* store-ship, with Armstrong guns and other stores, for Hong Kong, which got on shore off the Ratta, in Plymouth Sound, was got off on the 21st, and now lies alongside the Commercial Wharf.

The following, in reference to the *McLourne* screw steamer, appeared in the *Times*, signed James Thompson:—"In the extract of the letter from one of

the military officers on board, furnished by your correspondent, he states, under date of the 17th of February (twelve days after leaving St. Vincent), that a stoppage occurred, 'after which it gradually dawned upon us how thankful we should be that bursting boilers had not yet blown us into eternity.' I do not wish to impute deliberate malice to this gentleman, whoever he may be, but I can hardly be wrong in expressing the wish that he had been more accurate in ascertaining the cause of the stoppage which occurred before writing in this strain. The truth is, that the stoppage was in no way dependent on the boilers, which are in perfect order, but was caused by the giving way of the intermediate crank shaft—an accident that was solely occasioned by the stress of weather the ship had previously undergone. The *Melbourne* being within three days' sail of Rio Janeiro, it was considered more prudent by the Admiralty agent on board to bear up for that port, where the crank-shaft was repaired, and in the course of a few days she proceeded on her voyage under steam.

Mr. Horsman's motion for the production of the naval estimates for the last 100 years has brought before the public some facts which are specially valuable at this time. The lowest point reached in our navy estimates for 103 years past, was in 1768, when there were only 15,511 men employed in the service, at an expense of a little above one and a-half millions. At the conclusion of the American war, 105,443 sailors and marines belonged to our naval establishment, at an annual cost of a little above eight millions. In 1859-60, the number of men voted for the navy is about half the amount just quoted, whilst the expenses of the service are reckoned at nearly ten millions. The increase of expense is attributable to the different conditions of the navy. In 1813, the number of men employed seems to have reached the highest point, no fewer than 147,047 being rated on the navy lists at an expense of twenty-three and a-half millions. From 1756 to 1859 England has been engaged in thirteen wars, of which four were with France.

REVISED ARMY ESTIMATES FOR 1860-61.

The revised Army Estimates have just been published, and are divided into six parts—viz., forces, civil establishments, supplies, works and buildings, educational, and non-effective, for which a total sum of £14,842,546 is asked, being an increase of £1,983,249 on the estimates of 1859-60. The number of men to be provided for is 145,269, and the pay and allowances for this force amount to £4,736,701, further augmented by miscellaneous charges, put down at £620,285. The first of these items is £1,012,227, and the second £57,918 beyond those of last year. The embodied militia will cost £320,000, a decrease of no less than £240,000 on the previous year's estimate; while the volunteer corps ask £20,000 less than last year, and figure for the comparatively modest sum of £68,000. The next division is that of the civil establishments, in which we find a large increase over 1859-60. The departments of the Secretary for War and of the General Commanding-in-Chief are put down for £196,224, an increase of £10,630 upon the last estimates; the manufacturing establishments, military storekeepers, barrackmasters, lodging money, rents, &c., are estimated at £374,005, an increase of £14,965; and the wages of artificers and labourers at £865,234, showing an increase of £115,706. The third division includes clothing and necessaries, estimated at £324,000, a decrease of £126,000 on the previous year; provisions, forage, fuel and light, barrack furniture and bedding, &c., figure for £1,278,377, an increase of £181,593; and warlike stores for land and sea service will absorb £2,038,088, an increase of £940,463 upon the estimates of 1859-60. The fourth vote comprises fortifications, civil buildings, and barracks—the first item being down for £645,355, an increase of £196,783; the second for £203,500; and the third for £707,607, the two latter showing a decrease of £29,457 and £125,885 respectively. The fifth division, the educational, demands an increase of £7,150 upon the last estimates, and is down for £277,547. These five divisions comprehend the effective services, and comprise a total of £12,707,923. The non-effective services, which include rewards for military services, pay of general officers, pay of reduced and retired officers, widows' pensions and compassionate allowances, pensions and allowances to wounded officers, in-pensions, out-pensions and superannuation allowances, demand £2,134,623, a decrease of £12,882 upon last year; thus making up the total amount of £14,842,546 required for the coming year, and showing a net increase of £1,983,249 upon the estimates of 1859-60.

Literature.

A Visit to India, China, and Japan. By BAYARD TAYLOR. Newly Revised and Edited by G. F. PARDON. James Blackwood, Paternoster-row.

This is a re-issue, at a moderate price and in a convenient form, of a book which we have already commended to the attention of our readers.* A second perusal, however, so strongly confirms our favourable impression that we feel it deserves somewhat more than a cursory notice.

Mr. Bayard Taylor, the well-known American traveller, paid his visit to India, China, and Japan in the year 1853, and published the account of his travels in 1855. Since then we have had the mutiny in India, and treaties and wars, or rumours of wars, with China and Japan, so that the work before us treats of a condition of things past and well-nigh forgotten, and we cannot say that the appendix furnished by Mr. Pardon adds much to our information on recent events. The book is nevertheless both entertaining and valuable. The writer propounds no new theories, and favours us with no philosophical or anti-

quarian disquisitions; but perhaps we like his work none the less on that account. It is simply what it professes to be—an account of a visit (albeit a hurried one) to the far East. We do not find it at all a tedious journey to accompany our author in his banghy cart from Bombay to Indore, thence to the capital of the Great Mogul and the gigantic mountains of the Himalayan range. He describes with equal felicity the wonders of art and the sublime and varying aspects of nature, and his narrative contains just enough of the salt of personal adventure which travellers are perhaps more apt to provide than their readers are to relish. We accompany Mr. Taylor to Meerut, Cawnpore, and Lucknow, and on by Allahabad and Benares to Calcutta. His visit to China is scarcely so well told. He has no admiration for China, and the unfortunate Chinese are denied the possession of one redeeming quality. We forbear to quote his "deliberate opinion" of them as recorded in page 162 of this volume, for, in truth, we think a little more knowledge of this part of his subject would have induced him to modify his judgment. His visits to the capital of Loo-choo, and to the Bonin and Peel Islands, are among the best and most entertaining parts of this volume. As to Japan, we know now, imperfect as our knowledge still is, so much more than Mr. Taylor has told us, that it seems only necessary to say that he accompanied the United States expedition under Commodore Perry. We have not space to point out a tithe of the merits of this book, but we must not omit to thank Mr. Taylor for the testimony he is ever ready to bear (and we must not forget he is an American) to the virtues of the English. Of his style it would be difficult to speak too highly. It is clear, graphic, free from affectation, and at times highly poetical. One short example must suffice. In his description of the most renowned monument of Agra, Mr. Taylor tells us that

"The dome of the Tâj contains an echo more sweet, pure, and prolonged than that in the Baptistery of Pisa, the finest in Europe. A single musical tone uttered by the voice floats and soars overhead in a long, delicious undulation, fainting away so slowly that you hear it after it is silent, as you see or seem to see a lark you have been watching, after it is swallowed up in the blue of heaven."

In a word, we think Mr. Bayard Taylor's style little inferior to that of his countryman Washington Irving. It is not easy to award higher praise.

SELECTION.

TEA CULTURE IN INDIA.—The introduction of the tea culture into India is an interesting experiment, if, indeed, it can still be considered an experiment. The Government within the past ten years, has devoted much attention to it. All the principal varieties of the tea plant have been imported, experimental gardens laid out, at different points in the Himalayas, from Assam to the north-western frontier of the Punjab, and Chinese workmen procured to teach the preparation of the leaves. Mr. Fortune, whose travels in China on his mission to effect these objects have excited considerable notice, had been despatched a third time to that country to procure fresh supplies of plants and workmen. The tea plant was first introduced into Assam, a district north of Bengal, and lying on the Brahmapootra river. A company was formed about fifteen years ago for the cultivation and manufacture of tea; but through ignorance and inexperience it was for some time a losing concern. At present, however, it has so far succeeded as to produce 500,000 pounds of tea, and to pay 10 per cent. annually to the company. The experimental gardens in the northern and western parts of the Himalayas have been established more recently, and the natives are now beginning to take up the cultivation of the plant. One of the gardens is at Kaoligir, about three miles from Dehra, and I visited it in company with Mrs. Keene. Mr. Fortune considers that a level alluvial soil, like that of the Dhoon, is not so well adapted for the tea as the hilly country about Almora and in the Punjab, and if it be correct I did not see the plant in its greatest perfection; though I should think it difficult for any plantation to present a more flourishing appearance than parts of that at Kaoligir. It consists of three hundred acres of level ground—a rich dark loam mixed with clay—and contains plants in every stage of growth, from the seedling to the thick bushy shrub six feet high.—*B. Taylor's Visit to India, China, and Japan.*

Legal.

IN RE HERRINGBON RUSTOMJEE.—This was an examination meeting. The bankrupt was described as a merchant of Bishopsgate Within. The accounts, prepared by Messrs. Johnson and Wilson, commence June 30, 1855, with a capital of £4,720, and end on the 4th January last, with unsecured creditors, £8,702, and creditors holding security, £11,190. The property held by the latter is estimated as worth £14,488, and consists principally of consignments. The largest secured creditor is the Mercantile Bank of India, for £8,932. Debtors in China are returned as owing £8,587; bad debts, £4,993. The bankrupt also returns as his property a plantation at Singapore, on which he has expended £7,255. He appears to have made no profits; his trade expenses were £2,055; losses, £5,503; house and personal expenses, £731. An adjournment for three months was ordered at the request of the assignees, for the purpose of giving time to realize the assets abroad.

ARMY AND NAVY ESTIMATES.

In the House of Commons upon the motion to go into committee on the navy estimates, Sir C. NAPIER called attention to the circumstances connected with the present state of the navy, censuring the extravagant expenditure which had been incurred by the Admiralty in altering ships, and, while admitting that we had now something deserving the name of a Channel fleet, complained that it was still undermined and, that it was especially deficient in petty officers. He also alluded to the recent mutinies, and urged the necessity of a recourse to rigid measures in order to prevent their recurrence. As a general means of improving the condition of the navy, he advocated the adoption of a higher rate of pay for warrant officers, and a revival of the penal code of the navy; while, with regard to corporal punishment, he thought the power of inflicting it might advantageously be taken from captains and vested in courts-martial, as is the case in the army. In conclusion he criticised the present system of block ships and "re-serve," and demanded that it should be superseded by something more likely to afford to the nation a reserve fleet really to be relied upon in a time of sudden emergency—an object which might easily be effected by carrying out the recommendations of the commission for manning the navy. —Sir J. ELPHINSTONE directed attention to the post captains on the reserved list, who, he contended, had received no reward commensurate with their length of service, and ought to be open for further promotion, and consequent increased half-pay.—Mr. LINDSAY protested against the rapid increase which had taken place in our naval expenditure, arising out of the mutual jealousy existing between France and this country, until it now reached an enormous amount, which pressed severely upon industry, and threatened to affect it still more injuriously in future, unless the rivalry of the two nations were put an end to. At the same time, he said, he did not wish to weaken our necessary defences; but it was perfectly plain, from the report of the commission, that vast savings might be effected without at all impairing the efficiency of the navy. This was more particularly the case in the dockyard department, where the cost of work was considerably in excess of building in private yards.—Sir M. SEYMOUR supported the views of the hon. Baronet the member for Portsmouth relative to the position of retired officers (post captains) with regard to increased half-pay. He expressed his satisfaction at hearing that the widows and orphans of warrant officers were to receive some consideration at the hands of the Admiralty. He agreed with the gallant admiral the member for Southwark that the crews of the Channel fleet were not so good as they should be. He had never before had ships with war complements kept in our ports during the winter season, and they could well judge what must be the temptations under such circumstances to both officers and men. He hoped that a different arrangement would be adopted in future, and by dispersing the Channel fleet to various quarters of the world, and disposing of the coast guard at home, a great expense would be saved to the country, and a beneficial effect exercised on the navy. He believed with the hon. member for Sunderland (Mr. Lindsay), that it was the opinion of the House and of the public that the national dockyards were not well managed, and he should always be ready to support any motion that might be made with the view of improving their management. But he thought, from his own experience in the dockyards, that the difficulty experienced by the hon. gentleman in his attempt to reconcile the accounts of expenditure in the dockyards arose entirely from the variety of modes in which those accounts were kept. He did not appear there as an advocate for the dockyards or of any other department, but he could not refrain from saying that, in his opinion, the work that had been done in the dockyards was the best that could be produced in the country. (Hear.) He hoped that if any committee were appointed, some inquiry would be made into the quality of the work produced in the Government dockyards. Referring to the manning commission, the hon. and gallant gentleman said we had not yet obtained the whole of the reserve force that had been recommended by the commission. He hoped that the Secretary to the Admiralty would state what was the present number of the naval volunteers, and of the naval coast volunteers. The most vitally important question connected with the navy was that which related to manning. We had always experienced great difficulties in manning the navy. We had never got our full complement of sailors without a great deal of pressure. He did not suppose impressment could ever be resorted to again. That plan, he thought, would be neither desirable nor justifiable. Still, on a sudden emergency, he thought that the commander of a ship might properly take from a homeward bound vessel enough of the crew to man his ship. The House ought to consider whether some of the arrangements which had been made recently by other countries for the manning of their navies might not be adopted by this country. It was a curious fact, that out of the 150,000 sailors belonging to the commercial marine of the United States, only 9,000 were natives of America. That strange state of things was owing, in a great measure, to the wages paid in the American commercial marine. The question of pay was a very serious and large one; and as there was hardly one class in our navy that was satisfied, he hoped the Secretary to the Admiralty would feel that the time had arrived when the pay of all who were actively employed in the navy ought to be reconsidered by the Government. During the Russian war no more than 1,000 of the men employed in our mercantile marine entered the Royal navy. Fifty years ago, when the population of the country was only half of what it now was, we had altogether a force of more than 600,000 for the defence of the country. Our present plan of raising men for internal defence was useless, and almost inoperative. The militia, accompanied by the ballot, was in his opinion the only way to procure a sufficient force to repel an invader, and he hoped that, if that plan were resorted to, it would be extended to the navy. (Hear, hear, hear.)—After some remarks from Admiral WALCOTT and Mr. BENTINCK, the House went into committee.—The first vote, £160,280 for the expenses of the Admiralty Office, &c. The next vote discussed was one of £287,725 for the Coastguard, Coast Volunteers, and Naval Reserve; incidentally to which it was admitted by Lord C. Palmerston that the number of men who had enrolled themselves in the reserve was only 800, instead of the estimated 30,000, while the number of coast volunteers enrolled was 6,166, of whom 4,000 were under drill. This vote and another were agreed to, and the House resumed.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- FORDE**—On the 18th inst., at Wimbledon, Surrey, the wife of Henry C. Forde, Esq., of a son.
- GIBSON**—On the 1st March, at Fuhchau, the wife of the Rev. O. Gibson, American Mission, of a daughter.
- HARGREAVES**—On the 14th April, at Cleveland-square, Hyde-park, the wife of Henry Hargreaves, Esq., of a daughter.
- LANGLEY**—On the 17th April, at 7, Cleveland-terrace, Hyde-park, the wife of Col. Langley, of a son.
- LEGGE**—On the 29th February, at Hong Kong, the wife of the Rev. James Legge, D.D., of a daughter.
- MACTAGGART**—At Esplanade, Singapore, 19th March, the wife of Wm. Mac-taggart, Esq., of a daughter.
- PLUNKETT-WADE**—On the 19th inst., the wife of W. J. Plunkett-Wade, Esq., late Lieut. Royal Artillery, of a daughter.
- RAWSON**—On Thursday, the 19th inst., the wife of the Rev. A. Rawson, Bromley-common, of a daughter.
- SMITH**—On the 9th March, at the Esperance Family Hotel, Singapore, Coleman-street, the wife of Captain E. M. Smith of a son.
- WINTER**—On the 18th inst., at the Rectory, East Bradenham, Norfolk, the wife of the Rev. George Robert Winter, of a daughter.

MARRIAGES.

- D'ALMEIDA—PENNINGTON**—On the 17th inst., at Ipsden Church Oxen, by the Rev. L. T. Pennington, brother of the bride assisted by the Rev. R. Twopeny, the vicar, Wm. Barrington d'Almeida, Esq., eldest son of Sir Joaquin d'Almeida, Consul-General of Portugal, and Consul for Sardinia at Singapore, to Anna Harriette, second daughter of Rowland Pennington, Esq., of Stoke House, Wallingford, one of her Majesty's Justices of the Peace, and Deputy-Lieutenant for the county of Cumberland.
- DENT—FRESHFIELD**—On the 17th inst., at Reigate, by the Rev. J. Cecil Wynter, the Rev. J. J. Dent Dent, second son of Joseph Dent, Esq., of Ribston Hall, Yorkshire, to Laura, youngest daughter of the late James W. Freshfield, jun., Esq., of Reigate.
- GORDON—CREALOCK**—On the 21st inst., at St. John's, Paddington, by the Rev. G. M. Prescott, Archibald Gordon, Esq., M.D., C.B., Deputy Inspector-General of Hospitals, to Mary Preston, second daughter of the late William Belton Crealock, Esq., of Stanhope-place, Hyde-park.
- GUIMARAS—LOUREIRO**—On the 18th February, at Macao, His Excellency the Governor, Sr. Isodoro Francisco Guimaraes, to Srta. Genoveva Roza Joaquina d'Espirito Santo Loureiro.
- HILL—VOSS**—On the 19th inst., at St. Mary Abbots, Kensington, by the Rev. F. H. Vivian, incumbent of St. Bartholomew's, Bethnal-green, assisted by the Rev. Harvey W. Brooks, incumbent of St. Stephens, Westbourne park, Henry Geary Hill, Esq., Royal Artillery, eldest surviving son of Harcourt Hill, Esq., Inverness-terrace, Hyde-park, to Isabel Cave, youngest daughter of the late John M. Voss, Esq., banker, Swansea.
- O'SULLIVAN—MAER**—At Penang, on the 1st March, by the Right Rev. the Bishop of Atalia, assisted by the Revs. Manissol and Hab, John P. O'Sullivan, Esq., United States, Consul for Singapore, and its dependencies, to Netty, youngest daughter of the late William Maer, Esq., M.D., of Bucharest, Wallachia.
- SANFORD—SMITH**—On the 17th inst., at the parish church, Clapham, by the Rev. J. Collins, Mr. Percival Sanford, of 16, Champion-grove, Denmark-hill, to Mary Collins, eldest daughter of Richard Collins Smith Esq., of Union-grove, Clapham.
- SORBY—BOWER**—On the 18th inst., at the parish church of Darley, near Matlock, Derbyshire, by the Rev. D. Vawdrey, rector, assisted by the Rev. W. Belcher, incumbent of South Darley, in the same county, Mr. Alfred Sorby, of South Darley, to Agnes, daughter of the late Mr. William Bower, of Manchester.

DEATHS.

- HOPE**—On the 17th inst., at Exeter, Colonel John I. Hope, Royal Engineers, aged 64.
- INCE**—On the 14th inst., at 3, Wilton-street, Grosvenor-place, Susan, younger daughter of the late John Ince, Esq.
- JEFFREYS**—At sea, during the month of November last, on board the ship *Lodianah*, on her passage from Singapore to Liverpool, Mr. Richard Jeffreys, aged 30.
- NEWMAN**—On the 5th March, at his residence in Hollywood-road, Hong Kong, William H. Newman, in his 32nd year.
- RAWSON**—At Bath, April 16th, suddenly, T. S. Rawson, Esq., of the late firm of Rawson, Sons, and Co., of China and London.
- ROBERTSON**—On the 17th Feb., at Batavia, Ellen, daughter of the late William Robertson, A.C.G., aged 48.
- WESTMACOTT**—On Wednesday evening, the 11th inst., at his residence, 1, Gordon-square, after a protracted illness, Henry Seymour Westmacott, Esq., of John-street, Bedford-row, solicitor, aged 51.
- WOOD**—At Graefrath, Prussia, Commander James Wood, R.N., son of the late John George Wood, Esq., aged 51.
- ZECHARIAH**—At Singapore, on the 15th March, Mrs. Ashken J. Zechariah, relict of the late Isaiah Zechariah, Esq., aged 62.
- YOUNG**—At Singapore, on 17th March, Captain John Young, of the ship *Wide Awake*.

POSTAL REGULATIONS.

LETTERS and Newspapers are despatched to China, Singapore, &c., by two routes, viz., via Southampton, on the 4th and 26th of each month; and via Marseilles, on the 10th and 26th. They reach their destination at the same time. Books are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of Books or Pamphlets; but it must not exceed 3 lbs. in weight. The Postage on Books is payable in advance by stamps.

RATES OF POSTAGE.

VIA SOUTHAMPTON.		s.	d.	VIA MARSEILLES.		s.	d.

The following shows the intended departures of mails, by the P. and O. Co.'s steamers, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo, are despatched via Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. The departures from Hong Kong for the ensuing year will be:—

Feb. 15 and 27 .. June 5 and 22 .. Oct. 13 and 29

March 15 and 30 .. July 5 and 22 .. Nov. 15 and 28

April 13 and 23 .. Aug. 10 and 24 .. Dec. 15 and 30

Arriving in London, via Marseilles on the 12th to 15th, and 26th to 29th of each month, and via Southampton five days later.

COMMERCIAL POSTSCRIPT.

FRIDAY AFTERNOON.

The Money Market is easy, and discount for choice paper is 4½ per cent., being ½ per cent. less than the Bank of England rate.

The Board of Trade returns for the past month show diminished activity in our export business, principally to India.

SILK.—Market dull. Deliveries, 2,800 bales. Importers anxious to sell, and prices reduced 1s. to 1s. 6d. in Trieste since January. Taysam supply very short.

ARRIVALS NOT INCLUDED IN TABLE.—April 22: off Portland, from Batavia, Johanna and Gurtruida; off Cuxhaven from Singapore, Buenos Ayres; at Texel from Batavia, Prins Mauritz. 21: at Brouwershaven from Batavia, Soerabaya; from Banjoewangie, Hendrika. 22: from Batavia, Catharina Maria. 23: Maarten v. Rossen. 12: at New York from Shanghai, Skylark. April 21: off Dungeness from Batavia, Catharina Maria, for Rotterdam. 26: off the Start, from Singapore, Land o' Cakes.

DEPARTURES.—April 23: from Sunderland for Hong Kong, Minerva, Neckar. 25: from Deal for Hong Kong, Columbine.

SPOKEN.—Jacobus Martinus, Sunderland to Singapore, Feb. 29, 1 N., 21 W. Sir Bevois, Batavia to Rotterdam, March 6, 5 N., 20 W.

The Neckar (Hamb. ship), Brolin, from Sunderland to Hong Kong, put into Portsmouth 26 April, leaky, having struck heavily on Sunderland Bar in coming out.

The Diana, of Greenock, from Manila to Falmouth, was spoken 21 April in lat. 47 N., long. 9 W., leaky, and short of provisions.

Laid on at Liverpool for Woo ung: Jumna, Sillery, Herperus. For Batavia and Sourabaya California. For Singapore: Richard Cobden.

Monetary and Commercial.

The following table will show the number and tonnage of ships entered inwards and cleared outwards with cargo, from the 1st January to 31st March, 1860, as compared with the corresponding three months of 1859, according to the statement published by the East India and China Association:—

	INWARDS.				OUTWARDS.			
	1859.		1860.		1859.		1860.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
China	17	10,064	47	29,887	22	13,348	48	31,054
Singapore and Penang	15	8,068	21	10,532	14	5,485	13	5,298
Manila	3	1,924	12	7,914	3	638	3	2,076

Mauritius	40	18,284	40	16,891	11	8,275	11	6,718
Cape of Good Hope	14	4,165	22	6,156	37	10,932	33	13,471
Total	221	147,073	330	217,510	317	206,465	347	253,432

In reference to the statement in our last from the *Times*, a letter has appeared in the *Daily News*, showing, by extracts from *Burn's Circular* that the exports have not been so excessive; the figures, however, given for China are large, being for 1860, plain calicoes, 37,941,064 yards, against 17,163,367 yards for the corresponding period of 1859, and 18,262,532 of 1858; calicoes printed and dyed, 4,627,835 yards, against 2,484,808

yards for 1859, and 3,681,717 for 1858; cotton yarn, 2,244,162 lbs., against 1,715,348 lbs. for 1859, and 1,651,700 lbs. for 1858.

ELECTRIC INTELLIGENCE.

It was announced some months since in this journal that the electric cable in course of manufacture for connecting Falmouth with Gibraltar would be transferred to the Rangoon and Singapore section. This has now been decided on by Government, and arrangements are in progress through Messrs. Glass, Elliott, and Co., the contractors, for shipping the same in screw steamers, about the end of August. Allowing the passage and laying to occupy 100 days, it will bring Singapore into telegraphic communication about the middle of December. The passage from Hong Kong being at that season six days, it follows that advices can be received in London in that month in seven or eight days, allowing that the gap between Alexandria and Candia be filled up. Notwithstanding the urgent necessity for facilitating the despatch of India and China telegraphic messages from Alexandria to this country, Government have not yet placed a steamer on the service between Alexandria and Candia, which place is in telegraphic communication with London through Constantinople. Surely the Admiralty could spare one of the many vessels composing the Mediterranean squadron. We understand that another attempt will shortly be made by Messrs. Newall and Co. to lay a cable between these two points, and thus bring Alexandria and the Red Sea Company's lines into connection.

The last accounts from Alexandria to the 11th inst. mention that a fracture of the Red Sea cable existed between that port and Aden, but that between Aden and Kurrachee it was in order.

In consequence of the insurrection in Sicily the Malta cable has been again out of service, and no reliance can be placed on the transmission of messages by it so long as it passes through the Neapolitan dominions. The cable from Toulon to Corsica, &c., would obviate this.

ORIENTAL BANK CORPORATION.

The annual meeting of the Oriental Bank took place on the 19th inst., Mr. H. G. Gordon in the chair, when the report was adopted unanimously, and a dividend and bonus declared of 12 per cent. for the half-year ending last December, making a total distribution of 17 per cent. for 1859, against 12 per cent. in 1858. This satisfactory result was stated to be due entirely to legitimate banking business, and not to have arisen in any way from transactions in "Company's paper," as had been erroneously reported. The Indian Government securities, of which the bank, from the nature of their business, are compelled to hold large amounts, stand for less in the books than their present market value. The accounts from all the branches continue encouraging. The new financial arrangements of Mr. Wilson, involving the withdrawal of the note circulation of the banks of Bengal, Madras, and Bombay, will, it was mentioned, in no way affect the interests of the Oriental Bank. The projected establishment of a State bank was also alluded to as a proceeding more likely to prove beneficial than otherwise. The same view also appeared to be entertained with regard to the proposed Bank of India, which has been announced to be in course of formation, there being ample room for an extension of banking operations in the East, and the business of the Oriental being on such a footing as to be secure from competition. Annexed is an abstract of the report:—

"The accounts for 1859 are made up as usual to the 31st of December, and the net profit, after defraying current expenses and writing off all bad and doubtful debts, amounts to £226,008. A dividend of 5 per cent. for the first half of 1859 has already been paid, and it is proposed now to pay a like dividend for the subsequent half-year, together with a bonus of 7 per cent., making for the year a distribution of profit equal to 17 per cent., free of income-tax. There will then remain a balance of £11,808 to be carried forward to the credit of the next year's account. In last year's report the proprietors were informed that the Indian Government securities belonging to the corporation had been adjusted to the market price of the day. The value of these securities has since been much improved; and although, pending a settlement of Indian financial affairs, no re-adjustment of the account has been considered advisable, the directors think it will be satisfactory to the proprietors to learn that this investment stands in a favourable position."

BALANCE-SHEET OF THE ORIENTAL BANK FOR THE YEAR ENDING THE 31ST OF DECEMBER, 1859.

AGRA AND UNITED SERVICE BANK.

At the annual meeting of the proprietors of this bank, held at the offices, 27, Cannon-street, on April 14, the directors presented the following report:—
